The fragments, scraps, the bits and gossy reliques
Of her o'er-eaten faith, are bound to Dionæ. *Shak.*

3. In *arith.* and *alg.* one or more aliquot parts of a unit or whole number; any division of a whole number or unit, as $\frac{2}{3}$, two-fifths, $\frac{1}{4}$, one-fourth, which are called *vulgar fractions*. In these, the figure above the line is called the *numerator*, and the figure below the line the *denominator*. The denominator points out the number of equal parts into which unity or a quantity, considered as a whole, is divided, and the numerator points out how many of these parts are taken. Thus, in the fraction $\frac{3}{4}$, the unit or whole is divided into 4 equal parts, and 3 of them taken. A *proper fraction* is one whose numerator is less than its denominator. An *improper fraction* is one whose numerator is not less than its denominator, as $\frac{5}{3}$, $\frac{7}{4}$. A *simple fraction* expresses one or more of the equal parts into which the unit is divided, without reference to any other fraction. A *compound fraction* expresses one or more of the equal parts into which another fraction or a mixed number is divided. Compound fractions have the word of interposed between the simple fractions of which they are composed: thus, $\frac{1}{2}$ of $\frac{3}{4}$ of $\frac{1}{2}$ is a compound fraction. A *complex fraction* is that which has a fraction either in its numerator or denominator, or in each of them: thus, $\frac{5\frac{1}{2}}{9}$, $\frac{8}{9\frac{1}{2}}$ and $\frac{5\frac{1}{2}}{9\frac{1}{2}}$ are complex fractions. In *decimal fractions* the denominator is 10, or some number produced by the continued multiplication of 10 as a factor, such as 100, 1000, &c.; hence, there is no necessity for writing the denominator, and the fraction is usually expressed by putting a point (.) before the numerator, as $\frac{5}{10} = .5$; $\frac{25}{100} = .25$; $\frac{1}{100} = .01$. See under *DECIMAL*.

Fractional (frak'shon-al), *a.* Pertaining to fractions; comprising a part or the parts of a unit; constituting a fraction; as, *fractional numbers*.

Fractionary (frak'shon-a-ri), *a.* Fractional.

Frankincense (frank'in-sens), *n.* [*F. frank* and *incense*—said to be so named from its liberal distribution of odour; perhaps, however, equivalent to *French incense*. Comp. *Burgundy pitch*.] Olibanum, a gum resin which distils from incisions made in the *Boswellia thurifera*, a tree somewhat resembling the sumach, and belonging to the nat. order Amyridaceae, inhabiting the mountains of India. It comes to us in semi-transparent yellowish tears and sometimes in masses, possesses a bitter and nauseous taste, but when burned exhales a strong aromatic odour. African frankincense is yielded by *B. Carterii*, but it is a drug rarely met with in our market. The common frankincense is the produce of *Pinus Abies* or spruce fir, from which it either exudes spontaneously or more abundantly from incisions of the bark. It occurs in two states, in tears and in large irregular lumps or compressed cakes. It possesses a turpentine-like odour and taste, and enters into the composition of many plasters. A similar resin is yielded by *Pinus Teda*.

Our *fraughtage*, sir,
I have conveyed abroad. *Shak.*

Fraunhofer's Lines (frāun'hō-fēr-z līnz), *n. pl.* The dark lines observed crossing a very clear solar spectrum at right angles to its length, first discovered by Wollaston, but named after *Fraunhofer*, a Bavarian optician who first thoroughly investigated them. They are caused by the absorption of portions of the rays emitted from the incandescent body of the sun in their passage through the gases and vapours, as those of iron,

sodium, magnesium, &c., which by these lines are shown to exist in the luminous envelope of the sun, and to a much less extent in their passage through the aqueous vapour and permanent gases of the earth's atmosphere. This absorption takes place from the remarkable property possessed by gases and vapours of retaining those portions of a ray of light passing through them from an incandescent solid or liquid body, which they themselves would emit if incandescent. The discovery of these lines led to the invention and use of the spectroscope, to the science of spectroscopy, and to all our present knowledge of solar and stellar chemistry.

Fraxin (fraks'in), *n.* A substance existing in the bark of the common ash-tree (*Fraxinus excelsior*), decoctions of which have the property of fluorescence. See *FLUORESCENCE*.

Fraxinea (fraks-in-ē-ā), *n. pl.* [See *FRAXINUS*.] The ash tribe, a sub-order of the Oleaceæ, comprehending those genera which have a winged fruit or samara, with one or more seeds. Among the most noticeable genera are *Fraxinus* (the common ash) and *Ornus* (the manna ash).

Fraxinella (fraks-in-el'la), *n.* A species of dittany, the *Dictamnus Fraxinella*, an ornamental herbaceous annual plant, cultivated for its fragrant leaves and handsome rose-coloured flowers. It is common as a border-plant in flower-gardens, and is easily propagated by seeds. It yields a valuable oil. In warm still evenings the atmosphere round the plant becomes charged with the volatile oil given out by it, which takes fire on the approach of flame.—*Dictamnus albus* or common dittany is also called *fraxinella*; its flowers are white.

Fraxinus (fraks-in-us), *n.* [*L.* the ash-tree.] A genus of deciduous trees, containing the common ash and belonging to nat. order

Common Ash (*Fraxinus excelsior*).

Oleaceæ. The species inhabit the more temperate regions of the northern hemisphere, both in the Old and New World. The common ash (*F. excelsior*) is one of the most useful of our British trees, on account of the excellence of its hard tough wood and the rapidity of its growth. There are many varieties of it, as the weeping ash, the curled-leaved ash, the entire-leaved ash, the American ash, &c.

Freemasonic (frē'mā-sor'ik), *a.* Of or pertaining to, or resembling freemasonry. 'That mysterious undefinable *freemasonic* signal, which passes between women, by which each knows that the other hates her.' *Thackeray.*

Freemasonry (frē'mā-sn-ri), *n.* A term applied to the organization of a society calling themselves *free* and accepted *masons*, and all the mysteries therewith connected. This society, if we can reckon as one a number of societies, many of which are unconnected with each other, though they have the same origin and a great similarity in their constitution, extends over almost all the countries of Europe, many parts of America, and some other parts of the globe. According to its own peculiar language it is founded on the practice of social and moral virtue. It claims the character of charity, in the most extended sense; and brotherly love, relief, and truth are inculcated in it. Fable and imagination have traced back the origin of freemasonry to the Roman Empire, to the Pharaohs, the temple of Solomon, the tower of Babel, and even to the building of Noah's ark. In reality it took its rise in the middle ages along with other incorporated crafts. Skilled masons moved from place to place to assist in building the magnificent sacred

structures—cathedrals, abbeys, &c.—which had their origin in these times, and it was essential for them to have some signs by which, on coming to a strange place, they could be recognized as real craftsmen and not impostors.

Freeminded (fré'mind-ed), *a.* Having the mind free from care, trouble, or perplexity.

To be *freeminded* and cheerfully disposed at hours of meat, sleep, and exercise, is one of the best precepts of long lasting. *Bacon.*

A *frere* there was a wanton and a mery. *Chaucer.*

Frescade (fres'kad), *n.* [O. Fr.] A cool walk; a shady place. *Maunder.*

Fresco (fres'kō), *n. pl.* **Frescoes** and **Frescoes** (fres'kōz), [It., fresh. See FRESH.] 1. Coolness; shade; a cool, refreshing state of the air; duskiness.—2. A method of painting on walls, performed with mineral and earthy pigments on fresh plaster, or on a wall laid with mortar not yet dry. The colours, incorporating with this ground, and drying with it, become very durable.

It is a very common error to term the ancient paintings found on church walls, &c., *frescoes*, but there is scarcely an instance of a genuine *fresco* among them. They are discoloured paintings on plaster, and quite distinct in their style, durability, and mode of manipulation. *Fairholt.*

3. A cool refreshing liquor. [Rare.]

Fresco (fres'kō), *v. t.* To paint in fresco, as walls.

Fresh (fresh), *a.* [A. Sax. *fersc*, whence *fresh* by a common metathesis. Cog. D. *versch*, *frisch*, Icel. *fersk*, *friskr*, Dan. *fersk*, *frisk*, G. *frisch*; hence by borrowing It. Sp. and Pg. *fresco*, Fr. *fraîche*, *fraiche*, fresh. *Frisk* is a form of the same word, and *brisk* is closely allied.] 1. Full of health and strength; vigorous; strong; brisk; lively. 'Fresh as a bridegroom.' *Shak.*

Two swains
Fresh as the morn and as the season fair. *Pope.*

That slander, sir,
Is found a truth now: for it grows again
Fresher than e'er it was. *Shak.*

Hence, ardent; as, 'Ever since a *fresh* admirer of what I saw.' *Shak.*—2. Having the appearance of health and vigour; bright; not faded; as, a young man of *fresh* colour.

Tell me,
Hast thou beheld a *fresher* gentlewoman?
Such war of white and red within her cheeks. *Shak.*

How *fresh* the colours look,
How well they hold. *Tennyson.*

Hence—3. Undecayed; unimpaired by time; in good condition; not stale; as, to preserve flowers, fruit, fish, &c., *fresh*.—4. Not exhausted with labour or exertion; as, he came in from the race as *fresh* as he set out.—5. Renewed in strength; reinvigorated; as, he rose *fresh* for the combat.—6. Reinvigorating; refreshing; health-giving. 'His wonted sleep under a *fresh* tree's shade.' *Shak.* 'Fresh as April, sweet as May.' *Carver.* Hence applied to pure cool water; as, 'I'll . . . draw thy water from the *freshest* spring.' *Prior*; and also to a rather strong wind; as, a *fresh* breeze; a *fresh* gale of wind.—7. Vivid; distinctly held before the mind; clearly remembered; as, the story is *fresh* in my recollection.—8. New; recently grown, made, or obtained; as, *fresh* vegetables; coffee *fresh* from Ceylon; *fresh* news; a *fresh* coat of paint. 'To-morrow to *fresh* woods and pastures new.' *Milton.* Hence, unpractised; untried; inexperienced.

How green you are and *fresh* in this old world. *Shak.*

9. Not salt or salted; as, *fresh* water; *fresh*

meat.—10. Tippy. [Slang.]—11. Sober; not tipsy. [Scottish.]—12. Open; not frosty. [Scottish.]—To have or to gather *fresh* way (*quat*), to go at an increased speed.—SYN. Brisk, strong, vigorous, lively, unimpaired, unfaded, florid, ruddy, new, novel, recent, rare, unpractised, unaccustomed, unused, inexperienced.

Fresh (fresh), *adv.* Freshly. 'Bleeding *fresh*.' *Shak.*

Fresh (fresh), *n.* 1. A freshet; a spring of fresh water.

He shall drink nought but brine; for I'll not show him
Where the quick *freshes* are. *Shak.*

2. A flood; an overflowing; an inundation.

3. Open weather; a day of open weather; a thaw. [Scottish.]—4. *pl.* The mingling of fresh water with salt in rivers or bays, or the increased current of an ebb-tide caused by a flood of fresh water flowing into the sea. [United States.]

Fresh-blown (fresh'blōn), *a.* Newly blown, as a flower.

Beds of violets blue,
And *fresh-blown* roses wash'd in dew. *Milton.*

Fresh-coloured (fresh'kul-erd), *a.* Having a lively, healthy colour; ruddy.

Freshe, *v. t.* To refresh. *Chaucer.*

Freshen (fresh'n), *v. t.* 1. To make fresh; to separate, as water from saline particles; to take saltiness from anything; as, to *freshen* water, fish, or flesh.—2. To refresh; to revive.

Pleusive drops let all their moisture flow
In large effusion o'er the *freshen'd* world. *Thomson.*

3. *Naut.* to relieve, as a rope, by altering the position of a part exposed to friction: to *freshen* the hawse is to pay out or take in a little of the cable of a vessel at anchor, so as to expose another part of it to the fraying action at the hawse-hole.

Freshen (fresh'n), *v. i.* 1. To grow fresh; to lose salt or saltiness.—2. To grow brisk or strong; as, the wind *freshens*.

The breeze will *freshen* when the day is done. *Byron.*

Freshet (fresh'et), *n.* 1. A small stream of fresh water.—2. In the United States, a flood or overflowing of a river, by means of heavy rains or melted snow; an inundation.

Fresh-force (fresh'fōrs), *n.* In law, a force, or act of unlawful violence, newly done in any city, borough, &c. See *FORCE*.

Fresh-looking (fresh'lyk-ing), *a.* Appearing fresh.

Freshly (fresh'li), *adv.* In a fresh manner. 'He looks as *freshly* as he did.' *Shak.*

Fate seemed to wind him up for fourscore years;
Yet *freshly* ran he on ten winters more. *Dryden.*

Freshman (fresh'man), *n.* 1. A novice; one in the rudiments of knowledge.—2. A student of the first year in a university.

Freshman (fresh'man), *a.* Pertaining to a freshman, or to the class in colleges composed of those called freshmen.

Freshmanship (fresh'man-ship), *n.* The state of being a freshman.

Freshment (fresh'ment), *n.* Refreshment. *Cartwright.*

Freshness (fresh'nes), *n.* The condition or quality of being fresh, in all its senses.

The Scots had the advantage both for number and *freshness* of men. *Hayward.*

And breathe the *freshness* of the open air. *Dryden.*

For the constant *freshness* of it, it is such a pleasure
As can never cloy or overwork the mind. *South.*

Her cheeks their *freshness* lose and wonted grace. *Granville.*

Freshnew (fresh'nū), *a.* [Fresh and new.] Unpractised. *Shak.*

Fresh-shot (fresh'shot), *n.* [A form of *freshet*.] The discharging of any great river into the sea, by which fresh water is often to be found on the surface a good way from the mouth of the river.

Freshwater (fresh'wā-tēr), *a.* 1. Pertaining to, produced by, or living in water that is fresh or not salt; as, *freshwater* geological deposits; *freshwater* fish.—2. Accustomed to sail on fresh water only, or in the coasting trade; as, a *freshwater* sailor. 3. Raw; unskilled.

The nobility, as *freshwater* soldiers which had never seen but some slight skirmishes. *Knolles.*

Fresh-watered (fresh'wā-tēr-d), *a.* Newly watered; supplied with fresh water.

Fret (fret), *v. t.* pret. & pp. *fretted*; ppr. *fretting*. [It is difficult to decide to what root or roots the word *fret* belongs in its various senses. In the meanings classed together in this article (as also in the next) the origin is probably the prov. Fr. *fretter*, fr. *frotter*,

Pr. fretar, It. *frettare*, from L. *fretio*, *fretum*, to rub, but the A. Sax. *fretan*, to gnaw (see FRET, to gnaw), is also not inconsistent with these meanings and may be the true origin.] 1. To rub; to wear away; to fray; to chafe; to gall; as, to fret cloth by friction; to fret the skin.

They would, by rolling up and down, grate and fret the object metal, and fill it full of little holes. *Sir I. Newton.*

2. To wear away so as to diminish; to impair.

By starts
His fretted fortunes gave him hope and fear. *Shak.*
3. To agitate; to disturb; to make rough; to cause to ripple; as, to fret the surface of water. 'Mountain pines . . . fretted with the gusts of heaven.' *Shak.*—4. Fig. to chafe the mind of; to gall; to irritate; to tease; to make angry.

Because thou hast fretted me in all these things, behold I will remember thy way upon thine head. *Ezek. xvi. 43.*

Fret (fret), *v. i.* 1. To be worn away, as by friction; to become frayed or chafed; as, your coat is beginning to fret at the wristbands.—2. To wear into; to make way by attrition.

Many wheels arose, and fretted one into another with great excoriation. *Wiseman.*

3. To be chafed or irritated; to become vexed or angry; to utter peevish expressions. He frets, he fumes, he stares, he stamps the ground. *Dryden.*

He knows his mother earth; he frets for no fine cradle, but lies tranquilly and composed at her feet. *Landor.*

4. To boil or work as angry feelings; to rattle.

That diabolical rancour that frets and ferments in some hellish breasts. *South.*

Fret (fret), *v. t.* 1. In *med.* (a) chafing, as in the folds of the skin of fat children. (b) Herpes; tetter.—2. In *mining*, the worn side of a river-bank, where ores, or stones containing them, accumulate by being washed down the hills, and thus indicate to the miner the locality of the veins. *Goodrich.*—3. The agitation of the surface of a fluid, as when fermenting or boiling; a rippling on the surface, as of water; small undulations continually repeated. *Addison.*

The blood in a fever, if well governed, like wine upon the fret, discharges itself of heterogeneous mixtures. *Dennis.*

4. Fig. a state of chafing or irritation, as of the mind, temper, &c.; vexation; anger; as, he keeps his mind in a continual fret.

Yet then did Dennis rave in furious fret. *Pope.*

Fret (fret), *v. t.* pret. & pp. *fretted*; *ppr. fretting*. [A. Sax. *fretan*, to eat, to gnaw, to devour; D. *vreten*, G. *fressen*, O. H. G. *frezan*, to devour; Goth. *fraitan*, to eat up—which is generally referred to *fra*=*E. for*, intens., and *itan*, to eat. Comp. also A. Sax. *fret*, ornament, *fretveitan*, to ornament.] 1. To gnaw; to eat into; to corrode; as, a worm frets the planks of a ship.

Like as it were a moth fretting a garment. *Book of Common Prayer.* Ps. xxxix. 12.

2. To form into raised work; to ornament with raised work.

Whose skirt with gold was fretted all about. *Spenser.*

Fret (fret), *n.* Ornamental carved or embossed work.

Fret (fret), *n.* [O. Fr. *fretter*, to interlace; It.

Grecian Frets.

ferrata, the grating of a window, from L. *ferrum*, iron.] 1. A kind of ornament much employed in Grecian art and in sundry modifications common in various other styles. It is formed of bands or fillets variously combined, but most frequently consists of continuous lines arranged in rectangular forms. Sometimes called *Key Ornament*.—2. A piece of perforated ornamental work. 3. In *her.* a charge consisting of two narrow bendlets placed in saltire and interlaced with

Fret.

a masole. A fret fretted, or double fretted, or in *trua* lower's knot, is one in which the angles of the masole are extended into loops. **Fret** (fret), *v. t.* To ornament with frets; to variegate; to diversify.

Yon gray lines
That fret the clouds are messengers of day. *Shak.*

Fret (fret), *n.* [Fr. *fredon*, a quaver or trill in singing, from root *frit*, seen in L. *fritinatio*, to twitter as a swallow.] In music, one of the wood, ivory, or metal cross bars on the finger-boards of stringed instruments, which regulate the pitch of the notes produced. By pressing the string down to the finger-board behind a fret only so much of the string can be set in vibration as lies between the fret and the bridge. The use of frets is still continued on the Spanish guitar, and was formerly in constant use upon the bass-viol for learners. On lutes and viols they were always permitted to remain.

Fret (fret), *v. t.* To furnish with frets, as a musical instrument.

Fret (fret), *n.* [L. *fretum*, a strait, a sound.] A frith (which see). [Obsolete and rare.]

An island parted from the firme land with a little fret of the sea. *Knolles.*

Fret, **Frette**, **† pp.** Fraught; filled. *Chaucer.*

Frete, **† v. t.** To eat; to devour. *Chaucer.* See FRET, to gnaw.

Fretful (fret'ful), *a.* 1. Gnawing. 'Though parting be a fretful corrosive.' *Shak.*—2. Disposed to fret; ill-humoured; peevish; angry; in a state of vexation; as, a fretful temper.—**Fretful**, *Peevish*, *Cross*, all indicate an unamiable mood. **Fretful** is applied to one who is very apt to display irritation or vexation, of a discontented spirit, complainingly impatient; *peevish*, easily annoyed or put out, easily provoked, much disposed to find fault; *cross*, applied to the temper, and implying as well anger as impatience.

By indulging this fretful temper, you aggravate the uneasiness of age. *Blair.*

She is *peevish*, sullen, froward, Proud, disobedient, stubborn, lacking duty. *Shak.*

Did ever any man upon the rack afflict himself because he had received a *cross* answer from his mistress? *Fer. Taylor.*

SYN. *Peevish*, ill-humoured, ill-natured, irritable, waspish, capulous, petulant, splenetic, spleeny, crabbed, testy, querulous. **Fretfully** (fret'ful-ly), *adv.* *Peevishly*; angrily.

Fretfulness (fret'ful-ness), *n.* *Peevishness*; ill-humour; disposition to fret and complain.

Fretise (fret'is), *v. t.* To ornament with fret-work.

Frett (fret), *n.* In *mining*, the worn side of the bank of a river; a fret.

Fretted (fret'ed), *a.* 1. Adorned with frets or fretwork; exhibiting sunk or raised ornamentation in rectangular forms; having many intersecting groins or ribs; as, a fretted roof; a fretted vault.—2. In *her.* an epithet for charges or ordinaries interlaced one with the other: in this sense also written *Fretten*.

Fretten (fret'n), *a.* Marked; as, *pock-fretten*, marked with the small-pox.

Fretter (fret'er), *n.* One who or that which frets.

Fretty (fret'i), *a.* Adorned with fretwork.

In *her.* an epithet for a bordure consisting of eight, ten, or more pieces, each passing to the extremity of the shield, interlacing each other after the manner of a fret.

Fretum (fret'um), *n.* [L.] An arm of the sea.

Fretwork (fret'werk), *n.* Ornamental work consisting of a series or combination of frets; ornamental work with interlacing parts; especially, work in which the design is formed by perforation. In *glazing*, stained glass-work in which patterns are formed by fitting together pieces of stained glass in leaden cases.

French, **Frough** (frunch, fruch), *a.* Easily broken; brittle; frail as with rottenness, as wood. [Scotch.]

Freyne, **† v. t.** See *FRANE*. *Chaucer.*

Friability, **Friableness** (fri-a-bil'i-ty, fri-a-bleness), *n.* [See *FRIABLE*.] The quality of being easily broken, crumbled, and reduced to powder.

Friable (fri-a-bl), *a.* [Fr.: L. *friabilis*, from *frio*, *fritum*, to rub, break, or crumble down into small pieces.] Easily crumbled or pulverized; easily reduced to powder.

Pumice and calcined stones are very *friable*.

Friar (fri'er), *n.* [Fr. *frère*, a brother. Contr. from L. *frater*. See *BROTHER*.] 1. In the *R. Cath. Ch.* an appellation common to the members of all religious orders, but more especially to those of the four mendicant orders, viz. (1) Minors, Gray Friars, or Franciscans; (2) Augustines; (3) Dominicans or Black Friars; (4) White Friars or Carmelites. 2. In *printing*, a white patch on a page which has not received the ink.

Friar-bird (fri'er-bërd), *n.* A name given to the *Tropidorhynchus corniculatus*, an Australian bird belonging to the family *Meliphagidae*, from the bareness of its head and neck. Called also *Leather-head*.

Friarlike (fri'er-lik), *a.* Like a friar; monastic; unskilled in the world.

Friarly (fri'er-ly), *a.* Like a friar; pertaining to friars; untought in the affairs of life.

Yet have no abstract nor *friarly* contempt of them. *Bacon.*

Friar's-balsam (fri'erz-bäl-sam), *n.* An alcoholic solution of benzoïn, styrax, tolu balsam, and aloes, used as a stimulating application for wounds and ulcers.

Friar's-chickens, **Fried-chickens** (fri'erz-chik-enz, fri'd-chik-enz), *n. pl.* Chicken broth with eggs dropped in it, or eggs beat up and mixed with it. [Scotch.]

Friar's-cowl (fri'erz-koul), *n.* A plant, *Arisarum vulgare*, from the cowl-like spathe which covers the spadix.

Friar's-crown, **Friar's-thistle** (fri'erz-kroun, fri'erz-this-1), *n.* A plant, the woolly-headed thistle (*Carduus eriophorus*).

Friar-skate (fri'er-skät), *n.* A name of the sharp-nosed ray (*Raja lintea*).

Friar's-lantern (fri'erz-lan-tern), *n.* The ignis fatuus or will o' the wisp.

Friary (fri'er-i), *n.* 1. A convent of friars; a monastery.

He like an earthquake made the abbeys fall, The *friaries*, the nunneries, and all. *Taylor.*

2. The system of forming into brotherhoods of friars; the practices of friars; monkery.

Friary (fri'er-i), *a.* Belonging to a friary.

Friation (fri-a'shon), *n.* [L. *frio*, *fritum*, to crumble.] The act of crumbling or pulverizing.

Fribble (fri'b'l), *a.* [Fr. *frivole*; L. *frivolus*, silly, empty, trifling.] Frivolous; trifling; silly; contemptible.

The superficial, trivial, and frigid manner in which that *fribble* minister treated this important branch of administration. *British Critic.*

Fribble (fri'b'l), *n.* A frivolous, trifling, contemptible fellow.

That *fribble* the leader of such men as Fox and Burke. *Thackeray.*

Fribble (fri'b'l), *v. t.* pret. & pp. *fribbled*; *ppr. fribbling*. 1. To trifle.

The fools that are *fribbling* round about you. *Thackeray.*

2. To totter. *Tatler.*

Fribbler (fri'b'ler), *n.* A trifler; a coxcomb.

Fribbling (fri'b'ling), *a.* Frivolous; trifling; feebly captious.

Friberg, **Friburgh** (fri'bërg, fri'bërg), *n.* [A. Sax. *friborh*, *freðborh*, a free-pledge, from *fri*, *freð*, free, and *borh*, *borg*, pledge, security.] The same as *Frank-pledge*.

Fricace (fri-käs), *n.* [See *FRICASSEE*.] 1. Meat sliced and dressed with strong sauce.—2. An unguent prepared by frying things together.

Applying only a warm napkin to the place, after the unction and *fricace*. *B. Fouson.*

Fricandean, **Fricando** (frëk-än-dë, frik-andë), *n.* [Fr. *fricandeau*.] Properly a fricassée of veal, but applied to various preparations of veal.

Fricandel (frikan-del), *n.* [Older form of Fr. *fricandeau*.] A dish prepared of veal, eggs, spices, &c.

Fricassee (fri-kas-së), *n.* [Fr. *fricassée*, from *friasser*, from L. *frio*, *fritum*, to roast, parch, fry; Skr. *dhriti*, to roast.] A dish of food made by cutting chickens, rabbits, or other small animals into pieces, and dressing them with a strong sauce in a frying-pan or a like utensil.

Fricassee (fri-kas-së), *v. t.* pret. & pp. *fricassee*; *ppr. fricasseeing*. To dress in fricassée.

Frication (fri-kä'shon), *n.* [L. *fricatio*, from *frio*, to rub.] The act of rubbing; friction. [Rare.]

Fricative (fri-kä-tiv), *a.* A term applied to certain letters produced by the friction of the breath issuing through a narrow opening of the organs of articulation, as *f*, *v*, *s*, *z*, &c.

Fricatrice (fri-kä-tris), *n.* [Fr. *frietrix*, from *frio*, *fritum*, to rub.] A harlot. *B. Fouson.*

Fäte, fär, fat, fäll; mē, met, hēr;

pine, pīn; nōte, not, mōve;

tūbe, tub, buil;

oil, pound; ū, Sc. abune; ŷ, Sc. leg.

Frickle (frik'l), *n.* A bushel-basket.
Friction (frik'shon), *n.* [Fr.: *L. frictio*, from *frico*, *frictum*, to rub, to rub down.] 1. The act of rubbing the surface of one body against that of another; attrition; as, many bodies by *friction* emit light, and *friction* generates or evolves heat.—2. In *mech.* the effect of rubbing, or the resistance which a moving body meets with from the surface on which it moves. Friction arises from the roughness of the surface of the body moved on and that of the moving body. No such thing can be found as perfect smoothness of surface in bodies. In every case there is, to a less or greater extent, a roughness or unevenness of the parts of the surface, arising from peculiar texture, porosity, and other causes, and therefore when two surfaces come together the prominent parts of the one fall into the cavities of the other. This tends to prevent or retard motion, for in dragging the one body over the other an exertion must be used to lift the prominences over the parts which oppose them.—*Coefficient of friction.* The coefficient of friction for any two surfaces is the ratio that subsists between the force necessary to move one of these surfaces horizontally over the other, and the pressure between the two surfaces. Thus the coefficient of friction for oak and cast-iron is 83 : 100, or .83.

Friction (frik'shon), *a.* Implying or relating to friction; frictional. *R. Adams.*

Frictional (frik'shon-al), *a.* Relating to friction; moved by friction; produced by friction; as, *frictional electricity*.—*Frictional gearing-wheels*, wheels which catch or bite, and produce motion not by teeth but by means of friction. With the view of increasing or diminishing the friction the faces are made more or less V-shaped.

Friction-balls (frik'shon-bälz), *n. pl.* Balls placed under a heavy object to reduce the friction, while that object is moving horizontally. Some forms of swing-bridges have such balls placed under them.

Friction-clutch (frik'shon-klueh), *n.* In *mach.* a species of loose coupling much used for connecting machines which require to be frequently engaged and disengaged, as wash-stocks, or which are subject to sudden variations of resistance, as crushing-rollers. In the figure it is shown in section; *a* is the shaft through which the moving power is conveyed, on which is a loose wheel *b*, intended to communicate motion to the gearing of the machine to be driven. On the eye of this wheel is keyed an external cone *c*, and to this another external cone *d*, loose on the shaft longitudinally, is accurately fitted. But this cone, while it is free to move endlong on the shaft by means of an ordinary shifting lever, the fork of which is received into the recess *f*, is prevented from turning round on the shaft by the feathers marked *e*. When the external cone is thrown forward, so that it embraces the surface of the cone *c*, the friction gradually puts the wheel *b* in motion, and being kept in contact by means of a spring or weight on the shifting lever the friction is usually sufficient to transmit the amount of power necessary for the attached machinery. But if by any chance the load should suddenly increase, so as to exceed the friction, the cones slip on each other, and the velocity of the wheel *b* is consequently diminished, or the resistance may become so great that the wheel *b* will be brought to rest. In this way the risk of breakage in ordinary working, and the shocks which would otherwise be thrown on the general gearing by the sudden engagement of a heavy machine, are very much lessened.

Friction-cones (frik'shon-konz), *n. pl.* In *mach.* a form of slip-coupling, consisting of two cones *a, b*, of which the one *a* is formed on the back of the driving-wheel, loose on the driving-shaft, and the other *b* forms part of a sliding-block, attached to the shaft by a sunk feather, and fits accurately into the interior of that formed on the back of the wheel. The sliding-block can be thrown in and out of gear in the ordinary way, by means of a fork *c*, and the transmission of motion depends on the friction of the two conical surfaces. If the load on

the machine, which is driven by the second shaft, is suddenly changed, the adhesion

Friction-cones.

between the surfaces of the cones allows them to slip, and thus breakage is avoided.

Friction-coupling (frik'shon-kup'ling), *n.* In *mach.* a form of coupling in which two shafts are connected by friction, as in the friction-clutch and friction-cones.

Friction-gear (frik'shon-gēr), *n.* Same as *Frictional Gearing-wheels* (which see under *Frictional*).

Friction-hammer (frik'shon-ham-mēr), *n.* A hammer lifted by the friction of revolving rollers.

Frictionless (frik'shon-less), *a.* Having no friction.

Friction-powder (frik'shon-pou-dēr), *n.* A composition of chlorate of potash and antimony, which readily ignites by friction.

Friction-rollers (frik'shon-rol-ēr), *n. pl.* A name common to any small rollers or cylinders employed to convert sliding motion into rolling motion. Such cylinders are often placed under heavy bodies when they are required to be moved any short distance on the surface of the ground; and, in *mach.*, the same method is occasionally employed to diminish the friction of a heavily-loaded axis. In that case a number of small cylinders are inclosed round the axis, and partake of its motion.

Friction-tube (frik'shon-tüb), *n.* *Milit.* a tube used in firing cannon, sufficient heat being generated in it by friction to ignite friction-powder.

Friction-wheel (frik'shon-whēl), *n.* In *mach.* (a) a form of slip-coupling applied in cases where the variations of load are sudden and great, as in dredging-machinery, &c. It consists of a strong plain pulley *b*, keyed on the driving-shaft, and on the circumference of this a wheel *a* is fitted, with a series of friction-plates *a a* interposed, and retained in recesses formed in the eye

Friction-wheel.

of the wheel. Behind each of those plates a set-screw *b* is inserted, which bears against the back of the plate, and can be tightened at pleasure to regulate the degree of friction required for the ordinary work; but should the pressure on the circumference of the wheel *a* exceed this, the plates slide upon the circumference of the pulley *b*, which continues to revolve with the shaft, and the wheel itself remains stationary. (b) One of two simple wheels or cylinders in-

Friction-wheels.

tended to assist in diminishing the friction of a horizontal axis. The wheels

are simply plain cylinders *a a*, carried on parallel and independent axes *b b*. They are disposed so as to overlap pair and pair at each end of the main axis *c*, which rests in the angles thus formed by the circumferences. The axis, instead of sliding on a fixed surface, as in ordinary cases, carries round the circumferences of the wheels on which it is supported with the same velocity as it possesses itself, and in consequence the friction of the system is proportionally lessened.

Friday (frī'dā), *n.* [A. Sax. *Frige-day*, *G. Freitag*, the day sacred to *Frigg*, or *Freya*, the Saxon Venus, as *L. Dies Veneris*; Fr. *Vendredi*.] The sixth day of the week.—*Good Friday*, the Friday immediately preceding Easter, which in the Christian church is kept sacred, in memory of the sufferings and death of Christ, as it is believed to be the anniversary of the day on which he was crucified.

Fridge (frif), *v. i.* [A. Sax. *frician*, to dance. Probably allied to *freak*.] To move hastily.

The little notes or atoms that *fridge* and play in the beams of the sun. *Hallward.*

Fridge (frif), *v. t.* [See preceding art., or the origin may be *L. frico*, to rub.] To rub; to fray.

You might have rumbled and crumpled, and doubled and creased, and fretted and *fridged* the outside of them (jerkins) all to pieces. *Sterne.*

Fridstole (frid'stöl). See *FREESTOLE*.

Friend (frend), *n.* [A. Sax. *freund*, also *friend*, virtually a pres. part. of *freōn*, to love; like Goth. *frjunds*, from *frjōn*, to love; *G. freund*, a friend. *Fiend* is similarly formed. See *FREE*.] 1. One who is attached to another by affection; one who entertains for another sentiments of esteem, respect, and affection, which lead him to desire his company, and to seek to promote his happiness and prosperity: opposed to *foe* or *enemy*.

A friend loveth at all times. *Prov. xvii. 17.*

2. One not hostile; one of the same nation, party, or kin; an adherent; a follower; a companion in arms.—3. One who looks with favour upon, as on a cause, institution, or the like; a favourite; one who is propitious; a promoter; as, a *friend* to commerce; a *friend* to poetry; a *friend* to charitable institutions.—4. A term of salutation; a familiar address.

Friend, how earnest thou in hither? *Mat. xxii. 12.*
 5. A Quaker; a member of the Society of Friends.—6. A paramour; a lover, of either sex.—*A friend at or in court*, one who has sufficient interest to serve another.

A friend's the court is better than a penny in purse. *Shak.*

—*Society of Friends*, the name assumed by the society of dissenters commonly called Quakers, which took its rise in England about the middle of the seventeenth century through the preaching of George Fox. Upon doctrinal points the Friends profess to maintain the doctrines generally received by Protestants, but they reject all sacraments, and do not appoint an order of ministers, considering that the instruction of their congregations may be undertaken from time to time by persons of either sex who may feel prompted by the Holy Spirit to speak. The Friends are characterized by plainness in dress, by their adherence to the use of the pronouns *thou* and *thee* when addressing one person, and the disuse of the customary salutations and tokens of obeisance, by their refusal to take judicial oaths, their objection to balls and theatres, to the reading of novels, to indulging in music, especially sacred music, and by certain other features.—*To be friends with*, to be in a relation of friendship with.

'Friends am I with you all, and love you.' *Shak.*
 'This grammatical impropriety,' Henley very well remarks, 'is still so prevalent, as that the omission of the anomalous *s* would give some uncouthness to the sound of an otherwise familiar expression.' We could not, indeed say, 'Friend am I with you all'; we should have to turn the expression in some other way. Nor does the pluralism of *friends* depend upon that of *you* all: 'I am friends with you' is equally the phrase in addressing a single person.

Prof. Craik.

Frog (frog), *n.* [A. Sax. *froga*, *froga*, *froese*, *froa*; Comp. D. *voroch*, G. *frösch*, Dan. *fró*, N. *frosk*.] The common English name of the animals belonging to the genus *Rana*, a genus of amphibians, having four legs with four toes on the fore feet and five on the hind, more or less webbed, a naked body, no ribs, and no tail. Owing to the last peculiarity frogs belong to the order of amphibians

known as Anoura. Frogs are remarkable for the transformations they undergo before arriving at maturity. The young frog, which is named a *tadpole*, lives entirely in water, breathes by external and then by internal gills, has no legs, a long tail furnished with a membranous fringe like a fin, and a horny beak, which falls off on the animal passing from the tadpole to the frog state, while the tail is absorbed and legs are developed. The mature frog breathes by lungs, and cannot exist in water without coming to the surface for air. The only British species is the common frog (*R. temporaria*), but the tribe is very numerous, other varieties being the edible frog (*R. esculenta*) of the south of Europe, eaten in France and South Germany, the hind quarters being the part chiefly used; the bull-frog of America (*R. pipiens*), 8 to 12 inches long, so named from its voice resembling the lowing of a bull; the blacksmith frog of Janeiro; the Argus frog of America, &c. The tree-frogs belong to the genus *Hyla*. (See **TREE-FROG**.) Frogs lie torpid in winter, swim with rapidity, and move by long bounds, being able from the power of the muscles of their hind-legs to leap many times their own length. Their eggs or spawn are to be seen floating in ponds and other stagnant waters in large masses of gelatinous matter. Figs. 1, 2, 3 represent the young frog in the tadpole state in various stages, without legs, living like a fish exclusively under water; fig. 4

Frog and its metamorphoses.

shows the hind-legs formed, but the long tail still present; fig. 5, the fully formed animal.—2. In *farriery*, a sort of tender horn that grows in the middle of the sole of a horse's foot, at some distance from the toe, dividing into two branches, and running toward the heel in the form of a fork.—3. cliffs, in which it lays only one egg. The natives of St. Kilda value the eggs above those of any other bird, and search for them by descending precipices by ropes in the most perilous manner. The fulmar is also valued for its feathers, down, and the oil found in its stomach, which is one of the principal products of St. Kilda. When caught or assailed it lightens itself by disgorging the oil from its stomach. There is another species found in the Pacific Ocean.

Fulmar (*ful'mär*), *n.* The fowmart (which see).

Fulmen (*ful'men*), *n.* [L.] Lightning; a thunderbolt. [Rare.]

Reasoning cannot find such a mine of thought, nor eloquence such a *fulmen* of expression. *Sir J. Hamilton.*

Fulminant (*ful'min-ant*), *a.* [L. *fulminans*, *fulminantis*, pp. of *fulmineo*. See *FULMINATE*.] Thundering; making a loud noise. *Bailey.*

Fulminate (*ful'min-ät*), *v.t.* pret. & pp. *fulminated*; ppr. *fulminating*. [L. *fulmineo*, *fulminatus*, from *fulmen*, lightning, contr. for *fulgmen*, from *fulgeo*, to flash.] 1. To thunder.—2. To make a loud sudden noise or a sudden sharp report; to explode with a loud noise; to detonate; as, *fulminating* gold.—3. To issue threats, denunciations, censures, and the like, with or as with authority; especially, to send forth ecclesiastical censures, as is done by the pope.

Who shall be depository of the oaths and leagues of princes, or *fulminate* against the perfidious infractors of them. *Lord Herbert.*

Fulminate (*ful'min-ät*), *v.t.* 1. To cause to explode.—2. To utter or send out, as a denunciation or censure; especially, to send out, as a menace or censure, by ecclesiastical authority.

Fume (fūm), *v.t.* 1. To smoke; to dry in smoke.

Those that serve for hot countries, they used at first to *fume* by hanging them up on long sticks one by one, and drying them with the smoke of a soft fire. *Carew.*

2. To fumigate, as with scent; to perfume.

Fume all the ground,
And sprinkle holy water. *John Fletcher.*

Now are the lawn sheets *fumed* with violets. *Marston.*

3. To disperse or drive away in vapours; to send up as vapour.

The heat will *fume* away most of the scent. *Mortimer.*

How vicious hearts *fume* frenzy to the brain. *Young.*

Fumeless (fūm'les), *a.* Free from fumes.

Fumer (fūm'ér), *n.* One who fumes or perfumes; a perfumer. 'Embroiderers, feather-makers, *fumers*.' *Beau. & Fl.*

Fumet (fū'met), *n.* [Fr. *fumées*, from L. *fumus*, dung.] The dung of the deer, hare, &c. Written also *Fevmet*. *B. Jonson.*

Fumette (fū-met'), *n.* [Fr. *fumet*, from L. *fumus*, smoke, fume.] The scent of meat, as venison or game when kept too long; the scent from meats cooking. 'Unless it had the right *fumette*.' *Swift.*

There are such steams from savoury pies, such a *fumete* from plump partridges and roasting pigs, that I think I can distinguish them as easily as I know a rose from a pink. *R. M. Sephton.*

Fumetere, *n.* The plant fumitory. *Chaucer.*

Fumid (fū'mid), *a.* [L. *fumidus*, from *fumus*, smoke.] Smoky; vaporous. *Sir T. Browne.*

Fumidly, Fumidness (fū-mid'li, fū'mid-nes), *n.* The state or quality of being fumid; smokiness. *Bailey.*

Fumiferous (fūm-if'ér-us), *a.* [L. *fumifer*, from *fumus*, smoke, and *fero*, to bear.] Producing smoke.

Fumifugist (fūm-ifū-jist), *n.* [L. *fumas*, smoke, and *fugo*, to drive away.] One who or that which drives away smoke or fumes. *Dr. Allen.*

Fumigant (fūm'gant), *a.* [L. *fumigans*, *fumigantia*, ppr. of *fumigo*. See FUMIGATE.] Fuming. [Rare.]

Fumigate (fūm'gāt), *v.t.* pret. & pp. *fumigated*; ppr. *fumigating*. [L. *fumigo*, *fumigatio*, to smoke, to fumigate.—*fumo*, smoke, and *ago*, to do, to cause.] 1. To apply smoke to; to expose to smoke or gas, as in chemistry or medicine, by inhaling it, or in cleansing infected apartments, clothing, &c.—2. To perfume. *Dryden.*

Fumigation (fūm-i-gā'shon), *n.* [L. *fumigatio*. See FUMIGATE.] 1. The act of fumigating or applying smoke or gas for various purposes, as for the purpose of inhalation, for disinfecting houses, clothes, and the like. Fumigation by inhalation is sometimes recommended as a cure in pulmonary complaints.

Fumigation with strong chemical agents—such as chlorine, iodine, and nitrous fumes—is without doubt of real efficacy in the prevention of contagion. *Dr. A. W. Ely.*

2. Fragrant vapour raised by heat. *Dryden.*
Fumigatory (fūm'i-ga-to-ri), *a.* Having the quality of cleansing by smoke.

Fumily (fūm'i-li), *adv.* With fume; smokily.

Fumy (fūm'ī), *a.* Producing fume; full of vapour; vaporous.

From dice and wine the youth retir'd to rest,
And puffed the *fumy* god from out his breast.
Dryden.

Fun (fun), *n.* [May be connected with *fond*, O.E. *fon*, foolish, *fun*, *fomme*, to be foolish.] Sport; mirthful drollery; frolicsome amusement. 'Frolic and fun.' *Goldsmith.*

Don't mind me, though, for all my *fun* and jokes,
You bards may find us bloods good-natur'd folks.
Dr. H. More.

—To make fun of, to turn into ridicule. —Not to see the fun, to be unwilling to regard anything offensive or annoying in the light of a joke; not to be inclined to put up with rough practical joking; to be disinclined to be practised upon whether in jest or earnest.

Young Miller did not see the fun of being imposed on in that fashion. *W. Black.*

Funambulate (fū-nam'bū-lāt), *v. i.* [L. *funis*, rope, and *ambulo*, *ambulatorium*, to walk.] To walk on a rope.

Funambulation (fū-nam'bū-lā'shon), *n.* Rope-dancing.

Funambulatory (fū-nam'bū-lā-to-ri), *a.* 1. Performing like a rope-dancer. —2. Narrow, like the walk of a rope-dancer. 'This funambulatory track.' *Sir T. Browne.*

Funambulist (fū-nam'bū-list), *n.* A rope-walker or rope-dancer. *De Quincey.*

Funambulo, **Funambulus** (fū-nam'bū-lo, fū-nam'bū-lus), *n.* [It. *funambulo*, L. *funambulus*. See FUNAMBULATE.] A rope-dancer or rope-walker.

We see the industry and practice of tumblers and *funambulos*. *Bacon.*

I see him walking not like a *funambulo* upon a cord, but upon the edge of a razor. *Sir H. Wotton.*

Funaria (fū-nā-ri-a), *n.* [L. *funarius*, pertaining to a rope, from *funis*, a rope, a cord.] A genus of mosses having terminal fruit-stalks, with an inflated calyptra and oblique double peristome. *F. hygrometrica* is common in this country, being found by waysides, and especially on spots where a wood-fire has been. It has obtained its specific name from its fruit-stalk having the property of twisting when moisture is applied to it. This species grows in all parts of the world. There are other three British species.

Function (funk'shon), *n.* [Fr. *fonction*, L. *functio*, from *fungor*, *fungus*, to perform, to execute.] 1. In a general sense, the doing, executing, or performing of anything; discharge; performance; as, the function of a calling or office. 'A representing commoner in the function of his public calling.' *Swift.* —2. Office or employment, or any duty or business belonging to a particular station or character, or required in that station or character; occupation, employment, business, or office in general; the functions of a chancellor, judge, or bishop; the functions of a parent or guardian.

The bards performed the function of public censors with sharp criticism. *Prof. Blackie.*

Tradesmen singing in their shops and going about their functions friendly. *Shak.*

3. The specific office or action which any organ or system of organs is fitted to perform in the animal or vegetable economy; as, the function of the heart, of leaves, &c.; the specific office of anything belonging to a living being, as the body as a whole, the mind of man, or any faculty of the mind.

All these various functions (of living beings), however, may be considered under three heads:—(1) Functions of Nutrition, divisible into functions of absorption and metamorphosis, and comprising all those functions by which an organism is enabled to live, grow, and maintain its existence as an individual. —(2) Functions of Reproduction, comprising all those functions whereby fresh individuals are produced and the perpetuation of the species is secured. —(3) Functions of Relation or Correlation, comprising all those functions (such as sensation and voluntary motion) whereby the outer world is brought into relation with the organism, and the organism in turn is enabled to act upon the outer world.

H. A. Nicholson.

4. In math. a quantity so connected with another that no change can be made in the latter without producing a corresponding change in the former, in which case the dependent quantity is said to be a function of the other; thus, the circumference of a circle is a function of the diameter; the area of a triangle is a function of any two of the sides and the angle they contain. In order to indicate in a general way that one quantity *y* is a function of another *x* the notation

$y=f(x)$, or something similar, is adopted; thus, if *u* be the area of a triangle, *x* and *y* two of the sides, and *θ* the contained angle, we should write $u=g(x, y, \theta)$. —Vital functions, functions immediately necessary to life, as those of the brain, heart, lungs, &c. —Natural or vegetative functions, functions less instantly necessary to life, as digestion, absorption, assimilation, expulsion, &c. —Animal functions, those which relate to the external world, as the senses, voluntary motions, &c. —The equivalence of functions, a communist term implying that no man's labour ought to be remunerated at a higher rate than that of any other man, whatever be the difference of capacity or production.

Functional (funk'shon-al), *a.* Pertaining to functions; relating to some office; official. **Functionalize** (funk'shon-al-iz), *v. t.* To place in a function or office; to assign some function or office to. *Laing*. [Rare.]

A very idiot, a *fungus*, a golden ass. *Burton.*

Fungi (fun'ji), *n. pl.* [L., *pl. of fungus*, a mushroom.] A large natural order of acotyledonous or cryptogamous plants, 5000 being

Common Mushroom (*Agaricus campestris*).—Illustrative of parts of Fungi and terms employed.

1. *Agaricus comatus* (tall cylindrical agaric). 2. *Boletus edulis* (edible boletus). 3. *Morella esculenta* (ground-hued morel).

from them in deriving their nutriment from the body on which they grow, not from the medium by which they are surrounded. They are among the lowest forms of vegetable life, and, from the readiness with which they spring up in certain conditions, their germs are supposed to be floating in the atmosphere in incalculable numbers. Some diseases are produced by fungi. Fungi differ from other plants in being nitrogenous in composition, and in inhaling oxygen and giving out carbonic acid gas. Berkeley divides fungi into two great sections, the first having the spores naked, and comprising agarics, boleti, puffballs, rust, smut, and mildew; the second comprising the morels, truffles, certain moulds, &c., in which the spores are in sacs (asci).

Fungible (fun'ji-bl), *n.* [L. (*res*) *fungibiles*, probably from *L. fungo*, to perform, discharge.] 1. In the *civil law*, a thing of such a nature as that it may be replaced by another of equal quantity and quality.—2. In *Scots law*, a movable which may be estimated by weight, number, or measure, as grain or money.

Furmenty, Furmity (fēr'men-ti, fēr'mi-ti), *n.* Same as *Furmety*.

Furnace (fēr'nās), *n.* [Fr. *fournaise*, L. *for-nax*, an oven, from root *for*, to be hot, as in *for-nas*, hot.] 1. A place where a vehement fire and heat may be made and maintained, as for melting ores or metals, heating the boiler of a steam-engine, warming a house, baking pottery or bread, and other such purposes. Furnaces are constructed in a great variety of ways, according to the different purposes to which they are applied. In constructing furnaces the following objects are kept in view:—(1) To obtain the greatest quantity of heat from a given quantity of fuel. (2) To prevent the dissipation of the heat after it is produced. (3) To concentrate the heat and direct it as much as possible to the substances to be acted upon. (4) To be able to regulate at pleasure the necessary degree of heat and have it wholly under the operator's management. An *air furnace* is one in which the flames are urged only by the natural draught; a *blast furnace*, one in which the heat is intensified by the injection of a strong current of air by artificial means; a *reverberatory furnace*, one in which the flames in passing to the chimney are thrown down by a low-arched roof upon the objects which it is intended to expose to their action.—2. Any place, time, or occasion of severe torture; great trial; as, the *furnace* of affliction.

Furnace (fēr'nās), *v.t.* To throw out, like sparks from a furnace.

The thick sighs from him. *Shak.*

When all the god came rushing to her soul. *Dryden*.

4. In *class. myth.* one of the avenging deities, the daughters of Earth or of Night, represented as fearful winged maidens, with serpents twined in their hair, and with blood dripping from their eyes. They dwell in the depths of Tartarus, and owing to their wrathful disposition were dreaded by gods and men. According to some writers they were three in number and called *Tisiphone*, *Alecto*, and *Megera*. Hence, a stormy, turbulent, violent woman.—5. Apparently used by Milton in the following passage for one of the *Parcæ* or *Fates*:—

Comes the blind *Fury* with the abhorred shears,
And slits the thin-spun life. *Lycidas*, 75, 76.

SYN. Rage, madness, indignation, wrath, ire, violence, vehemence, tempestuousness, fierceness.

Fury (fūr'i), *n.* [L. *fur*.] A thief. 'Have an eye to your plate, for there be *furies*.' *Fletcher*.

Furze (fēr'z), *n.* [A. Sax. *fyrz*. See **FIR**.] Whin, gorse, the common name of the species of the genus *Ulex*, nat. order Leguminosæ. Twelve species have been described, two of which are natives of Britain. The common furze (*U. europæus*) is a low shrubby plant, very hardy, and very abundant in barren, heathy, sandy, and gravelly soils throughout the west of Europe. The stem is 2 or 3 feet high, much branched, and most of the leaves converted into spines; at the summit the leaves are simple, and the flowers solitary and yellow. It often covers exclusively large tracts of country, and makes a splendid appearance when in flower. It is used as fuel, and sometimes the tops of the branches are used (especially the young tops) as fodder for horses and cattle, after having been beaten or bruised to soften the prickles. The dwarf-furze (*U. nanus*) is found in many parts of the British Isles.

Furze-chat (fēr'zchat), *n.* Another name for the whin-chat, a bird of the family Sylviæ or warblers, and genus *Saxicola* (*S. rubetra*), so called from its frequenting places abounding in furze or gorse.

Furze-ling, **Furze-wren** (fēr'zling, fēr'zren), *n.* *Melizophilus provincialis*, a small bird found in several of the southern counties of England. Called also *Dartford Warbler*.

Furzen, **Furzy** (fēr'z'en, fēr'z'i), *a.* Overgrown with furze; full of gorse.

Fusarole, **Fusarol** (fū'sā-rōl), *n.* [Fr. *fusarole*, *fusarolle*, It. *fusciuolo*, from *fusaiolo*, a whirl to put on a spindle, from *fuso* (L. *fusus*), a spindle, the shaft of a column.] In arch. a moulding generally placed under the echeilus or quarter-round of columns in the Doric, Ionic, and Corinthian orders. It consists of oval beads cut across at the top and alternating with thin tongue-shaped ornaments.

Fuso (fusk), *a.* Brown; dark-coloured; fuscous. [Rare.]

Expectation was alert on the receipt of your strange-shaped present, while yet undisclosed from its *fuse* envelope. *Lucas*.

Fuscation (fus-kā'shon), *n.* A darkening; obscurity. *Blount*.

Fuscin, **Fuscine** (fus'sin), *n.* [L. *fuscus*, dark-coloured.] A brownish matter obtained from empyreumatic animal oil. It is insoluble in water, but may be dissolved by alcohol.

Fuscite (fus'sit), *n.* Same as *Gabbroinite* (which see).

Fuscous (fus'kus), *a.* [L. *fuscus*, dark-coloured.] Brown; of a dark colour.

Sad and *fuscous* colours, as black or brown, or deep purple, and the like. *Burke*.

Fuse (fūz), *v.t.* pret. & pp. *fused*; ppr. *fusing*. [L. *fundo*, *fusum*, to pour out, to melt, to cast.] 1. To melt; to liquefy by heat; to render fluid; to dissolve.—2. To blend or unite things, as if they were melted together.

That delicious man
Whose fancy *fuses* old and new,
And flashes into false and true,
And mingles all without a plan. *Tennyson*.

Fuse (fūz), *v.i.* 1. To be melted; to be reduced from a solid to a fluid state by heat. 2. To become intermingled and blended, as if melted together.

Fuse (fūz), *n.* [A shortened form of *fusil*.] A tube filled with combustible matter, used in blasting, or in discharging a shell, &c.

Fusee (fū-zē), *n.* [Fr. *fusée*, a spindleful, from L. *fusata* (same sense), L. *fusus*, a spindle. Comp. *rocket*, from *rook*, a distaff.] The cone or conical part of a watch or clock, round which is wound the chain or cord. It is a mechanical contrivance for equalizing the power of the main-spring; for as the action of a spring varies with its degree of tension, the power derived from the force of a spring requires to be modified according to circumstances before it can become a proper substitute for a uniform power. In order therefore to correct this irregular action of the main-spring, the fusee on which the

Barrel and Fusee of a Watch.

chain or catgut acts is made somewhat conical, so that its radius at every point may be adapted to the strength of the spring.

Fusee (fū-zē), *n.* [From Fr. *fusil*, which is pronounced *fūsé*. See **FUSIL**.] 1. A small neat musket or firelock; a fusil.—2. Same as *Fuse* (which see).—3. A kind of match for lighting a pipe, cigar, and the like.

Fusee (fū-zē), *n.* The track of a buck.

Fusee-engine (fū-zē'en-jin), *n.* A machine for making fuses for watches and clocks.

Fusel-oil (fū-zel-oil), *n.* [G. *fusel*, spirits of inferior quality, as bad brandy or gin, and *E. oil*.] Oil of potato-spirit; crude amylic alcohol (C₂H₅O). It is a colourless oily spirit, of a strong and nauseous odour, which produces stupefying effects. Its taste is very acrid and nauseous. See under **AMYLIC**.

Fusibility (fūz-i-bil'i-ti), *n.* [See **FUSIBLE**.] The quality of being fusible, or of being convertible from a solid to a fluid state by heat.

Fusible (fūz-i-bl), *a.* [Fr. from L. *fundo*, *fusum*, to pour.] That may be melted or li-

quified.—*Fusible metal*, an alloy, usually of lead, tin, and bismuth, compounded in such definite proportions as to melt at a given temperature.—*Fusible plug*, in *steam-engines*, a plug of fusible metal placed in the skin of the boiler, so as to melt, and allow the steam to escape when a dangerous heat is reached.—*Fusible porcelain*, a silicate of alumina and soda obtained from cryolite and sand, fused and worked as glass.—*Fusible calculus*, a variety of urinary concretion consisting of the mixed phosphates of magnesia and ammonia, and of lime. It is so named because it fuses before the blow-pipe.

Fusiform (fū'zī-form), *a.* [L. *fusus*, a spindle, and *forma*, form.] Shaped like a spindle; in bot. applied to roots that taper to both ends, as the radish.

Fusil (fūzil), *n.* [Fr.; It. *foecile*, *fucile*, from

Fusil for projecting Grenades.

L. *focus*, dim. of *focus*, a fire.] A light musket or firelock resembling a carbine, and which might be slung over the shoulder by a belt.

Fusil (fūzil), *n.* [L. *fusus*, a spindle.] A bearing in heraldry differing from the lozenge in being longer in proportion to its breadth, and named from its shape, which resembles that of a spindle.

Fusil, **Fusile** (fūzil), *a.* [Fr. *fusile*; L. *fusilis*, from *fundo*, *fusum*, to pour.] 1. Capable of being melted or rendered fluid by heat. 'A kind of *fusile marble*.' *Woodward*.—2. Running; flowing, as a liquid. 'A *fusile sea*.' *Philips*.

Fusileer, **Fusilier** (fū-zil-ēr'), *n.* [From *fusil*.] Properly, a soldier armed with a fusil; an infantry soldier who bore firearms, as distinguished from a pikeman and archer. The name *Fusiliers* was formerly given to the third of the three regiments of Foot Guards, now called *Scots Guards*, and is still given to the 7th Regiment of the line, called *Royal Fusiliers*.

Fusillade (fūzil-ād), *n.* [Fr., from *fusil*, a musket.] A simultaneous discharge of musketry; as, a general *fusillade*.

Fusillade (fūzil-ād), *v.t.* pret. & pp. *fusilladed*; ppr. *fusillading*. To shoot down by a fusillade. 'Fusillade them all.' *Carlyle*.

Fusine (fū-sīnē), *n. pl.* A sub-family of the turnip-shells (Turbinellidae), the typical genus of which is *Fusus*, commonly known by the name of spindle-shells.

Fusing-point (fūzīng-point), *n.* The degree of temperature at which a substance melts or liquefies; point of fusion. See under **FUSION**.

Fusion (fū'zhon), *n.* [Fr.; L. *fusio*, from *fundo*, *fusum*, to pour.] 1. The act or operation of melting or rendering fluid by heat, without the aid of a solvent; as, the *fusion* of ice or of metals.—2. The state of being melted or dissolved by heat; a state of fluidity or flowing in consequence of heat; as, metals in *fusion*.—3. The act of uniting or blending together things, as if they were melted together; complete union.

So far did the emperor advance in this work of *fusion* as to claim a place for himself among the Gaulish deities. *Mercator*.

—A *queous* or *watery fusion*, the melting of certain crystals by heat in their own water of crystallization.—*Dry fusion*, the liquefaction produced in salts by heat after the water of crystallization has been expelled.—*Igneous fusion*, the melting of anhydrous salts by heat without their undergoing any decomposition.—*Point of fusion of metals*, the degree of heat at which they melt or liquefy. This point is very different for different metals. Thus potassium fuses at 136° Fahr., bismuth at 504°, lead at 619°, zinc at 680°, silver 1832°, gold 2232°. Malleable iron requires the highest heat of a smith's forge (2912°); while cerium, platinum, and some other metals are infusible in the heat of a smith's forge, but are fusible before the oxy-hydrogen blow-pipe.

Fusionless (fū'zhon-less). See **FUSIONLESS**. [Scotch.]

The old dotted deevil is as *fusionless* as a docken. *M. Scott*.

Fusome (fū'sum), *a.* [A. Sax. *fūs*, ready,

quick, willing, and E. some.] Handsome; neat; notable. [Local.] *Grose*.
Fuss (fus), *n.* [Probably from A. Sax. *fūs*, quick, willing, ready; local. *fūs*, eager.] A tumult; a bustle; unnecessary or annoying work; much ado about nothing.

Old mother Dalmaine, with all her *fuss*, was ever a bad cook, and overdid everything. *Disraeli*.

Fuss (fus), *v.i.* To make much ado about trifles; to make a bustle.

He *fussed*, fretted, commanded, and was obeyed. *Sir W. Scott*.

Fuss (fus), *v.t.* To disturb or confuse with trifling matters.

Her intense quietude of bearing suited Miss Gryce, who could not bear to be *fussed*. *Cornhill Mag.*

Fussball, *n.* See FUZZBALL.

Fussify (fus'i-fi), *v.t.* To fuss. [Vulgar.]

Fussily (fus'i-li), *adv.* In a fussy or bustling manner. *Byron*.

Fussiness (fus'i-nes), *n.* The state of being fussy; bustle, especially needless bustle.

She was fussy no doubt; but her real activity bore a fair proportion to her *fussiness*. *Marryat*.

Fussle (fus'l), *v.t.* Same as *Fuzzle*.

Fussok (fus'ok), *n.* A large, fat woman. [Provincial.]

Fussy (fus'i), *a.* Moving and acting with fuss; bustling; making much ado about trifles; making more ado than is necessary.

'A fussy way.' *Whately*.

Fust (fust), *n.* [O. Fr. *fust*, Fr. *fût*; It. *fusta*; L. *fustis*, a staff.] In arch. the shaft of a column or trunk of a pilaster. *Gwilt*.

Fust (fust), *n.* [O. Fr. *fust*, Fr. *fût*, a cask, *fusté*, tasting or smelling of the cask; Pr. *fust*, wood, from L. *fustis*, a stick, a baton.] A strong musty smell.

Fust (fust), *v.i.* To become mouldy; to smell ill.

Sure he that made us with such large discourse Looking before and after, gave us not That capability and godlike reason To *fust* in us ununs'd. *Shak.*

Ep. Hall.

Fusteric (fus'ter-ik), *n.* The yellow colouring matter derived from fustet. See *FUSTET*.

Fustet (fus'tet), *n.* [Fr. Sp. and Pg. *fustete*, from L. *fustis*, a stick, staff.] The wood of the *Rhus cotinus* or Venice sumach, a South European shrub with smooth leaves and a remarkable feathery inflorescence. It yields a fine orange colour, which, however, is not durable without a mordant.

Fustian (fus'ti-an), *n.* [O. Fr. *fustaine*; Fr. *fustaine*; It. *fustagno*, from *Fostat*, the name of a suburb of Cairo, whence this fabric was first brought.] 1. A kind of coarse twilled cotton stuff, or stuff of cotton and linen with a pile like velvet, but shorter. It includes corduroy, moleskin, velveteen, &c.

2. An inflated style of writing; a kind of writing in which high-sounding words are used, above the dignity of the thoughts or subject; a swelling style; bombast.

Fustian is thoughts and words ill sorted. *Dryden*.

Fustian (fus'ti-an), *a.* 1. Made of fustian.

2. Swelling above the dignity of the thoughts or subject; too pompous; ridiculously tumid; bombastic.

Virgil, if he could have seen the first verses of the *Sylva*, would have thought Statius mad in his *fustian* description of the statue on the brazen horse. *Dryden*.

Fustianist (fus'ti-an-ist), *n.* One who writes bombast. *Milton*.

Fustic (fus'tik), *n.* [Fr. and Sp. *fustoc*, from Sp. *fuste*, wood, timber, from L. *fustis*, a stick, a staff.] The wood of the *Machura tinctoria*, a tree growing in the West Indies. It is a large and handsome tree, and the timber, though like most other dye-woods, brittle, or at least easily splintered, is hard and strong. It is extensively used as an ingredient in the dyeing of yellow, and is largely imported for that purpose.—*Young fustic*, same as *Fustet* (which see).

Fustigate (fus'ti-gät), *v.t.* pret. & pp. *fustigated*; ppr. *fustigating*. [L. *fustigo*, to beat with a stick—*fustis*, a stick, and *ago*, to drive.] To beat with a cudgel; to cane.

Fustigation (fus-ti-gä'shon), *n.* The act of fustigating or cudgelling; punishment inflicted by cudgelling.

Slighter palm of martyrdom, however, shall not be denied: martyrdom not of massacre, yet of *fustigation*. *Carlyle*.

Fustilariant (fus-ti-lä'ri-an), *n.* [From *fusty*.] A low fellow; a scoundrel.

Away, you scullion! you rampallian! you *fustilariant*! I'll tickle your catastrophe. *Shak.*

Fustlug, **Fustlugs** (fus'ti-lug, fus'ti-lugz), *n.* A gross, fat, unwieldy person.

You may daily see such *fustlings* walking in the streets, like so many tuns. *Fustinus*, 1639.

Fustiness (fus'ti-nes), *n.* State or quality of being fusty; an ill smell from mouldiness, or mouldiness itself.

Fusty (fus'ti), *a.* [See *Fust*.] Mouldy; musty; ill-smelling; rank; rancid. 'A fusty nut with no kernel.' *Shak.*

It was that free and familiar communing with the beauties of English nature in their softer forms that gave his (Peacock's) writings the freshness which so often relieves them from the oppressive taint of the midnight oil and the fusty library. *Edin. Rev.*

Fusulina (fü-sü-lä'na), *n.* [L. *fusus*, a spindle.] A genus of fossil Foraminifera, so named from their fusiform shells. They occur in the coal formations of Russia especially.

Fusure (fü'zhür), *n.* [L. *fusura*. See *FUSE*, *v.t.*] The act of fusing or melting; smelting. *Bailey*.

Fusus (fü'zus), *n.* [L. a spindle.] A genus of gastropodous molluscs nearly allied to *Murex*, characterized by a somewhat spindle-shaped univalve shell, swelling out in its middle or lower part, with a canalculated base, an elongated spire, a smooth columella, and the lip not slit. The genus comprises many species. The red whelk of England, the 'roaring buckie' of the Scotch, is the *F. antiquus*.

Futchell (fuch'el), *n.* A longitudinal piece of timber supporting the splinter-bar and pole of a carriage.

Futile (fü'til), *a.* [Fr.; L. *utilis*, that easily pours out, that cannot be depended upon, vain, worthless, from *fundo*, *fusum*, to pour.] 1. Talkative; loquacious; tattling.

One *futile* person, that maketh it his glory to tell, will do more hurt than many that know it their duty to conceal. *Bacon*.

2. Trifling; of no weight or importance; of no effect; answering no valuable purpose; worthless.

Of its history little is recorded, and that little *futile*. *Ruskin*.

Futillity (fü'til-i-ti), *n.* 1. The quality of being talkative; talkativeness; loquaciousness; loquacity.

This fable does not strike so much at the *futillity* of women, as at the incontinent levity of a prying humour. *Sir R. L'Estrange*.

2. The quality of producing no valuable effect; triflingness; unimportance; want of weight or effect; as, the *futillity* of measures or schemes; to expose the *futillity* of arguments.

I have ridiculed the *futillity* of speculative minds only when they would pave the clouds instead of the streets. *Landor*.

Futillous (fü'til-us), *a.* Worthless; trifling.

Futtock (fut'tok), *n.* [Corrupted from *foot-hook* or *foot-lock*.]

Naut. one of the middle timbers, between the floor and the upper timbers, or the timbers raised over the keel, which form the breadth of the ship.—*Futtock-plates*, iron plates on the upper part of which the dead eyes are fixed, while round holes are punched at the lower end for the futtock-shrouds to hook in.—*Futtock-shrouds*, small shrouds leading from the shrouds of the main, mizzen, and fore masts to the shrouds of the top-masts. In the figure *aa* are the dead-eyes, *bb* the futtock-plates, and *cc* the futtock-shrouds.—*Futtock-stave*, a short piece of rope served over with spun yarn, to which the shrouds are confined at the cat-harpings.

G.

G, the seventh letter in the English alphabet. If we bend the tongue so as to form an arch, which presses against the hinder part of the roof of the mouth, and produce a sound by lowering the tongue, and giving utterance to voice, the sound is called in English *g* hard, which is a guttural mute, the 'voiced' or soft or sonant sound corresponding to the 'breathed' or hard or surd sound *k* (or *c* hard). This sound of *g* is what the letter always has before *a* (except in *gaol*), *o*, *u*, and when initial also before *e* and *i* in all words of English origin, and when final. The soft sound of *g*, or that which it more commonly has before *e*, *i*, and *y*, as in *gem*, *gin*, *gymnastics*, is a palatal sound the same as that of *j*, and did not occur in the oldest English or Anglo-Saxon. It is the voiced sound corresponding to the breathed sound *ch*, as in *church*. The letter *G* was a Roman invention introduced in comparatively late times; it was formed from *C*, which previously had been doing double duty as the representative of both the sound of *k* and that of *g* (as in *give*). *G* is silent before *n* at the beginning of words, as *gnat*, *gnaw*; in the middle of words before *n* it is generally pronounced; at the end, though not pronounced it has the effect of lengthening the preceding vowel, as in *benign*, *condign*, *malign*, *campaign*. In a number of words which in Anglo-Saxon contained a guttural *h*, it has intruded itself before the *h*, forming a combination which now merely lengthens the preceding vowel sound, as in *fought*, *bought*, *bright*, *might*, *night*, *nigh*, *high*. The Anglo-Saxon *g* seems often to have had a sound nearly equivalent to our *y*, and in many English words has been softened into *y* or *u*, or in other ways; *g*, A. Sax. *gear*, E. year; A. Sax. *bugan*, E. bow; A. Sax. *gellie*, E. alike; A. Sax. *feger*, E. fair; A. Sax. *weaga*, E. way; A. Sax. *lagu*, E. law; A. Sax. *sage*, E. saw. In words originally beginning with a *w*, and borrowed from the German into the French, a *g* has been inserted before the *w*, hence E. *guard* and *ward*, *guarantee* and *warrant*, *guise* and *wise*, Fr. *guerre*, E. war; comp. W. *gwain* for E. *wain*, *guell* for *well*.—As a numeral, *G* was anciently used to denote 400, and with a dash over it, *G̃*, 40,000.—In the calendar it is the seventh Dominical letter.—In music, (a) the fifth note and dominant of the normal scale of C, called also *sol*; (b) the lowest note of the grave hexachord; in the Guidonian system *gammā ut*; (c) a name of the treble clef, which is seated on the G or second line of the treble staff, and which formerly had the form of *G*. **Gab** (gab), *n.* [Dan. *gab*, Sw. *gap*, the mouth. Cog. Ir. *cob*, *gab*, mouth, O. Fr. *gab*, a gulp, a mouthful. See the verb. Akin *gape*, *gap*, *gobble*.] The mouth; hence, idle talk; chatter; loquacity; as, he has the gift of the *gab*. [Colloq.] **Gab** (gab), *v.i.* [A Scandinavian word of wide alliance in Teutonic, Romance, and Celtic groups. Comp. Gala (gá'la), *n.* A cotton fabric made in Scotland.

Gala (gá'la, gá'la), *n.* [Fr., show; It. *gala*, finery; of Teut. origin; allied to *G. geil*, wanton, Goth. *gailjan*, to rejoice; A. Sax. *gál*, wanton.] A festive occasion; a festivity.

Galacineæ (ga-la-sin'è-è), *n. pl.* A small tribe of plants of doubtful affinity, containing only two genera, *Galax* and *Stortia*, and now considered as a sub-tribe of *Diapensiaceæ*. *Galax aphylla*, a native of open woods in Virginia and North Carolina, is a smooth perennial herb with a creeping rhizome, roundish evergreen leaves, all springing from the root, and a long spiked raceme of small white flowers.

Galactagogue, *n.* See GALACTOGOGUE.

Galactia (ga-lak'ti-a), *n.* [From Gr. *gala*, *galaktos*, milk.] In med. (a) a redundant flow of milk either in a female who is suckling or in one who is not, and which may occur without being provoked by suckling. (b) A morbid flow or deficiency of milk. *Dr. Good.*

Galactine (ga-lak'tik), *a.* [Gr. *galaktikos*, milky, from *gala*, *galaktos*, milk.] 1. Of or belonging to milk; obtained from milk; lactic. — 2. In astron. an epithet first applied by Sir John Herschel to that great circle of the heavens to which the course of the Milky Way apparently most nearly conforms. — *Galactic poles*, the two opposite points of the heavens, situated at 90° from the galactic circle.

Galactine (ga-lak'tin), *n.* Same as *Lactine* (which see).

Galactite (ga-lak'tit), *n.* [Gr. *gala*, *galaktos*, milk.] In mineral. white natrolite, a zeolite of the mesotype group, erected into a distinct species on an erroneous analysis. Called also *Milkstone*.

Galactodendron (ga-lak'to-den'dron), *n.* [Gr. *gala*, *galaktos*, milk, and *dendron*, a tree.] A generic name given by some authors to the cow-tree of South America, now generally referred to the genus *Brosimum*, *Galactodendron* being used as the specific name. See COW-TREE.

Galactogogue, **Galactagogue** (ga-lak'to-gog, ga-lak'ta-gog), *n.* [Gr. *gala*, *galaktos*, milk, and *ago*, to induce.] A medicine which promotes the secretion of milk in the breast.

Galactometer (ga-lak'tom'et-ér), *n.* [Gr. *gala*, *galaktos*, milk, and *metron*, a measure.] An instrument to test the quality of milk, that is, the percentage of cream yielded by it; a lactometer.

Galactophagist (ga-lak-tof'a-jist), *n.* [Gr. *gala*, *galaktos*, milk, and *phagō*, to eat.] One who eats or subsists on milk. *Wright.*

Galactophagous (ga-lak-tof'a-gus), *a.* Feeding on milk. *Dunglison.*

Galactophoritis (ga-lak'to-fō-rī'tis), *n.* [Gr. *gala*, *galaktos*, milk, *phērō*, to carry, and term. *itis*, denoting inflammation.] In pathol. inflammation of the galactophorous ducts: sometimes inaccurately used for ulceration of the top of the nipples towards their orifices. *Dunglison.*

Galactophorous (ga-lak-tof-or-us), *a.* [Gr. *galaktophoros*—*gala*, *galaktos*, milk, and *phērō*, to bear, to produce.] Producing milk.

Galactopoietic (ga-lak'to-poi-et'ik), *a. or n.* [Gr. *gala*, *galaktos*, milk, and *poietikos*, capable of making, from *poieō*, to make.] A term applied to substances which increase the flow of milk. *Brande.*

Gala-dress (gá'la-dress), *n.* A holiday dress; a person's gayest dress.

Galaget (gá'la-j), *n.* [Sp. *galocha*, a wooden shoe. See GALOCHER.] A wooden shoe. *Spenser.*

Galago (ga-lá'gō), *n.* The native name of a genus of quadrumanous mammals, found in Africa. The species, which are nocturnal in their habits, have long hind-legs, great eyes, and large membranous ears. The great galago (*G. crassicaudatus*) is as large as a rabbit. They live in trees, and are sought after as food in Africa. See GUM-ANIMAL.

Galam Butter (gá'lam but'ér), *n.* A reddish-white solid oil, obtained from *Bassia buty-racea* (the Indian butter-tree).

Galanga, **Galangal** (ga-lang'ga, ga-lang'-gal), *n.* [Fr. *galanga*; O. Fr. *garingal*, from Ar. *chalan*, *khalandj*; Per. *khulandj*, a tree from which wooden bowls, &c., are made.] A dried rhizome brought from China and

used in medicine, being an aromatic stimulant of the nature of ginger. The drug is mostly produced by *Alpinia officinarum*, a flag-like plant, with stems about 4 feet high, clothed with narrow lanceolate leaves, and terminating in short simple racemes of elegant white flowers. The rhizome of *A. Galanga* is known as the greater galangal.

Galanthus (ga-lan'thus), *n.* [Gr. *gala*, milk, and *anthos*, a flower.] A small genus of Amaryllidaceæ, represented by the well-known snow-drop (*G. nivalis*). They are herbaceous plants with bulbous roots, narrow leaves, and drooping white bell-shaped flowers of six segments, the three outer being concave and spreading, and the three inner erect and shorter.

Galantine (gal-an'tin'), *n.* [Fr., from a radical *gal*, seen in *G. gallerie*, jelly, same as *gel* in *L. gelare*, to congeal.] A dish of veal, chickens, or other white meat, freed from bones, tied up, boiled, and served cold.

Galatheidæ (ga-la-thé'i-dé), *n. pl.* [After the nymph *Galathea*, of classical mythology.] A group of decapodous crustaceans, corresponding with the genus *Galathea* of Fabricius, having common characters with the anomalous and macrurous crustaceans. They inhabit fresh-water rivers.

Galatian (ga-lá'shi-an), *n.* A native or inhabitant of Galatia, in Asia Minor; as, Paul's epistle to the *Galatians*.

Galatian (ga-lá'shi-an), *a.* Of or pertaining to Galatia or the Galatians.

Galavance. See GARAVANCE.

Galax (gá-lax). See GALAXACEÆ.

Galaxidæ (ga-laks'i-dé), *n. pl.* [Gr. *galaxias*, a kind of fish, and *eidos*, resemblance.] A family of Australian and New Zealand acanthopterygian fishes, formerly classed with the Salmonidæ, and much resembling our common trout. They have no adipose fins, and are destitute of scales. The teeth are of moderate size. The genus *Galaxias* is the only one, and it contains about seven species. They are softer in flesh and more oily than our members of the salmon family.

Galaxy (ga-lak'si), *n.* [Fr. *galaxie*, from Gr. *galaxias* (*kyklos*, circle, being understood), from *gala*, *galaktos*, milk. Akin *L. lac*, *lactis*, milk.] 1. In astron. (a) the Milky Way; that long, white, luminous track which is seen at night stretching across the heavens from horizon to horizon, and which, when fully traced, is found to encompass the heavenly sphere like a girdle. This luminous appearance is occasioned by a multitude of stars so distant and blended as to be distinguishable only by the most powerful telescopes. At one part of its course it divides into two great branches, which remain apart for a distance of 150° and then reunite; there are also many other smaller branches that it gives off. At one point it spreads out very widely, exhibiting a fan-like expanse of interlacing branches nearly 20° broad; this terminates abruptly and leaves here a kind of gap. At several points are seen dark spots in the midst of some of the brightest portions; one of the most easily distinguished of these dark spots has long been known as the 'coal-sack.' (b) A remote cluster of stars. — 2. An assemblage of splendid persons or things.

Often has my mind hung with fondness and admiration over the crowded, yet clear and luminous, galaxies of imagery, diffused through the works of Bishop Taylor. *Dr. Parr.*

Galbanum, **Galban** (gal'ban-um, gal'ban), *n.* [L.; Gr. *chalbanē*; Heb. *chelbani*, galbanum, from *cheleb*, fat.] A fetid gum resin procured from at least two species of umbelliferous plants, which are probably *Ferula galbaniflua* and *F. rubricaulis*. It consists of the 'tears' of gum resin which exude spontaneously from the stem, especially in its lower part, and about the bases of the leaves. It is brought from the Levant, Persia, and India, and is administered internally as a stimulating expectorant. It is also used in the arts, as in the manufacture of varnish. It is supposed to be yielded by other umbellifers, among which are named *Ferulago galbanifera*, *Opoidia galbanifera*, and *Bubon Galbanum*.

Galbula (gal'bū-lā), *n.* [L.] The generic name of the jacamars, a genus of South American insectivorous birds, allied to the kingfishers. The species are clothed with brilliant green feathers.

Galbulinæ (gal-bū-lī'né), *n. pl.* [L. *galbula*, a yellow-bird.] The jacamars, a family of tropical American fissirostral birds, allied to the trogons and kingfishers, character-

ized by a long bill, long and graduated tail, toes three or four in number, the two front ones being united to the near end of the inner toe. The paradise jacamar (*Galbula paradisæa*) is a striking little bird, on account of the beautiful colours of its plumage, its graceful form, and its long forked tail. It is scarcely so large as an ordinary thrush.

Galbulus (fruit of *Juniperus communis*).

are fleshy and combined into a uniform mass, as the fruit of the juniper.

Gale (gāl), *n.* [Gael. and Ir. *gal*, a gale or puff of wind, smoke, vapour. Perhaps connected with Icel. *gala*, *giola*, a cool wind; *gala*, to blow.] 1. A wind; a brisk wind; a breeze; more specifically, a wind between a breeze and a storm or tempest: generally used with some qualifying epithet; as, a *gentle gale*; a *moderate gale*; a *brisk gale*; a *fresh gale*; a *strong gale*; a *hard gale*.

A little gale will soon disperse that cloud. *Shak.*
And winds of gentlest gale Arabian odours fanned From their soft wings. *Milton.*

2. [Slang.] A riot; a quarrel; a state of noisy excitement, whether of passion or hilarity.

The ladies, laughing heartily, were fast going into what, in New England, is sometimes called a *gale*. *Brooke.*

Gale (gāl), *v. i.* *Naut.* to sail, or sail fast.

Gale (gāl), *n.* [D. and A. Sax. *gagel*, wild-myrtle.] A plant of the genus *Myrica*, nat. order Myricaceæ. Sweet gale (*M. Gale*) is a shrub from 1 to 3 feet high, with numerous alternate branches and very small berries. The whole plant exhales a rather pleasant aromatic odour. It grows on wet heaths abundantly. It is also called *Bog-myrtle*. In America the name is applied to *Comptonia asplenifolia*.

Gale (gāl), *n.* [A. Sax. *gafol*, rent, tribute, O. E. *gavel*, *gavel*, probably from W. *gafael*, Gael. *gabharl*, seizing, a taking, a lease, tenure, or from A. Sax. *gīfan*, to give. See GAVEL.] A periodical payment of rent, duty, or custom; an instalment of money.

Gale, *v. i.* [A. Sax. *galian*.] To sing; to cry; to croak. 'Gan he cry and gale.' *Chaucer.*

Gale, *v. i.* [A. Sax. *gale*.] To sing. *Thorne.*

Galea (gā'le-a), *n.* [L.] A helmet; something resembling a helmet in shape or position; as, (a) in *zool.* a genus of sea hedgehogs or echini, found fossil only; they are distinguished by an oval base, from which the shell rises in a vaulted helmet-like form. (b) In *bot.* a name given to the parts of the calyx or corolla when they assume the form of a helmet, as the upper lip of a ringent corolla. (c) In *anat.* the amnion. (d) A kind of bandage for the head. (e) In *pathol.* headache extending all over the head.

Galeas (gā'le-as), *n.* A kind of vessel formerly used in the Mediterranean; a galley or galleass.

Galeated, **Galeate** (gā'le-āt-ed, gā'le-āt), *a.* [L. *galeatus*, pp. of *galeo*, to cover with a helmet, from *galea*, a helmet.] 1. Covered as with a helmet.

A galeated echinus copped, and in shape somewhat more conical than any of the foregoing. *Woodward.*

Galeated Calyx of *Aconitum variegatum*.

genus a place intermediate between the polecats and dogs.

Galega (ga-lé'ga), *n.* [Gr. *gala*, milk, and *ago*, to induce—because supposed to increase the milk of animals, especially of goats.] A genus of plants, nat. order Leguminosæ. They are smooth, erect, perennial herbs, with pinnate leaves and axillary

racemes of lilac or white pea-shaped flowers; a few species are known, mostly natives of the Mediterranean region. *G. officinalis*, or goat's rue, is not unfrequent in English gardens.

Galeidæ (ga-lé-i-dé), *n. pl.* [Gr. *galeos*, a shark, and *ekdos*, resemblance.] The tope, a family of sharks, distinguished from the Spinacidae or picked dog-fishes by the possession of an anal fin and the absence of spines in the dorsals. Their caudal fin is very inequilateral. Two species, the common tope (*Galeus canis*) and the smooth hound (*Mustelus vulgaris*), are abundant in our seas; the former has triangular, sharp, serrated teeth, like those of the rest of the sharks, but the latter has the jaws covered with a sort of mosaic, as in the rays, and like these it feeds principally on crustacea.

Galemea-wood (ga-le-mé-a-wyid), *n.* The name, in Jamaica, of the *Bumelia salicifolia*.

Galemys (ga-lé-mis), *n.* [Gr. *galé*, a weasel, and *mys*, a mouse.] A genus of mammals allied to the shrews. Only two species of the genus are known, the Russian desman or musk-rat (*G. moschata*) and the French desman (*G. pyrenaica*). These animals have a long snout, almost like an elephant's trunk, and the feet are deeply webbed. They live in burrows at the side of streams, and feed on insects. Owing to a powerful musky odour which they exhale they are often, though falsely, called musk-rats.

Galena (ga-lé-na), *n.* [Gr. *galénē*, stillness of the sea, tranquillity—so named from its supposed effect upon diseases.] 1. A remedy or antidote for poison; theriaca (which see).—2. Sulphide of lead; its common colour is that shining bluish gray usually called lead gray; sometimes it is nearly steel gray. Its streak has a metallic lustre, but its fine powder is nearly black. Its structure is commonly foliated, sometimes granular or compact and sometimes striated or fibrous. It occurs in regular crystals, or more frequently massive, and is the principal ore of lead.—*False galena.* See BLACK-JACK.

Galenic, Galenical (ga-len'ik, ga-len'ik-al), *a.* Pertaining to or containing galena.

Galenic, Galenical (ga-len'ik, ga-len'ik-al), *a.* Relating to *Galen*, the celebrated physician (born at Pergamus in Mysia, A.D. 130), or his principles and method of treating diseases. The galenic remedies consist of preparations of herbs and roots, by infusion, decoction, &c. The chemical remedies consist of preparations by means of calcination, digestion, fermentation, &c.

Galenism (ga-len-izm), *n.* The doctrines of Galen.

Galenist (ga-len-ist), *n.* A follower of Galen.

Galeobdolon (ga-lé-ob'dol-on), *n.* [Gr. *galé*, a weasel, and *bdoles*, stench—referring to the strong disagreeable odour of the plant.] A section of the genus *Lamium* (which see). *G. luteum* (weasel-snout) grows in woods and shady places in Britain and throughout Europe; it has whorled yellow flowers and opposite nettle-like leaves.

Galeocerdo (ga-lé-sér'á-dé), *n.* [Gr. *galeos*, a shark, and *kerdō*, a fox.] A genus of sharks whose broad-based, sharp, serrated teeth occur fossil from the lower tertiary upwards in America and Europe.

Galeodes (ga-lé-ó-des), *n.* [Gr. *galé*, a weasel, and *oides*, resemblance.] A genus of arachnids, by some called *Solpuga*, forming the type of a distinct family, Galeodidae or Solpugidae, having somewhat the appearance of large spiders, but possessing a pair of large claws with expanded bases, attached in front of the mouth, and having the finger movable. They run with great rapidity, throwing up the head in an attitude of defence when attacked, and are reputed venomous. The species, with a single exception, inhabit the hot sandy countries of the Old World. Several are found in Egypt.

Galeodidae (ga-lé-od'i-dé), *n. pl.* See GALEODES.

Galeola (ga-lé-ó-la), *n.* A genus of echinites, possessing the same characters as *Galea*, but differing in size.

Galeopithecidae (ga-lé-ó-pi-thé'si-dé), *n. pl.* See GALEOPITHECUS.

Galeopithecus (ga-lé-ó-pi-thé'kus), *n.* [Gr. *galé*, a weasel, and *pithēkos*, an ape.] The flying-lemur, a genus of mammals which have been referred to the bats, to the lemurs, but more properly to the Insectivora, of so peculiar a structure as to constitute a family (Galeopithecidae) of themselves. These animals have the bones of the arm

and leg, but not those of the digits, excessively elongated, and supporting extensive lateral folds of skin serviceable as a para-

Galeopithecus volans.

chute, but not as organs of flight. The species are restricted to the islands of the Indian Archipelago. Their inferior incisors are remarkable for their complex form, like the teeth of a comb.

Galeopsis (ga-lé-op'sis), *n.* [Gr. *galé*, a weasel, and *opsis*, appearance.] The generic name of the henry-nettles, a genus of plants, of the nat. order Labiata, characterized by the equally five-toothed calyx. They are herbaceous plants with square stems, usually clothed with sharp bristly hairs, nettle-like leaves on long stalks, and red, white, or yellow labiate flowers. There are about twelve species, three of which are natives of Britain. The handsomest of these (*G. versicolor*) is abundant in Scotland, especially in the Highlands; it has showy yellow flowers, with a broad purple spot on the lower lip.

Galericulate (ga-lé-rik'ú-lát), *a.* [L. *galericulum*, a cap—dim. of *galerum*, a kind of hat.] Covered as with a hat or cap. *Smart.*

Galerite (gal'er-it), *n.* [L. *galerium*, a hat or cap.] A name given to a fossil echinus of

Galerites albo-galerus.

1, Depressed form. 2, Normal form.

the chalk formation, from its having some resemblance to a hat. The *Galerites albo-galerus*, one of the most common species, is so named from its fanciful resemblance to the white conical caps of the priests of Jupiter.

Galeritidae (gal'er-it'i-dé), *n. pl.* The family of fossil sea-urchins to which galerite belongs.

Galerucidae (gal-e-rú'si-dé), *n.* [L. *galerum*, a kind of conical head-covering, and *eruca*, a caterpillar.] A family of herbivorous beetles, belonging to the section Tetramera and sub-section Cyclica of Latreille. The typical genus *Galeruca* comprises several species.

Galestes (ga-le'stēs), *n.* [Gr. *galé*, a weasel.] A name proposed by Professor Owen for the largest of the fossil mammalia discovered in 1858 in Purbeck, equalling the polecat in size. It is supposed to have been predaceous and marsupial. Its generic character is derived from a peculiar modification in the form of one of the premolars, which has a single external vertical groove. *Lyell.*

Galet (gal'et), *n.* A fragment of stone broken off by a mason's chisel; a spall.

Galia (gal'i-a), *n.* A medical composition containing gall. *Dunghison.*

Galiaceæ (ga-li-á-sé-é), *n. pl.* [See GALIUM.] A sub-order of Rubiaceæ, called Stellate by Linnaeus. It consists of herbaceous, square-stemmed plants, with whorled exstipulate leaves, and small regular mon-

petalous flowers. Some yield a dyeing substance in their roots, as the various species of madder, but the greater part are useless weeds. See GALIUM.

Galic (gal'ik), *a.* Same as *Gaelic*.

Galician (ga-li'shi-an), *a.* Pertaining to Galicia.

Galician (ga-li'shi-an), *n.* In *geog.* a native or inhabitant of Galicia. Called also *Galle-gan*.

Galilean (ga-li-lé'an), *n.* 1. A native or inhabitant of Galilee, in Judea.—2. One of a sect among the Jews, who opposed the payment of tribute to the Romans.

Galilean (ga-li-lé'an), *a.* In *geog.* relating to Galilee. 'The pilot of the Galilean lake. *Milton.*

Galilean (ga-li-lé'an), *a.* Of or pertaining to, or invented by *Galileo*, the Italian astronomer; as, the *Galilean* telescope.

Galilee (ga-li-lé), *n.* [Named after the scriptural 'Galilee of the Gentiles.' See definition.] A portico or chapel annexed to a church, used for various purposes. In it public penitents were stationed, dead bodies deposited previously to their interment, and religious processions formed; and it was only in the galilee that in certain religious houses the female relatives of the monks were allowed to converse with them, or even to attend divine service. When a female made an application to see a monk she was directed to the porch, usually at the western extremity of the church, in the words of Scripture, 'He goeth before you into *Galilee*; there shall you see him.' The only English buildings to which the term galilee is applied are those attached to the cathedrals of Durham, Ely, and Lincoln. The galilee at Lincoln Cathedral is a porch on the west side of the south transept; at Ely Cathedral it is a porch at the west end of the nave; at Durham it is a large chapel, dedicated to the Virgin, at the west end of the nave, built chiefly for the use of the women, who were not allowed to advance further than the second pillar of the nave. This last was also used as the bishop's consistory court.

Galimatias (ga-li-má'shi-as), *n.* [Fr. Said to be from the fact that an advocate who pleaded the cause of a man named Matthew, whose cock had been stolen, on becoming confused through the frequent repetition of the words, instead of *gallus Matthie*, the cock of Matthew, said *galli Matthias*, the cock's Matthew, but the anecdote has no doubt been invented to furnish an etymology. Probably a form of Fr. *galimatias* (see GALLIMAUFERY) through the hypothetical form *galinafalus*, represented by the Picard *carinafliche*, *carinafliche*.] Confused talk; gibberish; nonsense; absurd mixture.

Her dress, like her talk, is a *galimatias* of several countries. *H. Walpole.*

She became by this desire quite ridiculous, and ran into absurdities and a *galimatias* scarce creditable. *Fiddling.*

Galingale (gal'in-gál), *n.* A name applied in English books to *Cyperus longus*, but originally a synonym of *Galangal* (which see).

Galliongee, *n.* A Turkish sailor. *Byron.*

Galliot, Galliot (ga-li-ot, gal-li-ot), *n.* [Fr. *galiote*, dim. of *galée*, a galley. See GALLEY.]

1. A small galley, or sort of brigantine built for pursuit, and moved both by sails and oars, having one mast and sixteen or twenty seats for rowers.—2. A Dutch or Flemish vessel for cargoes, with very rounded ribs and flattish bottom, with a mizzen-mast placed near the stern, carrying a square mainsail and maintopsail, a foremast to the main-mast (there being no foremast), with fore-

Dutch Galliot.

staysail and jibs.—3. Also, a name formerly given to a bomb-ketch.

Galipea (ga-li-pé-a), *n.* A genus of the nat. order Rutaceæ, consisting of trees or small shrubs, natives of tropical America. *G. Cusparia* yields Angostura-bark (which see).

Galipot (gal'i-pot), *n.* [Fr. So called possibly from the vessels in which it was contained. See **GALLIPOT**.] The French name for the turpentine which concretes upon the stems of *Pinus maritima*, after they have been incised for the purpose of obtaining it.

Galium (ga'i-um), *n.* [Gr. *gala*, milk—referring to *Galium verum* having been used to curdle milk.] An extensive genus of annual, biennial, or perennial herbs, forming the type of the sub-order *Galiaceae* (which see). About 160 species are described, sixteen of which are found in Britain; the remainder are mostly natives of Europe, one or two, as *G. Aparine*, occurring as weeds of cultivation in all parts of the world. *G. verum* (the ladies' bed-straw) was formerly used in Cheshire to coagulate milk; it is still employed for the same purpose by the Highlanders of Scotland, along with the leaves of the stinging nettle and a little salt. *G. Aparine* is a common plant in hedges and on waste ground, and is popularly known as clivers or cleavers, a name derived from the circumstance of its seed-vessels, or burs, cleaving by means of their hooked prickles to the dress of persons coming in contact with them, and as goose-grass from the avidity with which the young stems and leaves are eaten by geese. The seeds have been recommended as a substitute for coffee.

Gall (gal), *n.* [A. Sax. *gealla*, O. Sax. *galla*, Icel. *gall*, D. *gal*, G. *galla*. Cog. with Gr. *cholē*, L. *fel*, for *hel*, bile.] 1. In *physiol.* a bitter slightly alkaline yellowish-green fluid, secreted in the glandular substance of the liver, and stored in the gall-bladder beneath it; bile (which see).—2. Anything bitter; bitterness of mind; rancour; malignity.

His daintiest food, his richest wines were all Turn'd by remorse to bitterness and gall. *Crabbe*.
Archilochus to vent his gall and spite,
In keen iambs first was known to write. *Oldham*.

3. The gall-bladder.

The married couple, as a testimony of future concord, did cast the *gall* of the sacrifice behind the altar. *Sir T. Browne*.

—*Gall of glass*, the neutral salt skimmed off the surface of crown-glass: called also *Sandiver*.

Gall (gal), *n.* [A. Sax. *galluc*, G. *gall-äpfel*, D. *gaboot*, Fr. *gale*, *noix de gale*, It. *galla*, agall, a gall-nut; from L. *galla*, an oak-gall, a gall-nut.] A vegetable excrescence produced by the deposit of the egg of an insect in the bark or leaves of a plant. The galls of commerce are produced by a species of cynips depositing its eggs in the tender shoots of

Aleppo Gall and the Gall-fly (*Cynips galla tinctoria*).

1, Gall split to show the cell in which the larva exists. 2, Exterior of the gall, showing the opening by which the perfect insect escapes.

the *Quercus infectoria*, a species of oak, abundant in Asia Minor, Syria, Persia, &c. When the maggot is hatched it produces a morbid excrescence of the surrounding parts. Galls are inodorous, and have a nauseously bitter and astringent taste. They are nearly spherical, and vary in magnitude from the size of a pea to that of a hazel-nut. When good, they are of a black or deep olive colour. They are also termed *Nut-galls* or *Gall-nuts*, and are known in commerce by the names of *white*, *green*, and *blue*. The two latter kinds are the best. The chief products of galls are tannin and gallic acid. Gall-nuts are very extensively used in dyeing and in the manufacture of ink. They are the most powerful of all the vegetable astringents, and are frequently used in medicine. They are chiefly imported from Aleppo, Tripoli, Smyrna, and Said. Galls are also produced, though of inferior quality, on the other species of oak, and likewise on plants and trees of different kinds, as *berry-galls*, *apple-galls*, &c. These galls are of various forms and sizes.

Gall (gal), *v.t.* To impregnate with a decoction of galls.

Gall (gal), *n.* [Origin uncertain. May be by a figurative usage from E. *gall*, bile, bitterness, rancour; or from E. *gall*, L. *galla*, the diseased vegetable excrescence; the Fr. *gale*, scab, itch, scurf, is probably the same word, but its origin is equally uncertain. Comp. also Armor. and W. *gal*, eruption.] A wound in the skin by rubbing.

This is the fattest wound; as much superior to the former as a gangrene is to a *gal* or a scratch.

Dr. H. More.

Gall (gal), *v.t.* [See preceding article.] 1. To fret and wear away, as the skin of, by friction; to excoriate; to hurt or break the skin of by rubbing; as, a saddle *galls* the back of a horse, or a collar his breast.

I'll touch my point
With this contagion, that, if I *gall* him slightly,
It may be death. *Shak.*

2. To break the surface of by rubbing; to impair, as by rubbing; to wear away; as, to *gall* a mast or a cable. 'A stream *galls* the ground.' *Ray*.—3. To tease; to fret; to vex; to chagrin; as, to be *galled* by sarcasm.

A temper *galled* by the long tyranny of the government. *Macaulay*.

4. To injure; to harass; to annoy. The troops were *galled* by the shot of the enemy.

In our wars against the French of old, we used to *gall* them with our long bows, at a greater distance than they could shoot their arrows. *Addison*.

Gall (gal), *v.t.* 1. To fret; to be teased.—2. To act in a *galling* manner; to say sarcastic or *galling* things to a person.

formed by trees.—5. In *fort* any communication covered in both above and at the sides. 6. In *mining*, a narrow passage or perforation, usually not deviating much from the horizontal.—7. *Naut.* a frame like a balcony projecting from the stern and quarters of a ship. That part at the stern is called the *stern-gallery*, that at the quarters the *quarter-gallery*.

Gallery-class (gal'le-ri-klas), *n.* A large class taught while seated on a gallery, as in infant and national schools.

Gallery-furnace (gal'le-ri-fér-nās), *n.* Same as *Gallery*, 6.

Gallery-painting, Gallery-picture (gal'le-ri-pant-ing, gal'le-ri-pik-tūr), *n.* A large painting to be hung in a gallery.

Galleylet (gal'li-till), *n.* Gallipot. *Bacon.*

Galley (gal'li), *n.* [O. Fr. *galée*, It. *galea*—probably from Gr. *gale*, a kind of gallery, or *galeos*, *gale*, a sea-fish, a kind of shark, which might suggest a swift-sailing vessel.] 1. A low flat-built vessel with one deck, and navigated with sails and oars, once commonly used in the Mediterranean. The largest sort of them were called *gallasses*. (See *GALLEASS*.) The common galleys varied in length from 100 to 200 feet, those of the smaller sizes being

Galley.

called *half-galleys*, and those of a still less size *quarter-galleys*. They carried as many as twenty oars on each side, worked by one or more men; they had two masts and two lateen sails, a raised structure at the stern, and often one at the prow. In France there were forty galleys for service in the Mediterranean, which were worked by convicts heavily ironed and subjected to much misery; and the word galley has hence become a synonym for a place of forced and severe toil.

The most voluptuous person, were he tied to follow his hawks and his hounds, his dice and his court-suits every day, would find it the greatest torment that could befall him; he would fly to the mines and the galleys for his recreation, and to the spade and the mattock for a diversion from the misery of a continual uninterrupted pleasure. *South.*

2. A ship, especially a ship of war of the ancient Greeks and Romans, propelled chiefly by oars. These galleys were distinguished according to the number of banks of oars which they possessed into *biremes*, *triremes*, *quadriremes*, *quinqueremes*, &c. 3. An open boat once used on the Thames by custom-house officers, press-gangs, and for pleasure.—4. The boat, somewhat larger than a gig, of a warship appropriated for the captain's use.—5. The cook-room or kitchen of a ship of war or of a steamer, answering to the caboose of small merchantmen.—6. An oblong reverberatory furnace with a row of reborts, whose necks protrude through lateral openings.—7. In *printing*, a movable frame or tray of wood, brass, or zinc, on which the types are placed when composed. It is sometimes furnished with a double bottom called a *galley-slice*.

Galley-fire (gal'li-fir), *n.* A ship's fireplace.

Galley-foist, Gally-foist (gal'li-foist), *n.* [*Galley* and *foist*, a kind of light ship.] A barge of state: sometimes specifically applied to the barge in which the Lord Mayor of London went in state to Westminster.

Rogues, hell-hounds, stentors, out of my doors, you sons of noise and tumult, begot on an ill May-day, or when the *galley-foist* is aloft to Westminster. *B. Fennel.*

Galley-halfpenny (gal'li-haf'pen-ni), *n.* A base coin in circulation in the time of Henry IV., so called from being brought to England surreptitiously in the galleys which carried merchandise from Genoa.

Galley-slave (gal'li-slāv), *n.* A person con-

demned for a crime to work at the oar on board of a galley.

Galley-slice (gal'li-slis), *n.* See *GALLEY*.

Galley-stick (gal'li-stik), *n.* A long tapering stick, the breadth of which is less than the height of types, placed beside a column of type in a galley, in order that the type may be locked up or wedged in place by quoins.

Galleyworm (gal'li-worm), *n.* Same as *Gallyworm*.

Gall-fly (gal'fi), *n.* An insect that punctures plants, and occasions galls. See *GALL*, a vegetable excrescence.

Galli (gal'i), *n. pl.* In *Rom. antiq.* the priests of Cybele at Rome.

Galliambic (gal-li-am'bi), *a.* [*L. galliam-bus*, a song used by the priests of Cybele—*Gallus*, a name applied to these priests, and *iambus*.] In *pros.* a term applied to a kind of verse consisting of two iambic dimeters catalectic, the last of which wants the final syllable.

Galliant (gal'li-an), *a.* Of or pertaining to Gaul or France; Gallie; French.

An eminent monsieur, that, it seems, much loves A Gallian girl at home. *Shak.*

Galliard, t. a. [*Fr. galliard, gay.*] Gay; brisk; active. *Chaucer.*

Galliard (gal'yad), *n.* 1. A brisk gay man. 'Selden is a galliard.' *Cleveland.*—2. A lively dance. [In this latter use more directly from Sp. *gallarda*, a lively Spanish dance.]

Galliardise (gal'yad-iz), *n.* Merriment; excessive gaiety. 'The mirth and galliardise of company.' *Sir T. Browne.*

Galliardness (gal'yad-nēs), *n.* Gaiety. 'His sprightly pleasance and galliardness abate.' *Gayton, Notes on Don Quixote.*

Gallias (gal'i-as), *n.* Same as *Galleass* (which see).

Gallie (gal'ik), *a.* [From *Gallia*, Gaul, now France.] Pertaining to Gaul or France.

Gallie (gal'ik), *a.* [From *gall*.] Belonging to galls or oak-apples; derived from galls; as, *gallie acid*. This acid has the formula C₂H₂O₃. It exists, ready formed, in the seeds of the mango, and is a product of the decomposition of tannic acid. It crystallizes in brilliant prisms, generally of a pale yellow colour. It colours the persalts of iron of a deep bluish black. It is of extensive use in the art of dyeing, as it constitutes one of the principal ingredients in all the shades of black, and is employed to fix or improve several other colours. It is well known as an ingredient in ink. See *INK*.

Galliean (gal'ik-an), *a.* [*L. Gallieus*, from *Gallia*, Gaul.] Pertaining to Gaul or France; as, the *Galliean church* or clergy.

Gallieinite (gal-lis'in-it), *n.* Same as *Gallitizinite*.

Gallieise, Gallicize (gal'i-siz), *v. t. pret. & pp. gallieised, ppr. gallieising.* To render conformable to the French idiom or language.

Gallicism (gal'i-sizm), *n.* [*Fr. gallicisme*, from *Gallia*, Gaul.] A mode of speech peculiar to the French nation; French form of speech improperly used by an English writer; a custom or mode of thought peculiar to the French. In St. Matt. xv. 32 is a *Gallicism*: 'I have compassion on the multitude, because they continue with me now three days, and have nothing to eat.' *Continue* is used here for *have continued*.

Gallicolæ (gal-lik'ō-lē), *n. pl.* A family of hymenopterous insects, synonymous with *Cynipidæ* (which see).

Galligaskins (gal-li-gas'kinz), *n.* [Probably from *Fr. greguesques*, O. Fr. *quarquesques*, *garguesques*, Norm. *gargache*, breeches, hose, from It. *grechesco*, Grecian. By corruption such forms as *gleguesques*, *galligasks* might arise. Comp. O. E. *grege*, *Fr. gregues*, a kind of breeches or hose, which recalls the *W. gwregys*, a girdle.] 1. Large open breeches; wide hose.

My galligaskins, that have long withstood The winter's fury and encroaching frosts, A horrid chasm disclosed. *Philips.*

2. Leather guards worn on the legs by sportsmen. *Simmonds.*

Gallimatia (gal-li-mā'shi-a), *n.* Same as *Gallimatias*.

Gallimaufrey, Gallimaufrey (gal-li-mā'fri), *n.* [*Fr. galimaufrie*, a ragout or hash—a word of uncertain origin.] 1. A hash; a medley; a hodge-podge, made up of the remnants and scraps of the larder. [Rare.]—2. Any inconsistent or ridiculous medley.

They have made our English tongue a *gallimaufrey*, or hodge-podge of all other speeches. *Spenser.*

Gallinaceæ, Gallinacæ (gal-li-nā'sē-ē, gal-

li-nā'sē-i), *n. pl.* The term by which the whole order of rasorial birds is sometimes designated, but properly restricted to that section of which the common domestic fowl is the type, including also turkeys, partridges, grouse, pea-fowl, and a number of allied forms, the other section or sub-order being the *Columbidæ* or *Columbaceæ* (pigeons). The *Gallinaceæ* are distinguished from the latter by being less adapted for flight, their body being comparatively much heavier, the legs and feet stronger, and the wings shorter and less powerful. The sub-orders have also been named *Clamatores* and *Gemitores* respectively, from the nature of their cry.

Gallinacean (gal-li-nā'shē-an), *n.* One of the order or sub-order of birds which includes the domestic fowl.

Gallinaceous (gal-li-nā'shus), *a.* [*L. gallinaceus*, from *gallina*, a hen, *gallus*, a cock, whose name probably means the crower; comp. *W. gale*, to call.] Pertaining to the order of birds which includes the domestic fowls or those of the pheasant kind.

Gallinæ (gal-lī'nē), *n. pl.* [*L. gallina*, a hen.] Linnaeus's name for the group of birds now known as *Rasores* (which see).

Gallinazo (gal-li-nā'zō), *n.* The South American name for the vultures of the genus *Cathartes* (*Catharista*). They have a dark plumage, and are encouraged and protected by the magistrates of cities on account of their services as scavengers. See *TURKEY-BUZZARD*.

Galling (gal'ing), *a.* Adapted to fret or chagrin; vexing; harassing; annoying.

Gallingly (gal'ing-li), *adv.* In a galling manner.

Feels its unwieldy robe sit on his shoulders Constrained and gallingly. *F. Baillie.*

Gallinha (gal'in-ha), *n.* A nominal money of account on the west coast of Africa represented by cowries.

Gallinipper (gal'ni-pēr), *n.* A large mosquito.

Gall-insect (gal'in-sekt), *n.* Same as *Gall-fly*.

Gallinule (gal'in-ūl), *n.* [*L. gallinula*, dim. of *gallina*, a hen.] Gallinula, a genus of gallinular birds, of the family *Rallidæ* or *rails*, and closely allied to the coots. The species frequent fresh waters, swimming about and diving or running on land with equal ease and swiftness. One species only, the common gallinule (*Gallinula chloropus*), called also water-hen and moor-hen, is found in Britain. It is about 14 inches long, tail short, bill upwards of an inch long, greenish-yellow at the tip and red at the base, the plumage generally of a deep olive-brown on the upper parts, blackish-gray beneath, the ridge of the wing and the under tail-coverts white. The gallinules are characterized by a frequent jerking of the tail. They form their nests near water among reeds, stumps, and roots, and lay from seven to ten eggs. The flesh is well flavoured.

Gallinulinae (gal-li-nū-lī'nē), *n. pl.* The gallinules, a sub-family of birds of the order *Grallæ* and family *Rallidæ*. See *GALLINULE*.

Galliot, Galleot (gal'i-ot, ga'le-ot), *n.* See *GALLOT*.

Gallipoli Oil (gal-lip'ō-i oil), *n.* An inferior kind of olive-oil brought from Gallipoli, in Italy.

Gallipot (gal'i-pot), *n.* [Probably from O. D. *gleypot*, an earthen pot—*gley*, *klei*, clay, and *pot*. According to Stow the making of earthenware tiles and apothecaries' vessels was introduced into England by two Flemings about 1570, who brought the name *galley-tiles* or earthenware tiles (and probably this also) along with them.] A small pot or vessel painted and glazed, used by druggists and apothecaries for containing medicines.

Plato said his master Socrates was like the apothecary's *gallipots*, that had on the outside apes, owls, and satyrs, but within precious drugs. *Bacon.*

Gallipot (gal'i-pot), *n.* A kind of resin; galipot (which see).

Gallitizinite (gal-lit'iz-in-it), *n.* Rutile, an ore of titanium.

Gallium (gal'i-um), *n.* [From *Gallia*, the Latin name for France.] Sym. Ga. Sp. gr. 5.935. A rare malleable metal, discovered by means of spectrum analysis in 1875 by M. Leccoq de Boisbaudron in the zinc-blende of Pierrefitte in the Pyrenees. It is of a grayish-white and brilliant lustre, and fuses at a remarkably low point (80.15° Cent. or 36° Fahr.), so low, indeed, as to melt readily by the mere warmth of the hand. It has

as yet been prepared only in small quantities; in its properties it is related to aluminium, and its spectrum consists of two violet lines, one well-defined and eminently characteristic.

Gallivant (gal-li-vant', gal-lav-ant', v.i. [Probably a corrupt form of *gallant*.] 1. To gad about in the company of men; to flirt with men; said of women; to run after women: said of men.

Else I shall have my maid *gallivanting* with somebody who may rob the house. *Dickens*.

2. To go or run about in a purposeless idle way; to go after trivial pursuits; as, he is gone *gallivanting* after other people's business.

Gallivat (gal'li-vat), n. A large galley or row-boat used in the East, rarely exceeding 70 tons in burden, two-masted, and carrying small swivel guns. The Malay pirates employ these boats on account of their swiftness.

Galliwasp (gal'li-wasp), n. A species of lizard bearing the scientific name of *Celestus occidens*. It is about 1 foot in length, and its whole appearance is remarkably stout and plump. Its general colour is brown. It is a native of the West Indies, and seems to be particularly common in Jamaica, where it is much dreaded and abhorred by the inhabitants, though without reason.

Gall-nut (gal'nut), n. A vegetable excrecence in plants. See *GALL*.

Gall-oak (gal'ok), n. *Quercus infectoria*, the oak from which the galls of commerce are obtained.

Gall of Glass, n. Scum of melted glass.

Gall-of-the-earth, n. A North American name for two plants of different genera, *Mulgedium floridanum* and *Nabalus Fraseri*; so called from their intense bitterness.

Gallomania (gal-lō-mā-ni-a), n. A mania for imitating French manners, customs, dress, literature, &c.

Gallon (gal'lun), n. [O. Fr. *galon*, *galon*; Fr. *gale*, a jar, a bowl. The change of *g* into *j* in French is not uncommon.] An English measure of capacity for dry or liquid goods, but usually for liquids, containing 4 quarts. The old wine gallon contained 231 cubic inches, which is now the size of the standard gallon of the United States; the old corn gallon, 268.6 cubic inches; the old ale gallon, 282 cubic inches. The imperial gallon now in use as the standard measure of capacity for all liquids and for dry goods contains 277.274 cubic inches, or 10 lbs. avoirdupois of distilled water at the temperature of 62° Fahrenheit, the barometer being at 30 inches.

Galloon (gal-lōn), n. [Fr. and Sp. *galon*; It. *galone*, from *gala*, pomp, show, finery. See *GALLA*.] A kind of narrow close lace made of cotton, silk, gold, or silver threads, &c., used for binding shoes, hats, and for other purposes.

Gallooned (gal-lōnd'), a. Furnished or adorned with galloon.

Galloper (gal'lup), v.i. [Fr. *galoper*, Fr. *galau-pear*, to gallop; of Teutonic origin. According to Skeat from O. Flem. *walop*, a galop, an extension of O. L. G. *wallen*, a Sax. *weallan*, to boil.] 1. To move or run with leaps, as a horse; to run with speed.—2. To ride a horse that is galloping; to ride at a rapid pace.

He *galloped* up to join them! *Tennyson*.

3. To move very fast; to scamper.

Such superficial ideas he may collect in *galloping* over it. *Locke*.

Gallop (gal'lup), n. 1. The movement or pace of a quadruped, particularly of a horse, by springs, bounds, reaches, or leaps. The animal lifts his fore-feet nearly at the same time, and as these descend and are just ready to touch the ground the hind-feet are lifted at once. The gallop is the swiftest pace of a horse.—2. A kind of dance. See *GALOP*.—*Hand-gallop*, a slow and easy gallop of a horse, in which the hand presses the bridle to hinder increase of speed.

Gallopade (gal-lup-ād'), n. [Fr. *galopade*. See *GALLOP*.] 1. In the *manège*, a sidelong or curvetting kind of gallop.—2. A sprightly kind of dance; the music adapted to it. See *GALOP*.

Gallopade (gal-lup-ād'), v.i. pret. & pp. *galloped*; ppr. *galloping*. To gallop; to move about briskly; to perform the dance called a gallopade.

The shock-head willows two and two

By rivers *galloped*. *Tennyson*.

Galloper (gal'lup-ēr), n. 1. One who or that which gallops.—2. In *artillery*, a

carriage on which very small guns are conveyed, and having shafts so as to be drawn without limbers.

Galloper-gun (gal'lup-ēr-gun), n. A small kind of gun conveyed on a galloper. See *GALLOPER*, 2.

Gallop-in (gal'lup-in), n. [Fr. *galopin*, from *galoper*, to gallop. See *GALLOP*.] A servant for the kitchen; a cook's boy; a scullion; so named from his being made to run messages.

Dyot for the kitchen and *gallop-ins*.

Archæologia, xv. 7.

Gallop-ing (gal'lup-ing), p. and a. Proceeding at a gallop or at a rapid rate; as, a *galloping* consumption, that is, a consumption that proceeds rapidly to a fatal termination; a rapid decline.

Gallowt (gal'lō), v.t. [A. Sax. *gallowian*, *agallowian*, to stupefy.] To fright or terrify.

The wrathful skies
Gallow the very wanderers of the night,
And make them keep their caves. *Shak.*

Galloway (gal'lō-wā), n. A horse or species of horses of a small size, first bred in *Galloway* in Scotland, characterized by great spirit and endurance.

Gallowglass, **Gallowglas** (gal'lō-glas), n. [Ir. *galloglach*, a heavy-armed soldier—*gall*, foreign, and *oglach*, a youth, vassal, soldier, from *og*, young, and adjectival termination *lach*. The Irish armed their gallowglasses after the model of the English early military settlers.] An ancient heavy-armed foot-soldier of Ireland and the Western Isles: opposed to *kerne*, a light-armed soldier.

The mercless Macdonwald . . . from the western isles,
Of *kerne* and *gallowglasses* is supplied. *Shak.*

Gallow-grass (gal'lō-gras), n. An old cant name for hemp, as furnishing halters for the gibbet.

Gallows (gal'lōz), n. *sing.* or *pl.*; also **Gallowses** (gal'lōz-ēz) in *pl.* [A plural form; A. Sax. *galga*, *galga* (*sing.*), a gallows; O. Fris. Goth. *galga*, G. *galgen*, gallows.] 1. An instrument of punishment on which criminals are executed by hanging, usually consisting of two posts and a cross beam on the top, to which the criminal is suspended by a rope fastened round his neck; also, a similar contrivance for suspending anything. 2. A wretch that deserves the gallows.

Cupid hath been five thousand years a boy.—
Ay, and a shrewd unhappy *gallows* too. *Shak.*

3. One of a pair of braces for supporting the trousers. [Colloq. In this sense always takes *gallowses* as a plural.]—4. *Naut.* same as *Gallows-bitts*.

Gallows (gal'lōz), *adv.* Very; exceedingly; as, *gallows* poor. [Slang.]

Gallows-bird (gal'lōz-bērd), n. A person that deserves the gallows.

Gallows-bitts (gal'lōz-bitts), n. *pl.* *Naut.* on

flush-decks, the name of a strong frame of oak made in the form of a gallows, and fixed at the fore and main hatch-way to support the spare top-masts, yards, booms, boats, &c.

Gallows-frame (gal'lōz-frām), n. 1. The frame of a gallows.—2. The frame by which the beam of a beam-engine is supported.

Gallows-free (gal'lōz-frē), a. Free from danger of the gallows. *Dryden*.

Gallows-stanchions (gal'lōz-stan-shon-z), n. Gallows-bitts (which see).

Gallows-top (gal'lōz-top), n. *Naut.* a cross-piece of timber tenoned on to the gallows-bitts at or near the top.

Gallows-tree (gal'lōz-trē), n. The tree of execution; the tree on which criminals were executed.

He played a spring, and danced it round,
Below the *gallows-tree*. *Burns*.

Gall-pipe (gal'pip), n. Same as *Gall-duct*.

Gall-sickness (gal'sik-nes), n. A remitting bilious fever in the Netherlands; Walcheren fever.

Gall-stone (gal'stōn), n. A concretion formed in the gall-bladder. The commonest kind of gall-stone is used by painters, on account of its brightness and durability, as a yellow colouring matter.

Gally (gal'i), a. Like gall; bitter as gall.

'Gally and bitter drinks of sin.' *Bp. Gardner*.

Gally (gal'li), n. In *printing*, see *GALLEY*, 7.

Gally-gaskins, **Gally-gascoynes** (gal-li-gas'kins, gal-li-gas'kōins), n. Same as *Gallygaskins*.

Gally-worm (gal'li-wērm), n. [Said to be from the adjective *gally*, bitter as gall, and *worm*.] A name commonly given to the myriapods exemplified by the millepedes or 'hairy worms.'

Galoche, **Galoshe** (ga-lōsh'), n. [Fr. *galoches*, either from L. *Gallica* (solea understood), a Gaulish shoe; or more probably from L. L. *calopediā* (through the corruptions *calop'dia*, *calop'dia*), from Gr. *kalopodion*, a wooden shoe—*kalon*, wood, and *pous*, *podas*, a foot.] 1. A patten, clog, or wooden shoe.—2. A shoe to be worn over another shoe to keep the foot dry.—3. A gaiter covering the upper part of the shoe and part of the leg.

Galop (ga-lōp'), n. [Fr. See *GALLOP*.] 1. A quick, lively kind of dance, somewhat resembling a waltz, performed in $\frac{2}{4}$ time.—2. The music to which the dance is performed.

Galore (ga-lōr'), n. [Ir. and Gael. *go lebr*, enough—*go*, to, and *lebr*, enough.] Abundance; plenty. 'They tipped strong liquors *galore*.' *Old song*.

Galoshe, n. Same as *Galoche*.

Galpe, v.i. To gape; to yawn. *Chaucer*.

Galsome (gal'sum), a. [From *gall*.] Angry; malignant. 'Galsome bitterness and wilful fraud and falsehood.' *Bp. Morton*.

Galt (gal't), n. Same as *Gault* (which see).

Galuncha (ga-lung'ka), n. An Indian febrile-fuge prepared from the stems of *Tinospora verrucosa* and *T. cordifolia*.

Galvanic (gal-van'ik), a. [See *GALVANISM*.] Pertaining to galvanism; containing or exhibiting it, as *galvanic* action, *galvanic* influence.—*Galvanic electricity*, electricity arising from chemical action. See *GALVANISM*.—*Galvanic pair* or *cell*, *Galvanic circuit*. See *GALVANISM*.—*Galvanic battery*, an association of galvanic pairs for the production of

Simple Galvanic Battery

current electricity. The simplest form of battery consists of a number of pairs of copper and zinc plates immersed in dilute sulphuric acid, the successive pairs being joined together by wires, the copper of the first cell to the zinc of the second, the copper of the second to the zinc of the third, and so on. (See *GALVANISM*.) This and similar forms of battery are objectionable partly on chemical and partly on electrical grounds. As the chemical action goes on, the liquid decreases in strength, acting less powerfully on the zinc, while at the same time the zinc which has been dissolved is deposited on the copper, thus tending to assimilate the plates, and so to destroy the current, which depends essentially upon the plates retaining their distinctive metallic characteristics. But the most important cause of weakening in such batteries consists in *polarization of the plates*, that is, in the deposition on the surface of the copper of a film of hydrogen, which not only interposes resistance by its defective conductivity, but also brings to bear an electromotive force in a direction opposed to that of the current. Various batteries have been devised to overcome these obstacles to the maintenance of a constant current, as the Daniell battery, the Grove, the Bunsen, and the Menotti. One of the best of these is the Daniell, invented in 1836. The cell of this battery consists of copper and zinc, the copper being in the form of a jar and serving as the outer dish of the cell. The zinc is formed into a rod and is placed inside a porous jar of unglazed porcelain, which again stands inside the copper jar. In the porous dish dilute sulphuric acid serves to excite the zinc, while as a conducting and absorbent liquid, between the porous vessel and the copper, is put a strong solution of sulphate of copper or blue vitriol. For the purpose of keeping it saturated, which is essential, crystals of sulphate of copper are

suspended in it near the surface by means of a wire-basket of copper. The effect of this arrangement is that the hydrogen is intercepted before it can arrive at the copper, and the deposit which takes place on the copper is a deposit of copper, the hydrogen taking the place of this copper in the saturated solution. The cells thus constructed are usually arranged in square compartments in a wooden box. A modification of the Daniell battery in which the wooden trough is divided into cells by glass plates or varnished slate slabs, which are again subdivided by porous earthenware, zinc plates and dilute acid being placed in one subdivision, copper and its sulphate in the other, is also in use. The Grove battery somewhat resembles the Daniell, but has a greater electro-motive power, the plates being platinum and zinc. It is inferior, however, in constancy. The Bunsen battery, the one in use for the telegraphs in Germany, differs in principle from Grove's only in the use of a carbon or charcoal electrode for a platinum one. The Menotti is a Daniell battery with the porous jar replaced by a layer of wet sandvut or sand. Sir W. Thomson has invented a form of battery, consisting of a square wooden tray, lined with lead, at the four corners of which four blocks of wood are placed to support the zinc, which is cast with bars like a gridiron instead of being a solid plate. On the bottom of the tray a copper plate is laid, which forms the positive pole of the battery. The liquid employed is a solution of sulphate of zinc, and crystals of sulphate of copper are dropped on to the bottom of the cell round the edges. Instead of the porous earthenware jar of the Daniell, the zinc is protected from the sulphate of copper by having very strong thick paper tied round it. This,

Section of Sir William Thomson's Battery.

while it allows perfectly free electrical communication between the two plates, hinders the sulphate of copper in the solution from being carried up to the zinc by currents of the liquid. This battery is used at all the telegraph stations at which Sir W. Thomson's siphon-recorder is employed.

Galvanical (gal-van'ik-al), *a.* Galvanic.

The phenomena of magnets, of electrical bodies, of galvanic apparatus, seem to form obvious material for such sciences. *W. Whewell.*

Galvanism (gal-van-izm), *n.* [From *Galvani*, professor of anatomy at Bologna, 1790, the first investigator in this field.] That branch of the science of electricity which treats of the electric currents arising from chemical action, more particularly from that accompanying the decomposition of metals. If a plate of copper and a plate of amalgamated zinc are placed in a vessel containing water and a small quantity of sulphuric acid, so long as the plates are kept separate no apparent action takes place, but whenever they are brought into contact bubbles of hydrogen gas appear at the copper plate and continue to be formed so long as the plates are kept touching. If weighed after being for some time in contact, the copper plate is found to be unaffected, the zinc plate to have lost in weight, and the liquid to hold in solution the lost zinc in the form of the sulphate of that metal. If wires of copper or any other conductor of electricity be attached to the plates, and their free ends be made to touch, the changes mentioned take place just as if the plates themselves were in contact. If a portion of the wires thus joined is placed parallel to a magnetic needle, the austral or north-seeking end of the needle no longer points to the magnetic north but to a point either to the west or east of it, and all the above-mentioned phenomena, though in a less degree, occur even when the wires, instead of being in contact, are merely placed in a liquid, the liquid completing the contact. When so immersed the ends of the wires show strong chemical affinities; thus, if the conducting liquid be a solution of the sulphate of copper, the wire from the zinc plate becomes coated with the copper of the solution, while the other wire attracts its oxygen and sulphuric acid,

wasting away by entering into combination with them. Again, if the ends of the wire be connected by a small piece of platinum or iron wire, the passage of the electric current through the wire makes it red hot. The wires connecting the plates are found, therefore, when in actual or virtual contact, to possess magnetic, chemical, and heating properties. Such an arrangement of plates as the above, together with the exciting liquid, is called a *galvanic pair*, or *galvanic cell*, and a combination of such pairs or cells forms a *galvanic battery*. (See under GALVANIC.) A galvanic pair through which an electric current is passing forms a complete chain or *circuit*; thus, in the above arrangement of plates the current may be supposed to start from the zinc, pass through the liquid to the copper, and thence through the wire back to the zinc. When the copper and zinc plates are connected by the wire the circuit is said to be *closed*, the current then circulating; when the connection between the plates is not complete the circuit is said to be *broken* or *interrupted*. When the circuit includes only a single cell, like the above, it is called a *simple galvanic circuit*; when it includes several cells joined together it forms a *compound galvanic circuit*. The copper

plate in the above arrangement, or the chemically passive plate or extremity in any arrangement or battery, is called the *positive pole* of the cell or battery, and the zinc or chemically active plate or extremity, the *negative pole*. See the above figure of Volta's pile or battery, which consists of a number of compound plates of copper and zinc separated by circular pieces of wet cloth—a zinc plate at bottom, copper at top. Galvanic electricity is a most important agent in the arts, in medicine, surgery, &c., and it was only through its discovery that the invention of the electric telegraph became possible. (See TELEGRAPH.) Galvanism, from its dealing with current electricity, or electricity in motion, sometimes receives the name of *dynamical electricity*, in contradistinction to *frictional electricity*, which is called *statical*, from its being concerned mainly with the electric condition of bodies in which electricity remains insulated or stationary. See ELECTRICITY.

Galvanist (gal-van-ist), *n.* One versed in galvanism.

Galvanization (gal-van-iz-ā'shon), *n.* 1. The act of affecting with galvanism.—2. The state of being so affected.

Galvanize (gal-van-iz), *v. t.* pret. & pp. *galvanized*; ppr. *galvanizing*. 1. To affect with galvanism.—2. To plate, as with gold, silver, or other metal, by means of galvanic electricity; to electroplate by galvanism.—3. To restore to consciousness by galvanic action, as from a state of suspended animation.

Galvanized (gal-van-izd), *p.* and *a.* Acted on or affected by galvanism.—*Galvanized iron*, a name given (a) improperly to sheets of iron coated with zinc by a non-galvanic process, the iron being first cleansed by friction and the action of dilute sulphuric acid, and then plunged into a bath composed of melted zinc and other substances, as sal-ammoniac, or mercury and potassium; and (b) more properly, to sheets of iron coated first with tin by a galvanic process, and then with zinc by immersion in a bath containing fluid zinc covered with sal-ammoniac mixed with earthy matter.

Galvanizer (gal-van-iz-ēr), *n.* One who or that which galvanizes.

Galvano-caustic (gal-van'ō-kas'tik), *a.* [From *galvanic*, and *caustic* (which see).] Relating to the heat derived from galvanism when employed as a caustic.

Galvanoglyphy (gal-van-og'li-fī), *n.* [E. *galvanism*, and Gr. *glyphō*, to engrave.] Same as *Glyphography*.

Galvanologist (gal-van-ō'f-jist), *n.* One who describes the phenomena of galvanism.

Galvanograph (gal-van'ō-graf), *n.* A plate formed by the galvanographic process; an impression taken from such a plate.

Galvanographic (gal-van'ō-graf'ik), *a.* Pertaining to galvanography.

Galvanography (gal-van-og'ra-fī), *n.* [E. *galvanism*, and Gr. *graphō*, to write.] A

method of producing plates for copperplate engraving by the galvanoplastic process without etching. The drawing is made exactly as it is to appear upon paper either by means of a thickish pigment on a polished silver plate or copper plate coated with silver, or by means of chalk on a roughened copper plate, so that the painted or chalked portions form a slightly raised surface. A deposit of copper is then made on the plate in the ordinary way, and a copper plate is thus produced forming an exact reverse of the other, the raised portions of which now appear depressed. The impressions are taken from this in the same manner as in copperplate printing.

Galvanology (gal-van-ō'lo-jī), *n.* A description of the phenomena of galvanism.

Galvano-magnetic (gal-van'ō-mag-net'ik), *a.* Same as *Electro-magnetic*.

Galvanometer (gal-van-om'et-ēr), *n.* [*Galvanic*, and Gr. *metron*, a measure.] An instrument for detecting the existence and determining the strength and direction of an electric current. In all galvanometers the principle of the action is the same. It depends upon the force which exerted discovered to be exerted between a magnetic needle and a wire carrying a current—a force which tends to set the needle at right angles to the direction of the current, and whose intensity, other things remaining the same, depends directly upon the strength of the current. The *sine galvanometer* consists of a magnetic needle poised at the centre of a coil of insulated copper-wire, wound round a vertical circle that may be

Sine Galvanometer.

turned horizontally on its stand. If the needle and vertical circle are both in the magnetic meridian, when a current passes the needle is deflected, the strength of the current being as the sine of the angular deviation. The *astatic galvanometer* consists of a pair of similar needles magnetized, with their poles turned opposite ways, and stiffly connected at their centres, so that both will swing together. The one tends always to turn in a direction opposite to the other under the earth's magnetic attraction, so that, if the needles were perfectly alike, we should have a perfectly astatic pair, or a pair that would not tend to assume any particular direction from the magnetic influence of the earth. One of the needles, *ab*, is nearly in the centre of the coil *ODEF* through which the current passes; the other, *a'b'*, just above the coil. When a current traverses the coil in the direction of the arrows the action of all parts of the current upon the lower needle tends to urge the austral pole *a* towards the back of the figure and the boreal pole *b* to the front, while the upper needle, *a'b'*, is affected

principally by the current *CD* of the coil which urges the austral pole *a'* to the front of the figure and the boreal pole *b'* to the back. Both needles are thus urged to rotate in the same direction by the current, and as the opposing action of the earth is greatly enfeebled by the combination a much larger deflection is obtained than would be given by one of the needles if employed alone. In the *tangent galvanometer* a very short magnetic needle is delicately suspended so as to turn in a horizontal plane. The point about which it turns is at the centre of a vertical coil of copper-wire through which the current is passed. The diameter of the coil is at least

ten or twelve times the length of the needle. The needles are therefore usually not more than 1 inch long; and, for convenience of reading its deflections, long light pointers of aluminium or of glass fibre are cemented to its ends. To use the instrument it is placed so that the vertical coil of copper-wire is in the plane of the magnetic meridian. The current is then sent through the coil, and the angle by which the needle is deflected is read off. It is easy to show that under these circumstances the strength of the current is proportional to the tangent of the angle of deflection, whence the name of the instrument. *Thomson's mirror galvanometer* is the most sensitive galvanometer yet invented. Its needle, which is very short, is rigidly attached to a small light concave mirror, and suspended in the centre of a vertical coil of very small diameter by a silk fibre. A movable magnet is provided for bringing the needle into the plane of the coil when the latter does not coincide with the magnetic meridian. Needle, mirror, and magnet weigh only about 14 grain. At a distance of 2 or 3 feet from the mirror is a solid wooden stand, with a graduated scale, facing the mirror. In the stand, just under the centre of the scale, a hole is cut, and a fine wire stretched upright across it. A strong lamp stands behind the opening so that its light will fall on the mirror and be reflected back on the scale. An image of the wire will thus be constantly thrown on the scale, and the slightest motion of the needle and its mirror will produce a much greater motion of this image. As the current flows the one way or the other the index will move to one side or the other. This galvanometer was invented for use on the Atlantic submarine cables. It was long the only instrument with which signals could be read through long submarine lines; and it is still employed to a great extent, though being superseded by the siphon-recorder of the same inventor.

Galvanoplastic (gal-van'ō-plast'ik), *a.* Pertaining to the art or process of electrolytizing; as, the *galvanoplastic art*, that is, electrolytizing.

Galvanoscope (gal-van'ō-skōp), *n.* [*Galvanism*, and Gr. *skopeō*, to examine.] An instrument for detecting the existence and direction of an electric current. A magnetic needle is a galvanoscope.

Galvanoscopic (gal-van'ō-skop'ik), *a.* Of or pertaining to a galvanoscope.

Galwes, *n.* The gallows. *Chaucer.*

Gama-grass (gā-ma-gras), *n.* A species of grass (*Tripsacum dactyloides*), a tall, stout, and exceedingly productive grass cultivated in Mexico, the Southern States of North America, in the West Indies, and to some extent in Europe, said to admit of being cut six times in a season. It bears drought remarkably well. *T. monostachyon* (the Carolina gama-grass) is the only other species known.

Gamasea, Gamasidae (ga-mā'sē-a, ga-mā'sī-dē), *n. pl.* The beetle-mites or spider-mites, a family of Arachnida, order Acarina, distinguished by the absence of eyes, by free, filiform palpi, chelate antennae, and by legs with two claws and a disc or caruncle. They are parasitic, and found on insects, birds, and other animals, generally on the neck. Some infest plants. One species is common in bird-cages, doing serious injury to cage-birds. The species parasitic on poultry lives for a time on the human skin and gives rise to intolerable itching.

Gamashes, Gamaches (ga-mash'ez), *n.* [*O. Fr. gamaches*, *It. gamasce*, spatterdashies, from *L. L. gamba*, hoof, *O. Fr. gambe* (*Fr. jambe*), leg; or the origin may be *Celt. gar*, a shank, through the Languedoc *garumacho*, a legging.] 1. High boots, buskins, or startups.—2. Short spatterdashies worn by ploughmen. [*Scotch.*]

Gamass (ga-mas'), *n.* The bulbs of the gamash or biscuit-root (*Camassia esculenta*) of the North American Indians.

Gamb, Gambe (gamb), *n.* [*O. Fr. gambe*; *Fr. jambe*, a leg.] A leg or shank, a term in *her.* used to express the whole fore-leg of a lion or any other beast. If couped or erased near the middle joint it is then only a paw. Also written *Jambe*.

Gamba (gam'ba), *n.* In *compar. anat.* a term applied to the elongated metacarpus or metatarsus of the ruminants and solidungulates.

Gambado, Gambade (gam-bā'dō, gam'bād'), *n.* [*It. gamba*, the leg.] 1. A spatterdash or gaiter for covering the leg when riding or walking in muddy roads.

His thin legs tenanted a pair of gambadoes fastened at the side with rusty clasps. *Sir W. Scott.*

2. A kind of leather cases attached to a saddle instead of stirrups.

Gambeson, Gambison (gam'bē-zon, gam'bi-zon), *n.* [*O. Fr. gambesson, gambeson, wambais*; *Pr. gambais*; *M. H. G. wambeis*, from *O. H. G. wamba*, *A. Sax. wambe*, *Sc. wame*—womb, stomach. *Comp. G. wams*, doublet.

Wedgwood refers it to Gr. *dambakion*, *dambakion*, a fabric stuffed with cotton, the Gr. *b* being softened in the Western tongues into *w*, which passes into Romance *g*.] A quilted tunic, said to be of German origin, stuffed with wool, fitting the body, and worn under the habergeon. Being strong enough to resist ordinary cuts, it was frequently worn without other armour. Called also *Aeton* and *Hacqueton*.

Quilted Gambeson of the fifteenth century.

Gambet (gam'bet), *n.* [*Fr. gambette*, *O. Fr. gambe*, leg.] One of the sandpipers, of the size of the greenshank, found in the Arctic Sea and in Scandinavia and Iceland. See *TOTANUS*.

Gambier, Gambir (gam'bēr, gam'bir), *n.* [*Malayan.*] An earthy-looking substance of light-brown hue, which is used medicinally as an astringent, but is far more extensively employed in tanning and dyeing. It is

Gambier Plant (*Uncaria Gambier*).

chiefly imported from Singapore, and is yielded by *Uncaria Gambier* and *U. acida*.

Gambison, *n.* See *GAMBESON*.

Gambist (gam'bist), *n.* In *music*, a player on the viol-di-gamba, or viol with six strings.

Gambit (gam'bit), *n.* [*Fr.*; *It. gambetto*, a tripping up of one's legs, or supplanting, from *gamba*, the leg.] In *chess-playing*, the sacrifice of a pawn early in the game, for the purpose of taking up an attacking position.

Gamble (gam'bl), *v. t. pret. & pp. gambled*; *ppr. gambling*. [*Freq. of game*, with *b* inserted, as in *number, humble*.] To play or game for money or other stake.

Gamble (gam'bl), *v. t.* To lose or squander by gaming; with *away*.

Bankrupts or sots who have gambled or slept away their estates. *Ames.*

Gambler (gam'blēr), *n.* One who gambles; one who games or plays for money or other stake.

A gambler's acquaintance is readily made and easily kept,—provided you gamble too. *Lord Lytton.*

Gambling-house (gam'bling-hous), *n.* A gaming-house; a hell.

Gamboge (gam-bōj' or gam-bōj'), *n.* [*From Camboja, Cambodia*, a portion of the empire of Anam, in the Indo-Chinese Peninsula.] A concrete, vegetable, inspissated juice or sap, or gum-resin, yielded by several species of trees. The gamboge of European commerce appears to be mainly derived from *Hebradendron gambogoides* of Graham, or *Garcinia Morella* of Desrousseaux, var. *pedicellata*, also called *G. Hanburii*, a dioecious tree with handsome laurel-like foliage and small yellow flowers, found in Cambodia, Siam, and in the southern parts of Coch-

China. It is yellow, and contained chiefly in the middle layer of the bark of the tree; it is obtained by incision, and issues from

Gamboge Plant (*Garcinia Hanburii*).

the tree in the form of a yellowish fluid, which, after passing through a viscid state, hardens into the gamboge of commerce. It consists of a mixture of resin with 15 to 20 per cent. of gum. Gamboge has drastic purgative properties, but is seldom administered except in combination with other substances. In doses of a drachm or even less it produces death. Other species of *Garcinia* yield a similar drug, which is collected for local use, but not for exportation. The so-called American gamboge is the juice of *Vismia guianensis*.

Gambogian, Gambogie (gam-bōj'i-an or gam-bōj'i-an, gam-bōj'ik or gam-bōj'ik), *a.* Pertaining to gamboge.

Gambol (gam'bol), *v. t. pret. & pp. gambled, gambolled*; *ppr. gamboling, gambolling*. [*O. E. gambolde, gambaude, gambaulde*; of same origin as *Fr. gambade, gambol, gambiller*, to wag the leg or kick, viz. from *O. Fr. gambe*, *It. gamba*, the leg, *Fr. jambe*; *L. L. gamba*, hoof.] 1. To dance and skip about in sport; to frisk; to leap; to play in frolic, like boys and lambs.

Bears, tigers, ounces, pards Gambolled before them. *Milton.*

2. To leap; to start aside.

Bring me to the test, And if the matter will reward; which madness Would gambol from. *Shak.*

Gambol (gam'bol), *n.* A skipping or leaping about in frolic; a skip; a hop; a leap; a sportive prank. 'Beasts in gambols frisk.' *Dryden.*

Gambrel, Gambriel (gam'brel, gam'bril), *n.* [*From It. gamba*, the leg.] 1. The hind-leg of a horse.—2. A stick crooked like a horse's leg, used by butchers for suspending animals while dressing them.

Spied two of them hung out at a stall, with a gambrel thrust from shoulder to shoulder, like a sheep that was new-flayed. *Chapman.*

—**Gambrel roof**, a hipped roof; a mansard or curved roof.

Gambrel, Gambriel (gam'brel, gam'bril), *v. t.* To tie or hang up by means of a gambrel thrust through the legs. 'I'll carry you gambrell'd like a mutton.' *Beau. & Fl.*

Gambroon (gam-brōn'), *n.* In *manuf.* a kind of twilled linen cloth, used for linings.

Game (gām), *n.* [*A. Sax. gamen, gomen*, joy, pleasure; *Icel. gaman*, delight, gratification; *O. G. gaman*, jest, sport. *Gammion*, humbug, is of same origin.] 1. Sport of any kind; jest; play. 'Twixt earnest and game.' *Milton.*

We have had pastime here and pleasing game. *Shak.*

2. Any contrivance or arrangement for the purpose of sport, recreation, amusement, testing skill or strength, and the like; as, a game of chance; the game of cricket; *Highland games*; specifically (*pl.*), in *class. antiq.* diversions or contests, as in wrestling, running, throwing the discus, &c., usually instituted in honour of some event, and exhibited for the amusement of the people; as, the Nemean games; Pythian games; Olympian games; Circensian games.—3. The act of playing at any such game; a single contest in any such game; as, a game at cards, cricket, chess.—4. The prize or stakes in any such game.—5. The requisite number of points or advantages to be gained in order to win any such game; the performance of whatever is necessary to be victorious in any game; as, in cribbage 61 is game.—6. Field sports, as the chase, falconry, &c.

Some sportsmen that were abroad upon game. *L'Estrange.*

7. Animals pursued or taken in the chase or in the sports of the field; birds and beasts obtained by fowling and hunting; specifically, the animals enumerated under this

designation in the game-laws.—8. Scheme pursued; measures planned.

This seems to be the present game of that crown.
Sir W. Temple.

9. Amorous sport; gallantry.

Set them down
For sluttish spoils of opportunity
And daughters of the game. *Shak.*

—To make game of, formerly, to make a game of, to turn into ridicule; to delude or humbug.

Do they not seek occasion of new quarrels
On my refusal to distress me more,
Or make a game of my calamities? *Milton.*

Game (gām), *v. i.* pret. & pp. *gamed*; ppr. *gaming*. [A. Sax. *gāman*, to play. See the noun.] 1. To play at any sport or diversion. 2. To play for a stake or prize; to use cards, dice, billiards, or other instruments, according to certain rules, with a view to win money or other thing waged upon the issue of the contest; to be in the habit of so doing; to gamble.

Avarice itself does not calculate strictly when it games. *Burke.*

Game (gām), *a.* 1. Of or belonging to such animals as are hunted as game; as, a *game pie*; a *game preserve*.—2. Having the plucky, unyielding spirit of a game-cock; courageous; resolute.

I was game. . . I felt that I could have fought even to the death. *W. Irving.*

3. Ready, willing, or prepared to do something; as, are you *game* for five shillings? = Are you willing to lend or subscribe five shillings? [Slang.]—To be *game*, in playing at cards and the like, to have attained the requisite number of points to win; to be victorious.—To *die game*, to maintain a bold, resolute, courageous spirit to the last.

Game (gām), *a.* [W. *cam*, crooked.] Crooked; lame; as, a *game leg*. [Slang.]

Game-bag (gām'bag), *n.* A bag for holding the game killed by a sportsman.

Game-cock (gām'kok), *n.* A cock bred or used to fight; a cock of a good fighting breed.

Game-egg (gām'eg), *n.* An egg from which a fighting cock is bred.

Game-fowl (gām'foul), *n.* A fowl bred or kept for the purpose of fighting.

Gameful (gām'fūl), *a.* 1. Full of sport or games; sportive.—2. Full of game or beasts of sport. 'Gameful woods.' *Pope.*

Gamekeeper (gām'kēp-ēr), *n.* One who has the care of game; one who is employed to look after animals kept for sport.

Game-laws (gām'laz), *n. pl.* Laws enacted with regard to, or for the preservation of, the animals called game.

Gameless (gām'les), *a.* Destitute of game.

Gamey (gām'li), *adv.* In a game or courageous manner.

Gameiness (gām'nes), *n.* The quality of being game or having an unyielding spirit; courage; pluckiness.

There was no doubt about his gameiness. *Hughes.*

Game-preserved (gām'prē-zēv-ēr), *n.* A landowner or lessee of game, who strictly preserves it for his own sport or profit. The term is generally applied to those who preserve so strictly that the game becomes a nuisance to the farmers whose crops are subject to its depredations.

Gamesome (gām'sum), *a.* Gay; sportive; playful; frolicsome. 'Then ran she gamesome as a colt.' *Tennyson.*

Gamesomely (gām'sum-li), *adv.* Merrily; playfully.

Gamesomeness (gām'sum-nes), *n.* The quality of being gamesome; sportiveness; merriment.

Gamester (gām'stēr), *n.* [Game, and the suffix -ster.] 1. One who games; a person addicted to gaming; one who is accustomed to play for money or other stake at cards, dice, billiards, and the like; a gambler; one skilled in games.

A gamester, the greater master he is in his art, the worse man he is. *Bacon.*

2. A merry frolicsome person.

My lord Sands. You are a merry gamester. *Shak.*

3. A prostitute. 'A common gamester to the camp.' *Shak.*

Gamey (gām'i), *a.* Same as *Gamy* (which see).

Gamic (gām'ik), *a.* In zool. pertaining to or connected with the congress of the sexes; sexual.

In each ovum, along with the rudiments of agamic eggs, or eggs which, if developed, produce young by true parthenogenesis, there usually, if not always, exists the rudiment of an ephippial egg; which, from sundry evidences, is inferred to be a sexual or *gamic* egg. *Fr. Spencer.*

Gamin (gam'in, ga-mān), *n.* [Fr.] A neglected street boy; an Arab of the streets.

The word *gamin* was printed for the first time, and passed from the populace into literature in 1834. It made its first appearance in a work called *Claude Gueux*: the scandal was great but the word has remained. . . The *gamin* of Paris at the present day, like the *Graculus* of Rome in former time, is the youthful people with the wrinkle of the old world on its forehead. *Trans. of Victor Hugo.*

In Japan the *gamins* run after you and say, 'Look at the Chinaman.' *Laurence Oliphant.*

Gaming-house (gām'ing-hous), *n.* A house where gaming is practised; a hell.

Gaming-table (gām'ing-tā-bl), *n.* A table appropriated to gaming.

Gamma (gam'ma), *n.* Same as *Gamut*.

Gammaridæ (gam-ma'ri-dē), *n. pl.* [L. *gammarus*, Gr. *gammaros*, a crab, and *eidos*, resemblance.] The sand-hoppers, a family of amphipodous crustaceans, of which the genus *Gammarus* is the type.

Gammarolite (gam-ma'rol-it), *n.* [L. *gammarus*, Gr. *gammaros*, a crab, and *lithos*, a stone.] A fossil crawfish or other crustacean.

Gammarus (gam'ma-rus), *n.* A genus of amphipodous crustaceans, of which the fresh-water shrimp is a species.

Gammer (gam'mēr), *n.* [Contr. for good-mother or grandmother. Comp. *gaffer*.] An old wife: the correlative of *gaffer*.

Delude the pious dames and *gamblers*,
To think their mumbling guides' precaton
So full of heavenly inspiration. *Hudibras Redivivus.*

Gammon (gam'mun), *n.* [Fr. *jambon*, It. *gambone*, a big leg, a gammon, from *gamba*, a leg; L. *gamba*, a hoof.] The buttock or thigh of a hog, pickled and smoked or dried; a smoked ham.

Gammon (gam'mun), *v. t.* 1. To make into bacon; to pickle and dry in smoke.—2. *Naut.* to fasten a bowsprit to the stem of a ship by several turns of a rope.

Gammon (gam'mun), *n.* [Connected with *game*. Comp. Dan. *gammen*, sport.] 1. A game called usually *Back-gammon* (which see).—2. An imposition or hoax; humbug. [Colloq. or slang.]

The gentry say death and distress are all *gammon*,
And shut up their hearts to the lab'rer's appeal.

Gammon (gam'mun), *v. t.* [See the noun.] 1. In the game of *back-gammon*, to beat or excel, by withdrawing, either by superior skill or more fortunate throws of the dice, all one's men from the board, before one's antagonist has been able to get his men home, and withdraw any of them from the board.—2. To impose on by means of improbable stories; to delude; to humbug. 'He *gammoned* me with a trumped-up story.' *La-tam.* [Colloq.]

Gammoning (gam'mun-ing), *n.* *Naut.* the lashing by which the bowsprit is bound firmly down to the cutwater, in which is a hole for the purpose of reefing several turns of it.—*Screw-gammoning*, a chain or plate fastened by means of a screw used in some vessels for convenience in tracing up the bowsprit when required.

Gammoning-hole (gam'mun-ing-höl), *n.* *Naut.* a hole cut through the knee of the head of a ship for the purpose of gammoning the bowsprit.

Gammon-plate (gam'mun-plāt), *n.* *Naut.* see GAMMON-SHACKLES.

Gammon-shackles (gam'mun-shak-lz), *n.* *Naut.* a ring to which the gammoning is made fast; it is formed on the end of an iron plate bolted to the stern called the *gammon-plate*.

Gammut (gam'ut), *n.* Same as *Gamut* (which see).

Gammy (gam'mi), *a.* In *vagrants' slang*, bad; unfavourable.

Gamogenesis (ga-mo-jen'e-sis), *n.* [Gr. *gamos*, marriage, and *genesis* (which see).] Generation by copulation of the sexes; sexual generation.

The kind of *genesis*, once supposed to be universal, in which the successive generations are alike, is always sexual *genesis*, or, as it has been otherwise called, *gamogenesis*. *H. Spencer.*

Gamogenetic (ga-mo-jen-et'ik), *a.* Of or relating to *gamogenesis*.

Gamomorphism (ga-mo-mor'fiz), *n.* [Gr. *gamos*, marriage, and *morphē*, shape.] That stage of development of organized beings in which the spermatic and germinal elements are formed, matured, and generated, in preparation for another act of fecundation, as the commencement of a new genetic cycle. *Brande & Cox.*

Gamopetalous (ga-mo-pet'al-us), *a.* [Gr.

gamos, marriage, union, and *petalon*, a flower-leaf.] In bot. same as *Monopetalous* (which see).

Gamophyllous (ga-moff'il-us or ga-mo-fil'-us), *a.* [Gr. *gamos*, marriage, union, and *phyllon*, a leaf.] In bot. having a single perianth-whorl with coherent leaves; symphyllous; opposed to *apophyllous*. *Sachs.*

Gamosespalous (ga-mo-sep'al-us), *a.* [Gr. *gamos*, marriage, and *E. sepal* (which see).] In bot. same as *Monosespalous* (which see).

Gamut (gam'ut), *n.* [Gr. *gamma*, the letter G, and L. *ut*, the syllable used in singing the first note of the scale.] In music, (a) the first or gravest note in Guido's scale of music, the modern scale. (b) A scale on which notes in music are written or printed, consisting of lines and spaces which are named after the first seven letters of the alphabet.

Long has a race of heroes fill'd the stage,
That rant by note, and through the *gamut* rage. *Addison.*

Gamy (gām'i), *a.* 1. Having the flavour of game; having the flavour of game kept uncooked till it is slightly tainted; as, the venison was in fine *gamy* condition.—2. Courageous; plucky; game; as, a *gamy* little fellow. [Colloq.]

Gan (gan), *v.* [A contraction of *began*, or from a simple A. Sax. *gimman*. A form *can* was used in the same way.] An old English auxiliary equivalent to *did*. 'Melting in tere, then *gan* shee thus lament.' *Spenser.*

Ganch, Gaunch (gansh, gansh), *v. t.* [Fr. *ganche*, It. *gancio*, a hook.] To drop from a high place on hooks, as the Turks do malefactors, by way of punishment.

Take him away, *ganch* him, impale him, rid the world of such a monster. *Dryden.*

Gander (gan'dēr), *n.* [A. Sax. *gandra*. 'The d and r in *gander* are merely euphonic; a is the masculine suffix and the root is *gan* = *gans*, a goose; comp. Icel. *gás*, a goose, *gusi*, a gander; also G. *gans*, Gr. *chen*, L. *anser* (= *hanser*).] *Morris*. Comp. also Sk. *hansa*, a goose. See GOOSE.] The male of the goose.

Gane (gān), pp. of *gae*, to go. [Scotch.] **Gang** (gang), *v. i.* [A. Sax. *gangan*, Goth. *gagan*, to go.] To go; to walk. [Old English and Scotch.]

But let them *gang* alone. . .
As they have brewed, so let them bear blame. *Spenser.*

Your flaunting beaus *gang* with their breasts open. *Arbuthnot.*

Gang (gang), *n.* [A. Sax. *gang*, a way, a passage, a gallery, from *gangan*, to go; whence also *geuge*, a number going together, a gang, a company. See GO.] 1. A number going in company; hence, a company or a number of persons associated for a particular purpose or on a particular occasion: used especially in a depreciatory or contemptuous sense or of disreputable persons; as, a *gang* of thieves. 'There's a knot, a *gang*, a pack, a conspiracy against me.' *Shak.* More specifically.—2. A number of workmen or labourers of any kind engaged on any piece of work under the supervision of one person; a squad.—3. In *mining*, literally a course or vein, but applied to the earthy, stony, or other substance which incloses the ore of metals, or is only mingled with it without being chemically combined; the matrix of ore. [In this sense often written *Gangue*.]—4. The channel of a stream or course in which it is wont to run; a water-course. Hence.—5. A ravine or gully. [Provincial.]—6. As much as one goes for or carries at once. [Scotch.]

To please you, mither, did I milk the kye,
An' bring a *gang* o' water frae the burn. *Donald and Flora.*

7. The field or pasture in which animals graze; as, those beasts have a good *gang*. [Scotch.]

Ganga (gang'ga), *n.* A Spanish name given to the birds of the genus *Pterocles* or sand-grouse. See SAND-GROUSE.

Gang-board (gang'bōrd), *n.* 1. A board or plank with cleats for steps, used for walking into or out of a boat.—2. A term applied to planks placed within or without the bulwarks of a vessel's waist for the sentinel to walk or stand on.

Gang-bye (gang'bi), *n.* The go-by. [Scotch.]

Mercy on me, that I sud live in my auld days to gie the *gang-bye* to the very writer. *Sir W. Scott.*

Gang-cask (gang'kask), *n.* A small cask used for bringing water aboard ships in boats.

Gang-day (gang'dā), *n.* [A. Sax. *gang-deg*.] A day of perambulation of parishes; a rogation-day. See GANG.

Ganger (gang'ēr), *n.* 1. One who conducts or

superintends a gang or band, as the foreman of a gang of labourers or plate-layers on a railway.—2. One who gangs or goes; a walker. *Sir W. Scott.* [Scotch.]
Gangetic, Gangic (gan-jet'ik, gan'jik), *a.* Relating to the river Ganges.
Ganging-plea (gang'in-plē), *n.* A long-continued plea; a permanent or hereditary process. [Scotch.]

But I thought you had some law affair of your ain to look after—I have ane myself—a *ganging-plea* that my father left to me, and his father afore left to him. *Sir W. Scott.*

Gangliac, Ganglial (gang'gil-ak, gang'gil-al), *a.* Relating to a ganglion.

Gangliated (gang'gli-āt-ed), *a.* Having ganglions; intermixed or intertangled with enlargements at the intersections.

Gangliiform, Gangliiform (gang'gli-form, gang'gli-o-form), *a.* [Gr. *ganglion*, a tumour, and *L. forma*, shape.] Having the shape of a ganglion.

Ganglion (gang'gli-on), *n. pl. Ganglia* or **Ganglions** (gang'gli-a, gang'gli-onz). [Gr. *ganglion*, a sort of swelling or excrescence, a tumour under the skin.] 1. In *anat.* an enlargement occurring somewhere in the course of a nerve, and containing bipolar or multipolar nerve cells in addition to nerve filaments. There are two systems of nerves which have ganglia upon them. First, those of common sensation, whose ganglia are near to the origin of the nerve in the spinal cord. Secondly, the great sympathetic nerve, which has various ganglia on various parts of it. In the invertebrates these ganglia are centres of nervous force, and are distributed through the body in pairs, for each ring of the body, con-

nected by fibres as in the figure. The cerebral ganglia of vertebrates are the brain itself, the masses of gray matter at the base of the brain, as the optic thalamus, &c.—2. In *surg.* an encysted tumour situated somewhere on a tendon, formed by the elevation of the sheath of the tendon, and the effusion of a viscid fluid into it.—3. In *bot.* the mycelium of certain fungi.—*Lymphatic ganglion*, a lymphatic gland.

Ganglionic (gang'gli-on-ik), *a.* Composed of ganglia.

Ganglioneura (gang'gli-ō-nē'ra), *n.* [Gr. *ganglion*, a tumour under the skin, and *neuron*, a sinew, a nerve.] A name applied by Rudolphi to the molluscous and articulate divisions of the animal kingdom which are characterized by a ganglionic type of the nervous system.

Ganglionic (gang'gli-on'ik), *a.* Pertaining to a ganglion; as, the *ganglionic* nerves of the digestive organs; or the *ganglionic* nerves of common sensation.

Ganglionica (gang'gli-on'ik-a), *n. pl.* [Gr. *ganglion*, a tumour.] In *med.* a class of medicinal agents which affect the sensibility or muscular motion of parts supplied by the ganglionic or sympathetic system of nerves.

Ganglionitis (gang'gli-on-ī'tis), *n.* [Gr. *ganglion*, a tumour.] In *pathol.* inflammation of a nervous ganglion. Sometimes used for inflammation of a lymphatic ganglion.

Gang-master (gang-mas'ter), *n.* A master or employer of a gang or body of workers; one who hires a band of persons to perform some specified task.

Gang-plough (gang-plon), *n.* A plough with more than one ploughshare stocked in one frame.

Gang-punch (gang-punsh), *n.* An arrangement of several punches in a single stock.

Gangrel (gang-rel), *n.* One who gangs or goes; specifically, (a) a child just beginning to walk. (b) A vagrant. [Scotch.]

Gangrel (gang-rel), *a.* Vagrant; vagabond.
Gangrenate (gang'rēn-āt), *v. t.* pret. & pp. *gangrenated*; ppr. *gangrenating*. To produce a gangrene in; to gangrene.

Gangrene (gang'rēn), *n.* [Fr., from *L. gangraena*; Gr. *gangraina*, from *grāo*, *graino*, to gnaw, to eat.] 1. In *pathol.* the first stage of mortification of living flesh: so called

from its eating away the flesh.—2. In *bot.* a disease ending in putrid decay.

Gangrene (gang'rēn), *v. t.* pret. & pp. *gangrened*; ppr. *gangrening*. To produce a gangrene in; to mortify.

In cold countries when men's noses and ears are mortified, and, as it were, *gangrened*. *Bacon.*

Gangrene (gang'rēn), *v. i.* To become mortified.

Wounds immedicable
 Rattle and fester, and *gangrene*
 To black mortification. *Milton.*

Gangrenescent (gang'rēn-es'sent), *a.* Becoming gangrenous; tending to mortification.

Gangrenous (gang'rēn-us), *a.* Mortified; indicating mortification of living flesh.

Gang-saw (gang'sā), *n.* An arrangement of several saws fitted parallel to one another in one sash or frame.

Gang-there-out (gang'thēr-ūt), *a.* Vagrant; vagabond; leading a roaming life.

I am a lone woman, for James he's awa' to Drum-shourloch fair with the year-auids, and I daurna for my life open the door to ony o' your *gang-there-out* sort o' bodies. *Sir W. Scott.*

Gangtide, *n.* See GANGWEEK.

Gangue (gang), *n.* See GANG, 3.

Gangway (gang'wā), *n.* 1. A passage; a temporary access to a building while in the course of erection, formed by an inclined plane of wooden planks, with pieces nailed across their surface to prevent the feet slipping; way or avenue into or out of any inclosed place, especially a passage into or out of a ship, or from one part of a ship to another; also a narrow platform of planks laid horizontally along the upper part of a ship's side, from the quarter-deck to the fore-castle.—2. In the *House of Commons*, a passage across the house, which separates the ministry and opposition with their respective adherents, who sit on seats running along the sides of the house, from the neutral or independent members, who occupy seats running across. Hence, the phrase *to sit below the gangway*, as applied to a member, implies that he holds himself as bound to neither party, but free to vote with either as he shall judge right.—*To bring to the gangway* (*navit.*), to punish a seaman by seizing him up and flogging him.

Gangweek, Gangtide (gang'wēk, gang'tid), *n.* Rogation week, when processions are made to survey the bounds of parishes.

It (birch) serveth well . . . for beautifying of streets in the crosse or *gang-week*, and such like. *Gerard.*

Ganil (gan'il), *n.* [Fr.] A kind of brittle limestone. *Kirwan.*

Ganister, Gannister (gan'is-tēr), *n.* A close-grained hard sandstone or grit found under certain coal-beds in the lower coal measures of Derbyshire, Yorkshire, Lancashire, &c. It is used for macadamizing roads, and also for lining iron furnaces and the Bessemer converter.

Ganjah, Gunjah (gan'jā, gun'jā), *n.* The name for the hemp plant in the north of India; specifically, the dried plant which has flowered, and from which the resin has not been removed: it is sold for smoking like tobacco.

Gannet (gan'et), *n.* [A. Sax. *ganet*, *ganot*, a sea-fowl, a fen-duck; allied to *gander*, *goose*.] The solan goose, a bird of the genus *Sula*

Gannet or Solan Goose (*Sula Bassana*).

(*S. Bassana*), family Pelicanidae, measuring about 3 feet in length, and about 6 feet between the tips of the wings. It has a straight bill, 6 inches long, and palmated feet. The colour is chiefly white, with the tips of the wings black, and it feeds on various small fishes, chiefly herring. Great numbers of these birds frequent the Hebrides, St. Kilda, Ailsa Craig, and the Bass Rock. Many of

the old birds are annually taken, on account of the feathers and down, and the young are sometimes eaten. The species also occurs on the eastern coasts of North America and Labrador.

Ganoccephala (ga-no-sef'al-a), *n. pl.* [Gr. *ganos*, lustre, and *kephale*, the head.] Owen's name for a group of fossil labyrinthodonts, with polished horny or ganoid plates covering the head, a character which, however, is common to the order.

Ganoccephalous (ga-no-sef'al-us), *a.* Having the head covered by shining polished plates.

Ganoid, Ganoidal (gan'oid, gan-oid'al), *a.* [Gr. *ganos*, splendour, and *eidos*, appearance.] 1. A term applied to those scales or plates of fishes which are composed of an inferior layer of true bone, covered by a superior layer of polished enamel.—2. Belonging to the order Ganoides.

Ganoid (gan'oid), *n.* A fish of the order Ganoides.

Ganoides (gan-oid'ē-i), *n. pl.* [Gr. *ganos*, splendour, and *eidos*, appearance.] The second order of fishes according to the arrangement of M. Agassiz. The families of

Scales of different fossil genera of Ganoidians.

1, Lepidosteus. 2, Cheiracanthus. 3, Palaeoniscus. 4, Cephalaspis. 5, Dipterus. 6, Acipenser.

this order are characterized by angular rhomboidal, polygonal or circular scales, composed of horny or bony plates, covered with a thick plate of glossy enamel-like substance, by the presence of a spiral valve in the intestines, by the optic nerves uniting in a chiasma, and by free gills protected by a gill cover. The bony pike and sturgeon are of this order. It contains many genera, of which the majority are extinct.

Ganoidian (gan-oid'i-an), *a.* Same as *Ganoid*.

Ganoidian (gan-oid'i-an), *n.* Same as *Ganoid*.

Ganoina (gan'ō-in), *n.* The peculiar bony tissue which gives the enamel-like lustre and transparency to the plates of ganoid fishes and of some labyrinthodonts. It is simply dense homogeneous bone.

Gantlet (gant'let), *n.* Same as *Gaumtlet*.

Gantlet (gant'let), *n.* [Nasalized from Sw. *gatlapp*, from *gata*, a street, a line of soldiers, and *lapp*, a course; D. *loopen*; Sc. *lopp*, to run.] A military punishment inflicted on criminals for some heinous offence. It was executed in this manner: soldiers were arranged in two rows, face to face, each armed with a switch or instrument of punishment; between these rows the offender, stripped to his waist, was compelled to pass a certain number of times, and each man gave him a stroke. A similar punishment was used on board of ships.—*To run the gantlet*, to undergo the punishment of the gantlet; hence, to go through much and severe criticism, controversy, or ill-treatment.

Winthrop ran the *gantlet* of daily slights from his neighbours. *Palfrey.*

Gantlope (gant'lōp), *n.* The original form of *Gantlet*, a military punishment.

He is fain to run the *gantlope* through the terrors and reproaches of his own conscience. *Dr. John Scott.*

Gantry (gan'tri), *n.* Same as *Gaumtree*.

Ganymede (ga'ni-mēd), *n.* In *class. myth.* a youth carried off by Jupiter, in eagle-form, and made cup-bearer to the immortals.

Ganza (gan'za), *n.* [Sp. *gansa*, *gansa*, gander, goose. See GANDER.] One of the birds (a species of wild goose) which, in the fictitious work of Cyrano de Bergerac (1649), relating the journey of Dominique Gonzales, Spanish adventurer to the moon, are represented drawing thither the chariot of Gonzales.

They are but idle dreams and fancies, And savour strongly of the *ganzas*. *Hudibras.*

Gaol (jāl), *n.* Same as *Jail*.

Gaol (jāl), *v. t.* Same as *Jail*.

Gaol-bird (jāl'berd), *n.* Same as *Jail-bird*.

Gaol-delivery (jāl'dē-li-vē-ri), *n.* Same as *Jail-delivery*.

Gaoler (jāl'er), *n.* A jailer.

Gaol-fever (jäl'fë-vér), *n.* Same as *Jail-fever*.

Gaon (gä'on), *n.* [Heb., exaltation.] One of an order of Jewish doctors, who appeared after the closing of the Talmud.

Gap (gap), *n.* [From *gape*; Icel. *gap*, a hiatus.] A break or opening, as in a fence, wall, or the like; a breach; a chasm; an entrance; a hiatus; hence, a vacant space or time; a defect or flaw, as in honour or reputation.

From the *gaps* and chasms . . .
Came men and women in dark clusters round.

Manifold miseries ensued by the opening of that gap to all that side of Christendom. *Knolles*.

A third can fill the gap with laughing. *Swift*.
If you violently proceed against him, mistaking his purpose, it would make a great gap in your honour. *Shak*.

—To stop a gap, to secure a weak point; to repair a defect; to supply a temporary expedient.

His policy consists in setting traps,
In finding ways and means, and stopping gaps. *Swift*.

—To stand in the gap, to expose one's self for the protection of something; to make defence against any assailing danger. *Ezek.* xxii. 30.

Gape (gäp), *v.i.* pret. & pp. *gaped*; ppr. *gaping*. [A. Sax. *geapan*; Dan. *gäbe*, Icel. *gäpa*, to gaze with open mouth; D. *gäpen*, G. *gäpfen*, to gape.] 1. To open the mouth wide, as (a) expressing a desire for food; as, the young birds *gape*. (b) Indicative of sleepiness, drowsiness, dullness, or indifference; to yawn.

She stretches, *gapes*, unglues her eyes,
And asks if it be time to rise. *Swift*.

(c) Indicative of wonder, surprise, astonishment, or the like; as, the *gaping* crowd. 'With *gaping* astonishment had stared agast.' *Byron*. (d) Expressing earnest desire or expectation.

Others will *gape* t' anticipate
The cabinet designs of fate. *Hudibras*.

(e) Manifesting a desire to injure, devour, or overcome.

They have *gaped* upon me with their mouth. *Job* xvi. 10.

2. To open as a gap; to show a fissure or chasm.

May that ground *gape* and swallow me alive. *Shak*.
—To *gape* for, after, and sometimes at, to crave; to desire or covet earnestly. 'Thou, who *gap'st* for my estate.' *Dryden*.

What shall we say of those who spend their days in *gaping* after court favour and preferment? *Sir R. L'Estrange*.

Many have *gaped* at the church revenues; but, before they could swallow them, have had their mouths stopped in the churchyard. *South*.

Gape (gäp), *n.* 1. The act of gaping.

The mind is not here kept in a perpetual *gape* after knowledge. *Addison*.

2. In *zool.* the width of the mouth when opened, as of birds, fishes, &c.—3. *pl.* A disease of young poultry attended with much gaping. It is due to the presence of a trematoid worm (*Fasciola trachealis*) in the windpipe.

Gaper (gäp'ér), *n.* 1. One who gapes, as for food, from sleepiness, drowsiness, or dullness, in wonder, astonishment, longing desire, expectation, or the like.

The golden shower of the dissolved abbey lands rained well near into every *gaper's* mouth. *Carew*.

2. A bivalve mollusc, as the species of *Mya*, *Saxicava*, &c., whose shell is permanently open at the posterior end.

Gap-seed (gäp'séd), *n.* What causes gaping; a humorous term for a foolish or idle staring with ignorant wonder and with the mouth open; the effect produced on an ignorant person by some wonderful exhibition or sight.

These, tho' they pretend to be thought fools, will not be the only fools there, nor to be compar'd with those who, in an eager pursuit after diversion, stand with their eyes and their mouths open, to take in a cargo of *gap-seed*, while some a little too nimble for them pick their pockets. *Poor Robin*, 1735.

Gap-toothed (gäp'tüht), *a.* Having interstices between the teeth.

A grey and *gap-toothed* man as lean as death. *Tennyson*.

Gar (gär), [A. Sax. *gär*, a dart.] 1. An element in proper names derived from the Anglo-Saxon; as, *Edgar* or *Eadgar*, happy weapon; *Ethelgar*, noble weapon.—2. A name given to the several species of the genus of fishes *Belone*, from their long slender body and acute dart-like head, as *B. vulgaris* (the garfish or sea-pike), *B. truncata* (the banded

garfish of America), as also to a ganoid fish of the genus *Lepidosteus* found in the fresh waters of America. The head of one species, the alligator gar, is somewhat like that of an alligator. It attains the length of 10 feet. See *GARFISH*.

Gar (gär), *v.t.* [Icel. *göra*, Dan. *göre*, Sw. *göra*, to make.] To cause; to make; to force; to compel. [Old English and Scotch.]

Get warmly to your feet
An' gar them hear it. *Burns*.

Garage (gä'rä; French pron. gä-räzh), *n.* [Fr. *garage*, from *garer*, to lay up a ship, a vehicle, &c., while not employed; whence also *gare*, a railway terminus.] A place where automobiles or motor vehicles are kept; a shed or store for motor vehicles, or place where they may be kept till required. The word, like the thing, is of quite recent introduction.

There are now *garages* established in Bombay, where automobiles may be hired by the hour. *Board of Trade Journal*, Nov. 9, 1905.

Garancin, Garandine (gär'an-sin), *n.* [Fr. *garance*, madder.] A product obtained from madder, which is found to yield better results in dyeing than madder itself, the colours produced by it being more brilliant and requiring less after-treatment, while the portions of the fabric desired to be kept white attract hardly any colour.

Garangan (gär'an-gan), *n.* A Javanese species of ichneumon, the *Herpestes javanicus*. It is about the size of a large water-rat, and abounds in the teak forests, preying on snakes, birds, and small quadrupeds. The natives assert that, when it attacks a snake, it puffs up its body and induces the snake to twine itself round its inflated person. It then suddenly contracts itself, slips from the reptile's coils, and darts upon its neck. There is some foundation for this assertion in the fact that the *garangan* does possess the power of inflating and contracting its body with great rapidity.

Garavance, Calavance (gär'a-vans, kal'a-vans), *a.* Name for several kinds of pulse, including *Dolichos barbadensis* and *D. sinensis*.

Garb (gärb), *n.* [O. Fr. *garbe*, a garb, appearance, comeliness; It. Sp. *garbo*, garb, carriage, comeliness—of Teutonic origin; comp. A. Sax. *gearwa*, clothing, preparation, *gearu*, prepared; E. *gear*, *geer*, O.E. *yare*, ready; O.H.G. *garawu*, *garwi*, attire, *garawan*, to make ready.] 1. Clothing; clothes; vesture; habit; specifically, an official or other distinguishing dress. 'The judge was arrayed in his official *garb*.' *Daily Telegraph*. 2. Fashion or mode, now, specifically, of dress, but formerly also of speech, manner, and the like; mode of doing anything; exterior appearance; deportment. 'He wears the *garb* but not the clothes of the ancients.' *Denham*. 'He could not speak English in the native *garb*.' *Shak*. 'Pausanias began to live after the Persian *garb*.' *Usher*. 'Commanding peace even with the same austerity and *garb* as he controlled the war.' *Shak*.

Garb, n. In *her.* see *GARBE*.

Garbage (gärb'äzh), *n.* [O.E. *garbash*, probably from *garble*, to sift. *Garbage* thus properly means what is sifted out, refuse.] The bowels of an animal; refuse parts of flesh; offal; hence, the refuse animal or vegetable matter of a kitchen; hence, any worthless, offensive matter, as immoral writings and the like.

So lust, though to a radiant angel link'd,
Will sate itself in a celestial bed,
And prey on *garbage*. *Shak*.

Garbaged (gärb'äjd), *a.* Stripped of the bowels.

Garbe, Garb (gärb), *n.* [Fr. *gerbe*, Sp. *garba*, G. *garbe*, O.H.G. *garba*, sheaf.] In *her.* a sheaf of any kind of grain, but specifically, a sheaf of wheat—supposed to be the emblem of summer, when other than wheat the kind must be expressed.

Garbed (gärb'd), *a.* Dressed; habited.

Garbel, n. See *GARBLE*.

Garbel (gärb'el), *n.* The plank next the keel of a ship. See *GARBOARD-STREAK*.

Garble (gärb'l), *v.t.* pret. & pp. *garbled*; ppr. *garbling*. [O. Fr. *garbeller*, to sift, to examine nearly; Sp. *garbillar*, to sift, *garbillo*, a coarse sieve; from *Ar. gharbil*, a sieve, or *L. cribellum*, dim. of *cribrum*, a sieve.] 1. To sift or bolt; to separate the fine or valuable parts from the coarse and useless parts, or from gross or dirt; as, to *garble* spices.

Dr. Gwinne with seven others were appointed commissioners (in 1860) for *garbling* tobacco. *Dr. Ward*.

2. To select and cull such parts of as may serve a purpose; to mutilate so as to give a false impression of; to sophisticate; to corrupt.

This word is never now used in its primary sense, and has indeed undergone this further change, that while once to *garble* was to sift for the purpose of selecting the best, it is now to sift with a view of picking out the worst. *Trench*.

The materials for the history of a people are more extensive, more indirect, and therefore less liable to be *garbled*, than are those for the history of a government. *Buckle*.

Garble, Garbel (gärb'l), *n.* 1. Anything that has been sifted or from which the coarse parts have been removed.

And thereby (by avoidupois weight) are weighed all kind of grocerie wares, physical drugs, . . . and all other commodities not before named (as it seemeth), but especially every thing which beareth the name of *garbel*, and whereof issueth a refuse or waste.

2. *Garbage*; refuse separated from goods, as spices, drugs, &c.; hence, in the following extract, applied to a low mean fellow:—

How did the bishop's wife believe
On this most sacrilegious slave?
Did not the lady smile upon the *garble*? *Wolcott*.

Garbler (gärb'lér), *n.* One who garbles, sifts, or separates; as, the *garbler* of spices, a former officer in London who looked after the purity of drugs and spices; hence, one who culls out or selects to serve a purpose.

A further secret in this clause may best be discovered by the projectors, or at least the *garblers* of it. *Swift*.

Garboard-plank (gärb'örd-plangk), *n.* *Naut.* the first plank fastened next the keel on the outside of a ship's bottom.

Garboard-streak, Garboard-strake (gärb'örd-strék, gärb'örd-sträk), *n.* *Naut.* the first range or streak of planks laid on a ship's bottom next the keel.

Garboil (gärb'oil), *n.* [O. Fr. *garbouil*, It. *garbuglio*, a great stir or noise, a tumult.] Tumult; uproar; disorder.

Look here, and at thy sov'reign leisure read
The *garboils* she awak'd. *Shak*.

Garce (gärs), *n.* An Indian measure of capacity for grain, oil, seeds, &c., equal to 1154.0830 imperial gallons.

Garcinia (gär'sin'i-a), *n.* [In honour of Dr. *Garcin*, an eastern traveller, who first described it.] A genus of *Clusiaceae*, consisting of opposite-leaved trees, with pinkish white or yellow flowers arranged in clusters in the axils of the leaves or in panicles at the end of the twigs; they are chiefly found in India and the Malay Archipelago. The mangosteen-tree (*G. Mangostana*) is a species of this genus; other species furnish gamboge (which see).

Gard (gärd), *v.* and *n.* Same as *Guard*.

Gard (gärd), *n.* Yard; garden. 'Trees of the *gard*.' *Beaumont*.

Gardant, Guardant (gärd'ant, gärd'ant), *ppr.* [Fr.] In *her.* a term applied to any animal (except the

hart, stag, buck, or hind) full-faced or looking at the observer, whether the animal be passant, rampant, or otherwise. When a beast of chase is represented in this position it is said to be at *gaze*.

Garde-brace, Garde-bras (gärd'bräs, gärd'brä), *n.* [Fr. *garde-bras*, arm-guard.] An additional piece of armour fastened to the elbow-plates, and covering the elbow and upper part of the arm; used in the fifteenth century.

Garden (gärd'n), *n.* [From Teut. root but directly from the O. Fr. *gärdin*; comp. *L.G. garten*, G. *garten*, Goth. *gards*, A. Sax. *geard*, O.E. *garth*, O.H.G. *garto*, *karto*, an inclosed place, a yard, a garden; A. Sax. *gyrdan*, to gird, to inclose. The same root is seen in Slav. *gradus*, as in *Novograd*, *L. cohors*, cohort, *hortus*, a garden, Gr. *hortos*, a yard. See also *YARD*.] 1. A piece of ground appropriated to the cultivation of herbs or plants, fruits and flowers, and vegetables. Land appropriated to the raising of culinary herbs and roots for domestic use is called a *kitchen-garden*; that appropriated to flowers and shrubs is called a *flower-garden*; and

Lion gardant.

Garde-brace.

that to fruits is called a *fruit-garden*. But these uses are sometimes blended.

God the first *garden* made, and the first city *Cain*.

2. A rich well-cultivated spot or tract of country; a delightful spot.

I am arrived from fruitful Lombardy,
The pleasant *garden* of great Italy. *Shak.*

Garden (gär'dn), *a.* Pertaining to or produced in a garden; as, *garden* implements, &c.

Garden (gär'dn), *v. t.* To lay out or to cultivate a garden; to prepare ground, to plant and till it, for the purpose of producing plants, shrubs, flowers, and fruits.

We farm, we *garden*, we our poor employ,
And much command, though little we enjoy. *Crobie.*

Garden (gär'dn), *v. t.* To cultivate as a garden. *Cotgrave.*

Garden-balsam (gär'dn-bäl-sam), *n.* *Impatiens Balsamina*, a well-known ornamental plant. See *IMPATIENS*.

Garden-city (gär'dn-si-ti), *n.* A town specially laid out so as to have much garden ground in and around it.

Garden-engine, *n.* See *GARDEN-PUMP*.

Gardener (gär'dn-er), *n.* One whose occupation is to make, tend, and dress a garden.

Gardener's-garters, *n. pl.* A plant, *Phalaris arundinacea variegata*. See *PHALARIS*.

Gardenesque (gär'dn-es'k), *a.* Partaking of the character of a garden; laid out so as to resemble a garden, with the avoidance of formal geometrical outlines.

Garden-glass (gär'dn-glas), *n.* 1. A round globe of dark-coloured glass, generally about 1½ foot in diameter, placed on a pedestal, in which the surrounding objects are reflected: much used as an ornament of gardens in Germany.—2. A bell-glass used for covering plants.

Garden-house (gär'dn-hous), *n.* 1. A summer-house.

Look you, Master Greenshield, because your sister is newly come out of the fresh air, and that to be pent up in a narrow lodging here i' the city may offend her health, she shall lodge at a *garden-house* of mine in Moorfields. *Winter.*

2. A privy; a necessary. [Southern States of America.]

Garden-husbandry (gär'dn-huz-band-ri), *n.* A branch of horticulture, the object of which is to raise fruits, vegetables, and seeds for profit on a smaller extent of ground than is usually occupied for agricultural purposes.

Gardenia (gär'dé-ni-a), *n.* [Named after Dr. *Garden*, an American botanist.] A genus of Rubiaceae, consisting of (often spiny) trees and shrubs natives of the Cape and of tropical Asia and Africa. They have large handsome white or yellowish flowers, which are often deliciously fragrant; *G. florida* and *G. radicans* are well known in cultivation as Cape jasmine.

Gardening (gär'dn-ing), *n.* The act of laying out and cultivating gardens; horticulture.

Gardenless (gär'dn-less), *a.* Destitute of a garden. *Shelley.*

Gardenly (gär'dn-li), *a.* Having the character of a garden; like or relating to a garden; becoming or appropriate to a garden.

The crop throughout being managed in a *gardenly* manner. *Marshall.*

Garden-mould (gär'dn-möld), *n.* Mould or rich mellow earth suitable for a garden.

Garden-plot (gär'dn-plot), *n.* A separate portion of a garden laid out with flowers, vegetables, or bushes.

Garden-pump, **Garden-engine** (gär'dn-pump, gär'dn-en-jin), *n.* A machine with a hose attached for artificially watering gardens, lawns, &c.

Gardenship (gär'dn-ship), *n.* Horticulture. *Lord Shaftesbury.*

Garden-spider (gär'dn-spi-dér), *n.* The common name of the spider *Epeira diadema*, from its being found in great numbers in gardens, especially in autumn, where it stretches its beautiful geometric webs perpendicularly from branch to branch, remaining in the centre with its head downwards waiting for its prey. The web of this spider is composed of two different kinds of threads, the radiating and supporting threads being strong and of simple texture. The fine spiral thread which divides the web into a series of steps, decreasing in breadth toward the centre, is studded with a vast amount of little globules, which give to the web its peculiar adhesiveness. The dorsal surface of the abdomen of this spider is marked with a triple yellow cross, whence the name

Cross-spider. It is also sometimes called *Diadem-spider*.

Garden-squirt (gär'dn-skwert), *n.* A squirt for watering flowers.

Garden-stand (gär'dn-stand), *n.* A stand or frame on which flower-pots are placed.

Garishness, **Gairishness** (gär'ish-ness), *n.*

1. The state or quality of being garish; gaudiness; finery; affected or ostentatious show. There are woe

Ill-bartered for the *garishness* of joy. *Coleridge.*

2. Flightiness of temper; extravagance of joy or ostentation; want of steadiness.

This (fasting) is a singular corrective of that pride and *garishness* of temper, that renders it impatient of the sobrieties of virtue, but open to all the wild suggestions of fancy and the impressions of vice. *South.*

Garisoun,† *v. t.* To heal.

I cannot see how thou maist go,
Other waies thee to *garisoun*. *Chaucer.*

Garland (gär'land), *n.* [O.E. *gārland*, *gerland*; Fr. *garlande*, a garland, from (as *Teutonic word* becomes Romance *guard*, *wise*, *guise*) O.H.G. *wiera*, a coronet, a crest, through M.H.G. *wierelen*, a dim. of *wieren*,

to plait round about. Wedgwood derives it from *gala*, through the old or provincial Fr. forms *gallende*, *gallende*, which are found in the sense of garland. 1. A royal crown; a diadem.

In whose (Edward the Fourth's) time, and by whose occasion, what about the getting of the *garland*, keeping it, losing and winning again, it hath cost more blood than hath twice the winning of France. *Sir T. More.*

2. A wreath or chaplet made of branches, flowers, feathers, and sometimes of precious stones, usually intended to be worn on the head like a crown.—3. The top; the principal thing, or thing most prized.

Call him noble that was now your hate,

Barns and *garners* never empty. *Shak.*

Garnet (gär'nër), *v.t.* To store in, or as in, a granary.

But there, where I have *garnet*'d up my heart,
Where either I must live, or bear no life. *Shak.*

Garnet (gär'net), *n.* [Fr. *grenat*, It. *granato*, *granata*, from L. *granum*, grain, seed, and in later times the cochineal insect and the scarlet dye obtained from it—cochineal insects being once supposed to be seeds of a species of oak. Comp. Sp. *grana*, the cochineal insect; It. *granato* (*fino*), fine scarlet; and see GRAIN. The name would therefore probably be given to the stone on account of its fine crimson colour.] 1. The name common to a group or family of minerals varying considerably in composition, as alumina, lime, magnesia, or some other base is associated with the silica which composes about half the mineral. Garnets occur generally in mica-slate, hornblende-slate, gneiss, and granite, usually in crystals more or less regular. The crystals have numerous sides, from twelve to sixty or even eighty-four. The prevailing colour is red of various shades, but often brown, and sometimes green, yellow, or black. They sometimes resemble the hyacinth, the leucite, and the idocrase. The colour is due to the presence of oxide of iron, of manganese, or of chrome. In addition to the coarse or common garnet there are the noble, precious, or oriental garnet, of crimson-red colour, the most prized of all the varieties, of which the finest specimens are imported from Syriam in Pegu, the grossular or olive-green garnet from Siberia, the pyrope, the topazolite, the suezinite, the melanite, the pyrenite, the alchochroite, the apome, and the colophonite.—2. *Naut.* a sort of tackle fixed to the main-stay, and used to hoist in and out the cargo.

W. *gargas*, *gardys*, from *gar*, the leg; Gael. *gartan*, a garter; Armor. *gar* or *garr*, the leg.] 1. A string or band used to tie a stocking to the leg.—2. The badge of the highest order of knighthood in Great Britain, called the *order of the Garter*; hence, also, the order itself. This order is one of the most illustrious of the military orders of knighthood in Europe. It is said to have been founded by Edward III. in memory of the following circumstance. The Countess of Salisbury having dropped her garter while dancing, the king picked it up and tied it round his own leg; but, observing the jealous glances of the queen, he restored it to its owner with the exclamation: *Honi soit qui mal y pense* (Shamed be he who thinks evil of it). The peculiar emblem of the order is a dark blue ribbon, edged with gold, bearing the motto, and with a buckle and pendant of gold (fig. 5). It is worn on the left leg below the knee. The mantle is of blue velvet, lined with white taffeta; the hood and surcoat are of crimson velvet, and the hat is of black velvet with a plume of white ostrich feathers, with a tuft of black heron's feathers in the centre. The collar of gold (fig. 3) consists alternately of garters surrounding roses and of double knots; and the badge of the order (fig. 4), consisting of a figure of St. George on horseback fighting the dragon, depends from it. The lesser George (fig. 2) is worn on a broad blue ribbon over the left shoulder. The star (fig. 1), formerly only a cross, is of silver, and consists of eight points, with the cross of St. George in the centre, encircled by the garter. Until the reign of Edward VI. the title of the order was the Order of St. George, which name it is still known by. The original number of knights was twenty-six, and this is still the nominal number, although the princes of the blood are admitted as supernumerary members.—3. A king-of-arms, instituted by Henry V. for the service of the order of the Garter. His duties are to attend upon the knights at their solemnities, to intimate their election, to call them to be installed at Windsor, to cause their arms to be suspended above their stalls, to marshal their funeral processions, &c. He is also principal king-of-arms in England, and as such grants and confirms arms under the authority of the earl-marshal, to whom, however, he is not subject as garter-king-of-arms.—4. In *her.* the half of a bend.—5. *pl.* In a circus, the tapes that are held up for a performer to leap over.

Insignia of the Garter.

(The clown) offered at the *garters* four times last night, and never done 'em once. *Dickens*.

He being in love could not see to *garter* his hose, and you being in love cannot see to put on your hose. *Shak.*

2. To invest with the order of the Garter. 'A circle of *gartered* peers.' *Macaulay*.

Garter-fish (gä'r'tēr-fish), *n.* A name sometimes given to *Lepidopus argyreus*, a teleostean fish, now better known as the *Scabbard-fish*, having a long depressed body like the blade of a sword, which reaches 6 feet in length.

Garter-king, **Garter-king-of-arms**, **Garter-king-at-arms** (gä'r'tēr-king, gä'r'tēr-king-ov-ärmz, gä'r'tēr-king-at-ärmz), *n.* See **GARTER**, 3.

Garter-snake (gä'r'tēr-snäk), *n.* An American serpent, the *Coluber sirtalis*.

Garth (gä'rth), *n.* [See **GARDEN**, **YARD**.] *W. gard*, an inclosure, yard, garth, and *gardden*, a garden, are borrowed from English.] 1. † A close; a yard; a croft; a garden.

Caught his hand and wrung it passionately, And past into the little *garth* beyond. *Tennyson*.

2. The greensward or grass area between, or within the cloisters of a religious house.—3. A dam or weir for catching fish.—4. A hoop or band. [Provincial.]

Garthman (gä'rth'man), *n.* The proprietor of an open weir for taking fish.

Garum (gä'r'um), *n.* [L.] A fish sauce much prized by the ancients, made of small fish preserved in a certain kind of pickle; also, a pickle made of the gills or blood of the tunny.

Garvie, **Garvie-herring** (gä'r'vi, gä'r'vi-hering), *n.* The name in Scotland for the sprat, *Harengula (Clupea) sprattus*.

Gas (gas), *n.* [Fr. *gaz*, a word formed by Van Helmont to signify, in general, a spirit not capable of being coagulated; probably in connection with D. *geist*, spirit, A. Sax. *gast*, G. *geist*.] 1. In *chem.* an elastic aeriform fluid, a term originally synonymous with air, but afterwards restricted to such bodies as were supposed to be incapable of being reduced to a liquid or solid state. Under this supposition gas was defined to be 'a term applied to all permanently elastic fluids or airs differing from common air.' Since the liquefaction of gases by Faraday, effected by combining the condensing powers of mechanical compression with that of very considerable depression of temperature, the distinction between gas and vapour, viz. that the latter could be reduced to a liquid or solid condition by reduction of temperature and increase of pressure, while gas could not be so altered, is no longer tenable, so that the term has resumed nearly its original signification, and designates any substance in an elastic aeriform state. Gas may now be defined to be a substance possessing the condition of perfect fluid elasticity, and presenting, under a constant pressure, a uniform state of expansion for equal increments of temperature, being distinguished by this last property from vapour, which does not present such a rate of uniform expansion. *Gases* are distinguished from *liquids* by the name of *elastic* fluids; while *liquids* are termed *non-elastic*, because they have, comparatively, no elasticity. But the most prominent distinction is the following:—*Liquids* are compressible to a certain degree, and expand into their former state when the pressure is removed; and in so far they are elastic, but *gases* appear to be in a continued state of compression, for when left unconfined they expand in every direction to an extent which has not hitherto been determined. *Gases* retain their elasticity in all ordinary temperatures, and in this they differ from vapours. The number of gaseous bodies is great, and they differ greatly in their chemical properties. They are all, however, susceptible of forming combinations with fluid and solid substances. Many of them are of great importance in the arts and manufactures, and one, viz. coal-gas, has contributed immensely to the comfort and convenience of our cities and towns. Gases are invisible except when coloured, which happens in two or three instances. 2. In *popular lan.* coal-gas (which see), the common gas used for illuminating purposes. **Gas** (gas), *v.t.* To singe, as loose filaments from net, lace, &c., by passing the material between two rollers, and exposing it to the action of a large number of minute jets of gas.

Gasalier (gas-a-lēr), *n.* Same as *Gaselier*.

Gas-bath (gas'bäth), *n.* A bath heated by gas.

Gas-bracket (gas'brak-et), *n.* A pipe, frequently curved or jointed, projecting from the wall of a room, the body of a gaselier, &c., which gives out the gas, and into which the burner is fitted.

Gas-burner (gas'bēr-ēr), *n.* That part of a gas lamp or bracket which gives out and regulates the light. Gas-burners have a great many different forms, some being either simple beaks perforated with a small round hole, or with a series of holes in the form of a circle, to produce an argand flame, or two holes drilled obliquely, to make the flame cross like a swallow's tail, or with a slit producing a sheet of flame called a bat's wing. Sometimes several radiating jets are

made to issue from the same burner. The bude-burner has two or three concentric argand rings.

Gas-check (gas'chek), *n.* In *gunnery*, a ring or plate behind the charge-chamber of certain breech-loading ordnance, designed to prevent the escape of gas to the rear.

Gas-coal (gas'köl), *n.* A coal, as cannel-coal, employed for making gas.

Gas-company (gas'kum-pa-ni), *n.* A joint-stock company formed to supply gas to a community, generally at a certain rate per 1000 feet.

Gascon (gas'kon), *n.* A native of Gascony in France; hence, a boaster. See **GASCONADE**.

Gasconade (gas'kon-äd'), *n.* [Fr. from **GASCON**, an inhabitant of Gascony, the people of which are noted for boasting.] A boast or boasting; a vaunt; a bravado; a bragging.

I tell you, without any *gasconade*, that I had rather be banished for my whole life, because I have helped to make the peace, than be raised to the highest honour for having contributed to obstruct it.

Bolingbroke.

Gasconade (gas'kon-äd'), *v.i.* pret. & pp. *gasconaded*; ppr. *gasconading*. To boast; to brag; to vaunt; to bluster.

Gasconader (gas'kon-äd'er), *n.* A great boaster.

Gas-condenser (gas'kon-den-sör), *n.* A part of the apparatus used in the manufacture of illuminating gas, consisting of a series of convoluted pipes surrounded by water, in passing through which the gas is freed from the tar it brings with it from the retort.

Gascoynes (gas'koinz), *n. pl.* Same as **GAS-KINS**. *Beau & Fl.*

Gascromh (gas'kröm), *n.* [Gael. *cas*, a foot, and *erom*, crooked—crooked foot.] A long pick, with a cross-handle and projecting foot-piece, used in the Highlands for digging in stony ground, when no other instrument can be introduced; a foot-pick. *Sir W. Scott.*

Gasefy (gas'e-fi), *v.t.* Same as **Gasify**.

Gaselity (gas-é-ti), *n.* The state of being gaseous.

Gaselier (gas'e-lér), *n.* [Formed from *gas* by a kind of erroneous imitation of *chandelier*.] A frame with brackets or branches adapted for burning gas, as a chandelier for burning candles.

Gas-engine (gas'en-jin), *n.* An engine for utilizing coal-gas as a motive power. There are several varieties, the main features of all being the admission of gas largely diluted with common air into the cylinder till it is half full, and then exploding the mixture by an electric spark or a gas-jet.

Gaseous (gä'zë-us), *a.* 1. In the form of gas or an aeriform fluid; of the nature of gas.—2. Wanting substance or solidity; dimsy. 'Unconnected, gaseous information.' *Sir J. Stephens.*

Gaseousness (gä'zë-us-nes), *n.* State or quality of being gaseous.

Gas-fitter (gas'fit-ér), *n.* A workman who lays pipes and fits burners for gas; one who puts up gas-fixtures.

Gas-fixture (gas'fiks-tür), *n.* A bracket or gaselier for gas, including burner and stop-cock.

Gas-furnace (gas'fër-näs), *n.* A furnace of which the fuel is gas from burners so disposed in the chambers as to give the maximum heating power.

Gas-gauge (gas'gä), *n.* An instrument for ascertaining the pressure of gas, generally consisting of a bent graduated tube containing water or mercury, open at one end, and with the other screwed into the vessel containing the gas.

Gas-governor (gas'güv-ér-nér), *n.* An apparatus for equalizing the pressure of gas previous to its issuing from the gasometer for the supply of light, and for preventing inequalities of pressure arising from putting out lights at different periods of the night.

Gash (gash), *n.* [According to Skeat a corruption of an older form *garsh* or *garsee*, from O.Fr. *garser*, to scarify, pierce with a lancet; *garscher*, to chap, as the hands; L.L. *garsa*, scarification.] A deep and long cut; an incision of considerable length, particularly in flesh.

Gash (gash), *v.t.* To make a gash, or long, deep incision in: applied chiefly to incisions in flesh.

Gashed with honourable scars,
Low in Glory's lap they lay. *Montgomery.*

Gash (gash), *a.* ['The same conjecture has occurred to me which Sibbald mentions, that it may be an abbreviation of Fr. *sagace*, L. *sagax*, sagacious. *Jamieson.*] Sharp;

shrewd; sagacious; having the appearance of sagacity joined with that of self-importance; trim; well-dressed. [Scotch.]

He was a *gash* an' faithfu' tyke
As ever lap a sleugh or dyke. *Burns.*

Here farmers *gash*, in ridin' graith,
Gaed hoddin' by their cotters. *Burns.*

Gash (gash), *v.i.* To gossip; to converse; to chatter. [Scotch.]

She lea'es them *gashin'* at their cracks,
An' slips out by herself. *Burns.*

Gash (gash), *a.* Ghastly. [Scotch.]

Gashful (gash'fūl), *a.* Ghastly; hideous; frightful.

Nor prodigal upbanging of thine eyes,
Whose *gashful* balls do seem to pelt the skies.

Quarles.

Gashliness (gash'li-nes), *n.* The condition or quality of being gashly or ghastly; horrorfulness; dreadful; dismalness. 'The general dulness (*gashliness* was Mrs. Wickam's strong expression) of her present life.' *Dickens.*

Gashly (gash'li), *a.* Calculated to inspire terror; ghastly; horrible; dreadful; dismal. *Sterne.*

Gasholder (gas'höld-ér), *n.* A vessel for storing gas after purification; a gasometer.

Gasification (gas'i-fi-kä'shon), *n.* [See **GASIFY**.] The act or process of converting into gas.

Gasiform (gä'zi-form), *a.* Gaseous; aeriform.

Gasify (gas'i-fi), *v.t.* pret. & pp. *gasified*; ppr. *gasifying*. [E. *gas*, and L. *facio*, to make.] To convert into gas or an aeriform fluid, as by the application of heat, or by chemical processes.

Gas-indicator (gas'in-di-kät-ér), *n.* An instrument for indicating the pressure of gas in a pipe.

Gas-jet (gas'jet), *n.* 1. A spout of flame issuing from a gas-burner.—2. A gas-burner.

Gasket (gas'ket), *n.* [Fr. *garcette*, a gasket, cat-o'-nine-tails; Sp. *garçeta*, a gasket, also hair which falls in locks on the temples, It. *gaschette*. Origin unknown.] 1. *Naut.* A plaited cord fastened to the sail-yard of a ship, and used to furl or tie the sail to the yard.—2. In *nach*, a strip of leather, tow, platted hemp, or similar material, used for packing a piston, as of the steam-engine and its pumps.

Gaskins (gas'kinz), *n. pl.* [See **GALLIGASKINS**.] Galligaskins; wide open breeches.

If one point break, the other will hold; or, if both break, your *gaskins* fall. *Shak.*

Gas-lamp (gas'lamp), *n.* A lamp, the light in which is supplied by gas, as a street-lamp.

Gas-lantern (gas'lan-térn), *n.* A frame of glass for inclosing one or more gas-burners in streets, at street doors, &c.

Gaslight (gas'lit), *n.* Light produced by the combustion of coal-gas; a gas-jet.

Gas-main (gas'män), *n.* One of the principal pipes which convey the gas from the gasworks to the places where it is to be consumed.

Gas-meter (gas'mét-ér), *n.* An instrument through which the gas is made to pass, in order to ascertain the number of cubic feet which are consumed in a given time at a particular place. Of this instrument there are two classes, the wet and the dry. The wet meter is composed of an outer box about three-fifths filled with water. Within this is a revolving four-chambered drum, each chamber being capable of containing a definite quantity of gas, which is admitted through a pipe in the centre of the meter, and, owing to the arrangement of the partitions of the chambers, causes the drum to maintain a constant revolution. This sets in motion a train of wheels carrying the hands over the dials which mark the quantity of gas consumed. The dry meter consists of two or three chambers, each divided by a flexible partition or diaphragm, by the motion of which the capacity on one side is diminished while that on the other is increased. By means of slide-valves, like those of a steam-engine, worked by the movement of the diaphragms, the gas to be measured passes alternately in and out of each space. The contractions and expansions set in motion the clockwork which marks the rate of consumption. The diaphragms in all the chambers are so connected that they move in concert.

Gasometer (gaz-om'et-ér), *n.* [Gas, and Gr. *metron*, a measure.] 1. In *chem.* (a) an instrument or apparatus intended to measure, collect, preserve, or mix different gases.

(b) An instrument for measuring the quantity of gas employed in any chemical experiment.—2. A reservoir or storehouse for gas, especially for the ordinary illuminating gas produced in gas-works, and which supplies

Gasometer.

the various pipes employed in lighting streets and houses; usually, a cylinder closed at one end and having the other end immersed in water, in which it rises or falls, according to the volume of gas it contains. [*Gasholder* or *gas-tank* is a preferable term to *gasometer* in this sense, as the structure is simply a reservoir and has nothing to do with measuring the gas.]

Gasometric (gaz-o-met'rik), *n.* Of or pertaining to gasometry or the measurement of gases.—*Gasometric analysis*, in *chem.* the process of separating and estimating the relative proportions of the constituents of a gaseous body. This is effected either by the action of absorbents, as on gas contained in a eudiometer (which see), or by exploding the gas with oxygen and observing the volumes before and after explosion.

Gasometry (gaz-om'et-ri), *n.* The science, art, or practice of measuring gases; that department of chemical science which treats of the nature and properties of gases.

Gasoscope (ga'zö-sköp), *n.* [Gas, and Gr. *skopeō*, to see.] An instrument for indicating the pressure of gas in buildings, mines, or other places.

Gasp (gasp), *v.i.* [Icel. *geispa*, to yawn; Dan. *gispe*, to gasp; L.G. *jagen*, *japsen*, the former of which recalls the E. *gape*.] 1. To open the mouth wide in laborious respiration; to labour for breath; to respire convulsively; to pant violently.

She *gasps* and struggles hard for life. *Lloyd.*

2. To pant with eagerness; to crave vehemently. 'Quenching the *gasp*ing furrows thirst for rain.' *Spenser*.—To *gasp after*, to vehemently long for.

The Casilian seeing how dearly they loved one another, and *gasped* after liberty, demanded a most exorbitant price for their ransom. *Spectator.*

Gasp (gasp), *v.t.* To emit or utter with gaspings or pantings: with *away*, *forth*, *out*, &c.

And with short sobs he *gasps* away his breath. *Dryden.*

She couldn't see even her children's faces, though we heard her *gasp*ing out their names. *Dickens.*

Gasp (gasp), *n.* The act of opening the mouth to catch the breath; laboured respiration; a short painful catching of the breath.

Cheating the sick of a few last *gasps*,
To pestle a poison'd poison behind his crimson lights. *Tennyson.*

Gaspereaux (gas'pér-ö), *n.* A North American name for the fish called *Alewife*. See **ALEWIFE**.

Gaspingly (gasp'ing-li), *adv.* In a gasping manner; with a gasp or with gasps.

Gas-pipe (gas'pip), *n.* A pipe for the conveyance of gas.

Gas-regulator (gas're-gü-lät-ér), *n.* Same as **Gas-governor**.

Gas-retort (gas're-tort), *n.* The chamber in which carbonaceous matter is distilled to produce illuminating gas.

Gas-service (gas'sér-vis), *n.* Gas fittings or fixtures; pipes, jets, &c., for burning gas.

Gassoul (gas-söl'), *n.* The native name for a mineral soap exported in considerable quantities from Morocco.

Gas-stove (gas'stöv), *n.* A stove heated by gas for cooking and other purposes.

Gassy (gas'i), *a.* Relating to or containing gas; gaseous; inflated; exhalated.

Gast,† Gaster† (gäst, gäst'ér), *v.t.* [Probably

of same origin as *agast*; comp. *My. gast*, a fright, and *flabbergast*.] To make agast; to frighten.

Or whether *gasted* by the noise I made,
Full suddenly he fled. *Shak.*

Either the sight of the lady has *gaster'd* him, or
else he's drunk, or else he walks in his sleep.
East. & Fl.

Gas-tank (gas'tangk), *n.* A gasometer or gasholder.

Gas-tar (gas'tär), *n.* The tar which condenses in the tubes when gas is distilled from coal. Although itself offensive and of little direct use, it yields many valuable products, as naphtha, naphthalene, creasote, benzole, and many most beautiful dyes, as aniline purple, roschen, violine, magenta, aniline green, &c.

Gasteromycetes (gas'tér-ó-mi-sé'tez), *n. pl.* [Gr. *gaster*, *gasteros*, belly, and *mykēs*, *mykēōs*, a mushroom.] One of the six great divisions of the fungi, comprising those genera with naked spores in which the hymenium or fruit-bearing surface is inclosed in a peridium or outer coat. It includes the puff-balls.

Gasteromycetous (gas'tér-ó-mi-sé'tus), *a.* Of or belonging to the Gasteromycetes.

Gasterophilus (gas'tér-ó-fī-lus), *n.* [Gr. *gaster*, the belly, and *philos*, loving.] A genus of parasitic insects inhabiting the stomach of horses, the grubs or larvae of which are ordinarily termed *bots*.

Gasteropod (gas'tér-ó-pod), *n.* One of the Gasteropoda.

Gasteropoda (gas'tér-ó-pó-da), *n. pl.* [Gr. *gaster*, the belly, and *pous*, *podos*, a foot.] A class of molluscs, consisting of animals inhabiting a univalve shell, although some of the group are wholly destitute of a shell. The shell is either a small internal plate, as in slugs; or cone-shaped and spiral, as in the majority; or multivalve, the pieces fol-

Gasteropoda.

Common Garden-snail (*Helix aspersa*). *f.* Foot extending the whole length of the under side of the body.

lowing each other along the middle line, as in the chitons. The distinguishing characteristic is the foot, which is broad, muscular, and disk-like, and attached to the ventral surface. The garden-snail may be regarded as a typical example. The class comprises also whelks, periwinkles, limpets, cowries. No known gasteropod has a bivalve shell.

Gasteropodous (gas'tér-ó-pod-us), *a.* Belonging to the order Gasteropoda.

Gasterosteidae (gas'tér-ó-s-té-i-dé), *n. pl.* The sticklebacks, a family of spine-finned acanthopterygian fishes, in which the skeleton is entirely bony, and part of the rays of the dorsal, anal, and ventral fins are formed into spines. They are remarkable among fish for building nests for their young.

Gasterosteus (gas'tér-ó-s-té-us), *n.* [Gr. *gaster*, and *osteon*, a bone.] A genus of fishes, co-extensive with the family Gasterosteidae (which see).

Gasful, **Gasly** (gas'tful, gas'tli), *a.* Same as *Chastful*, *Chastly*.

Gas-tight (gas'tit), *a.* Sufficiently close to prevent the escape of gas: frequently applied to stoppers or other appliances for closing phials, bottles, &c.

Gasiness (gást'nes), *n.* Amazement; fright.

Look you pale, mistress?

Do you perceive the *gasiness* of her eye? *Shak.*

Gastornis (gast-ór'nis), *n.* [Gaston, the Christian name of M. Plante, the discoverer, and *Gr. ornis*, a bird.] A large fossil bird discovered in the lower eocene deposits of Meudon, near Paris. Though the leg and thigh bones—the only portions yet discovered—indicate a bird as tall and more bulky than the ostrich, its structural peculiarities point to affinities with the Gallatres or wading-birds.

Gastrea (gas-tré'a), *n.* [Gr. *gaster*, the stomach.] In *zool.* a name given by Haeckel to a hypothetical animal form long extinct, which, according to what is known as the *gastrea theory*, he supposes to have been the ancestral form of the whole animal kingdom. The *gastrea* is regarded as a simple sac-like organism whose body-wall, consisting simply of an ectodermal and an en-

dodermal layer of cells, incloses a space—the primitive stomach.

Gastralgia, **Gastralgia** (gas-tral'ji-a, gas-tral'ji), *n.* [Gr. *gaster*, *gasteros*, the belly, and *algos*, pain.] In *pathol.* pain in the stomach or in the belly.

Gastric (gas'trik), *a.* [From Gr. *gaster*, the belly or stomach.] Of or pertaining to the belly or stomach.—*Gastric juice*, a thin pellucid liquor, separated by a peculiar set of secretories in the mucous membrane of the stomach, which open upon its internal tunic. It is the principal agent in digestion, and contains pepsin as its characteristic compound.

In the empty stomach it is neutral, but during digestion it becomes acid, from the separation of free hydrochloric acid. Liebig ascribes the solvent power of the gastric juice to the gradual decomposition of a matter dissolved from the lining membrane of the stomach, aided by the oxygen introduced in the saliva. See *Digestion*.—*Gastric system*, the name given to all those parts of the body which contribute to digestion.—*Gastric fever*, a popular name for *typhoid* or *enteric fever*, from the manner in which it affects the intestines. See under *TYPHOID*. The name is sometimes applied in England to acute inflammatory dyspepsia.

Gastricism (gas'tri-sizm), *n.* [Gr. *gaster*, *gasteros*, the belly.] In *pathol.* a term for gastric affections in general; specifically applied to that theory by which almost all diseases are attributed to the accumulation of impurities in the stomach and bowels, suggesting their removal by causing vomiting and purging. *Dr. Mayne.*

Gastridium (gas'tri-di-um), *n.* [Gr. *gastridion*, a little swelling, dim. of *gaster*, *gasteros*, the belly.] Nit-grass, a genus of plants of the nat. order Gramineae. *The G. lentigerum*, or awned nit-grass, is found in some parts of England where water has stagnated near the sea-shore, but is rare.

Gastroloquism (gas'tr-ó-lo-kwizm), *n.* [Gr. *gaster*, *gasteros*, the belly, and *L. loquor*, to speak.] Ventriiloquism.

Gastroloquism (is) a hybrid term synonymous with *ventriiloquism*. *Hooper.*

Gastroloquist (gas'tr-ó-lo-kwist), *n.* [Gr. *gaster*, belly, and *L. loquor*, to speak.] One who appears to speak from his belly or stomach; a ventriiloquist.

Gastroloquous (gas'tr-ó-lo-kwus), *a.* Ventriiloquous. [Rare.]

Gastroloquy (gas'tr-ó-lo-kwi), *n.* A voice or utterance which appears to proceed from the belly or stomach; ventriiloquism.

Gastritis (gas'tr-itis), *n.* [Gr. *gaster*, *gasteros*, the belly, and term. *-itis*, denoting inflammation.] In *med.* chronic inflammation of the stomach.

Gastrobranchus (gas'tr-ó-brang'kus), *n.* [Gr. *gaster*, *gasteros*, the belly, and *branchia*, gills.] The hag, a genus of marsipobranchiate fishes belonging to the lamprey family. Called also *Myxine*. See *HAG*.

Gastrocele (gas'tr-ó-sél), *n.* [Gr. *gaster*, the stomach, and *kēle*, a tumour.] In *pathol.* a hernia of the stomach.

Gastrochæna (gas'tr-ó-ké-na), *n.* [Gr. *gaster*, the belly, and *chæna*, to gape.] A genus of lamellibranchiate molluscs found on the coasts of Great Britain and America. They inhabit an equivalent inequilateral shell, united by a ligament, and having in the interior a small spoon-shaped curvature. They often burrow in cavities or in sand, calcareous rocks, &c., lining their hole with a shelly layer, so as to form a sort of tube. *G. modiolina*, common in the Mediterranean, perforates shells and limestones, making holes 2 inches deep by 3 inch in diameter.

Gastrochænidæ (gas'tr-ó-ké-ni-dé), *n. pl.* [Gr. *gaster*, *gasteros*, the belly, *chæna*, to gape, and *eidos*, resemblance.] A family of bivalve molluscs, of which the genus *Gastrochæna* is the type. See *GASTROCHÆNA*.

Gastrochene (gas'tr-ó-kén), *n.* A member of the genus *Gastrochæna* (which see).

Gastrocnemius (gas'tr-ó-kné-mi-us), *n.* [Gr. *gaster*, the belly, and *knēmē*, the leg.] In *anat.* one of the muscles (especially the most external) which form the calf of the leg.

Gastrodynia (gas'tr-ó-din'i-a), *n.* [Gr. *gaster*, the belly, and *odynē*, pain.] In *med.* pain in the stomach.

Gastroenteritis (gas'tr-ó-en-tér-itis), *n.* [Gr. *gaster*, the belly, and *enteron*, intestine.] In *med.* inflammation of the stomach and intestines.

Gastrolobium (gas'tr-ó-ló-bi-um), *n.* [Gr. *gaster*, *gasteros*, belly, and *lobos*, a lobe.] A

large genus of leguminous plants occurring in South-western Australia, characterized mainly by the stalked two-seeded ventricose or inflated pods, which are seldom larger than a pea. Several of the species often prove fatal to cattle who eat of their foliage, and they are hence known as poison-plants.

Gastrology (gas'tr-ó-lo-jí), *n.* [Gr. *gaster*, *gasteros*, the belly, and *logos*, discourse.] A treatise on the stomach. *Maunder.*

Gastromalacia (gas'tr-ó-ma-lá-si-a), *n.* [Gr. *gaster*, the belly, and *malakos*, soft.] In *med.* softening of the stomach, a disease occurring in infants.

Gastromancy (gas'tr-ó-man-si), *n.* [Gr. *gaster*, belly, and *mantia*, divination.] In *antig.* (a) a kind of divination among the ancients by means of words seeming to be uttered from the belly. (b) A species of divination by means of large-bellied glasses or other round transparent vessels, in the centre of which figures are supposed to appear by magic art.

Gastromyth (gas'tr-ó-mith), *n.* [Gr. *gaster*, *gasteros*, the belly, and *mythema*, to speak.] One whose voice appears to come from the stomach; a ventriiloquist. *Blount.*

Gastronome, **Gastronomer** (gas'tr-ónom, gas'tr-ónom-er), *n.* [See *GASTRONOMY*.] One who is partial to good living; an epicure.

The happy *gastronome* may wash it down with a selection of thirty wines from Burgundy to Tokay. *L. F. Swinney.*

Gastronomic, **Gastronomical** (gas'tr-ónom'ik, gas'tr-ónom'ik-al), *a.* Pertaining to gastronomy.

Gastronomist (gas'tr-ónom-ist), *n.* One versed in gastronomy; one who likes good living; a judge of the art of cookery; a gastronome.

I was glad to have an opportunity of dining with so renowned a *gastronomist*. *Lord Lytton.*

Gastronomy (gas'tr-ónom-i), *n.* [Gr. *gaster*, *gasteros*, the belly, and *nomos*, a rule, law.] The art or science of good living; the pleasures of the table; epicurism.

Those incomparable men, who retiring from a sinful world, give themselves with undivided zeal to the profound science of *gastronomy*. *Lord Lytton.*

Gastropod (gas'tr-ó-pod), *n.* Same as *Gasteropod*.

Gastropoda (gas'tr-ó-pó-da), *n. pl.* Same as *Gasteropoda*.

Gastropodous (gas'tr-ó-pod-us), *a.* Same as *Gasteropodous*.

Gastrophage (gas'tr-ó-ra-fé), *n.* [Gr. *gaster*, *gasteros*, the belly, and *phagē*, a suture.] In *surg.* a suture uniting a wound of the belly or of some of its contents.

Gastrophraphy (gas'tr-ó-ra-fí), *n.* [Gr. *gaster*, the belly, and *raphia*, a sewing or suture.] In *surg.* the operation of sewing up wounds of the abdomen.

Gastroscopy (gas'tr-ós'ko-pi), *n.* [Gr. *gaster*, *gasteros*, the belly, and *skopeo*, to view.] In *med.* an examination of the abdomen in order to detect disease.

Gastrostomy (gas'tr-ó-stó-mi), *n.* [Gr. *gaster*, *gasteros*, the belly, and *stoma*, mouth.] In *surg.* a term applied to the operation of forming an artificial opening into the stomach with the view of introducing food when it cannot be received naturally on account of obstruction or stricture of the gullet. The operation has not yet been successfully performed on the human subject.

Gastrotomy (gas'tr-ó-tó-mi), *n.* [Gr. *gaster*, *gasteros*, the belly, and *tomē*, a cutting, from *temno*, to cut.] In *surg.* the operation of cutting into or opening the abdomen.

Gave (gāv), pret. of *give*.

Gavel (gā'vél), *n.* [O. Fr. *gavelle*, Fr. *javelle*, a small heap of corn laid to dry; It. *gavella*, a handful of corn, generally derived from L. *L. capella*, of same origin as *L. capulus*, a handle, from *capio*, to seize.] 1. A sheaf of corn before it is tied up; a small heap of unbound wheat or other grain. 'Their corn lies in the gavel heap.' *Chapman.* [Provincial.]—2. Ground. [Provincial.]—3. A small mallet used by the president of a legislative body or public assembly to attract attention and preserve order.

Gavel (gā'vél). For *Gable* or *Gable-end*. See GABLE, GABLE-END. [Scotch.]

Gavel (gā'vél), *n.* [A. Sax. *gafol*, *gafel*, tax, tribute, rent, a word perhaps adopted by the Anglo-Saxons from their Celtic predecessors (see GAVELKIND); W. *gafael*, Gael. *gabhall*, a seizing, taking, a lease, a tenure,

from a Welsh root *gaf*, Gael. *gabh*, to seize. The E. *gabel*, a tax, is from Fr. *gabelle*, a tax, and is probably not connected with this word. See GABEL. Comp. also *Gale* (rent).] In *law*, tribute; toll; custom.

Gavellet (gā'vél-et), *n.* [See GAVEL, a tax.] In *law*, an ancient and special *cessavit*, in Kent, where the custom of gavelkind continues, by which the tenant, if he withdraws his rent and services due to his lord, forfeits his lands and tenements.

Gavelkind (gā'vél-kind), *n.* [W. *gafaelcenedl*, the hold or tenure of a family. See GAVEL, a tax.] 1. In *law*, a land-tenure in England, derived from the ancient Britons, by which, when the owner died without a will, the land descended to all the sons in equal shares, and the issue of a deceased son, whether male or female, inherited the father's part. In default of sons it descended in equal shares to the daughters; in default of lineal issue it went to the brothers of the last holder; and in default of brothers to their respective issue. The tenant also could convey the lands at fifteen years of age, and a wife was dowerable out of one-half of the land. This species of tenure is believed to have prevailed over the whole kingdom in Celtic and Anglo-Saxon times, but to have been gradually abolished everywhere else except in Wales and Kent, in the former of which it continued in force down till the time of Henry VIII., while in Kent all lands that have not been disengaged by act of parliament are still held in gavelkind.

Gavelled (gā'vél-d), *a.* In *law*, a term applied to lands held under the tenure of gavelkind.

Gavelman (gā'vél-man), *n.* A tenant liable to tribute.

Gavelmed (gā'vél-med), *n.* [A. Sax. *gafel*, a tax, and *mead*, a meadow.] In *law*, the duty or work of mowing grass or cutting meadow-land, required by the superior from his customary tenants.

Gavelock (gā'vél-ok), *n.* [A. Sax. *gafeloe*, a javelin; Icel. *gaflok*.] An iron crow or lever; a javelin or spear.

Gaverick (gā'vér-ik), *n.* A name of the red gurnard (*Trigla cuculus*), a common fish on the Cornwal coast.

Gavial (gā'vi-al), *n.* [The name of the ani-

Head of Gavial or Gangetic Crocodile (*Gavialis gangeticus*).

mal in Hindostan.] A genus of the order Crocodilia, characterized by the narrow elongated, almost cylindrical jaws, which form an extremely lengthened muzzle. The cervical and dorsal shields are continuous. The teeth are all of equal length, and the feet completely webbed. The only species now living occurs in Southern and Eastern Asia. It feeds on fish.

Gavotte, **Gavot** (ga-vot), *n.* [Fr., from *Gapot*, an inhabitant of the Pays de Gap of the Hautes Alpes, where the dance originated.] 1. A sort of French dance. — 2. The music to which the dance was performed. Gavottes are no longer written to be danced to, but have become a favourite movement in concertos, sonatas, &c. 'Who might be heard in his apartment of nights playing tremulous old *gavottes* and minuets on a wheezy old fiddle.' *Thackeray*.

Gaw (ga), *n.* A little ditch or trench; a grip. [Scotch.]

Care should be taken to have plenty of channels or *gaws* or grips, as they are usually termed in Scotland. *Stephens*.

Gawby, *n.* See GABY.

Gawd (gād), *n.* and *v.t.* Same as *Gaud* (which see).

Gawf (gaf), *n.* In *costermongers' slang*, a cheap red-skinned apple, which is rubbed hard with a cloth to give it the appearance and feeling of an apple of superior quality.

Gawk (gak), *n.* [A. Sax. *gac*, *gac*, Icel. *gaur*, Sc. *gowl*, cuckoo, simpleton, fool.] [Scotch and North of England.] 1. A cuckoo. 2. A fool; a simpleton; a booby.

Gawky (gak'i), *a.* [See GAWK.] Foolish; awkward; clumsy; clownish.

A large half-length of Henry Darnley represents him tall, awkward, and *gawky*. *Pennant*.

Gawky (gak'i), *n.* A stupid, ignorant, awkward fellow; a booby; a clown. 'What a *gawky* it was.' *Thackeray*.

Gawn (gan), *n.* Same as *Gawn*, *n.* (which see).

Gawntree (gan'trē), *n.* Same as *Gauntree* (which see).

Gawp (gap), *v.t.* [A form of *gape* or *gulp*.] To devour; to eat greedily; to swallow voraciously. [Scotch.]

Gawsy, **Gawsie** (gā'si), *a.* See GAUCIE.

Gay (gā), *a.* [Fr. *gai*, It. *gaio*, Pr. *gai*, *gai*, O.Sp. *gayo*, *gay*; of Teutonic origin; comp. O.H.G. *gahi*, swift, powerful, excellent, G. *gähe*, *jähe*, exceedingly quick. *Jay*, the bird, is probably of same origin.] 1. Excited with merriment or delight; merry; airy; jovial; sportive; frolicsome. *Belinda* smiled, and all the world was *gay*. *Pope*.

2. Fine; showy; as, a *gay* dress.

But who is this?
That so deck'd, ornate, and *gay*,
Comes this way sailing
Like a stately ship. *Milton*.

Enjoy your dear wit, and *gay* rhetoric,
That hath so well been taught her dazzling fence. *Milton*.

3. Given to pleasure; specifically, given to vicious pleasure; addicted or ministering to the indulgence of lust; loose; dissipated; as, a *gay* woman.

Some *gay* girl, God it wot,
Hath brought you thus upon the very trot. *Chaucer*.

Is this that haughty, gallant, *gay* Lothario? *Romeo*.

4. Inflamed or merry with liquor; intoxicated: a vulgar use of the word in America. SYN. Merry, gleeful, blithe, lively, sprightly, sportive, light-hearted, frolicsome, jolly, jovial, showy, fine, brilliant, gaudy.

Gay (gā), *adv.* [Comp. as regards usage the adverb *pretty*.] Pretty; moderately; as, *gay* gude, pretty good. [Scotch.]

Gay (gā), *n.* An ornament.

Morose and untractable spirits look upon precepts in emblem as they do upon *gays* and pictures, the fooleries of so many old wives' tales. *L'Estrange*.

Gayal, **Gyal** (gā'l), *n.* [Indian name.] A species of ox (*Bos frontalis*) found wild in the mountains of Northern Burma and Assam, and long domesticated in these countries and in the eastern parts of Bengal.

The head is very broad and flat in the upper part, and contracts suddenly towards the nose; the horns are short and slightly curved. The animal has no proper hump, but on the shoulders and fore part of the back there is a sharp ridge. The colour is chiefly a dark brown. Its milk is exceedingly rich, though not abundant.

Gaybine (gā'bin), *n.* [Gay and bine.] A name of several showy twining plants, genus *Pharbitis*.

Gay-diang (gā'di-ang), *n.* [Native name.] A vessel of Anam, generally with two, but in fine weather with three masts, carrying lofty triangular sails. It has a curved deck, and in construction somewhat resembles a Chinese junk. These vessels carry heavy cargoes from Cambodia to the Gulf of Tonquin.

Gay-diang of Anam.

Gayety (gā'e-ti), *n.* Same as *Gaiety*.

Gayler, *n.* A jailer. *Chaucer*.

Gaylie, **Gaylies** (gā'li, gā'li), *adv.* Pretty, well; as, 'How are you to-day? *Gaylies*.' [Scotch.]

Gay-lussite (gā-lūs'it), *n.* A mineral so named in honour of *Gay-Lussac*, a distinguished French chemist. It occurs in im-

bedded crystals, of which the primary form is a right rhombic prism. It consists of the carbonates of lime and soda in nearly equal quantities, with water.

Gayly (gā'li), *adv.* Same as *Gaily*.

Gayness (gā'nes), *n.* The state or quality of being gay; gaiety; fineness. 'Softness of lodging, *gayness* of attire.' *Bp. Hall*.

Gaysome (gā'sum), *a.* Full of gaiety.

Gay-you (gā'ū), *n.* [Native name.] A narrow flat-bottomed fishing-boat having an outrigger, much used in Anam. It has two and

Gay-you of Anam.

sometimes three masts, and is usually covered in the middle by a movable roof. The helm is peculiar, resembling that used in China.

Gaze (gāz), *v.i.* pret. & pp. *gazed*; ppr. *gazing*. [Perhaps a form of O.E. *gare*, to stare (see GARE); but more probably connected with such words as *agast*, A. Sax. *gassan*, to smite, Goth. *usgaisjan*, to terrify.] To fix the eyes and look steadily and earnestly; to look with eagerness or curiosity, as in admiration, astonishment, or anxiety.

Ye men of Galilee, why stand ye *gazing* up into heaven? *Acts i. 11*.

Gaze (gāz), *v.t.* To view with fixed attention. And *gazed* awhile the ample sky. *Milton*.

Gaze (gāz), *n.* 1. A fixed look; a look of eagerness, wonder, or admiration; a continued look of attention.

With secret *gaze*,
Or open admiration, him behold. *Milton*.

2. The object gazed on; that which causes one to gaze.

Made of my enemies the scorn and *gaze*. *Milton*.

Stag at gaze.

—At *gaze*, (*a*) in the position assumed by a stag when he turns round in sudden fear or surprise upon first hearing the sound of the hunt; hence, gaping in fearful or stupid wonder.

I that rather held it better
men should perish one by one.

Than that earth should stand
at *gaze*, like Joshua's moon in Ajalon. *Tennyson*.

(b) In *her*, signifying that a hart, stag, buck, or hind, borne in coat-armour, is depicted full-faced, or with the face directly to the front.

Gazebo (ga-zē'bō), *n.* [Humorously formed from *gaze*.] A summer house commanding an extensive prospect: 'a word of trivial coinage.' *Smart*.

Gazeful (gāz'fūl), *a.* Looking with a gaze; looking intently; given to gazing. 'The ravish'd hearts of *gazeful* men.' *Spenser*.

Gazehound (gāz'hound), *n.* A hound that pursues by the sight rather than by the scent: supposed to be the greyhound. *Sir W. Scott*.

Gazelle (ga-zel'), *n.* [Fr. *gazelle*; Sp. *gazela*, an antelope, gazelle; Ar. *ghazal*, a young

Gazelles (*Antelope dorcas*).

deer just able to walk, a fawn, a gazelle.] An animal of Africa and India, of the genus

Antelope. Like the goat, the gazelle has hollow permanent horns, and it feeds on shrubs; but in size and delicacy, and in the nature and colour of its hair, it resembles the roe-buck. It has cylindrical horns, most frequently annulated at the base, and bunches of hair on its fore-legs. It has a most brilliant beautiful eye. Written also *Gazel*.

Gazement (gāz'ment), *n.* View. 'Covered from people's gazement with a veil.' *Spenser*.

Gazer (gāz'ēr), *n.* One who gazes; one who looks steadily and intently from delight, admiration, or study.

But for that chill changeless brow,
Whose throbs thrill with mortality,
And curdles to the gazer's heart. *Byron.*

Gazet (ga-zet'), *n.* [It. *gazetta*, dim. of *L. gazza*, royal treasure.] A small Venetian coin, worth somewhat less than a halfpenny. *B. Jonson.*

Gazette (ga-zet'), *n.* [It. *gazetta*, a gazette, from *gazetta*, a small Venetian coin (from *L.* or rather *Per. gazu*, treasure) which was the price of the first newspaper; hence applied to the paper itself; or the name may have been given to the paper from its being a 'little treasury' of news; or it may have been equivalent to 'The Chatterer,' *gazetta* being a dim. of *gazza*, a magpie.] A newspaper; a sheet or half sheet of paper containing an account of transactions and events of public or private concern, which are deemed important and interesting. The first gazette in England was published at Oxford in 1665. On the removal of the court to London the title of *London Gazette* was adopted. It is now the official newspaper, and published on Tuesdays and Fridays. A similar official newspaper is published also in Edinburgh and Dublin, and all three contain among other things a list of those who have become bankrupt since last publication; hence, to appear in the gazette, to have one's name in the gazette, to become bankrupt.

Gazette (ga-zet'), *v.t.* pret. & pp. *gazetted*; ppr. *gazetting*. To insert in a gazette; to announce or publish in a gazette; as, his promotion is gazetted.

Gazetteer (ga-zet-tēr'), *n.* 1. A writer of news, or an officer appointed to publish news by authority.—2. A newspaper; a gazette. [Rare or obsolete.]

'Gazetteer!' answered Adams. 'What is that?'—
'It is a dirty newspaper,' replied the host, '... which I would not suffer to lie on my table, tho' it hath been offered me for nothing.' *Fielcing.*

3. A book containing descriptions of natural and political divisions, countries, cities, towns, rivers, mountains, &c., in a portion of the world or in the whole world, alphabetically arranged; a book of topographical descriptions; a geographical dictionary.

Gazingstock (gāz'ing-stok), *n.* A person gazed at with scorn or abhorrence; an object of curiosity or contempt.

I will cast abominable filth upon thee, and make thee vile, and will set thee as a gazingstock. *Nab. iii. 6.*

Gazogene (ga'zo-jēn), *n.* [*Gas*, and *Gr. gen-nai*, to produce.] An apparatus used for manufacturing aerated water on a small scale for domestic use, by the combination of an alkali and an acid, as carbonate of soda and tartaric acid. It generally consists of two globes, one above the other, connected by a tube, the lower for containing water, and the upper the ingredients for producing the aerated liquid. When water is gently introduced into the upper globe from the lower, by inclining the vessel so as to fill about a half of the former, chemical action takes place, and the carbonic acid descends and gradually saturates the water in the lower globe. When this has taken place, the aerated water can be drawn off by opening a stop-cock at the top.

Gazolite (ga'zo-lit), *n.* Same as *Aerolite* (which see).

Gazolytes (ga'zo-lits), *n. pl.* In *chem.* the name given to one of the four sections into which the simple elements were divided by Berzelius, the other three being *metals*, *metalloids*, and *halogens*. It was intended to comprise the elements which exist only in a gaseous form.

Gazon (ga-zōn'), *n.* [Fr., from *O.H.G. waso*, *G. wasen*, turf.] In *fort.* turf or a piece of earth covered with grass, used to line parapets and the traverses of galleries.

Gazzatum, *t.* [Said to be from *Gazza* in Palestine, where it is supposed to have been

manufactured.] A fine species of silk or linen stuff of the gauze kind. It is mentioned by writers in the thirteenth century.

Ge. [*Got.* *ga*, *G. ge.*] A common prefix in Anglo-Saxon words, especially in verbs, participles, and verbal nouns. It sometimes has a modifying effect on the meaning of the primitive word, but very often appears to have no appreciable influence. In Old English it appears especially in past participles, such as *yclept*, *ydlight*, *yfostered*, *ywriten*; in *among*, *alike*, *enough*, it is less easily recognized.

Geagh, *n.* The name given by the Turks to a cycle of twelve years, each year bearing the name of a different animal.

The day is also divided into twelve parts or *geaghs*, each of which is distinguished by the name of an animal. *Craig.*

Geal (jēl), *v.i.* [Fr. *geler*; *L. gelo*, to freeze.] To congeal. [Obsolete or Scotch.]

Gean (gēn), *n.* [Fr. *guigne*, *O.Fr. guisne*, heart-cherry. Of Teutonic origin. *O.H.G. wihsela*, wild cherry, contracted into *wihs'la*, became in *O.Fr. guisne*. The interchange between *l* and *n* is not without other examples in Old French.] A kind of wild cherry-tree (*Prunus avium*), a tall tree common in woods in some parts of England, and frequently growing wild in Scotland. The fruit is smaller than that of the common cherry, of a red colour when unripe, and a deep purple or black when it arrives at maturity. The flavour is superior to that of most cherries. The wood of this tree is used for many kinds of domestic furniture and other purposes.

Geant, *t.* *n.* A giant. *Chaucer.*

Gear (gēr), *n.* [*A. Sax. gear*, *gearwe*, habiliments, equipments, *gearu*, *gearo*, prepared, ready, *O.E. gare*, *ware*, ready. See *GARB.*] 1. Whatever is prepared for use or wear; manufactured stuff or material; hence, habit; dress; ornaments.

Array thyself in her most gorgeous gear. *Spenser.*
To see some radiant nymph appear
In all her glittering birthday gear,
You think some goddess of the sky
Descended ready cut and dry. *Swift.*

2. The harness or furniture of domestic animals; whatever is used in equipping horses or cattle for draught; tackle.—3. Military harness; warlike accoutrements. 'Graithed in his gear.' *Ruddiman*. [Scotch.] 4. Goods; riches. [Scotch.]

The gear that is gifted, it never
Will last like the gear that is won. *F. Bailie.*
—Girds and gear, all one's property.—
5. Business matters; business; matter; affair. 'Here's a goodly gear.' *Shak.*

But I will remedy this gear ere long,
Or sell my title for a glorious grave. *Shak.*
I shall appear some harmless villager
Whom thrift keeps up about his country gear. *Milton.*

6. Anything of no value; trash; rubbish; nonsense.

That servant of his that confessed and uttered this gear was an honest man. *Latimer.*

7. *Naut.* a general name for the ropes, blocks, &c., belonging to any particular sail or spar; as, the mainsail-gear; the fore-top-mast-gear.—*Running-gear*, the running rigging.—*Pump-gear*, *windlass-gear*, &c., all the articles belonging to the pumps, windlass, &c.—8. In *mach.* in a general sense, the appliances or furnishings connected with the acting portions of any piece of mechanism; as, expansion gear; valve gear; specifically, (a) toothed wheels collectively; (b) the connection of toothed wheels with each other; gearing.—*To throw machinery into or out of gear*, to connect or disconnect wheel-work or couplings. Written also *Geer*.

Gear (gēr), *v.t.* To dress; to put on gear; to harness.

Gear-cutter (gēr'kut-ēr), *n.* A manufacturer of toothed wheels for transmitting motion in machinery; a machine for cutting such wheels.

Geare (jēr), *v.i.* or *t.* To jeer. *Spenser.*

Gearing (gēr'ing), *n.* 1. Harness.—2. In *mach.* the parts collectively by which motion communicated to one portion of a machine is transmitted to another; a train of toothed wheels for transmitting motion. There are two chief sorts of gearing, viz. *spur-gearing* and *bevelled-gearing*. In the former the teeth are arranged round either the concave or convex surface of a cylindrical wheel in the direction of radii from the centre of the wheel, and are of equal depth throughout. In *bevelled-gearing* the teeth are placed upon the exterior periphery of a conical wheel in a direction converging to the apex of the

cone, and the depth of the tooth gradually diminishes from the base. See under *BEVEL*. Spelled also *Geering*.

Spur-gearing.

Gearing-chain (gēr'ing-chān), *n.* In *mach.* an endless chain transmitting motion from one toothed wheel to another.

Gear-wheel (gēr'whēl), *n.* Any wheel having teeth or cogs which act upon the teeth of another wheel to impart or transmit motion.

Geason (gē'zn), *a.* [*A. Sax. gesen*, rare, dear.] Rare; uncommon; wonderful.

The ladie heark'ning to his sensefull speech,
Found nothing that he said unmeet or geason. *Spenser.*

Geat (jēt), *n.* [*D. gat*. See *GATE*.] The hole through which metal runs into a mould in castings. Written also *Git*.

Gebia (jē'bi-a), *n.* A genus of long-tailed crabs, consisting of three species, natives of the British coast.

Gecarcinidæ (jē-kār-sin'ī-dē), *n. pl.* The land-crab family, consisting of only one genus, *Gecarcinus* (which see).

Gecarcinus (jē-kār-sī-nus), *n.* The genus comprising those short-tailed decapod crustaceans popularly called *Land-crabs*. They live at a distance from the sea, some living in fresh water and some burrowing in the ground, coming to the salt-water only in spawning time. The gills are kept moist by means of a special arrangement of the gill cavity. The genus is co-extensive with the family.

Gecinidæ (jē-sī-nī-dē), *n. pl.* The green woodpeckers, a sub-family of scansorial birds belonging to the family *Picidæ*, and containing as among the principal species the green woodpecker (*Gecinus* or *Picus viridis*) of Britain.

Geck (gek), *n.* [*Comp. G. geok*, *D. gek*, a silly person, a cockcomb; also *A. Sax. geac*, a cuckoo, a simpleton; *Sc. gook*.] [*Old* or provincial *E. and Sc.*] 1. A toss of the head in derision or from vanity or folly; hence, a taunt; a jibe.—2. An object of scorn; a dupe; a gull.

Why have you suffered me to be imprisoned,
And made the most notorious geck and gull
That e'er invention play'd on? *Shak.*

3. Scorn; contempt.
Geck (gek), *v.i.* and *t.* [See the noun, and comp. *G. gecken*, to mock, to banter, to make a fool of.] [*Old English* and *Scotch.*] 1. To toss the head in derision or scorn, or from vanity or folly; to deride; to mock.

He gecks at me and says I smell o' tar. *Ramsay.*

2. To cheat, trick, or gull.

Gecko (gek'o), *n.* [Said to be from the sound of the animal's voice, which resembles the word *gecko* uttered in a shrill tone.] A name common to the members of the family *Geckotidæ* (which see).

Geckotidæ (gek-ō'tī-dē), *n. pl.* [*Gecko* (which see), and *Gr. eidos*, resemblance.] A family of nocturnal lizards, also called *Ascalabotes*,

Wall-gecko (*Gehco fascicularis*).

belonging to the section *Pachyglossæ*, characterized by the general flatness of their form, especially of the head, which is somewhat of a triangular shape; the body is covered on the upper part with numerous round prominences or warts; the feet are rather short, and the toes of nearly equal length and furnished with flattened sucking pads by means of which the animals can run up a perpendicular wall, or even across a ceiling; the tail varies, but is not long.

and often has folds or circular depressions, but never a dorsal crest. The greatest number feed on insects and their larvae and pupæ. Several of the species infest houses, where, although they are perfectly innocuous, their appearance makes them unwelcome tenants.

Ged, Gedd (ged), *n.* [Icel. *gedda*, Comp. A. Sax. *gād*, a goad, and Ir. *gadh*, a dart. Probably from its shape.] The name of the pike in Scotland.

Gee, Jee (jē), *v. i.* [In the first sense perhaps a form of *go*; in the second and third more probably from the Fr. *dia*, used to make the horse turn to the left, in Switzerland to the right; Armor. *dia*, *dion*, Ir. *deas*, to the right, the right hand. The Fr. *huc* issued with regard to the opposite direction.] 1. To agree with; to suit with; to fit. 2. To go or turn to the off-side, or from the driver; to gee-ho: used by teamsters to the cattle they are driving, and followed by *off*. 3. To move faster; to quicken the speed: used also by teamsters in the imperative to their cattle with *up*; as, *gee up*!

Gee, Jee (jē), *v. t.* To cause to turn, as a team, to the off-side, or from the driver; as, to *gee* a team of oxen.

Gee-ho (jē'hō), *v. i.* See **GEE**, *v. i.* 2.

Geer (gēr), *n.* Same as **Gear**.

Geering (gēr'ing), *n.* Same as **Gearing**.

Geese (gēs), *n. pl.* of *goose*.

Geest (gēst), *n.* [L.G. *geest*, *geestland*, sandy, dry land, O. Fris. *gēst*, *gēstland*, from Fris. *gāst*, barren.] Alluvial matter on the surface of land, not of recent origin.

Geez (gēz), *n.* The ancient language of Abyssinia, a dialect of Arabic. It has a literature reaching back to the fourth century. As a living language it has been superseded by Amharic. Called also *Literary Ethiopic*.

Gehenna (gē-hē'nā), *n.* [L. *gehenna*, Gr. *gehenna*, from the Heb. *ge-hinnom*, the valley of Hinnom, in which was Tophet, where the Israelites sometimes sacrificed their children to Moloch (2 Ki. xxiii. 10). On this account the place was afterwards regarded as a place of abomination and became the receptacle for the refuse of the city, perpetual fires being kept up in order to prevent pestilential effluvia.] A term used in the New Testament as equivalent to hell, place of fire or torment and punishment, and rendered by our translators by hell and hell-fire. Mat. xviii. 9; xxiii. 15.

The pleasant valley of Hinnom—Tophet thence and black Gehenna called—the type of hell.

Gehlenite (gē'lēn-it), *n.* [From *Gehlen*, the chemist.] A mineral of a grayish colour and resinous lustre, found chiefly at Mount Monzoni in the Tyrol. It is a ferro-silicate of alumina and lime.

Geine, Geic Acid (jē'in, jē'ik as'id), *n.* [Gr. *gē*, the earth.] Another name for **Humus** (which see).

Geisha (gē'i-sha), *n.* [Japanese.] A Japanese dancing-girl who performs in public.

Geizen, Gizen (gē'zn), *v. t.* [Sw. *gisa*, to geizen; Icel. *gisin*, dried.] To become leaky for want of moisture, as a tub or barrel; to wither; to fade. [Scotch.]

Gekko (gē'kō), *n.* Same as **Gecko**.

Gelable (jē'lā-bl), *a.* [L. *gelo*, to congeal.] That may or can be congealed; capable of being converted into jelly.

Gelada (jē'lā-dā), *n.* A singular Abyssinian baboon, remarkable for the heavy mane which hangs over the shoulders, and which only grows when the animal is adult. It is called *Gelada Ruppelli*, in honour of Dr. Ruppell, its discoverer. It is also known as *Cynocephalus* (*Theropithecus*) *Gelada*.

Gelalæan Era (jē-lā-læ'an ē'ra), *n.* The era of Yezdegerd, so called from its reform by Gelal-Edin, sultan of Khorassan. See **YEZDEGERDIAN**.

Gelasimus (jē-las'i-mus), *n.* See **CALLING-CRAB**.

Gelatigenous (jē-lā-tij'in-us), *a.* [E. *gelatine*, and Gr. *gennao*, to produce.] Producing or yielding gelatine. — *Gelatigenous tissues*, animal tissues which yield to boiling water gelatine. They are chiefly found in the cellular membrane, the skin, the tendons, ligaments, bones, cartilages, &c.

Gelatinate (jē-lā'tin-āt), *v. t.* pret. & pp. *gelatinated*; ppr. *gelatinating*. To be converted into gelatine or into a substance like jelly.

Lapis lazuli, if calcined, does not effervesce, but *gelatinates* with the mineral acids. Kirwan.

Gelatinate (jē-lā'tin-āt), *v. t.* To convert into gelatine or into a substance resembling jelly.

Gelatination (jē-lā'tin-ā'shon), *n.* The act or process of converting or being turned into gelatine or into a substance like jelly.

Gelatin, Gelatin (jē'lā-tin), *n.* [Fr. *gelatine*, It. and Sp. *gelatina*, from L. *gelo*, to congeal, to freeze, *gelu*, ice.] A concrete animal substance, transparent, and soluble slowly in cold water, but rapidly in warm water. It is confined to the solid parts of the body, such as tendons, ligaments, cartilages, and bones, and exists nearly pure in the skin, but it is not contained in any healthy animal fluid. Its leading character is the formation of a tremulous jelly when its solution in boiling water cools. Gelatine does not exist as such in the animal tissues, but is formed by the action of boiling water. The coarser forms of gelatine from hoofs, hides, &c., are called *glue*; that from skin and finer membranes is called *size*; and the purest gelatine, from the air-bladders and other membranes of fish, is called *islinglass*. With tannin a yellowish white precipitate is thrown down from a solution of gelatine, which forms an elastic adhesive mass, not unlike vegetable gluten, and is a compound of tannin and gelatine. It is this action of tannin on gelatine that is the foundation of the art of tanning leather. Gelatine when acted upon by sulphuric acid yields gelatine sugar or glyccol. When treated with potash it is said to yield glyccol and leucine. Gelatine is nearly related to the proteids. No chemical formula has yet been deduced for gelatine. It is a nutritious article of food, and as part of the diet in hospitals produces the best effects, but animals fed exclusively on it die with the symptoms of starvation, as it cannot yield albumen, fibrine, or caseine. Its ultimate components are 47.8 carbon, 7.9 hydrogen, 16.9 nitrogen, 27.4 oxygen. See **JELLY**.—2. See **GELATINOSI**.

Gelatine† (jē'lā-tin), *a.* Gelatinous. 'Gelatine matter.' Derham.

Gelatiniform (jē-lā-tin'i-form), *a.* Having the form of gelatine.

Gelatinize (jē-lā'tin-iz), *v. t.* or *i.* The same as **Gelatinate**.

Gelatinosi (jē-lā'tin-ō'si), *n. pl.* In zool., according to Cuvier's arrangement, the second order of Polypi, comprehending the Hydrozoa, Polyzoa, and in part the Infusoria of later zoologists.

Gelatio-sulphurous (jē-lā'ti-no-sul'fer-us), *a.* Consisting of gelatine and sulphur.

Gelatinous (jē-lā'tin-us), *a.* Of or pertaining to, or consisting of gelatine; of the nature and consistence of gelatine; resembling jelly; viscous.—*Gelatinous tissue*, in anat. the organic tissue of the bones, that of tendons and ligaments, the cellular tissue, the skin, and the serous membranes. All these substances dissolve by long-continued boiling in water, and the solution on cooling forms a jelly.

Geld, Gelt (geld, gelt), *n.* [A. Sax. *geld*, *gild*, *gylde*, G. and D. *geld*, money, a payment of money, tribute.] Money; tribute; compensation. This word is obsolete in English, but it occurs in old laws and law books in composition; as in *Danegeld* or *Danegelt*, a tax imposed to meet the expense of defending the country against the Danes; *Weregeld*, compensation for the life of a man, &c.

All these the king granted unto them . . . free from all *gells* and payments in a most full and ample manner. Fuller.

Geld (geld), *v. t.* pret. *gelded* or *gelt*; pp. *gelded* or *gelt*; ppr. *gelding*. [Icel. *gelda*, Dan. *gilde*, G. *gelien*, to geld, A. Sax. *gylte*, castrated.] In the north of England a cow not with calf is called a *geld* cow; comp. G. *gelt*, barren, *gelt-kuh*, barren cow; in Scotland a cow not giving milk is said to be *yeld*.] 1. To castrate; to emasculate.—2. To deprive of anything essential. 'Bereft and gelded of his patrimony.' Shak.—3. To deprive of anything immodest or exceptionable; to expurgate, as a book, story, and the like.

They were diligent enough to make sure work, and to *geld* it so clearly in some places that they took away the very manhood of it. Dryden.

Geldable (geld'ā-bl), *a.* That may be gelded.

Geldable† (geld'ā-bl), *a.* Liable to pay taxes.

Burrill.

Gemmate (je-m'ät), *a.* [*L. gemmatus*, pp. of *gemmo*, to put forth buds, from *gemma*, a bud.] In *bot.* having buds; reproducing by buds.

Gemmated (je-m'ät-ed), *a.* Adorned with gems or jewels.

Gemmatum (je-m'ä'shon), *n.* [*L. gemmatum*, from *gemmo*, *gemmatum*, to put forth buds, from *gemma*, a bud.] 1. In *zool.* the process of reproduction by buds; the formation of a new individual by the protrusion and complete or partial separation of a part of the parent; budding.

Gemmatum consists in the production of a bud or buds, usually from the outside, but sometimes from the inside, of an animal; which buds become developed into more or less completely independent beings. The fresh beings thus produced by budding are all known as zooids. . . . When the zooids produced by budding remain permanently attached to one another and to the parent organism which produced them the case is said to be one of 'continuous' *gemmatum*, and the ultimate result of this is to produce a colony or composite structure, composed of a number of similar and partially interdependent beings, all produced by budding, but all remaining in organic connection. *H. A. Nicholson.*

2. In *bot.* the act of budding; the manner in which young leaves are folded up in the bud before its unfolding. — 3. The time when leaf-buds are put forth.

Gemmels (je-m'elz), *n. pl.* A pair of hinges.

Gemmeous (je-m'ë-us), *a.* [*L. gemmeus*, composed of or set with precious stones. See **GEM**.] Pertaining to gems; of the nature of gems; resembling gems.

Gemmiferous (je-m'if'er-us), *a.* [*L. gemma*, a bud, and *fero*, to bear.] Multiplying by buds, as vegetables, and certain animals of the lowest class, as Hydrozoa.

Gemminess (je-m'i-nes), *n.* The state or quality of being gemmy; spruceness; smartness.

Gemmipara, **Gemmipares** (je-m'ip'a-ra, je-m'ip'a-rëz), *n. pl.* [*L. gemma*, a bud, and

pario, to produce.] The animals which propagate by buds, as the hydra or fresh-water polype, &c.

Gemmiparity (je-m'ip-a-ri-ti), *n.* In *zool.* the condition or quality of being gemmiparous; the faculty of reproducing by buds, as in polypes. The buds may separate from the parent and become distinct animals or remain attached to it.

Gemmiparous (je-m'ip'a-rus), *a.* [*L. gemma*, a bud, and *pario*, to bear.] 1. Producing buds or gems. — 2. In *zool.* reproducing by buds, which, growing out of an animal organism, mature and fall off, becoming independent animals, as in many of the infusoria, or remain in organic connection, forming a colony or composite structure, composed of a number of similar and partially independent zooids. See extract under **GEMMATION**.

Gemmosity (je-m'os-i-ti), *n.* The quality of being a gem or jewel. *Bailey.*

Gemmule (je-m'ül), *n.* [*L. gemmule*, dim. of *gemma*, a bud.] 1. In *bot.* (a) a term used synonymously with *plumule*, or the growing point of the embryo in plants. (b) One of the buds of mosses. (c) One of the reproductive spores of algae. — 2. In *zool.* a term applied to the ciliated embryos of many Coelenterata, as also to the seed-like reproductive bodies or spores of Spongia.

Gemmuliferous (je-m'ül-if'er-us), *a.* Bearing gemmules.

Gemmy (je-m'i), *a.* 1. Bright; glittering; full of gems.

The *gemmy* bridle glittered free,
Like to some branch of stars we see
Hang in the golden galaxy. *Tennyson.*

2. Neat; spruce; smart.

Genappe (je-nap'), *n.* [From *Genappe*, in Belgium, where it was originally manufactured.] A worsted yarn whose smoothness enables it to be conveniently combined with silk, and so well adapted for braids, fringes, &c.

Gendarme (zhäh-därm), *n.* [Fr. from the pl. *gens d'armes*, men-at-arms.] The name of a private in the armed police of France in our day; but in former times the appellation of *gens d'armes* or *gendarmes* was confined to the flower of the French army, composed of nobles or noblesse, and armed at all points. The present gendarmerie of France are charged with the maintenance of its police and the execution of its laws. The *gendarmes* are all picked men; they are usually taken from the regular forces, and are of tried courage or approved conduct. There are *horse gendarmes* and *foot gendarmes*. They are formed into small parties called *brigades*; and the union of a number of these forms a *departmental company*.

Gendarmerie, **Gendarmery** (zhäh-därm-rë, jen-därm'er-i), *n.* [Fr. *gendarmerie*.] The body of gendarmes.

Gende. Same as *Gent*. *Chaucer.*

Gender (jen'dër), *n.* [Fr. *genre*, from *L. genus*, *generis*, origin, kind or sort, gender; *Gr. genos*; from the root *gen*, *Skt. jan*, to beget. See **GENUS**.] 1. Kind; sort. 'Supply it with one *gender* of herbs.' *Shak.* — 2. A

sex, male or female. — 3. In *gram.* one of those classes or categories into which words are divided according to the sex, natural or metaphorical, of the beings or things they denote; a class of words marked by similarity in termination, the termination having attached to it a distinction in sex, as seen in the termination in nouns, adjectives, participles, &c.; a grammatical category in which words of similar termination are classed together; such a distinction in words. In English words expressing males are said to be of the *masculine gender*; those expressing females, of the *feminine gender*; and words expressing things having no sex, are of the *neuter* or *neither gender*.

Gender is a grammatical distinction and applies to words only. Sex is a natural distinction and applies to living objects. *Dr. Morris.*

Gender has two aspects: (i) it represents a tendency to use different sounds for relations to males from those used for relations to females, or to inanimate things; (ii) it represents the tendency to couple together words (nouns, adjectives, and pronouns) agreeing in their terminations. From the first point of view there are but three *genders*; many languages have but two; some have none. From the second point of view there may be as many *genders* as there are sets of terminations; some languages have none; some, e.g. the Congoes and Caffirs, have many. *Prof. March.*

Gender (jen'dër), *v.t.* To beget. [Obsolete, *engender* being more generally used.] Its influence.

Thrown in our eyes *genders* a novel sense. *Keats.*

Gender (jen'dër), *v.i.* To copulate; to breed. *Lev. xix. 19.*

Genagogenesis (jē'në-a-je'n'ë-sis), *n.* Same as *Parthenogenesis*.

Genealogical (jē'në-a-loj'ik-al), *a.* [From *genealogy*.] 1. Pertaining to the descent of persons or families; exhibiting the succession of families from a progenitor; as, a *genealogical table*. — 2. According to the descent of a person or family from an ancestor; as, a *genealogical order*. — *Genealogical tree*, the genealogy or lineage of a family, drawn out under the form of a tree, with its roots, stem, and branches.

Among the rest was the room in which James I. died, and a portico with a *genealogical tree* of the house of Cecil painted on the walls. *Gough.*

Genealogically (jē'në-a-loj'ik-al-i), *adv.* In a genealogical manner.

Genealogist (jē'në-al'oj-ist), *n.* One who traces descents of persons or families.

Genealogize (jē'në-al'oj-iz), *v.i. pret. & pp. genealogized*, ppr. *genealogizing*. To investigate or relate the history of descents.

Genealogy (jē'në-al'oj-i), *n.* [*L.* and *Gr. genealogia*—*Gr. genos*, race (from the root *gen*, *Skt. jan*, to beget), and *logos*, discourse. See **GENUS**.] 1. An account or history of the descent of a person or family from an ancestor; enumeration of ancestors and their children in the natural order of succession. 2. Pedigree; lineage; regular descent of a person or family from a progenitor.

The ancients ranged chaos into several regions; and in that order successively rising one from another, as if it were a pedigree or *genealogy*. *Burnet.*

A particular beat of drum or march, being that which, in the morning, gives notice for the infantry to be in readiness to march.—5. *Eccles*, the chief of an order of monks, or of all the houses or congregations established under the same rule. 6.† The public; the community; the vulgar; with the definite article.

The *general* was formerly a common expression for what we now call the community or the people.

'The *general* subject to a well-wished king, Quit their own part!' *Shak.*

'The play, I remember, pleased not the million; 'twas caviare to the *general*.' *Shak.* *Craik.*

—In *general*, in the main; for the most part; not always or universally.

I have shown that he excels, in *general*, under each of these heads. *Addison.*

General Assembly, *n.* The supreme court of the Established Church and Free Church of Scotland. See ASSEMBLY.

Generale (jen'ér-á'lé), *n.* pl. **Generalia** (jen'ér-á'l-á). [L. *Neuter* of adjective *generalis*, general.] That which is general. Hence—1. The usual commons in a religious house.—2. pl. Generalities.

There is need of a set of intermediate scientific truths, derived from the higher generalities of science, and destined to serve as the *generalia* or first principles of the various arts. *J. S. Mill.*

Generalissimo (jen'ér-ál-si'mó), *n.* [It.] The chief commander of an army or mili-

tary force which consists of two or more grand divisions under separate commanders. [The term is not used in the British army.]

Pompey had deserved the name of Great; and Alexander with the same cognomination was *generalissimo* of Greece. *Sir T. Browne.*

Generality (jen'ér-ál-ti), *n.* [Fr. *généralité*; It. *generalità*. See GENUS, GENDER.] 1. The state of being general; the quality of including species or particulars.—2. A statement which is general or not specific; that which is vague by reason of applying to a whole class collectively, but not to the individuals composing the class taken severally; particularly, that which lacks specificness or application to any one case; thus, 'a virtuous woman is a crown to her husband' is a general statement or a *generality*, while 'the Earl of Nithsdale's wife was his best friend in the day of trouble' is a specific statement or a *particular*.

Let us descend from *generalities* to particulars. *Landor.*

3. The main body; the bulk; the greatest part; as, the *generality* of a nation or of mankind.

Generalizable (jen'ér-ál-iz-á-bl), *a.* That may be generalized, or brought under a general rule, or referred to a particular class or genus.

Extreme cases are, ipso nomine, not *generalizable*. *Coleridge.*

Generalization (jen'ér-ál-iz-á'shon), *n.* 1. The act or process of extending from particulars to generals; the act of making general, or of comprehending under a common name several objects agreeing in some point, which we abstract from each of them, and which that common name serves to indicate.

Generalization is only the apprehension of the one in the many. *Sir W. Hamilton.*

2. A general inference.

In our inquiries into the nature of the inductive process, we must not confine our notice to such *generalizations* from experience as profess to be universally true. *J. S. Mill.*

Generalize (jen'ér-ál-iz), *v.t.* pret. & pp. *generalized*; ppr. *generalizing*. 1. To reduce to a genus; to arrange in a genus; to bring, as a particular fact or series of facts, into relation with a wider circle of facts.

Copernicus *generalized* the celestial motions, by merely referring them to the moon's motion. Newton *generalized* them still more, by referring this last to the motion of a stone through the air. *Nicholson.*

The existence of a man with such mighty powers of discovery and demonstration as Newton, and the recognition of his doctrines among his contemporaries, depend upon causes which do not admit of being *generalized*. *Sir G. Lewis.*

2. To deduce as a general principle from the consideration of many particulars.

A mere conclusion *generalized* from a great multitude of facts. *Coleridge.*

Generalize (jen'ér-ál-iz), *v.i.* To form objects into classes; to employ one's self in generalization.

The reviewer holds that we pass from special experiences to universal truths in virtue of 'the inductive propensity—the irresistible impulse of the mind to generalize ad infinitum.' *Whewell.*

Generally (jen'ér-ál-li), *adv.* 1. In general; commonly; extensively, though not universally; most frequently, but not without exceptions; as, a hot summer *generally* follows a cold winter; men are *generally* more disposed to censure than to praise.—2. In the main; without detail; in the whole taken together.

Generally speaking, they live very quietly. *Addison.*

3.† All taken together; collectively; in a body.

And so all of them *generalit* have power towards some good by the direction of reason. *Sir P. Sidney.*

Therefore I counsel that all Israel be *generally* gathered unto thee, from Dan even to Beersheba, as the sand that is by the sea for multitude. *Sam. xvii. 21.*

SYN. Usually, ordinarily, commonly, mainly, principally, chiefly.

Generalness (jen'ér-ál-nes), *n.* Wide extent, though short of universality; frequency; commonness.

They had, with a general consent, rather springing by the *generalness* of the cause than of any artificial practice, set themselves in arms. *Sir P. Sidney.*

General-officer (jen'ér-ál-of-fis-ér), *n.* *Milit.* the commander of an army, a division, or a brigade.

Generalship (jen'ér-ál-ship), *n.* 1. The office of a general; hence, the person holding the rank or position of a general.

Your *generalship* puts me in mind of Prince Eugene. *Goldsmith.*

2. The skill and conduct of a general officer;

military skill in a commander, exhibited in the judicious arrangements of troops, or the operations of war.

He acknowledged . . . that his success was to be attributed, not at all to his own *generalship*, but solely to the valour and steadiness of his troops. *Macaulay.*

Hence—3. Management or judicious tactics *generally*.

This was looked on in no other light, but as an artful stroke of *generalship* in Trim to raise a dust. *Sterne.*

4. The discharge of the functions of a general, as, the affair was executed under his *generalship*.

General-staff (jen'ér-ál-staf), *n.* *Milit.* the staff of an army.

Generality (jen'ér-ál-ti), *n.* The whole; the totality. *Hale.* [Rare.]

Generant (jen'ér-ant), *n.* [L. *generans*, *generantis*, ppr. of *genero*, to beget. See GENUS.] That which generates. 'The *generant* is supposed to be the sun.' *Ray.*

Some believe the soul made by God, some by angels, and some by the *generant*. *Glanville.*

Specifically, in *math.* that which by its motion generates or is conceived as generating a line, figure, or solid body; as, an isosceles triangle revolving on the perpendicular let fall from its apex to the base is the *generant* of a right cone.

Generant (jen'ér-ant), *a.* Generative; begetting; producing; specifically, in *math.* acting as a generant (see the noun).

Generate (jen'ér-át), *v.t.* pret. & pp. *generated*; ppr. *generating*. [L. *genero*, *generatum*, to beget. See GENUS.] 1. To beget; to procreate; to propagate; to produce a being similar to the parent.—2. To produce; to cause to be; to bring into life; as, great whales which the waters *generated*.—3. To cause; to produce; to form.

Sounds are *generated* where there is no air at all. *Bacon.*

Whatever *generates* a quantity of good chyle, must likewise *generate* milk. *Arbuthnot.*

—*Generating function*, a term applied by Laplace, in solving equations of differences, &c., to denote any function of *x*, considered with reference to the coefficients of its expansion in powers of *x*.—*Generating line* or *figure*, in *math.* is that line or figure by the motion of which another figure or solid is supposed to be described or generated.

Generation (jen'ér-á'shon), *n.* 1. The act of begetting; procreation, as of animals.—2. Production; formation; as, the *generation* of sounds.—3. In *math.* the formation or description of a line, geometrical figure, or magnitude of three dimensions, by the motion of a point, line, or figure in accordance with a mathematical law.—4. A single succession in natural descent, as the children of the same parents; hence, an age, or period of time between one succession and the next. Thus we say, the third, the fourth, or the tenth *generation*. Gen. xv. 16.

A link among the days, to knit The *generations* each with each. *Tennyson.*

5. The people of the same period or living at the same time.

6 Faithless and perverse *generation*. Luke ix. 41.

O a family; a race.

We plant a solid foot into the Time, And mould a *generation* strong to move. *Tennyson.*

7. Progeny; offspring.

The barb'rous Scythian, Or he that makes his *generation* messes To gorge his appetite, shall to my bosom Be as well neighbour'd. *Shak.*

—*Equivocal* or *spontaneous generation*, in biology, the production of animals and plants without previously existing parents, a notion entertained among ancient naturalists, and under the title of *abiogenesis* now held by some extreme evolutionists. See ABIOTIC-GENESIS.—*Alternate generation*. See under ALTERNATE.

Generative (jen'ér-át-iv), *a.* Having the power of generating, propagating, or producing; belonging to generation or the act of procreating.

In grains and kernels the greatest part is the nutriment of the *generative* particle. *Sir T. Browne.*

If there hath been such a gradual diminution of the *generative* faculty upon the earth, why was there not the like decay in the production of vegetables? *Bentley.*

Generator (jen'ér-át-ér), *n.* 1. He who or that which begets, causes, or produces.—2. In music, the principal sound or sounds by which others are produced, as the lowest C for the treble of the harpsichord, which, besides its octave, will strike an attentive

ear with its twelfth above, or G in alt., and with its fifteenth above, or C in alt.—3. A vessel or chamber in which something is generated; as, the *generator* of a steam-engine, or in gas-making apparatus.

Generatrix (jen'er-à-triks), *n.* In math. that which generates; specifically, the point, line, or figure which by its motion generates a line, surface, or solid.

Generio, General (jē-ne'rik, jē-ne'rik-al), *a.* [Fr. *général*, from L. *genus*, *generis*, kind. See GENDER, GENUS.] 1. Pertaining to a genus or kind; comprehending the genus, as distinct from the species, or from another genus. A *generio* description is a description of a genus; a *generio* difference is a difference in genus; a *generio* name is the denomination which comprehends all the species, as of animals, plants, or fossils, which have certain essential and peculiar characters in common: thus *Canis* is the *generio* name of animals of the dog kind; *Felis*, of the cat kind; *Cervus*, of the deer kind.

These men—whom modern writers set down as the Sophists, and denounce as the moral pestilence of their age—were not distinguished in any marked or *generio* way from their predecessors. *Grot.*

2. Very comprehensive; referring to large classes or their characteristics; general; thus, *animal*, *city*, are *generio* nouns.

Generically (jē-ne'rik-al-ly), *adv.* With regard to genus; as, an animal *generically* distinct from another, or two animals *generically* allied.

Genericalness (jē-ne'rik-al-nes), *n.* The state or quality of being *generio*.

Generification (jē-ne'rik-ā-shon), *n.* [L. *genus*, *generis*, kind, and *facio*, to make.] The act of generalizing.

Out of this universal is elaborated by *generification*. *Sir W. Hamilton.*

Generosity (jen'er-ōs'i-ti), *n.* [Fr. *générosité*, L. *generositas*, from *generosus*, of good or noble birth, noble-minded, from *genus*, race, kind, high birth, blood, family.] 1. The quality of being generous; nobleness of soul; magnanimity; liberality of sentiment; more specifically, a disposition to give liberally or to bestow favours; a quality of the heart or mind opposed to meanness or parsimony.

Generosity is in nothing more seen than in a candid estimation of other men's virtues and good qualities. *Barrow.*

The true heroic type of a Celtic warrior adds to his courage and self-sacrifice a *generosity* and a gentleness which make him one of the most finely-tempered specimens of humanity. *Prof. Blackie.*

2. Liberality in act; munificence; as, the object of one's *generosity*.

Generous (jen'er-us), *a.* [L. *generosus*, Fr. *généreux*, from *genus*, birth, extraction, family. See GENUS.] 1. Primarily, being of honourable birth or origin; hence, noble; honourable; magnanimous: applied to persons; as, a *generous* foe; a *generous* critic.

Twice have the trumpets sounded; The *generous* and bravest citizens Have hent the gates. *Shak.*

I know the Table Round, my friends of old; All brave, and many *generous*, and some chaste. *Tennyson.*

2. Noble; honourable: applied to things; as, a *generous* virtue; *generous* boldness.—3. Liberal; bountiful; munificent; free to give; as, a *generous* friend; a *generous* father. 'Noble by heritage, *generous*, and free.' *Carey.*—4. Strong; full of spirit; as, *generous* wine.—5. Full; overflowing; abundant; as, a *generous* cup; a *generous* table.—6. Possessed of or showing blood or breeding; spirited; courageous; as, a *generous* steed.

Acteon spies His op'ning hounds, and now he hears their cries: A *generous* pack. *Addison.*

Generously (jen'er-us-ly), *adv.* In a *generous* manner; honourably; not meanly; nobly; magnanimously; liberally; munificently.

Generousness (jen'er-us-nes), *n.* The quality of being *generous*; magnanimity; nobleness of mind; liberality; munificence; generosity.

Genesisiology (jen-ē'si-ol'-o-jī), *n.* [Gr. *genesis*, origin, generation, and *logos*, discourse.] The science or doctrines of generation.

Genesis (jen-ē-sis), *n.* [Gr. *genesis*, from *gennao*, to beget. See GENDER, GENUS.] 1. The act of producing or giving origin to; generation; origination.

The origin and *genesis* of poor Stirling's club. *Carryle.*

Those to whom the natural *genesis* of simpler phenomena has been made manifest, still believe in the supernatural *genesis* of phenomena which cannot have their causes readily traced. *H. Spencer.*

2. An explanation of the origin of anything. 3. The first book of the Old Testament, containing the history of the creation of the world and of the human race. In the original Hebrew this book has no title; the present title was prefixed to it by those who translated it into Greek.—4. In *geom.* same as *Generation*, 3.

Genet (jen'et), *n.* [Fr. *genette*, Sp. *gineeta*, a light-horseman, in O.Sp. a horse, 'named from the Berber tribe of *Zeneta*, who supplied the Moorish sultans of Grenada with a body of horse on which they placed great reliance.' *Wedgwood.*] A small-sized, well-proportioned Spanish horse. Written also *Jennet*.

Genet, Genette (jē-net'), *n.* [L.L. *geneta*, Sp. *gineeta*, from Ar. *djennett*.] 1. The *Viverra genetta*, a carnivorous animal belonging to the family *Viverridae* (civets and genets). The genet is a native of the western parts of Asia, and is about the size of a very small cat, but of a longer form, with a sharp-pointed snout, upright ears, and a very long tail. It has a very beautiful soft fur, and, like the civet, produces an agreeable perfume. It is of a mild disposition, and easily tamed.—2. The fur of the genet, which is made into muffs and tippets; hence, cat skins made up in imitation of this fur and used for the same purpose.

Genethliac (je-neth'li-ak), *n.* 1. A birthday-poem.—2.† One who is versed in genethliacs.

Genethliacal, Genethliac (je-neth-li'a-kal, je-neth'li-ak), *a.* [Gr. *genethliakos*, from *genethlō*, birth.] Pertaining to nativities as calculated by astrologers; showing the positions of the stars at the birth of any person. [Rare.]

The night immediately before he was slighting the art of those foolish astrologers and *genethliacal* ephemerists, that use to pry into the horoscope of nativities. *Howell.*

Genethliacs (je-neth'li-aks), *n.* The science of calculating nativities, or predicting the future events of life from the stars which preside at the birth of persons. *Butler.* [Rare.]

Genethiology (je-neth'li-a'-o-jī), *n.* [Gr. *genethiologia*, from *genethlō*, birth, and *logos*, a discourse.] A species of divination by astrological observation, as to the future destinies of one newly born.

It seems by Strabo that one of the sects of the Chaldeans did so hold to astronomy still, that they wholly rejected *genethiology*. *Sittingfleet.*

Genethliatic (je-neth'li-at'ik), *n.* One who calculates nativities. *Drummond.* [Rare.]

Genetic, Genetical (jen-et'ik, jen-et'ik-al), *a.* [Gr. *genesis*, generation, from *gennao*, to beget.] Relating to generation; pertaining to the origin of a thing or its mode of production; as, *genetic* development.

Man considers as accidental whatever he is unable to explain in the planetary formation on purely *genetic* principles. *Cosmos.*

In order to apply mineralogy to geological research we must study the *genetic* relations of minerals—that is to say, we must endeavour to discover their modes of production, and the circumstances which were necessary or conducive to their appearance in the positions and in the combinations in which we now find them. *Hicks and Geikie.*

Genetic (jen-et'ik), *n.* [Gr. *genesis*, generation.] In *med.* a medicine which acts on the sexual organs.

Genetically (jen-et'ik-al-ly), *adv.* In a *genetic* manner; by means of genetics.

Genette (je-net'), *n.* See GENET.

Geneva (jē-nē'va), *n.* [Fr. *Génève*, It. *ginepro*, L. *juniperus*, juniper.] A spirit distilled from grain or malt, with the addition of juniper-berries. But instead of these berries the spirit is sometimes flavoured with the oil of turpentine. The word is now usually in the form *gin*.

Geneva Bible, *n.* A copy of the Bible in English, printed at Geneva; first in 1560. This copy was in common use in England till the version made by order of King James was introduced, and it was laid aside by the Calvinists with reluctance.

Genevan (jē-nē'van), *a.* Pertaining to Geneva.

Genevan (jē-nē'van), *n.* 1. An inhabitant of Geneva; a *Genevese*.—2. An adherent of Genevan or Calvinistic theology; a Calvinist. See CALVINISM.

Genevanism (jē-nē'van-izm), *n.* [From *Geneva*, where Calvin resided.] Calvinism.

Geneva-watch (jē-nē'va-wach), *n.* A watch made at Geneva or of Swiss manufacture, generally of less size than the English watch, and having neither fuse nor chain; hence, a watch resembling this in form or construc-

tion. These watches are for the most part of inferior workmanship and finish to home-made watches, and consequently considerably lower in price.

Genevese (je-ne-véz'), *n. sing. and pl.* A native or natives of Geneva.

Genevese (je-ne-véz'), *a.* Relating to Geneva. **Genial** (jē-ni-al), *a.* [L. *genialis*, from *genius*, the spirit or nature of a man.] 1. Contributing to propagation or production; that causes to produce.

Creator, Venus, *genial* power of love. *Dryden.* 2.† Presiding over marriage; promoting or assisting at marriage.

What day the *genial* angel to our sire Brought her in naked beauty. *Milton.*

3. Characterized by kindly warmth of disposition and manners such as promotes cheerfulness on the part of others; cordial; kindly; sympathetically cheerful; as, a fine *genial* nature. 'The celebrated drinking ode of this *genial* archdeacon.' *Warton.*

4. Enlivening; warming; comforting; contributing to life and cheerfulness; supporting life. 'The grand *genial* power of the system, that visible god the sun.' *Warburton.*—5. Native; natural; innate. 'Natural incapacity and *genial* indisposition.' *Sir T. Broome.* [Rare.]—6. Relating to or exhibiting genius. [Rare.]

Men of genius have often attached the highest value to their less *genial* works. *Hare.*

Genial, Genian (je-ni'al, je-ni'an), *a.* [Gr. *gēnion*, the chin.] Pertaining to the chin; as, the *genial* or *genian* processes.

Geniality (jē-ni-al'i-ti), *n.* The state or quality of being *genial*; sympathetic cheerfulness or cordiality.

The arch of the prominent eyebrows, the well-shaped Grecian nose, the smiles lurking in the corners of the tight-pressed lips, show an innate *geniality* which might be dashed with bitter on occasion. *Edin. Rev.*

Genially (jē-ni-al-ly), *adv.* In a *genial* manner; specifically, (a)† by genius or nature; naturally.

Some men are *genially* disposed to some opinions, and naturally as averse to others. *Glavinie.*

(b) In a manner such as to comfort or enliven; cheerfully; kindly.

The splendid sun *genially* warmeth the fertile earth. *Harris.*

Genista (je-nis'ta), *n.* A large genus of shrubby leguminous plants, comprising about 100 species, natives chiefly of the Mediterranean region, Western Asia, and the Canary Islands. *G. tinctoria* (the dyer's

green-weed) is frequent in England and the Lowlands of Scotland; it was formerly em-

Dyer's Green-weed (*Genista tinctoria*).

ployed to dye yarn of a yellow colour, but has long been superseded by other dyes.

Genital (jen'it-al), *a.* [L. *genitalis*, from the root of *gigno*, to beget.] Pertaining to generation or the act of begetting.

Genitals (jen'it-al), *n. pl.* The parts of an animal which are the immediate instruments of generation; the privates; the sexual organs.

Geniting (jen'it-ing), *n.* A species of apple that ripens very early. Written also *Jen-niting*, *Juneating*, &c.

Genitival (jen'it-iv-al), *a.* Relating to the genitive. 'The genitival ending,' *E. Guest*.

Genitive (jen'it-iv), *a.* [L. *genitivus*, from *gigno*, *genitum*, to beget. The L. *casus genitivus*, genitive case, was a mistranslation of the Gr. *genitē ptōsis*, general case. See extract under next article.] In *gram.* pertaining to or indicating origin, source, possession, and the like; a term applied to a case in the declension of nouns, adjectives, pronouns, &c., in English called the possessive case, or to the relation expressed by such a case; as, *patrius*, 'of a father, a father's', is the genitive case of the Latin noun *pater*, a father.

Genitive (jen'it-iv), *n.* In *gram.* a case in the declension of nouns, adjectives, pronouns, participles, &c., expressing in the widest sense the genus or kind to which something belongs, or more specifically source, origin, possession, and the like; in English grammar, the possessive case. See extract.

The Latin *genitivus* is a mere blander, for the Greek word *genikē* could never mean *genitives*. . . . *Genikē* in Greek had a much wider, a much more philosophical meaning. It meant *casus genitivus*, the general case, or rather the case which expresses the genus or kind. This is the real power of the *genitive*. If I say, 'a bird of the water', 'of the water' defines the genus to which a certain bird belongs; it refers to the genus of water birds. 'Man of the mountains' means a mountaineer. In phrases such as 'son of the father' or 'father of the son', the *genitives* have the same effect. They predicate something of the son or of the father, and if we distinguished between the sons of the father and the sons of the mother, the *genitives* would mark the class or genus to which the sons respectively belonged. *Max Müller*.

Genitor (jen'it-ēr), *n.* 1. One who procreates; a sire; a father.

High *genitors*, unconscion did they cull
Time's sweet first fruit. *Keats*.

2. *pl.* The genitals.

Genitoriest (jen'it-o-riz), *n. pl.* Genitals. They cut off his *genitoriest*, and sent them for a present to the Duke of Main. *Howell*.

Geniture (jen'ti-tūr), *n.* Generation; procreation; birth.

Genius (jē'ni-us), *n.* [L., a good or evil spirit or demon supposed to preside over a man's destiny in life, that is, to direct his actions, and be his guard and guide: rarely used as equivalent to talents—from the root of *gigno*, Gr. *gennao*, to beget. See *GENUS*.] 1. A tutelary deity; the ruling and protecting power of men, places, or things; a good or evil spirit supposed to be attached to a person and influence his actions. [In this sense the plural is *genii*.]

The most opportune den,
Our worse *genius* can, shall never melt
Mine honour into lust. *Shak.*

Still had she gazed; but midst the tide
Two angel forms were seen to glide,
The *genii* of the stream. *Gray*.

2. The peculiar structure of mind which is given by nature to an individual, or that disposition or bent of mind which is peculiar to

every man, and which qualifies him for a particular employment; a particular natural talent or aptitude of mind which fits a man in an eminent degree for a particular study or course of life; as, a *genius* for history, for poetry, or painting. 'A *genius* for friendship,' *Sir W. Scott*.—3. That mental faculty or combination of faculties by which a person is enabled to produce some original and admirable creation, especially in the provinces of literature and the fine arts; intellectual endowment of the highest kind; uncommon powers of intellect, particularly the power of invention or of producing original combinations; as, Homer was a man of *genius*.

Genius is that mode of intellectual power which moves in alliance with the genial nature; i.e., with the capacities of pleasure and pain; whereas talent has no vestige of such an alliance, and is perfectly independent of all human sensibilities. *De Quincey*.

The true *genius* is a mind of large general powers, accidentally determined to some particular direction. *Johnson*.

Hence—4. A man endowed with uncommon vigour of mind; a man of superior intellectual faculties; as, Shakspeare was a rare *genius*.—5. The distinguishing character, bent, or tendency, as of a nation, a religion, a political constitution, or the like; peculiar character; peculiar constitution; pervading spirit or influence from associations or otherwise; as, the *genius* of the times; the *genius* of a language; the *genius* of Christianity or of the Semitic races.

Years ago, when I was in Palestine, I met a German student who was accumulating materials for the history of Christianity and studying the *genius* of the place. *Disraeli*.

'*Genius, Wisdom, Abilities, Talents, Parts, Ingenuity, Capacity, Cleverness.* 'Genius is the power of new combination, and may be shown in a campaign, a plan of policy, a steam-engine, a system of philosophy, or an epic poem. It seems to require seriousness and some dignity in the purpose. . . . In weaving together the parts of an argument, or the incidents of a tale, it receives the inferior name of *ingenuity*. *Wisdom* is the habitual employment of a patient and comprehensive understanding in combining various and remote means to promote the happiness of mankind. . . . *Abilities* may be exerted in conduct or in the arts and sciences, but rather in the former. . . . *Talents* are the power of executing well a conception, either original or adopted. . . . *Parts* have lost a considerable portion of their dignity. They were used in the last century perhaps almost in the sense in which we now rather employ *talents*. . . . *Capacity* is a power of acquiring. It is most remarkable in the different degrees of facility with which different men acquire a language.' *Sir J. Mackintosh*. To the above it may be added that properly *capacity* is passive power, or the power of receiving, while ability is active power, or the power of doing. *Cleverness* designates mental dexterity and quickness, and is evidenced by facility in acquiring a new subject, or by happy smartness in expressing one's conceptions.

Genius loci (jē'ni-us lō'si), [L.] The presiding divinity of a place; and hence, the pervading spirit of a place or institution, as of a college, &c.

Genlese, *n.* An old architectural term: elaborate carving in open work; the cusps or foliations of an arch. Often written *Genlese*.

A term of doubtful meaning applied by William of Worcester apparently to the cusps or featherings in the arch of a doorway. *Oxford Glossary*.

Genoese (jen'ō-ēz), *a.* Relating to Genoa. **Genoese** (jen'ō-ēz), *n.* An inhabitant or the people of Genoa in Italy.

Genouillière (zhō'il-yār), *n.* [Fr., from L. *genu*, the knee.] 1. A steel covering for the knees, which, with the elbow-caps, may be considered as the commencement of the coverings of plate with which knights ultimately encased themselves. *Genouillères* first appear in the thirteenth century.—2. In fort. (a) The part of the interior slope of the parapet below the sill of an embrasure. It covers the lower part of the gun-carriage.

Genouillères.

(b) The height of the parapet above the banquette in a barbette battery.

Genre (zhān-r), *n.* [Fr., from L. *genus*, *generis*, kind.] In *painting*, a term originally applied to any kind of painting accompanied by a distinctive epithet, as *genre historique*, historical painting; *genre du paysage*, landscape painting, &c.; but now more definitely applied to paintings which do not belong to any of the higher or specific classes, but depict scenes of ordinary life, as domestic, rural, or village scenes. *Wilkie, Ostade, Gerard Dow, Teniers, &c.*, are among the most distinguished of *genre* painters. The term is applied in an analogous sense to sculpture and the drama.

Gens (jens), *n. pl.* **Gentes** (jen'tēz). [L., allied to *genus*, *gigno*, and the Gr. *genos*, *gignomai*, and originally signifying kin.] In ancient Rome, a clan or house embracing several families united together by a common name and certain religious rites; as, the *Fabian gens*, all bearing the name *Fabius*; the *Julian gens*, all named *Julius*; the *Cornelian gens*, the *Valerian gens*, &c.

Gent (jent), *a.* Elegant; pretty; gentle. *Spenser*.

Gent (jent). A colloquial or somewhat vulgar abbreviation for *Gentleman*.

And behold at this moment the reverend *gent* enters from the vestry. *Thackeray*.

Gentee (jen-tē), *a.* [Fr. *gentil*; L. *gentilis*, from *gens*, *gentis*, race, stock, family, and with the sense of noble or at least respectable birth, as we use *birth* and *family*. See *GENUS*.] 1. Polite; well bred; easy and graceful in manners or behaviour; having the manners of well-bred people; free from vulgarity; refined; as, *gentee* company; *gentee* guests; *gentee* manners or behaviour; a *gentee* address.—2. Graceful in mien or form; elegant in appearance, dress, or manner.

Gentee in personage,
Conduct and equipage;
Noble by heritage,
Generous and free. *Carey*.

3. Free from anything low or vulgar; dealing with the habits or manners of well-bred society; not partaking of farce or buffoonery; as, *gentee* comedy.—4. Sufficient to maintain a person in a comfortable position in life; furnishing a competence; as, a *gentee* allowance.

Whoever supposes that Lady Austen's fortune is precarious is mistaken. I can assure you . . . that it is both *gentee* and perfectly safe. *Cotter*.

SYN. Polite, well-bred, well-mannered, well-behaved, refined, polished, elegant, mannerly.

Genteeish (jen-tē'ish), *a.* Somewhat *gentee*. [Rare.]

Gentee (jen-tē'ish), *adv.* In a *gentee* manner; politely; gracefully; elegantly; in the manner of well-bred people.

Genierie, *n.* Gentility. *Chaucer*.

Genese (jen'tēz), *n.* See *GENLESE*.

Gentian (jen'shi-an), *n.* [L. *gentiana*—said to be named after *Genius*, king of Illyria, who first experienced the virtue of gentian.] The name given to the members of the genus *Gentiana*, a large genus of bitter herbaceous plants, having opposite, often strongly ribbed, leaves, and blue, yellow, or red, often showy flowers. The calyx consists of four or five valvate segments, and the corolla is four- or five-parted; the fruit is a two-valved, one-celled, many-seeded capsule. They are for the most part natives of hilly or mountainous districts in the northern hemisphere. The most important species is *Gentiana lutea*, a native of Switzerland and the mountainous parts of Germany. The root, the only medicinal part of the plant, has a yellowish brown colour and a very bitter taste, and is in frequent use as a tonic. Many of the blue-flowered species, as *G. acutis*, *G. nivalis*, and *G. verna*, are among the most conspicuous and ornamental of European alpine plants. Five species are British.

Gentian Plant (*Gentiana lutea*).

Gentianaceæ (jen'shi-an-ā'sē-ē), *n. pl.* An order of monopetalous exogens, consisting for the most part of annual or perennial herbaceous plants, with opposite often connate entire leaves, and yellow, red, blue, or white flowers, which are borne in dichotomous or trichotomous cymes or in globose terminal heads. All are characterized by their bitter principle, which in some instances is employed in medicine. (See GENTIAN.) The order contains about 520 species, which are widely dispersed throughout the world, occurring most plentifully in temperate mountainous regions. Some very handsome species are tropical, while a few occur in Arctic latitudes.

Gentian-bitter (jen'shi-an-bit-ter), *n.* The active tonic principle of gentian separated from the aqueous infusion of the root by animal charcoal, and extracted therefrom by hot alcohol. It is yellow, uncrystallizable, aromatic, is much used in medicine, and has been used instead of hops in beer.

Gentianella (jen'shi-an-el'la), *n.* 1. A name often applied to *Gentiana acutis*.—2. A kind of blue colour.

Gentianin (jen'shi-an-in), *n.* In chem. the bitter principle of gentian. Called also *Gentianic Acid*, *Gentisic Acid*, and *Gentisin*.

Gentian-spirit (jen'shi-an-spi-rit), *n.* An alcoholic liquor produced by the vinous fermentation of the infusion of gentian. It is much drunk by the Swiss.

Gentil, Gentle (jen'til, jen'til), *n.* A species of trained falcon or hawk.

Gentil†, *a.* Well-born; of a noble family. *Chaucer.*

Gentile (jen'til), *n.* [L. *gentilis*, from *gens, gentis*, nation, race.] In *Script.* any one belonging to the (non-Jewish) nations; a worshipper of false gods; any person not a Jew or a Christian; a heathen. The Hebrews included in the term *goyim*, or nations, all the tribes of men who had not received the true faith, and were not circumcised. The Christians translated *goyim* by the L. *gentes*, and imitated the Jews in giving the name *gentiles* to all nations who were not Jews or Christians. In civil affairs the denomination was given to all nations who were not Romans.

Gentile (jen'til), *a.* 1. Belonging to the non-Jewish nations; pertaining to a heathen people or heathen peoples.—2. In *gram.* denoting one's race or country; as, a *gentile* noun.—3.† Worthy of a gentleman; genteel; honourable.

We make art servile, and the trade *gentile*.

Gentillesse† (jen'til-es), *n.* [Fr.] Character or manners of a person of gentle birth; courtesy; complaisance.

She with her wedding clothes undresses
All her complaisance and *gentillesse*. *Hudibras.*

Gentilish (jen'til-ish), *a.* Heathenish; pagan.

Gentilism (jen'til-izm), *n.* Heathenism; paganism; the worship of false gods.

Gentilitia† (jen'til-i'shi-la), *a.* Same as *Gentilitious*.

Gentilitious (jen'til-i'sh-us), *a.* [L. *gentilitius*, from *gens, gentis*, a nation, family, clan.] 1. Peculiar to a people or nation; national.

That an unsavoury odour is *gentilitious* or national into the Jews, reason or sense will not induce. *Sir T. Browne.*

2. Hereditary; entailed on a family.

The common cause of this distemper is a particular and perhaps a *gentilitious*. *Arbutnot.*

Gentility (jen'til-i-ti), *n.* [Fr. *gentilité*, heathenism. So in Sp. and It. from the L.; but with us the sense now corresponds with that of *genteel*.] 1. Politeness of manners; easy, graceful behaviour; the manners of well-bred people; genteelness.—2.† Good extraction; dignity of birth. 'Courtesy the fruit of true *gentility*.' *Harrington*.—3.† Those who are of good birth; gentry.

Gavelkind must needs in the end make a poor *gentility*. *Sir J. Davies.*

4.† Paganism; heathenism.

When people began to spy the falsehood of oracles, whereupon all *gentility* was built, their hearts were utterly averted from it. *Hooker.*

Gentilize (jen'til-iz), *v. t.* To render gentle or gentlemanly. [Rare.]

Religion is the most gentlemanly thing in the world. It alone will *gentilize* us unmix with cant. *Coleridge.*

Gentilize† (jen'til-iz), *v. t.* To live like a heathen. *Milton.*

Gentile (jen'til), *a.* [See GENTEEL.] 1. Well

born; of a good family or respectable birth, though not noble; as, the studies of noble and *gentile* youth; *gentile* blood.—2. Soft and refined in manners; mild; meek; not rough, harsh, or severe; as, a *gentile* nature, temper, or disposition; a *gentile* manner; a *gentile* address; a *gentile* voice.

We were *gentile* among you, even as a nurse.

3. Tame; peaceable; not wild, turbulent, or refractory; as, a *gentile* horse or beast.—4. Soothing; pacific.

O sleep, it is a *gentile* thing,
Beloved from pole to pole. *Coleridge.*

5. Treating with mildness; not violent.

A *gentile* hand may lead the elephant with a hair. *Persian Rosary.*

SYN. Mild, meek, placid, dove-like, quiet, peaceful, pacific, bland, soft, tame, tractable, docile.

Gentle (jen'til), *n.* 1. A person of good birth; a gentleman. [Poetical or obsolete.]

Gentiles do not reprehend;
If you pardon we will mend. *Shak.*

Come in your war array,
Gentiles and commons. *Sir W. Scott.*

2. A trained hawk. See GENTIL.

Gentle (jen'til), *n.* A maggot or larva of the flesh-fly, used in fishing.

Gentle† (jen'til), *v. t.* To make genteel; to raise from the vulgar.

Be he ne'er so vile,
This day shall *gentle* his condition. *Shak.*

Gentlefolk (jen'til-fok), *n.* [Gentle and folk.] Persons of good breeding and family. [It is now used generally in the plural, *gentle-folks*.]

The queen's kindred are made *gentlefolks*. *Shak.*

Gentle-hearted (jen'til-härt-ed), *a.* Having a soft or tender heart; of mild disposition; kind. *Shak.*

The *gentle-hearted* wife

Sat shuddering at the ruin of a world. *Tennyson.*

Gentleman (jen'til-man), *n.* [Gentle, that is, well-born, and man; comp. Fr. *gentilhomme*. See GENTEEL.] 1. A man of good family or good social position; every man above the rank of yeomen, including noblemen; in a more limited sense, a man who without a title bears a coat of arms, or whose ancestors have been freemen: in this sense *gentlemen* hold a middle rank between the nobility and yeomanry.

Meaning originally a man born in a certain rank, it (*gentleman*) came by degrees to connote all such qualities or adventitious circumstances as were usually found to belong to persons of that rank. This consideration explains why in one of its vulgar acceptations it means any one who lives without labour, in another without manual labour, and in its more elevated significance it has in every age signified the conduct, character, habits, and outward appearance, in whomsoever found, which, according to the ideas of that age, belonged, or were expected to belong, to persons born and educated in a high social position. *Prof. Bain.*

2. In a more loose sense, every man whose education, occupation, or income raises him above menial service or an ordinary trade.

3. A man of good breeding and politeness, as distinguished from the vulgar and clownish.—4. Often used almost as a polite equivalent for 'man,' in speaking of a person of whose social status we really know nothing; as, a *gentleman* called here last night: in the plural, the appellation by which men are addressed in popular assemblies, whatever may be their condition or character.—5. The servant of a man of rank, who attends his person.

Let be called before us

That *gentleman* of Buckingham's in person. *Shak.*

6. A man of the highest honour, courtesy, and morality.

The best of men

That e'er wore earth about him was a sufferer;

A soft, meek, patient, humble, tranquil spirit.

The first true *gentleman* that ever breathed. *Dekker.*

—*Gentlemen commoners*, a title of distinction at the University of Oxford; the highest class of commoners.

Gentleman-at-arms (jen'til-man-at-ärmz), *n.* A gentleman-pensioner (which see).

Gentleman-farmer (jen'til-man-fär-mër), *n.* A man of property who occupies his own farm, and has it cultivated under his direction.

Gentlemanhood (jen'til-man-hödd), *n.* The condition or attributes of a gentleman.

Gentlemanism (jen'til-man-izm), *n.* The state of being a gentleman; the affectation of gentlemanliness.

Gentlemanize (jen'til-man-iz), *v. t.* To bring or put into the condition of a gentleman. 'To *gentlemanize* one's self.' *Lord Lytton.*

Gentlemanlike (jen'til-man-lik), Same as *Gentlemanly*.

Gentlemanliness (jen'til-man-li-nes), *n.* The state or quality of being gentlemanly; behaviour of a well-bred man.

Gentlemanly (jen'til-man-li), *a.* 1. Pertaining to or becoming a gentleman, or a man of good family and breeding; polite; complaisant; as, *gentlemanly* manners.—2. Like a man of birth and good breeding; as, a *gentlemanly* officer.

Gentleman-pensioner (jen'til-man-pen-shon-ër), *n.* One of a band of forty gentlemen, entitled esquires, whose office it is to attend the sovereign's person to and from the chapel royal, and on other occasions of solemnity. They are now called *Gentlemen-at-arms*.

Gentlemanship (jen'til-man-ship), *n.* Quality of a gentleman.

His fine *gentlemanship* did him no good.

Lord Hatifax.

Gentleman-usher (jen'til-man-ush-ër), *n.* One who holds a post at court, to usher others to the presence, &c. See USHER.

Gentleness (jen'til-nes), *n.* [See GENTLE.] The state or quality of being gentle, benevolent, mild, docile, and the like; gentility; mildness of temper; sweetness of disposition; meekness; kindness; benevolence.

I must confess,

I thought you lord of more true *gentleness*. *Shak.*

The fruit of the Spirit is love, joy, peace, long-suffering, *gentleness*, goodness, faith. *Gal. v. 22.*

The *gentleness* of all the gods goe with thee. *Shak.*

Gentleship† (jen'til-ship), *n.* The condition, qualities, or deportment of a gentleman.

Some in France which will needs be gentlemen, have more *gentleship* in their hat than in their head. *Ascham.*

Gentlesse† (jen'til-es), *n.* Gentleness; gentle behaviour; the conduct of a gentleman. *Spenser.*

Gentlewoman (jen'til-wym-an), *n.* [*Gentle* and *woman*.] 1. A woman of good family or of good breeding; a woman above the vulgar.—2. A woman who waits about the person of one of high rank. 'The late queen's *gentlewoman*.' *Shak.*—3. A term of civility to a female, sometimes ironical.

Now, *Gentlewoman*, you are confessing your enormities; I know it by that hypocritical downcast look. *Dryden.*

Gentlewomanly, Gentlewomanlike (jen'til-wym-an-li, jen'til-wym-an-lik), *a.* Becoming a gentlewoman.

Gently (jen'til), *adv.* 1. In a gentle manner; softly; meekly; mildly; with tenderness. My mistress *gently* chides the fault I made. *Dryden.*

2. Without violence, roughness, or asperity.

Time has laid his hand

Upon my heart, *gently*, not smiting it. *Longfellow.*

Gentoo (jen-tö), *n.* [Pg. *gentio*, a *gentile*.] A term applied by old writers to a native of Hindustan, especially to one who worshipped Brahma; a Hindu: also applied to the language.

Gentry (jen'tri), *n.* Gentility; good descent. [Scotch.]

I ken full well that ye may wear good clothes, and have a soft hand, and yet that ye may come of idleness as well as of *gentry*. *Sir W. Scott.*

Gentry (jen'til), *n.* 1.† Birth; condition; rank by birth. 'Gentry, title, wisdom.' *Shak.*—2. People of good position, such as landed proprietors, merchants, wealthy or well-born people in general, of a rank below the nobility.—3. A term of civility, real or ironical.

The many-coloured *gentry* there alone. *Prior.*

4.† Civility; complaisance.

Show us so much *gentry* and good-will. *Shak.*

Genty (jen'ti), *a.* Neat; trim; elegantly formed. [Scotch.]

Sae jimpny laced her *genty* waist,

That sweetly ye may span. *Burns.*

Genuant (jen'u-ant), *a.* [L. *genu*, the knee.] In her kneeling.

Genuflexion, Genuflexion (jē-nū-flek-shon), *n.* [L. *genu*, the knee, and *flectio*, a bending.] The act of bending the knee, particularly in worship.

Henrietta performing such extraordinary *genuflexions* at the gallows-tree. *Strickland.*

Genuine (jen'u-in), *a.* [L. *genuinus*, from *geno, gigno*, to beget, bring forth, produce. See GENUS.] Belonging to the original stock; hence, real; natural; true; pure; not spurious, false, or adulterated; as, *genuine* descendants; *genuine* materials; *genuine* text.

As a *genuine* form of human experience, the age of poetry is gone, never to be recalled. *Dr. Caird.*

Experiments were at one time tried with *genuine* materials, and at another time with sophisticated ones. *Boyle.*

A *genuine* book is that which was written by the person whose name it bears as the author of it.
—*Ep. Watson.*

—*Authentic, Genuine.* See under **AUTHENTIC**.—**SYN.** Authentic, true, real, veritable, exact, accurate, unalloyed, unadulterated, unaffected.

Genuinely (jen'ū-in-li), *adv.* In a genuine manner.

Genuineness (jen'ū-in-nes), *n.* The state of being genuine; hence, freedom from adulteration or foreign admixture; freedom from anything false or counterfeit; purity; reality; sincerity; as, the *genuineness* of Livy's history; the *genuineness* of faith or repentance.

It is not essential to the *genuineness* of colours to be durable.
—*Boyle.*

Genus (jē'nus), *n.* **pl.** **Genera** (jē'nē-ra). [*L. genus, pl. genera*; akin *Gr. genos, race, family*, from root *gen, Skr. jan, to beget*. *Cog. Gael. gin, to beget*; *Gael. & Ir. goin, offspring*; *A. Sax. cym, kin, race*; *E. kin, kind*. From same root are *gentle, genteel, general, genius, generous, genesis, genial, genital, genuine, &c.*] 1. In *logic*, that which has several species under it; a class of a greater extent than species; a universal which is predicable of several things of different species; a predicable which is considered as the material part of the species of which it is affirmed.—2. In *science*, an assemblage of species possessing certain characters in common, by which they are distinguished from all others. It is subordinate to *tribe* and *family*. A single species, possessing certain peculiar characters which belong to no other species, may also constitute a genus, as the camelopard and the flying lemur.—3. In *music*, the general name for any scale.—*Subaltern genus*, in *logic*, that which is capable of being a species in respect of a higher genus, as *quadruped* in respect of *mammal*.—*Summum genus*, in *logic*, the highest genus; a genus which is not considered a species of anything, as *being*.

Geo- [*Gr. geā, gē, the earth*.] A frequent prefix in compound words derived from Greek, referring to the earth; as, *geography, geology, geometry, &c.*

Geocentric, Geocentrical (jē-ō-sen'trik, jē-ō-sen'trik-al), *a.* [*Gr. gē, earth, and kentron, centre*.] In *astron.* (a) having reference to the earth for its centre; in relation to the earth as a centre; seen from the earth: a term applied to the place of a planet as seen from the centre of the earth, in opposition to its *heliocentric place*, as conceived to be seen from the centre of the sun. (b) Having reference to the centre of the earth. See **PARALLAX**.—*Geocentric latitude* of a planet, its latitude as seen from the earth.—*Geocentric longitude* of a planet, the distance measured on the ecliptic in the order of the signs between the geocentric place and the first point of Aries.

Geocentrically (jē-ō-sen'trik-al-li), *adv.* In a geocentric manner.

Geocorisæ (jē-ō-kōr-i-sē), *n. pl.* [*Gr. gē, the earth, and koris, a bug*.] The land-bugs, a section of heteropterous insects, characterized by having the antennæ free, longer than the head, and inserted between the eyes and near the anterior margin. The species are for the most part found on the leaves of trees and small plants; some do not quit the ground, and others, as the Hydrometridæ, live upon the surface of the water.

Geocrinite (jē-ō-kron-it), *n.* [*Gr. gē, the earth, and kronos, Saturn*, the alchemistic name of lead.] A lead-gray ore with a metallic lustre, consisting of antimony, lead, sulphur, and a little arsenic.

Geocyclic (jē-ō-sik'lik), *a.* [*Gr. gē, the earth, and kyklos, a circle*.] 1. Of or pertaining to the revolutions of the earth.—2. Circling the earth periodically.—*Geocyclic machine*, a machine intended to represent in what manner the changes of the seasons, the increase and decrease of the days, &c., are caused by the inclination of the axis of the earth to the plane of the ecliptic, at an angle of 66½°, and how the axis, by remaining parallel to itself in all points of its path round the sun, invariably preserves this inclination.

Geode (jē'ōd), *n.* [*Gr. gedēs, earthy, from gē or gaea, earth*.] (a) A round or roundish lump of agate or other mineral, or a mere incrustation. Its interior is sometimes empty, and in this case the sides of its cavity are lined with crystals, as in agate balls. Sometimes it contains a solid movable nucleus, and sometimes it is filled with

an earthy matter different from the envelope, whence the name. (b) The cavity in such a nodule.

Geodephaga (jē-ō-def'a-ga), *n. pl.* [*Gr. gē, the earth, and phagō, to devour*.] Predaceous land-beetles, a division of carnivorous coleopterous insects found generally beneath stones, clods, &c., subdivided into two very large families—the Cicindelidæ and the Carabidæ.

Geodesian (jē-ō-dē'si-an), *n.* One versed in geodesy.

Geodesic, Geodesical (jē-ō-des'ik, jē-ō-des'ik-al), *a.* Geodetic (which see).

Geodesy (jē-ōd'e-si), *n.* [*Gr. geodaisia—gē, the earth, and daio, to divide*.] That branch of applied mathematics which determines the figures and areas of large portions of the earth's surface, the general figure of the earth, and the variations of the intensity of gravity in different regions by means of direct observation and measurement.

Geodetic, Geodetical (jē-ō-det'ik, jē-ō-det'ik-al), *a.* Pertaining to geodesy; obtained or determined by the operations of geodesy; engaged in geodesy; as, *geodetic surveying*; *geodetic observers*.

Geodetically (jē-ō-det'ik-al-li), *adv.* In a geodetical manner.

Geodetics (jē-ō-det'iks), *n.* Same as *Geodesy*.

Geodiferous (jē-ōd-if'er-us), *a.* [*Geode* (which see), and *L. fero, to produce*.] Producing geodes.

Geoffroyia (jef-roi'a), *n.* [In honour of M. E. F. Geoffroy, a French physician.] A genus of West Indian and South American dicotyledonous trees, belonging to the papilionaceous tribe of the nat. order Leguminosæ. The bark of *G. inermis* (*Andira inermis* of some botanists) possesses emetic, drastic, purgative, and narcotic properties, and in large doses is poisonous. It acts as a powerful anthelmintic. The fruit of *G. superba*, or *umari*, is much used by the inhabitants of Brazil on the banks of the Rio San Francisco.

Geogenic (jē-ō-jen'ik), *a.* Same as *Geogonic*.

Geoglossum (jē-ō-glos'sum), *n.* [*Gr. gē, the earth, and glossa, tongue*.] Earth-tongue, a genus of ascomycetous fungi found in bogs and meadows, all the species growing upon earth.

Geognost (jē-ōg-nost), *n.* [See **GEOGNOSEY**.] One versed in geognosy; a geologist. [Rare.]

Geognostic, Geognostical (jē-ōg-nost'ik, jē-ōg-nost'ik-al), *a.* Pertaining to geognosy; geological. [Rare.]

Geognosy (jē-ōg-nō-si), *n.* [*Gr. gē, the earth, and gnosis, knowledge*.] That part of natural history which treats of the structure of the earth. It is the science of the substances which compose the earth or its crust, their structure, position, relative situation, and properties. [This word originated among the German mineralogists, and is nearly synonymous with *geology*.]

Geogonic, Geogonical (jē-ō-gon'ik, jē-ō-gon'ik-al), *a.* Pertaining to geogony, or the formation of the earth.

Geogony (jē-ō-gō-ni), *n.* [*Gr. gē, the earth, and gōnē, generation*.] The doctrine of the formation of the earth; geology.

Geographer (jē-ō-grā-fēr), *n.* [See **GEOGRAPHY**.] One who is versed in, or compiles a treatise on, geography.

Geographic, Geographical (jē-ō-grāf'ik, jē-ō-grāf'ik-al), *a.* Relating to or containing a description of the terraqueous globe; pertaining to geography.

Geographically (jē-ō-grāf'ik-al-li), *adv.* In a geographical manner; according to the usual practice of describing the surface of the earth.

Geography (jē-ō-grā-fī), *n.* [*Gr. gē, the earth, and graphō, description*.] 1. The science which treats of the world and its inhabitants; a description of the earth or terrestrial globe, particularly of the divisions of its surface, natural and artificial, and of the position of the several countries, kingdoms, states, cities, &c. As a science, geography includes the doctrine or knowledge of the astronomical circles or divisions of the sphere, by which the relative position of places on the globe may be ascertained; and usually treatises of geography contain some account of the inhabitants of the earth, of their government, manners, &c., and an account of the principal animals, plants, and minerals.—*General or universal geography*, the science which conveys a knowledge of the earth, both as a distinct and independent body in the universe, and as connected with a system of heavenly bodies.—*Mathematical*

geography, that branch of the general science which is derived from the application of mathematical truths to the figure of the earth, and which teaches us to determine the relative positions of places, their longitudes and latitudes, the different lines and circles imagined to be drawn upon the earth's surface, their measure, distance, &c.

—*Physical geography*, that branch of geography which gives a description of the principal features of the earth's surface, the various climates and temperatures, showing how these, together with other causes, affect the condition of the human race, and also a general account of the animals and productions of the globe.—*Political geography*, that branch which considers the earth as the abode of rational beings, according to their diffusion over the globe, and their social relations as they are divided into larger or smaller societies.—*Sacred or biblical geography*, the geography of Palestine, and other oriental nations mentioned in Scripture, having for its object the illustration and elucidation of Scripture history.—2. A book containing a description of the earth or of a portion of it.

Geologer, Geologian (jē-ō-lō-jēr, jē-ō-lō-jī-an), *n.* A geologist. [Rare.]

Geologic, Geological (jē-ō-lōj'ik, jē-ō-lōj'ik-al), *a.* [See **GEOLOGY**.] Pertaining to geology, or the science of the earth.

Geologically (jē-ō-lōj'ik-al-li), *adv.* In a geological manner.

Geologist (jē-ō-lō-jist), *n.* One versed in the science of geology.

Geologize (jē-ō-lō-jiz), *v. i.* To study geology; to make geological investigations; to discourse as a geologist.

Geology (jē-ō-lō-jī), *n.* [*Gr. gē, the earth, and logos, discourse*.] The science which deals with the structure of the crust of the globe, and of the substances which compose it; or the science of the minerals or aggregate substances which compose the earth, the relations which the several constituent masses bear to each other, their formation, structure, position, and history. It also investigates the successive changes that have taken place in the organic and inorganic kingdoms of nature; it inquires into the causes of these changes, and the influence which they have exerted in modifying the surface and external structure of our planet. It is a science founded on exact observation and careful induction, and is intimately connected with all the physical sciences. The geologist, in order that he may conduct his investigations with success, ought to be well versed in chemistry, mineralogy, zoology, botany, comparative anatomy, in short, every branch of science relating to organic and inorganic nature. The rocks constituting the crust of the earth have been variously divided in accordance with their position and contents. The first great division is into *unstratified* and *stratified*. The unstratified rocks may belong to any age: they are divisible into two groups; those which represent stratified rocks, but have lost all trace of original form under powerful modifying influences (metamorphic); and those which from the first were unstratified, the volcanic rocks, including under this head many of the granites. They are all crystalline; four substances enter into their composition—mica, quartz, felspar, and hornblende. The volcanic rocks are either contemporaneous or intrusive: the former are those poured out on a land surface or a sea bottom, as the lavas of the oldest as well as of the most recent times; the latter break through the strata and push their way among them. The metamorphic rocks are gneiss, some granites, serpentine, and the like. The oldest strata, Laurentian, are represented by these rocks, and the tertiary exhibit the conversion of limited areas into crystalline masses. The stratified rocks have been deposited from water, and have been divided into *metamorphic* and *fossiliferous*. (See **METAMORPHIC**.) The fossiliferous strata have been divided into the following classes, founded on their fossil contents and the physical relations between the strata.—*Laurentian*. Highly crystallized schists, quartzose rocks, and limestones. Fossils: *Eozoin canadense* and graphite. Locality: Canada, Hebrides, Bavaria, Norway.—*Cambrian*. Sandstones, slates, schists, and crystalline limestones. Fossils: sea-weed, shells, some crustacea, especially trilobites. Locality: North Wales or Cambria, Scotland, America (Huron).—*Silurian*. Sandstones,

conglomerates, limestones, metamorphic slates, schists. Fossils: stems and leaves of water-plants, club-mosses, sea-weeds, corals, graptolites, star-fishes, shells bivalve and univalve, and trilobites in very great abundance; in upper beds, fishes, ganoid and placoid. Typical locality: Wales.—*Devonian and Old Red Sandstone*. Sandstones, limestones, shales. Fossils: sea-weeds, marsh-plants, as bulrushes, tree-ferns, reeds, &c.; corals, shells, crustacea. Locality: Devonshire. Old Red Sandstone. Sandstones and conglomerates. Fossils: chiefly large crustaceans, ganoid fishes, and a few plants. Locality: Scotland, Welsh Borders.—*Carboniferous*. Sandstones, limestones, shales, clays, ironstone, coal. Fossils: very numerous and gigantic tree-ferns, reeds, pines, palms, &c.; corals, encrinurids, star-fishes, sea-urchins, sea and land shells, crustacea, fishes, labyrinthodonts. Trilobites appear for the last time.—*Permian or Lower New Red Sandstone*. Red and whitish sandstones, shales, magnesian limestone. Remains resemble those of the coal measures, but animals less numerous; labyrinthodonts and reptiles numerous and gigantic. Typical locality: Perm in Russia.—*Triassic or Upper New Red Sandstone*. Sandstones, shales, conglomerates; characteristic product, rock-salt. Remains: plants few—horse-tails, calamites, ferns—much smaller than in coal measures. Animals—shells, crustaceans, shark-like fishes; reptiles and amphibians numerous and of great size. Characteristic remains: footprints of great lizards and huge birds. Called *Triassic* from being found in three distinct groups. Localities: Britain, Africa, India.—*Oolitic or Jurassic*. Subdivided into *lias*, *oolite* proper, *purbeck*. Egg-grained sandstones, limestones, shales, clays, ironstone bands, coal, lignite, and jet. Forms of life more like those of our own times. Remains extremely abundant. Vegetable life, indicating a climate like that of Australia—sea-weeds, tree-ferns, palms, pines, and liliaceous plants. Animals—sponges, corals, encrinurids, sea-urchins, worms, crustaceans, ammonites, nautilus, gigantic cuttlefish, fishes numerous and large, notably huge plated sharks. But the most characteristic remains are those of enormous lacertian reptiles, as ichthyosaurs. Remains of earliest warm-blooded animals, somewhat resembling kangaroo.—*Cretaceous*. Chalk, gault, greensand, chert, and coal (rare). Plants rare and imperfect, and apparently drifted. Animals numerous—sponges, corals, sea-urchins, star-fishes, and crustaceans. Shells plentiful and exquisitely beautiful in form and colour, notably ammonites and nautilus. Fishes not numerous, and characterized by their teeth. Reptiles gigantic, terrestrial in the Wealden. First appearance of bones of birds, and what seem to be bones of a monkey.—*Tertiary*. Remains resembling those now existing, and a large proportion identical. Real exogens appear for the first time; fishes, birds, and mammals of existing families. Two great periods—*warm and cold*. *Warm*: gypsum, marls, nummulite limestone. *Cold* period: boulder clay unstratified and stratified, shell clays, gravels, &c. The tertiary has been further divided into *Eocene, Miocene, Pliocene, and Pleistocene*, in accordance with the proportions of existing species in the various strata. See separate entries.—*Quaternary or Post-tertiary*. Remains identical or nearly so with present life. Deposits: clay, sand, gravel, mud, peat, soil, &c. Divided into *Prehistoric or Post-pleistocene*, and *Historic or Recent*. *Prehistoric*: Irish deer, woolly elephant, hairy rhinoceros, cave-hyena, cave-bear, mammoth; human remains, canoes, ashes, cave and lake dwellings, stone-weapons and implements, kitchen-middens. *Historic or Recent*: deposits now forming. Species now existing or existing within the historic period.—Another division of stratified fossiliferous rocks is into *Primary or Palaeozoic* (Laurentian, Cambrian, Silurian, Devonian and Old Red Sandstone, Carboniferous, Permian); *Secondary or Mesozoic* (Triassic, Jurassic, Cretaceous); *Tertiary or Cainozoic* (see above), and *Post-tertiary or Quaternary* (see above). See **FORMATION, FOSSIL, ORGANIC, ROCK, and STRATUM**.

Geomancer (jē'ō-man-sēr), *n.* One versed in or who practises geomancy.

Geomancy (jē'ō-man-si), *n.* [Gr. *gē*, the earth, and *man-teia*, divination.] A kind of divination by means of figures or lines,

formed by little dots or points, originally on the earth and afterwards on paper.

Geomantic, Geomantical (jē'ō-man'tik, jē'ō-man'tik-al), *a.* Of or pertaining to geomancy.

Geometer (jē'ō-met'er), *n.* [Gr. *geōmetrēs*. See **GEOMETRY**.] One skilled in geometry; a geometrician.

Geometral (jē'ō-met'al), *a.* [Fr. *géometral*.] Pertaining to geometry. [Rare.]

Geometric, Geometrical (jē'ō-met'rik, jē'ō-met'rik-al), *a.* [Gr. *geōmetrikos*. See **GEOMETRY**.] Pertaining to geometry; according to the rules or principles of geometry; done or determined by geometry.—*Geometrical construction*, the representation of a proposition by geometrical lines.—*Geometrical curves, or geometrical lines*, those in which the relation between the abscissa and ordinates is expressed by a finite algebraical

Geometrical Decorated Window, Ripon Minster.

equation.—*Geometrical decorated*, in arch. applied to the earlier period of decorated Gothic, in which the tracery and other ornamentation consist entirely of distinct geometrical forms, the principle of verticality and unity by a subordination of parts being fully developed.—*Geometrical elevation*, a design for the front or side of a building drawn according to the rules of geometry, as opposed to *perspective or natural elevation*.—*Geometrical locus*. See **LOCUS**.—*Geometrical progression*, is when the terms increase or decrease by equal ratios; as, 2, 4, 8, 16, 32, or 32, 16, 8, 4, 2. See **PROGRESSION**.—*Geometrical stairs*, those stairs of which the steps are supported only at one end by being built into the wall.

Geometrically (jē'ō-met'rik-al-ly), *adv.* In a geometrical manner; according to the rules or laws of geometry.

Geometrician (jē'ō-met'rik-shan), *n.* One skilled in geometry; a geometer; a mathematician.

Geometridæ (jē'ō-met'rik-dē), *n. pl.* A very extensive family of lepidopterous, nocturnal, or rather seminocturnal insects, known to collectors by the name of slender-bodied moth. More than 300 British species belonging to this family are known. The family itself is divided into sixty genera.

Geometrize (jē'ō-met'riz), *v. i.* To act according to the laws of geometry; to perform geometrically; to proceed in accordance with the principles of geometry; to recognize or apprehend geometrical quantities or laws.

Geometry (jē'ō-met'ri), *n.* [Gr. *geōmetria*—*gē*, the earth, and *metron*, measure—the term being originally equivalent to land-measuring or surveying.] The science of magnitude in general; the science which treats of the properties of definite portions of space; that science which treats of the properties of lines, angles, surfaces, and solids; that branch of mathematics which treats of the properties and relations of magnitudes. Geometry is the most general and important of the mathematical sciences; it is founded upon a few axioms or self-evident truths (see **AXIOM**), and every proposition which it lays down, whether it be theorem or problem, is subjected to the most accurate and rigid demonstration. Geometry has been distinguished into *theoretical or speculative* and *practical*. The former treats of the various properties and relations of magnitudes, with demonstrations of theorems, &c.; and the latter relates to the perform-

ance of certain geometrical operations, such as the construction of figures, the drawing of lines in certain positions, and the application of geometrical principles to the various measurements in the ordinary concerns of life. *Theoretical geometry* is again divided into *elementary or common geometry* and the *higher geometry*, the former being employed in the consideration of lines, superficies, angles, planes, figures, and solids, and the latter in the consideration of the higher order of curve lines and problems.—*Analytical geometry, Descriptive geometry*. See **ANALYTICAL, DESCRIPTIVE**.

Geo-navigation (jē'ō-na-vi-ga'shon), *n.* A term proposed for that branch of the science of navigation in which the place of a ship at sea is determined by referring it to some other spot on the surface of the earth—in opposition to *Cælo-navigation* (which see).

Geonomy (jē'ō-nō-mi), *n.* [Gr. *gē*, the earth, and *nomos*, a law.] The science of the physical laws relating to the earth, including geology and physical geography.

Geophagism (jē'ō-fa-jizm), *n.* [Gr. *gē*, the earth, and *phago*, to eat.] The act or practice of eating earth, as dirt, clay, chalk, &c. See **DIRT-EATING**.

Geophagist (jē'ō-fa-jist), *n.* One who practises geophagism; one who eats earth.

Geophila (jē'ō-fī-lā), *n.* [Gr. *gē*, the earth, and *phileo*, to love.] A small genus of creeping herbaceous plants of the nat. order Rubiaceæ, natives of India and tropical America and Africa. The root of *G. reniformis* is emetic, and may be used as a substitute for ipecacuanha.

Geophilus (jē'ō-fī-lūs), *n.* [Gr. *gē*, the earth, and *philos*, loving.] A genus of articulate animals, belonging to the order Chilograthæ and class Myriapoda, including the *G. electricus*, or electric centipede, a species not uncommon in this country, which has the power of emitting light when excited.

Geoponic, Geoponical (jē'ō-pō-n'ik, jē'ō-pō-n'ik-al), *a.* [Gr. *gē*, the earth, and *ponos*, labour.] Pertaining to tillage of the earth or agriculture. 'Authors *geoponical*.' *Sir T. Browne*.

Geoponics (jē'ō-pō-n'iks), *n.* The art or science of cultivating the earth. 'Herbs and wholesome sallets, and other plain and useful parts of *geoponics*.' *Evelyn*.

Georama (jē'ō-rā'mā), *n.* [Gr. *gē*, the earth, and *horama*, view.] A large hollow spherical globe or chamber, lined in the inside with cloth on which is depicted a general view of the geography of the earth's surface so as to be seen by a spectator from the interior.

George (jorj), *n.* [Gr. *georgos*, a husbandman—*gē*, the earth, and *ergon*, labour.] 1. A figure of St. George on horseback encountering the dragon, worn pendent from the

The George of the Order of the Garter.

collar by knights of the Garter. 'Look on my *George*, I am a gentleman.' *Shak. See GARTER*.—2. A loaf, supposed to have been originally stamped with a figure of St. George. 'A brown *george*.' *Dryden*.

George-noble (jorj'nō-bl), *n.* A gold coin in the time of Henry VIII. of the value of 6s. 8d. sterling; so called from bearing on the reverse the figure of St. George killing the dragon.

Georgian (jorj'i-an), *n.* A native or inhabitant of the region called *Georgia* on the south of the Caucasus Mountains; or of *Georgia*, one of the United States of America. **Georgian** (jorj'i-an), *a.* Belonging or relating to *Georgia* in Asia, or the state of *Georgia* in the United States.

Georgian (jor'i-an), *a.* Belonging or relating to the reigns of the four Georges, kings of Great Britain; as, the *Georgian* era.

Georgic (jor'ik), *n.* [Gr. *georgikos*, rustic—*gē*, the earth, and *ergon*, labour.] A rural poem; a poetical composition on the subject of husbandry; as, the *Georgics* of Virgil.

Georgic, Georgical (jor'ik, jor'ikal), *a.* Relating to agriculture and rural affairs; agricultural. "The Mantuan's *georgic* strains," *Gay*.

Georgium Sidus (jor'ji-um sī'dus), *n.* [L.] The planet Uranus, so named by its discoverer Sir William Herschel in honour of George III.

Georgos (jē-or'gos), *n.* [Gr.] A husbandman. *Spenser*.

Geosaurus (jē-ō-sā'rūs), *n.* [Gr. *gē*, the earth, and *sauros*, lizard.] A sub-genus of gigantic fossil saurians of the oolite and lias formations, considered by Cuvier to be intermediate between the crocodiles and the monitors.

Geoscopy (jē-os'ko-pi), *n.* [Gr. *gē*, the earth, and *skopeō*, to view.] Knowledge of the earth, ground, or soil obtained by inspection.

Geoselenic (jē-ō-sē-len'ik), *a.* [Gr. *gē*, the earth, and *selenē*, the moon.] Relating to the earth and the moon; relating to the joint action or mutual relations of the earth and moon; as, *geoselenic* phenomena.

Geostatic (jē-ō-stat'ik), *a.* [Gr. *gē*, the earth, and *statikos*, causing to stand.] A term applied to a peculiar sort of arch, having that kind of curve in which the vertical pressure is proportional to the depth below a fixed horizontal plane, and in which the horizontal pressure bears to the vertical pressure a fixed ratio depending on the nature of the superincumbent materials. This variety of arch is suited to sustain the pressure of earth.

Geotenthis (jē-ō-tēn'this), *n.* [Gr. *gē*, the earth, and *tenthis*, a squid.] A genus of fossil squids or calamaries whose pens are found abundantly in the lias and oolite formations. The ink-bag and other fragments in addition to the pens occur in the Oxford clay.

Geothermic (jē-ō-thēr'mik), *a.* [Gr. *gē*, the earth, and *thermos*, heat.] Of or pertaining to the internal heat of the earth.

Geothermometer (jē-ō-thēr-mom'et-ēr), *n.* [Gr. *gē*, the earth, and *thermometer* (which see).] An instrument for measuring the degree of terrestrial heat at different places, especially in mines and artesian wells.

Geotict (jē-ō-tik), *a.* [Gr. *gē*, the earth.] Belonging to earth; terrestrial. *Bailey*.

Geotropic (jē-ō-trop'ik), *a.* Of or pertaining to, or exhibiting geotropism; turning or inclining towards the earth. "Geotropic tendency," *Francis Darwin*.

Geotropism (jē-ōt-ro-pizm), *n.* [Gr. *gē*, the earth, and *tropos*, a turning, direction, from *trepeō*, to turn.] Disposition or tendency to turn or incline towards the earth, as the characteristic exhibited in a young plant, when deprived of the counteracting influence of light, of directing its growth towards the earth.

The powers of growth which exist in young seedlings would certainly be called instinctive if they existed in animals, and they are quite as indispensable as those just mentioned in supplying the wants which first arise. These two instincts are the power of directing the growth in relation to the force of gravity, and in relation to light; the first being called *geotropism*, the second *heliotropism*. *Francis Darwin*.

Geotrupidæ (jē-ō-trup'i-dē), *n. pl.* [Typical genus *Geotrupes*—Gr. *gē*, the earth, *trupāō*, to pierce—and *eidōs*, resemblance.] A family of burrowing lamellicorn beetles of the section *Petalocera*, in which the elytra are rounded behind and cover the abdomen. They inhabit temperate climates, and are useful in removing disgusting substances, as the excrementitious matter of men and other animals. When alarmed they feign death. The *Geotrupes stercorarius*, or watchman-beetle of Britain, is the type of the family.

Gephyrea (ge-fi-rē-a), *n. pl.* [Gr. *gephyra*, a bridge.] A class of the Anarthropoda, comprising the spoon-worms (*Sipunculus*) and their allies.

Gerah (gē'ra), *n.* [Heb.] The smallest piece of money current amongst the ancient Jews, the twentieth part of a shekel, or nearly three halfpennies. Ex. xxx. 13.

Geraniaceæ (jē-rā-ni-ā'sē-ē), *n.* [See GERANIUM.] A nat. order of exogens, the distinguishing character of which is to have a fruit composed of five cocci or cases, con-

nected with as many flat styles, consolidated round a long conical beak. These plants are usually astringent and odoriferous. The species of the order which inhabit Europe are herbaceous plants; a few of them are handsome, but the major part are mere weeds.

Geranium (jē-rā-ni-um), *n.* [Gr. *geranos*, a crane—on account of the long projecting spike of the seed-capsule.] The crane's-bill genus, a genus of herbaceous plants (rarely undershrubs), the type of the nat. order Geraniaceæ, natives of temperate regions throughout the world. They have usually palmately divided leaves and regular flowers, with ten stamens and five carpels, each tipped by a long glabrous awn (the persistent style). The flowers are usually blue or red, and are often handsome; the so-called geraniums of our gardens belong, however, to the genus *Pelargonium* (which see). There are about a dozen British species, of which the herb-robert (*G. robertianum*) is the most common.

Gerant (zhā-rān), *n.* [Fr.] The acting partner or manager of a joint-stock association, newspaper establishment, &c.

Gerb (jēr'b), *n.* In *her*. a sheaf. See GARBE.

Gerbil (jēr-bil), *n.* [Fr. *gerbille*, from *gerbo*, the Arabic name.] The English name given to the rodents belonging to the genus *Gerbillus* (which see).

Gerbillus (jēr-bil'lus), *n.* A genus of small burrowing rodents (the gerbils) of the family Muridæ. They have a long tail, which is tufted at the end. There are several species, found in the sandy parts of Africa and Asia. The Egyptian gerbil (*G. ægyptiacus*), inhabiting Egypt around the pyramids, is the type. It is about the size of a mouse and of a clear yellow colour.

Gerbua (jēr-bū-a), *n.* Same as *Jerboa*.

Gere, *†* *n.* Same as *Gear*. *Chaucer*.

Gerenda (jē-ren'da), *n. pl.* [L.] Things to be done or conducted.

Gerent (jē-rent), *a.* [L. *gerens*, *gerentis*, ppr. of *gero*, to bear.] Bearing; carrying; carrying on; used now only in composition; as, vice-gerent, belligerent.

Gerfalcon (jēr-fā-kn), *n.* A species of falcon, the grylfalcon.

He had . . . staghounds, foxhounds, harriers, packs for the boar and jacks for the wolf, *gerfalcions* for the heron and haggards for the wild-duck. *Macaulay*.

Gerie, *†* **Gereful**, *†* *a.* [O. Fr. *giver*, to twirl, from *L. gyrus*, Gr. *gyros*, a twirling, a circle.] Changeable; giddy.

Right so can *gerry* Venus overcast
The hertes of hire folk, right as hire day
Is *gerghit*, right so changeth she aray. *Chaucer*.

Gerlo-antico (jer-lō-an-tē'kō), *n.* A fine, rare, rich, flesh-coloured marble used for statuary purposes in Rome.

Gerlond, *†* *n.* A garland. *Chaucer*.

Germ (jerm), *n.* [L. *germen*, an offshoot, a germ—probably for *germen*, from *gero*, to bear.] 1. In *physiol.* the earliest form under that which is in an undeveloped state; an embryo; as, the germ of a fetus, of a plant, of a flower.

When one attempts to keep *en rapport* with modern scientific thought, one becomes imbued with the notion that distinct creative acts never took place, and that the primal germ is our legitimate ancestor in unbroken line. *Scientific American*.

2. That from which anything springs; origin; first principle; as, the germ of civil liberty or of prosperity.

Mr. Hunter's work on the blood . . . abounding in principles or the *germs* of principles. *P. M. Latham*.

German (jēr'mān), *a.* Same as *Germane*.

German (jēr'mān), *a.* [L. *germanus*, a brother, for *germinans*, from *germen*, an offshoot. See GERM.] 1. Sprung from the same father and mother or from members of the same family.

Brother *german* denotes one who is brother both by the father's and mother's side; cousins *german*, children of brothers or sisters. *Bowyer*.

2. *†* Nearly related; closely akin.

Wert thou a leopard, thou wert *german* to the lion. *Shak.*

3. Closely connected; appropriate; relevant; pertinent; germane.

The phrase would be more *german* to the matter, if we could carry a cannon by our sides. *Shak.*

German (jēr'mān), *n.* 1. A native or inhabitant of Germany.—2. The language of the higher and more southern districts of Germany, and the literary language of all Germany. It is divided into three periods—Old

High German, from the eighth to the twelfth century; Middle High German, to the fifteenth century; and Modern High German. The Old High German embraces the Alemannic, Frankish, and other sub-dialects. The Middle High German is the language of the Minnesingers, of the national heroic legends (*Heldensagen*), and of the lay of the Nibelungen. Modern German is properly the dialect of Saxony, which Luther rendered classical by his translation of the Bible. See LOW-GERMAN.

German (jēr'mān), *a.* Belonging to Germany.

German (jēr'mān), *n.* One sprung from the same stock: applied to brothers and sisters or to first cousins. See GERMANE.

Thyself thy message do to *german* dear. *Spenser*.

German-clock (jēr'mān-klok), *n.* An inferior and cheap sort of clock made in Germany, or a clock of similar construction.

Germander (jēr'mān'dēr), *n.* [Fr. *germandrée*, Prov. *germandrea*, It. *calandrea*—a changed form of *L. chamædrys*, Gr. *chamædrys*, *germander*—*chamai*, on the earth, and *drys*, an oak.] The common name given to plants of the genus *Teucrium*, but especially to *Teucrium Chamædrys*.—*Germander speedwell*, *Veronica Chamædrys*, a common British plant.

Germane (jēr'mān), *a.* [See GERMAN—term applied to relationships.] Closely akin; nearly related; allied; closely connected; relevant; pertinent; appropriate; fitted.

It will give a kind of constituency thoroughly germane to the nature and purposes of a county representation, according to the old rule of the constitution. *Gladstone*.

Germanic (jēr'mān'ik), *a.* Pertaining to Germany: a term sometimes applied to a family of Aryan tongues, otherwise called *Teutonic* (which see).

Germanism (jēr'mān-izm), *n.* An idiom or phrase of the German language.

It is full of Latinisms, Gallicisms, *Germanisms*, and all isms but Anglicisms. *Chesterfield*.

German-millet (jēr'mān-mil-et), *n.* A species of grass, a variety of the *Setaria italica*, producing a nutritious grain.

German-paste (jēr'mān-pāst), *n.* A kind of paste composed of pea-meal, sweet-almonds, lard, sugar, lay-saffron, and hard-boiled egg, used for feeding larks, thrushes, nightingales, and other singing birds.

German-sarsaparilla (jēr'mān-sār-sa-pa-ril-lā), *n.* A name given to the roots or rhizomes of *Carex arenaria*, *C. disticha*, and *C. hirta*, from their being occasionally used in Germany as a substitute for sarsaparilla.

German-silver (jēr'mān-sil-vēr), *n.* Pack-forg; the white alloy of nickel, formed by fusing together 100 parts of copper, 60 of zinc, and 40 of nickel; so named from being first made at Hildburghausen in Germany.

German-tinder (jēr'mān-tin-dēr), *n.* Amadou (which see).

Germ-cell (jēr'm'sel), *n.* In *animal physiol.* the cell which results from the union of the spermatozoon with the germinal vesicle or its nucleus. Some physiologists question the existence of such a cell, or assert its unimportance in the development of the egg.

The *germ-cell* assimilates the surrounding yolk, and propagates its kind by spontaneous fission, whence the first cell has been termed the *primary germ-cell*, and its progeny the derivative *germ-cell*. *Brande & Cox*.

Germen, *†* **Germin** (jēr'men, jēr'min), *n.* A germ (which see).

Thou all-shaking thunder,
Crack Nature's mould, all *germinis* spill at once
That make ungrateful man. *Shak.*

Germinal (jēr'min'al), *a.* Pertaining to a germ or seed-bud.—*Germinal membrane*, a series of layers of cells united together which are formed round the yolk of an egg during a certain stage in the development of the ovum.—*Germinal vesicle*, (a) In *animal physiol.* a cell which floats in the yolk of an egg, upon the walls of which is a spot or nucleus called the *germinal spot*. These perform important functions in the reception of the germ and in aiding its early development. (b) In *bot.* a cell contained in the embryo sac, from which the embryo is developed.

Germinal (zhār-mē-nal), *n.* [Fr., from *L. germen*, *germinis*, a shoot, a sprout.] The seventh month of the first French republican calendar, commencing March 21 and ending April 19.

Germinant (jēr'min-ant), *a.* [L. *germinans*, *germinantis*, ppr. of *germino*.] See GER-

MINATE.] Sprouting; beginning to grow; growing; gradually developing.

Prophecies are not fulfilled punctually, at once, but have springing and *germinating* accomplishment throughout many ages.

Germinate (jér'm-in-át), *v. i.* pret. & pp. *germinated*; ppr. *germinating*. [*L. germinare, germination, to bud, from germen.* See GERM.] To sprout; to bud; to shoot; to begin to vegetate, as a plant or its seed.

Germinate (jér'm-in-át), *v. t.* To cause to sprout; to put forth, as leaves. [Rare.]

In the early months of June and July several French departments *germinated* a set of rebellious paper-leaves, named proclamations, resolutions, journals, or diurnals, 'of the union for resistance to oppression.' Carlyle.

Germination (jér'm-in-á'shon), *n.* The first act of growth by an embryo plant; the time in which seeds vegetate after being

Seeds germinating. (In centre a plant which has newly appeared above ground.)

planted or sown. The immediate causes of germination are the presence of moisture and atmospheric air and a certain elevation of temperature. Moisture softens the integuments of the seed and relaxes the tissue of the embryo; atmospheric air supplies oxygen and nitrogen; and a temperature, which must be at least as high as 32° Fahr., by exciting the vitality of the embryo, enables it to take advantage of the agents with which it is in contact. During germination various changes take place in the chemical constituents of the seed, and are usually accompanied with increase of temperature, as is seen in the process of malting. Along with these other changes commonly take place: a root is produced, which strikes perpendicularly downwards and, fixing itself in the soil, begins to absorb food; a growth upwards then commences and ends in the protrusion of a stem and leaves.

Germinative (jér'm-in-át-iv), *a.* Of or pertaining to germination.

Germ-theory. The theory that living matter cannot be produced by evolution or development from not-living matter, but is produced from germs or seeds. The theory more particularly concerns itself with the appearance of life, or with phenomena supposed to be dependent on the presence of living matter, where the germs are so infinitesimally minute as not to be capable of detection by the eye aided by the most powerful instruments. In this view it has two aspects—first, as it affects the question of the origin of life, and, second, as it affects the origin and propagation of many diseases. As it regards the doctrine of the origin of life see BIOGENESIS, ABOGENESIS. As it affects the origin and propagation of disease it is maintained that the whole class of zymotic diseases, with many others, are due to the presence in the atmosphere of infinite multitudes of germs, chiefly spores of cryptogamic plants, as Bacteria and Torula (the yeast-plant), ready to become developed and multiply under favourable conditions, and by so doing to set up fermentation, putrefaction, or other morbid action in the bodies on or in which they are parasitic. All admit that many cutaneous diseases are due to the presence of parasites propagated by spores, as also that certain diseases, as pébrine in silk-worms, 'blood' in cattle, malignant pustules, &c., arise from the germs of animals or plants in the tissues or blood, but in regard to its wider application there is much controversy. A system of antiseptic treatment of wounds and sores has been founded upon this theory, with the view chiefly of preventing the formation of pus on the surface of incised wounds, and pyæmia, or blood-poisoning, occasionally occurring after operations, especially in hospitals. This treat-

ment consists in endeavouring to exclude germs or effect their destruction by the agency chiefly of carbolic acid.

Gern, **Gerne,** **Gerne,** *v. i.* To grin; to snarl; to yawn. 'Gaping like a gulfe when he did gerne.' Spenser.

Gerocomia (jér-ro-kó-mi-a), *n.* Same as *Gerocomy*.

Gerocomical (jér-ro-kom'ik-al), *a.* Pertaining to gerocomy. [Rare.]

Gerocomy (jér-ro'ko-mi), *n.* [*Gr. gērokomia, from gēros, old age, and komeō, to tend.*] That part of medicine which treats of the proper regimen for old people. [Rare.]

Gerontes (ge-ront'ez or je-ront'ez), *n. pl.* [*Gr., old men.*] In *Greek antiquity*, magistrates in Sparta who, with the ephori and kings, were the supreme authority of the state. There were twenty-eight, or, according to some thirty-two, of these magistrates. They could not be elevated to the dignity before their sixtieth year.

Gerontocracy (ge-rontok'ra-si or je-rontok'ra-si), *n.* [*Gr. gerōn, gerontos, an old man, and kratos, power.*] Government by old men.

Geropigia, Jerupigia (je-ro-pi'ji-a, je-rup'ji-a), *n.* A mixture composed of unfermented grape-juice, with sufficient brandy and sugar to prevent it from fermentation, and colouring matter from rhatany root or log-wood, imported from Portugal, to give spurious strength and colour to port wines.

Gerris (jér'ris), *n.* A genus of hemipterous insects. See HYDROMETHIDÆ.

Gerry-mander (ge-ri-man'dér), *v. t.* [From a governor of Massachusetts named Gerry, who devised the scheme.] To arrange the political divisions of, as a state, so that in an election one party may obtain an advantage over its opponent, even though the latter may possess a majority of votes in the state. [American political slang.]

Gerund (jér'und), *n.* [*L. gerundium, from gero, to carry on or perform—because, according to the old grammarians, the gerund properly expressed the doing or the necessity of doing something.*] The name given originally by grammarians to a part of the Latin verb used to express the meaning of the present infinitive active, when the infinitive ought to stand in some other case than the nominative, but adopted into other languages to indicate various forms or modifications of the verb; thus, in Anglo-Saxon a dative form of the infinitive with *tō* before it, is often called the *gerund*: as, *Io eom tō nimanne*, I am to take (or be taken). In Latin the gerund is a sort of verbal noun, having only the oblique cases, and possessing the same power of government as its verb, but resembling the noun in being governed by prepositions; as, *studium obtemperandi* legibus, a desire of obeying the laws; *ad obtemperandum* legibus, for obeying the laws. The early English or Anglo-Saxon gerund or dative of the infinitive was used chiefly to indicate end or purpose, like the Latin gerund or supine, or *ut* with the subjunctive. In English what seems to be a present participle governed by a preposition is sometimes denominated a gerund, in such phrases, for example, as 'fit for teaching,' 'fond of learning,' but here *teaching* and *learning* are merely verbal nouns (corresponding to the Anglo-Saxon nouns in *-ung*) governed by a preposition, the preposition and noun together doing the duty of the older gerund or dative infinitive with *tō*. So, 'fit for teaching boys,' is an abbreviation for 'fit for the teaching of boys.'

Gerundial (je-run'di-al), *a.* Pertaining to or resembling a gerund.

Gerundive (je-run'div-i), *n.* A name given originally by Latin grammarians to the future participle passive, but adopted into other languages to indicate certain modifications of the verb, as in English to indicate the verbal noun in *-ing* when governed by a preposition, and in German the present participle with *zu* (to) prefixed.

Gerundively (je-run'div-i-li), *adv.* In the manner of a gerund or gerundive; as, or in place of, a gerund or gerundive.

Gerusia (ge-rú'si-a), *n.* [*Gr. gerousia, an assembly of elders.*] The senate of ancient Sparta; the aristocratic element of Spartan polity. See GERONTES.

Gervas (jér'vas), *n.* A small tropical American shrub, the *Stachytarpheta jamaicensis*, nat. order Verbenaceæ, the leaves of which are sold in Austria under the name of Brazilian tea, and used in Britain to adulterate tea.

Gervillia (jér-vil'i-a), *n.* [After M. Gerville, a French naturalist.] A genus of conchifers or bivalves, family Aviculidæ, or wing-shells, found fossil from the carboniferous system to the chalk inclusive.

Gesling, *n.* A gossling.

Gesnera (jes-ne'ra). [After Conrad Gesner, the celebrated botanist.] A handsome genus of about fifty species, the type of the nat. order Gesneraceæ. They are mostly natives of Brazil, having tuberous rhizomes, opposite leaves, and usually red or orange flowers, borne singly or several together on axillary peduncles or in terminal racemes.

Gesneraceæ (jes-ne-rá'sé-é), An order of monopetalous exogens, comprising about 700 species, mostly natives of tropical and subtropical regions, and represented by a few genera in Australia, New Zealand, Japan, China, and the Mediterranean region. They are shrubby herbs, or (rarely) trees, often with tuberous rhizomes, usually opposite leaves, and scarlet, violet, or blue (often very handsome) flowers, borne singly upon axillary or terminal peduncles. Some of the genera are frequent in our hothouses, such as *Gloxinia*, *Acichemans*, and *Gesnera*.

Gesse, *n.* To guess. Chaucer.

Gest, *n.* A guest. Chaucer.

Gest, Geste (jest), *n.* [*L. gestum, from gero, to carry, to do.*] 1. Deed, action, or achievement.

They were two knights of peerless puissance, And famous far abroad for warlike geste. Spenser.

2. Show; representation.—3. Carriage of person; deportment; sometimes gesture.

Portly his person was, and much increase, Through his heroic grace and honourable geste. Spenser.

Had the knight looked back to the page's geste, I woe he had turned anon! For dread was the vice in the face so young: And wild was the silent geste that flung Casque, sword to earth. E. B. Browning.

Gest (jest), *n.* [O. Fr. *giste*. See GIST.] 1. A stage, rest, or stop in travelling. See GIST. 2. A roll or journal of the several days and stages prefixed, in the journeys of the English kings, many of which are extant in the heralds' office.

Gestant (jes'tant), *a.* [*L. gestans, gestantis, ppr. of gesto, freq. from gero, gestum, to carry.*] Carrying; laden. 'Clouds gestant with heat.' E. B. Browning.

Gestation (jest-á'shon), *n.* [*L. gestatio, from gesto, gestatum, freq. from gero, to carry.*] 1. The act of wearing, as clothes or ornaments.—2. The act of carrying young in the womb from conception to delivery; pregnancy.—3. Exercise in which one is borne or carried, as on horseback, or in a carriage, without the exercise of his own powers.—*Extra-uterine gestation*, pregnancy in which the fetus is contained in some organ exterior to the uterus, as when it is lodged in the ovary or in the fallopian tubes.

Gestatory (jes'ta-to-ri), *a.* 1. That may be carried or worn.

The crowns and garlands of the ancients were either gestatory, such as they wore about their heads and necks, &c. Str. T. Browne.

2. Pertaining to gestation or pregnancy.

Gestic (jest'ik), *a.* Pertaining to legendary deeds or exploits. 'The gay grandire, skill'd in gestic lore.' Goldsmith. [Rare.]

Gesticulate (jes-tik'ú-lät), *v. i.* pret. & pp. *gesticulated*; ppr. *gesticulating*. [*L. gesticulor, gesticulatus, from gero, gestum, to bear or carry.*] To make gestures or motions, as in speaking; to use postures.

The Spaniards argue with even more vehemence than even the French or Italians, and gesticulate with equal, if not superior, eagerness. H. Swinburne.

Gesticulate (jes-tik'ú-lät), *v. t.* To represent by gesture; to imitate; to act. [Rare.]

If I knew any man so vile To act the crimes these whippers reprehend, Or what their servile apes gesticulate. B. Jonson.

See *v. t.*—To get over, to pass over; to surmount; to conquer; to recover from; as, to get over difficulties; to get over sickness.—To get quit of, to get rid of; to shift off, or to disengage one's self from.—To get rid of, to disengage one's self from; also, to shift off; to remove.—To get through, to pass through and reach a point beyond anything; also, to finish; to accomplish.—To get to, to reach; to arrive.—To get together, to meet; to assemble; to convene.—To get up, (a) to arise; to rise from a bed or a seat; also, to ascend; to climb. (b) To prepare and introduce; to bring forward; as, to get up a concert. (c) To dress; to equip; as the actor was well got up for the part.—The following specimen of the capabilities of *get*, transitive and intransitive, is given by Dr. Withers:

I got on horseback within ten minutes after I got your letter. When I got to Canterbury, I got a chaise for town; but I got wet through before I got to Canterbury; and I have got such a cold as I shall not be able to get rid of in a hurry. I got to the Treasury about noon, but first of all I got shaved and dressed. I soon got into the secret of getting a memorial before the board, but I could not get an answer then; however, I got intelligence from the messenger that I should likely get one the next morning. As soon as I got back to my inn I got supper and got to bed. It was not long before I got to sleep. When I got up in the morning, I got my breakfast, and then I got myself dressed that I might get out in time to get an answer to my memorial. As soon as I got it, I got into the chaise, and got to Canterbury by three, and about tea-time I got home. I have got nothing for you, and so adieu.

Get (get), *n.* [*Fr. gette.*] Fashion; behaviour. *Chaucer.*

Seeing his gewgaw castle shine, New as his title, built last year. *Tennyson.*

Gey (gy), *adv.* Pretty; moderately. See *GAY*. [*Scotch.*]

Geyser (gī'zer), *n.* [*Icel. geyssir*, lit. the gusher, from *geysa*, to gush or rush forth; allied to *E. gush*.] The name given to springs or fountains of hot water such as were first observed in Iceland. The geysers of Iceland, nearly one hundred in number, lie about 30 miles north-west of Mount Hecla and 10 miles north of the town of Skallholt, in a plain covered by hot springs and steaming apertures. The largest, called the Great Geyser, throws up at certain times a column of hot water, with loud explosions, to the height of over 200 feet, and this eruption terminates in a column of steam, which rushes up with amazing force and a thundering noise. The next most important is the New Geyser or Strokur (churn). These springs are supposed to be connected with Mount Hecla. The geysers of Iceland are, however, surpassed by those which have been discovered in comparatively recent times in the Rocky Mountains in the Yellowstone Region. (See *BOILING-SPRINGS*.) The phenomenon, as experimentally illustrated by Tyndall, is due to the heating of the walls of a fissure, whereby the water is slowly raised to the boiling point under pressure and explodes into steam, an interval being required for the process to be repeated.

Chainorik (gā'nō-rik), *n.* A variety of the yak of a black colour, the back and tail being often white.

Ghaist (gast), *n.* A ghost. [*Scotch.*]

Ghastfully (gast'fūl-ly), *adv.* In a ghastful manner; frightfully.

He often stares ghastfully, raves loud, &c. *Pope.*

Ghastliness (gast'li-nes), *n.* The state or quality of being ghastly; horror of countenance; a deathlike look; paleness; as, the ghastliness of his appearance.

Ghastly (gast'li), *a.* [Rather from the *ghost* of *aghost* than from *A. Sax. gīst*, a ghost.] 1. Terrible of countenance; deathlike; dismal; as, a ghastly face; ghastly smiles.

Death Grim'd horrible a ghastly smile, to hear His famine should be fill'd. *Milton.*

2. Horrible; shocking; dreadful. 'Mangled with ghastly wounds.' *Milton.*—*Ghastly*, *Grim*, *Grisly*, *Haggard*. *Ghastly*, as it is most commonly applied, means deadly pale, deathlike. It is generally applied to the countenance, but its signification has been extended to denote anything that is shocking and suggestive of death; as, Milton's 'mangled with ghastly wounds.'

Her face was so ghastly that it could not be recognised. *Macaulay.*

Grim characterizes a rigid, fixed expression of countenance, indicating a severe, stern, ruthless disposition. Death is called 'the grim king of terrors.' *Grisly* designates the appearance of a person calculated to inspire terror.

My grisly countenance made others fly; None durst come near for fear of sudden death. *Shak.*

Haggard adds to the idea of paleness of countenance that of being wasted by famine or protracted mental agony.

Giraffe (jī-raf'), *n.* [Fr. *girafe*, *giraffe*, Sp. *girafa*, It. *girafa*, from Ar. *zūrafā*; Hind. *surafa*, that is long-necked.] The camelopard (*Giraffa camelopardalis* or *Camelopardalis giraffa*), a ruminant animal inhabiting various parts of Africa, and constituting the only species of its genus and family. It is the tallest of all animals, a full-grown male reaching the height of 18 or 20 feet. This great stature is mainly due to the extraordinary length of the neck, in which,

Giraffe (*Giraffa camelopardalis*).

however, there are but seven vertebrae, though these are extremely elongated. It has two bony excrescences on its head resembling horns. Its great height is admirably suited to its habit of feeding upon the leaves of trees, and in this the animal is further aided by its tongue, which is both prehensile and capable of being remarkably elongated or contracted at will. It rarely attempts to pick up food from the ground. Its colour is usually light fawn marked with darker spots. It is a mild and inoffensive animal, and in captivity is very gentle and playful.

The giraffe is, in some respects, intermediate between the holly-horned and solid-horned ruminants, though partaking more of the nature of the deer. *Prof. Owen.*

Giraffina (jī-raf-fī-na), *n. pl.* A family of ruminant animals, also called *Deveza*, and containing only one living genus, *Giraffa*. There is only one species of the genus, the well-known and singular-looking animal called the camelopard or giraffe (*G. camelopardalis*). Sivatherium and other Sivallik fossils are related to it.

Girandole (jī-ran-dōl), *n.* [Fr.; It. *girandola*, from *girare*, to turn, from *L. gyros*, a turn.] 1. A chandelier; a large kind of branched candlestick.

Girder (gêrd'er), *n.* 1. One who or that which girds, binds, or surrounds. Specifically—2. A main beam, either of wood or iron, resting upon a wall or pier at each end, employed for supporting a superstructure, or a superincumbent weight, as a floor, the upper wall of a house when the lower part is sustained by pillars, the roadway of a bridge, and the like. In a framed flooring the girders are let into the wall for 10 or 12 inches at either end, the ends being supported by transverse pieces of wood called *templates*, and the binding joists are laid at right angles to the girders and tenoned into them. Wooden girders are sometimes cut in two longitudinally and an iron plate inserted between the pieces, and the whole bolted together. This species of girder is called a *sandwich-girder*. For bridges cast-iron girders are sometimes cast in lengths of 40 feet and upwards, but when the span to be crossed is much greater than 40 feet recourse is had to wrought-iron, or to *trussed*, *lattice*, or *box girders*. A *trussed-girder* is a wooden girder strengthened with iron. (See *TRUSS*.) A *lattice-girder* is a girder consisting of two horizontal beams united by diagonal crossing bars, somewhat resembling wooden lattice-work. A *box-girder* is a kind of girder resembling a large box, such as those employed in tubular bridges. (See *BOX-GIRDER*.) There are also *bowstring-girders*, which are varieties of the lattice-girder, and consist of an arched beam, a horizontal tie resisting tension and holding together the ends of the arched rib, a series of vertical suspending bars by which the platform is hung from the arched rib, and a series of diagonal braces between the suspending bars.

Giusto (jus'to), *n.* [It., from L. *justus*, just, true.] In *music*, in just, correct, or steady time.

Give (giv), *v.t.* pret. *gave*; pp. *given*; ppr. *giving*. [A. Sax. *gifan*, Dan. *give*, D. *geven*, G. *geben*, Goth. *giban*, to give, probably a causative from the same root as L. *habeo*, to have (whence *habitus*, &c.) = to make to have.] The fundamental sense of this word is to surrender into the power of another; to convey to another; to bestow; and the word usually implies that this is done freely and without compensation. But the word is used in a great variety of senses, the connection of which with the fundamental meaning is usually obvious. Of these the principal are—(a) To communicate; as, to give an opinion; to give counsel or advice.

Give us then your mind at large:
How say you, war or not? Tennyson.

Hence, to utter; to pronounce; as, to give the word of command.

So you must be the first that gives this sentence. Shak.

(b) To expose.

Give to the wanton winds their flowing hair. Dryden.

(c) To grant; to permit.

It is given me once again to behold my friend. Rowe.

Then give thy friend to shed the sacred wine. Pope.
Hence, to grant; to admit; to allow by way of supposition; as, let A B be given equal to C D. (d) To enable; as, I was given to understand; I was given to know. (e) To addict; often with *up*; as, he gave himself up to the study of the ancient classics.

They who gave themselves to warlike action and enterprises, went immediately to the temple of Odin. Temple.

The past participle is frequent in this sense; as, 'given to prayer.' Shak. 'Given to musing.' Shak. (f) To excite; as, to give offence or umbrage. (g) To emit; to utter; as, to give a shout.

Bitter notes my harp would give. Tennyson.

(h) To reckon or consider.

The crown and comfort of my life, your favour, I do give lost. Shak.

(i) To pledge; as, I give you my word of honour. (j) To propose, as a toast; as, to give 'the army and navy.' (k) To represent.

Too modest are you,
More cruel to your good report than grateful
To us that give you truly. Shak.

(l) To ascribe.

You sent me deputy for Ireland;
Far from his succour, from the king, from all
That might have mercy on the fault thou gavest him. Shak.

(m) To yield, as a result or product.

The number of men being divided by the number of ships gives four hundred and twenty-four men a-piece. Arbuthnot.

—To give away, to alienate the title or property of a thing; to make over to another; to transfer.

Whatsoever we employ in charitable uses during our lives, is given away from ourselves. Atterbury.

—To give back, to return; to restore. —To give the bag, † to cheat. J. Webster. —To give birth to, to bear; to bring forth, as a child; to be the origin of.

There is some pre-eminence conferred by a family having for five successive generations given birth to individuals distinguished by their merits. Brougham.

—To give chase to, to pursue; as, the squadron immediately gave chase to the enemy's fleet. —To give ear, to listen; to pay attention; to give heed. —To give forth, to publish; to tell; to report publicly. Hayward.

—Give you good even, good morrow, and the like, phrases common in Shakspeare, meaning I wish you a good evening or a good morning. Perhaps they are originally elliptical expressions for 'God give you good even, good morrow;' compare 'God gi' god-den' (Shak.), for 'God give you a good evening.' Still in such phrases the saluter is sometimes the express subject of the verb to give; for example, 'When you have given good morning to your mistress.' Shak. —To give ground, to retire under the pressure of an advancing enemy; to yield. —To give the hand, to yield pre-eminence, as being subordinate or inferior. Hooker. —To give in, (a) to allow by way of abatement or deduction from a claim; to yield what may be justly demanded. (b) To declare; to make known; to tender; as, to give in one's adhesion to a party. —To give it to one, to rate, scold, or beat one severely. —To give one the lie, to charge with falsehood. —To give line, to give head, to give the reins, all figurative expres-

sions meaning to give full liberty to—the first derived from angling, the other two from horsemanship. —To give over, (a) to leave; to quit; to cease; to abandon; as, to give over a pursuit; to give over a friend. (b) To despair of recovery; to believe to be lost or past recovery. The physician had given over the patient, or given the patient over. —To give out, (a) to utter publicly; to report; to proclaim; to publish. It was given out that parliament would assemble in November. (b) To issue; to send forth; to publish.

The night was distinguished by the orders which he gave out to his army. Addison.

(c) To represent; to represent as being; to declare or pretend to be.

It is the bitter disposition of Beatrice that so gives me out. Shak.

(d) To send out; to emit; to distribute; as, a substance gives out steam or odours. —To give place, to retire to make room for another or for something else. —To give tongue, said of dogs, to bark. —To give up, (a) to resign; to quit; to yield as hopeless; as, to give up a cause; to give up the argument. (b) To surrender; to relinquish; to cede; as, to give up a fortress to an enemy; in this treaty the Spaniards gave up Louisiana. (c) To deliver; to make public; to show up.

And Jacob gave up the sum of the number of the people to the king. 2 Sam. xxiv. 9.

By giving up their characters. Beau. & Fl.

—To give one's self up, (a) to despair of one's recovery; to conclude to be lost. (b) To resign or devote.

Let us give ourselves wholly up to Christ in heart and desire. Taylor.

(e) To addict; to abandon. See above. —To give way, (a) to yield; to withdraw; to make room for; as, inferiors should give way to superiors. (b) To fail; to yield to force; to break or fall; to break down; as, the ice gave way, and the horses were drowned; the scaffolding gave way; the wheels or axle-tree gave way. (c) *Naut.* in the imperative, an order to a boat's crew to row after ceasing, or to increase their exertions. —To give way together (*naut.*), to keep time in rowing. —Give me so and so, a common phrase expressive of predilection for a thing, equivalent to 'so and so is the thing for me.'

Give me the good old times! Butler Lytton.

—Give, Confer, Grant. Give is generic and includes the other two; grant and confer include accessory ideas—confer adds the idea of condescension or of allowing that which might be withheld; grant implies ceremony or the giving to an inferior, and presupposes a request.

For generous lords had rather give than pay. Young.

The public marks of honour and reward conferred upon me. Milton.

Wherefore did God grant me my request. Milton.

Give (giv), *v.i.* 1. To yield, as to pressure; as, the earth gives under the feet.

Only a sweet and virtuous soul,
Like seasoned timber, never gives. G. Herbert.

2. To soften; to begin to melt; to grow moist and soft; to thaw; hence, to relent.

Some things are harder when they come from the fire, and afterwards give again and grow soft. Bacon.

3. To move; to recede.

Now back he gives, then rushes on again. Daniel.

4. † To weep; to shed tears.

Flinty mankind, whose eyes do never give
But thorough lust and laughter. Shak.

5. † To have a misgiving.

My mind gives ye're reserved
To rob poor market women. Webster.

6. To lead; to open; to afford entrance or view.

A well-worn pathway courted us
To one green wicket in a privet hedge;
This yielding gave into a grassy walk. Tennyson.

—To give in, to go back; to give way; to yield; to confess one's self beaten; to confess one's self inferior to another. —To give in to, to yield assent; to adopt.

This consideration may induce a translator to give in to those general phrases. Pope.

—To give off, to cease; to forbear. [Rare.]

—To give on, † to rush; to fall on.

Your orders come too late, the fight's begun;
The enemy gives on with fury led. Dryden.

—To give out, to cease from exertion; to yield; applied to persons. He laboured hard, but gave out at last.

Madam, I always believ'd you so stout,
That for twenty denials you would not give out. Swift.

ch, chain; ch, Sc. loch; g, go; j, job;

n, Fr. ton; ng, sing; TH, then; th, thin;

w, wig; wh, whig; zh, azure. —See KEY.

—To give over, to cease; to act no more; to desert.

It would be well for all authors if they knew when to give over, and to desert from any further pursuits after failure. *Addison.*

—To give upon, to front; to look into; to open upon (Fr. *donner sur*).
The crazy gateway giving upon the Alpine lane. *At the Year Round.*

Given (gîv'n), *p.* and *a.* 1. Bestowed; granted; conferred; imparted; admitted or supposed. 2. Abducted; disposed.

Fear him not, Caesar, he's not dangerous.

He's a noble Roman and well given. *Shak.*

It would be too much to affirm that in those days, when men were fanatically given both as to religious and political matters, the establishment of a truly popular form of government among us would have prevented the follies of the German war. *Brougham.*

3. In *nath*, a term frequently used to denote something which is supposed to be known. Thus if a magnitude be known, it is said to be a *given* magnitude; if the position of a thing be known, it is said to be *given* in position; if the ratio between two quantities be known, these quantities are said to have a *given* ratio, &c. &c.

Giver (gîv'ér), *n.* One who gives; a donor; a bestower; a granter; one who imparts or distributes.

It is the *giver*, and not the gift, that engrosses the heart of the Christian. *Kollock.*

Gives (givz), *n. pl.* Fetters or shackles for the feet. See *GIVES*.

Giving (giv'ing), *n.* 1. The act of conferring. 2. An alleging of what is not real; with *out*.

His *giving out* were of an infinite distance. *Shak.*

Gizz (giz), *n.* [Perhaps same as *jasey* (which see).] A wig; a shock of hair. [Scotch.]

Wf reekit duds, an' reekit gizz.
Ye did present your smootie plizz. *Burns.*

Gizzard (giz'erd), *n.* [Fr. *gacier*; Genévan *gacier*, *gacier*, from *L. gignere*, the entrails of poultry.] 1. The third and principal stomach in birds. In those which feed on grain or seeds it is very thick and muscular, and performs the function of teeth in triturating or grinding the food.

The food is triturated in the *gizzard* by the immediate agency of the *gizzard* bodies, as sand and gravel, which the birds swallow. *Eng. Cyc.*

2. *Fig. temper.*

But that which does them greatest harm,
Their spiritual *gizzards* are too warm. *Hudibras.*

—To stick in one's *gizzard*, to prove hard of digestion; to be distasteful or offensive; to vex one's self, or to be vexed. [Vulgar.]

Glabrate (glá'brát), *a.* [L. *glabratus*, pp. of *glabro*, to smooth, from *glaber*, smooth.] In bot. becoming smooth or glabrous from age. *Gray.*

Glabreate, **Glabriate**† (glá'bré-át, glá'brí-át), *v. t.* [L. *glabro*, *glabratum*, to make bald or smooth.] To make smooth. *Cockeram.*

Glabrity† (glá'brí-tí), *n.* The state of being glabrous; smoothness. *Bailey.*

Glabrous (glá'brus), *a.* [L. *glaber*, without hair, smooth.] Smooth; having a surface devoid of hair or pubescence. *Maunder.*

Glaciable (glá'shi-a-bl), *a.* Capable of being converted into ice. 'From mere aqueous and *glaciable* substances, condensing them by frosts into solidities.' *Sir T. Browne.* [Rare.]

Glacial (glá'shi-al), *a.* [Fr., from *L. glaci-alis*, from *glacies*, ice.] 1. Icy; consisting of ice; frozen; having a cold glassy look. — *Glacial phosphoric acid*, pure tribasic phosphoric acid. It is a transparent brittle solid, highly deliquescent. — *Glacial acetic acid*, the strongest acetic acid. It exists in a crystallized form under 50° Fahrenheit. — *Glacial drift*, in *geol.* see *DRIFT*. — *Glacial period* or *epoch*, in *geol.* that interval of time in the later tertiary period during which both the arctic regions and a great part of the temperate regions were covered with a sheet of ice, which formed a polar ice-cap. The epoch comprehended several alternations of warmth and cold, during which the ice-sheet shrank and expanded. The causes of the cold were partly astronomical and partly geographical. The phenomena of the drift or boulder-clay are explained by reference to this period of extreme cold, the explanation either taking the form of the *iceberg theory*, which assigns the boulder-clay to the action of floating ice,

or of the *glacier theory*, which ascribes the chief work to great continental ice-sheets. The deposits of the glacial period are boulder-clays of more than one kind, separated by sands and clays, the whole resting on striated and ice-worn rock-surfaces; sands, gravels, and clays, the last containing the remains of animals whose proper habitat is in regions farther north than where they are now found; erratics, or masses of rock transported great distances and of such size that floating ice alone could have carried them; moraines, or the debris gathered in valleys by local glaciers such as now exist in various parts of the earth, even in the tropical mountain chains. The iceberg theory, once universally adopted, is now admitted as explanatory of only a small part of the phenomena.

Glacialist (glá'shi-al-ist), *n.* One who studies the action of ice with a view to explain by its operation the phenomena of striated rock-surfaces, boulder-clay deposits, and erratics; one who studies or writes on geological phenomena attributed to the action of ice. See *Glacial Period* under *GLACIAL*.
Glaciarium (glá'shi-á-ri-um), *n.* [L. *glacies*, ice.] A place, as a building, provided with a smooth level flooring of artificial ice for skating on.

Glaciate (glá'shi-át), *v. t.* To be converted into ice. *Johnson.*

Glaciate (glá'shi-át), *v. t.* 1.† To convert into ice.—2. To cover with ice.—3. To act upon or impress a certain configuration on by ice.

It has been his aim throughout to indicate the succession of climatic changes over an area of far wider extent, conveying as far as possible to the reader's mind an impression of the glacial epoch including not Scotland alone, but also every *glaciated* region which has been carefully studied by geologists. *Sat. Rev.*

Glaciation (glá'shi-á'shon), *n.* 1. The act of freezing.—2. The result of freezing; ice. 3. The process of being covered with glaciers, or state of being so covered; the taking place of glacial action on the earth's surface; as, the *glaciation* of Scandinavia, of Scotland, &c.—4. A consequence of or phenomenon caused by such a process or covering, as the striation and smoothing of rock-surfaces.

Glacier (glá'shi-ér), *n.* [Fr., from *glace*, L. *glacies*, ice.] An immense accumulation of ice filling a valley and pouring down its masses to valleys yet lower. Glaciers are those masses of snow-ice formed in lofty valleys above the line of perpetual congelation, whose prolongation comes down into the lower valleys, reaching frequently to the borders of cultivation. They present

the appearance of frozen torrents, frequently several miles in length, traversed by deep rents called *crevasses*, and are composed of snow gradually solidified by compression into the granular mass known as *névé*, which ultimately, the pressure being continued and alternate melting and freezing taking place within the glacier and on its surface, becomes transparent ice. They move gradually down into the lower valleys at a varying rate of 18 to 24 inches in twenty-four hours, bearing upon their surface large quantities of stones, some of them of enormous size, derived from the walls of the valley down which the glacier moves. These heaps of stones, which are deposited ultimately at the sides and lower termination of the glacier, are called *lateral* and *terminal moraines*. In mild seasons glaciers are

much reduced in size, and in cold seasons much enlarged. In the winter of 1818-19 some Swiss glaciers increased so greatly, and came so far down into the lower valleys, as to sweep away whole villages. Glaciers are found in many lofty mountain ranges, as the Alps, the Andes, &c.

The Alpine glaciers are from 10 to 15 miles long and from 1 to 2½ broad, and their mean vertical thickness ranges from 100 to 600 feet. *Brande.*

—*Glacier theory*, (a) the theory attributing important geological changes, as the erosion of valleys, the denudation of large portions of the earth's surface, the transportation and deposition of drift or boulder-clay, the accumulation of moraines, &c., to the action of glaciers, which, during the glacial period, covered a large part of the frigid and temperate zones. See under *GLACIAL*.

(b) The name given to any theory accounting for the downward motion of glaciers. The principal glacier theories may now be said to be three, two of which agree in referring this motion to the effect of gravitation, but the one accounting for the coherence of the glacier by a certain viscosity inherent in ice, similar to that of treacle or honey, though differing in degree; and the other attributing it to the fact that, although the ice of which the glacier consists is being continually broken and disintegrated by the downward pressure of the parts of the glacier on each other, yet that these pieces immediately reunite through regelation taking place at the moist surfaces of the broken fragments. (See *REGELATION*.) The former theory is that of the late Principal Forbes of St. Andrews, the latter that of Professor Tyndall. Principal Forbes claimed, on the announcement of Tyndall's theory of cohesion by regelation, that that doctrine was already involved in his theory. Charpentier, Saussure, Agassiz, Rendu, and others, had previously investigated and proposed theories accounting for the river-like motion of glaciers, but the older of these erred in that they regarded glaciers as more or less solid and rigid bodies. The third theory, that of Professor James Thomson, assigns the motion of the glacier to the melting and freezing of alternate portions of the ice-mass subjected to pressure. The first push of the ice from the feeding-ground of the glacier is soon exhausted, but the change of form of the ice to which it gave rise is propagated by the alternate melting of the parts subjected to pressure, and their freezing as soon as the pressure is removed.

Glacière (glá'shi-ér), *n.* [Fr.] In *geol.* the term applied to certain caverns in alpine districts which, although not connected with any glacial system, are filled with ice.

Glacio-aqueous (glá'shi-ó-ak-wé-us), *a.* [Stem of *L. glacies*, ice and *E. aqueous*.] Pertaining to the combined action of water and ice.

Glacioust (glá'shi-us), *a.* Like ice; icy.

It will crystallize . . . into *glaciously* bodies.

Glad (glád), *n.* [Fr., from *glace*, ice.—From the smoothness of its surface.] A gentle slope or sloping bank; as, (a) in *fort*, a sloping bank so raised as to bring the enemy advancing over it into the most direct line of fire from the fort; that mass of earth which serves as a parapet to the covered way, having an easy slope or declivity toward the campaign or field. (b) In *geol.* an easy slope, like that of the shingle piled on the shore by the action of the tides and waves; less steep than a *talus*.

Glad (glád), *a.* [A. Sax. *glad*, glad, merry, pleasant; Dan. *glad*, glad, joyful; D. *glad*, Icel. *glathr*, smooth, polished, bright, cheerful; G. *glatt*, smooth. Allied to *glide* and to *glow*.] 1. Pleased; affected with pleasure or satisfaction; joyful; gratified; well contented; often followed by *of* or *at*; as, I am glad of an opportunity to oblige my friend. He that is glad at calamities shall not be unpunished. *Prov. xvi. 5.*

It is sometimes followed by *with*.

The Trojan, glad with sight of hostile blood. *Dryden.*

2. Expressive or suggestive of joy or pleasure; cheerful; bright; wearing the appearance of joy; as, a glad countenance. Glad evening and glad morn crown'd the fourth day. *Milton.*

3. Causing pleasure; giving satisfaction; pleasing. Her conversation More glad to me than to a miser money. *Sidney.*

SYN. Pleased, gratified, exhilarated, ani-

mated, delighted, cheerful, joyous, joyful, cheering, exhilarating, pleasing, animating. **Glad** (glad), *v.t.* To make glad; to affect with pleasure; to cheer; to gladden; to exhilarate.

Each drinks the juice that glads the heart of man. *Pope.*
But that which gladdened all the warrior train,
Though most were sorely wounded, none were slain. *Dryden.*

Glad† (glad), *v.t.* To be glad; to rejoice.

So shall you in such scorn?
I call my wish back. *Massey.*

Gladden (glad'n), *v.t.* [A. Sax. *gladian*.] To make glad; to cheer; to please; to exhilarate.

When he appear'd
A secret pleasure gladden'd all that saw him. *Addison.*

SYN. To cheer, please, exhilarate, comfort, animate, enliven, gratify, delight.

Gladden (glad'n), *v.t.* To become glad; to rejoice.

So shall your country ever gladden at the sound of your voice. *Adams.*

Gladder (glad'er), *n.* One that makes glad or gives joy.

Thou gladder of the mount of Cytheron,
Have pity, goddess. *Dryden's Chaucer.*

Gladdon (glad'don), *n.* Same as *Gladden*.

Glade (glad), *n.* [Lit. a passage for light; akin *N. glott*, *glette*, an opening, a clear spot among clouds; *Icel. glitta*, *Sc. glett*, to shine.] 1. An opening or passage through a wood; an open place in a wood or forest.

There interspersed in lawns and opening glades. *Pope.*

2. An opening in the ice of rivers or lakes, or a place left unfrozen; smooth ice. [United States; local.]—3. An everglade. [United States; local.]

Glade (glad), *n.* A local name for the common buzzard (*Buteo vulgaris*).

Glade, † v.t. To make glad. *Chaucer.*

Gladden, **gladwin** (glad'en, glad'win), *n.* [L. *gladius*, a sword.] In bot. names given to plants of the Iris family, especially *Iris foetidissima*, Linn., from the sword-like leaves.

Glade-net (glad'net), *n.* A kind of net much used in England and some parts of the Continent for the capture of birds, especially wood-cocks, in the glades of forests.

Glader, † n. One who makes glad. *Chaucer.*

Glader (glad'er), *n.* Same as *Gladden*.

Glade-eye (glad'i), *n.* A bird, the *Emberiza citrinella*, or yellow-hammer. See **YELLOW-HAMMER**.

Gladful† (glad'ful), *a.* Full of gladness.

There leave we them in pleasure and repast,
Spending their joyous days, and gladful nights. *Spenser.*

Gladfulness† (glad'ful-nes), *n.* The state or quality of being gladful or joyful; joy; gladness.

And there him rests in riotous suffiance
Of all his gladfulness, and kingly joviance. *Spenser.*

Gladiare (glad'i-ät), *a.* [L. *gladius*, a sword.] Sword-shaped; resembling the form of a sword, as the legume of a plant.

Gladiator (glad'i-ät-ör), *n.* [L. a swordman, one who fought at public games, from *gladius*, a sword.] 1. In *Rom. antiq.* one who fought in public for the entertainment of the people. Gladiators were at first prisoners, slaves, or condemned criminals; but afterwards freemen fought in the arena, either for hire or from choice. Under the empire knights, senators, and even women exhibited themselves in this way. Gladiators were first exhibited only on the occasion of public funerals, but afterwards at entertainments of various kinds, and especially at public festive games given by the ediles and other magistrates; they usually fought in the amphitheatre, sometimes in the forum, sometimes at the funeral pyre. They were kept and trained in special establishments or schools, sometimes by persons who let them out for hire, sometimes by citizens who wished to exhibit them themselves. Gladiators were divided into different classes according to their arms or mode of fighting. Thus *retiaris* were such as carried a kind of trident and a net (*rete*), in which they endeavoured to entangle their opponents; *Thracians* were those armed with the round sword or buckler of the Thracians and a short sword or dagger; the *mirallones* had an oblong shield curved to suit the shape of the body; *secutores* were another class usually pitted against the *retiaris*. In case the vanquished was not killed in the combat the people were allowed to decide his fate. If they decreed his

death they held up their thumbs in the air; the thumb turned downwards was the sig-

nal to save him. Hence—2 A combatant in general; a prize-fighter; a disputant.

Then whilst his foe each gladiator foils,
The atheist, looking on, enjoys the spoils. *Sir J. Denham.*

Gladiatorial, **Gladiatorian** (glad'i-a-tö'ri-al, glad'i-a-tö'ri-an), *a.* 1. Pertaining to gladiators or to combats for the entertainment of the Roman people.

Consider only the shocking carnage made in the human species by the capture of infants, the gladiatorial shows, and the exceedingly cruel usage of slaves. *Bp. Porteus.*

Hence—2. Pertaining to combatants in general, as to prize-fighters, disputants, &c.

Gladiatorism (glad-i-ät'er-izm), *n.* The act or practice of gladiators; prize-fighting.

Gladiatorship (glad'i-ät-ör-ship), *n.* The conduct, state, or occupation of a gladiator.

Gladiatory (glad'i-a-tö-ri), *a.* Relating to gladiators. [Rare.]

Their gladiatory fights and bloody spectacles. *Bp. Reynolds.*

Gladiature† (glad'i-ä-tür), *n.* Sword-play; fencing.

In their amphitheatrical gladiatures the lives of captives lay at the mercy of the vulgar. *Gayton.*

Gladiole (glad'i-öl), *n.* A gladiolus. See **GLADIOLUS**.

Gladiolus (glad-i'ö-lus), *n.* pl. **Gladioli** (glad-i'ö-li). [L. *gladius*, dim. of *gladius*, a sword.] An extensive and very beautiful genus of bulbous-rooted plants, nat. order Iridaceæ, found sparingly in the warmer parts of Europe and in North Africa, but abundantly in South Africa. Some of the species are half hardy, and rank among the finest of our popular garden flowers; but the majority are frame and greenhouse plants. The favourite garden varieties are mostly crosses between two or three South African species, such as *G. natalensis*, *G. floribundus*, and *G. cardinalis*. Many of the gladioli are stately plants, growing to the height of from 3 to 6 feet. The genus has its name from the shape of the leaves.

Gladius (glä'di-us), *n.* [L. a sword.] In zool. a term applied to the horny endoskeleton or pen of two-gilled cuttle-fishes, as *Loligo*. **Gladly** (glad'li), *adv.* [See **GLAD**.] With pleasure; joyfully; cheerfully.

The common people heard him gladly. Mark xii. 27. **Gladness** (glad'nes), *n.* [See **GLAD**.] The state or quality of being glad; joy, or a moderate degree of joy and exhilaration; pleasure of mind; cheerfulness.

They did eat their meat with gladness and singleness of heart. Acts ii. 46.

[Gladness is rarely or never equivalent to mirth, merriment, gaiety, or triumph, and it usually expresses less than delight.]

Gladship† (glad'ship), *n.* State of gladness; delight.

Such is the gladship of envie
In worldly thing. *Gower.*

Gladsome (glad'sum), *a.* 1. Pleased; joyful; cheerful.

The gladsome ghosts in circling troops attend,
And with unwearied eyes behold their friend. *Dryden.*

2. Causing joy, pleasure, or cheerfulness; having the appearance of gaiety; pleasing.

Of opening heaven they sung, and gladsome day. *Prior.*

Gladsmely (glad'sum-li), *adv.* In a glad-some manner; with joy; with pleasure of mind.

Gladsoneness (glad'sum-nes), *n.* State of being gladsome; joy; pleasure of mind.

Gladstone (glad'ston), *n.* A roomy four-wheeled pleasure carriage with two inside seats, calash top, and seats for driver and footman.

Gladwin, **Gladwyn** (glad'win). See **GLADEN**.

Glady (glad'i), *a.* Having glades. 'The copsy and glady wood beyond.' *Mrs. Marsh.*

Glagol (glä'gol), *n.* [Slav., a word.] An ancient Slavonic alphabet, principally used in several Roman Catholic dioceses of Istria and Dalmatia in the psalms, liturgies, and offices of the church. The alphabet bears traces of having existed prior to the introduction of Christianity, and seems to have been originally cut on sticks in the Runic fashion. The earliest Slavonic manuscripts are written in Glagol.

Glagolitic (glä'gol-it'ik), *a.* Of or pertaining to Glagol; as, the *Glagolitic* alphabet.

Glaik (glä'k), *n.* [Perhaps same as *gleek* (which see); comp. also Gael. *glac*, to catch.] [Scotch.] 1. A deception; a delusion; a trick.—To *gling the glaiks in folk's e'en*, to throw dust in people's eyes.

It is indeed but a fashion of integrity that ye will find among them, a fashion of wisdom and a fashion of carnal-learning—glancing glasses they are, fit only to *gling the glaiks in folk's e'en*, w' their pawky policy and earthy ingine. *Sir H. Scott.*

—To *give the glaiks*, to befool and then leave in the lurch; to jilt one.—2. A transient gleam or glance.

I could see by a *glait* of light from a neighbour's window, that there was a man with a cocked hat at the door. *Galt.*

Glaikit, **Glaiket** (glä'kit), *a.* Unsteady; light; giddy; frolicsome; foolish; silly. 'The lassie is *gläikit* w' pride.' *J. Baillie.* [Scotch.]

Hear me, ye venerable core,

As counsel for poor mortals,
That frequent pass dounce Wisdom's door,
For *gläikit* Folly's portals. *Burns.*

Glaikitness (glä'kit-nes), *n.* State of being glaikit; vain or silly folly; levity. [Scotch.]

Bid her have done w' her *glaitiness* for a wee. *F. G. Lockhart.*

Glaire (glär), *n.* [Fr. *glaise*, from *L. glare*, fem. of *clarus*, clear, the glair of an egg being the *clara pars*, or clear portion; in *It. chiara*, Sp. and *Fr. clare*; or the word may be from a Teutonic root, and connected with *Sc. glare*, *glaur*, viscid mud, slime.] 1. The white of an egg used as varnish to preserve paintings, and as a size in gilding. 2. Any viscous transparent substance resembling the white of an egg.

Glaire (glär), *v.t.* To smear with glair or the white of an egg; to varnish.

Glaire (glär), *n.* A kind of halberd.

Glaireous (glär'ö-us), *a.* Resembling glair or the white of an egg; viscous and transparent.

Glaireine (glär'in), *n.* A kind of glairy substance which forms on the surface of some thermal waters.

Glaireous (glär'us), *a.* Same as *Glaireous*.

Glaury (glär'i), *a.* Like glair, or partaking of its qualities; covered with glair.

The first sign of it is a *glairy* discharge. *Wiseman.*

Glaive, **Glaive** (glä'v), *n.* [Fr. *glaive*, from *L. gladius*, a sword; allied to Gael. *claidheamh*, a sword, *claidheamhor*, a claymore; *W. glaif*, a bill-hook, a scimitar, a glaive.] 1. A sword; a broadsword; a falchion. [Obsolete or poetical.]

With that he threw her rudely on the flore,
And, laying both his hands upon his glaive,
With dreadfull strokes let drive at him so sore,
That forst him flie abacke, himselfe to save. *Spenser.*

Two hundred Greeks came next in sight well-try'd,
Not surely arm'd in steel or iron strong;
But each a *glave* had pendant by his side. *Faustfax.*

2. A cutting weapon, used by foot soldiers, fixed to the end of a pole, and differing from the bill in having its edge on the outside curve.

When zeal with aged clubs and *glaves*
Gave chase to rochets and white staves. *Hudibras.*

ch, chain; ch, Sc. loch; g, go; j, job;

n, Fr. ton; ng, sing; th, then; th, thin;

w, wig; wh, whig; zh, azure.—See **KEY**.

[Mrs. Barrett Browning in the following passage erroneously uses the word as meaning a glove:—

But Earl Walter's *glazie* was steel,
With a brave old hand to wear it;
And dashed the lie back in the mouth
Which set against the goodly truth
And against the knightly merit
The Romaine of the Page.]

Glazie (glā'zī), *a.* Glossy; sleek and shining, as the hide of a young animal in good condition. [Scotch.]

Glamor (glā'mēr), *n.* A rare spelling of *Glamour*.

Glamour (glā'mēr), *n.* [Icel. *glám-sghni*, glamour, illusion; comp. *glámr*, the name of a famous ghost in Icelandic story.] 1. The supposed influence of a charm on the eye, causing it to see objects differently from what they really are.

It had much of *glamour* might
To make a lady seem a knight. *Sir W. Scott.*
As soon as they saw her well-far'd face
They coast the *glamor* of her. *Old ballad of Johnny Faa.*

2. Witchcraft.

And called her like that maiden in the tale
Whom Wyndham made by *glamour* out of flowers. *Tennyson.*

3. A haze which does not obscure objects, but which causes them to be seen in an aspect different from what they usually appear.

The air filled with a strange, pale *glamour* that
Seemed to lie over the broad valley. *W. Black.*

Glamoury (glā'mēr-ī), *n.* Glamour. *Lord Lytton.*

Glance (glāns), *n.* [The same word as *D. glans*, *G. glans*, lustre, splendour; modern Icel. *glans*, brilliance. Comp. *E. dial. glēn*, *Sc. glint*, to gleam. Comp. also *fr. glaine*, brightness, *glainne*, glass. *Glitter*, *glisten*, *glain*, &c., are probably more or less closely connected with this word.] 1. A sudden shoot of light or splendour. 'Swift as the lightning's *glance*.' *Milton*.—2. A sudden look or darting of sight; a rapid or momentary view or casting of the eye; a sudden and brief turning of the attention towards something; as, a sudden *glance*; a *glance* of the eye.

How fleet is a *glance* of the mind!
Compared with the speed of its flight,
The tempest itself lags behind,
And the swift-winged arrows of light. *Cowper.*

3. A hint; a reflection; an oblique or transient stricture.—4. A name given to some minerals which possess a metallic or pseudo-metallic lustre; as, copper-*glance*, lead-*glance*, anthony-*glance*, *glance*-coal, &c.

Glance (glāns), *v.t. pret. & pp. glanced*; *ppr. glancing*. 1. To shoot or dart a ray or rays of light or splendour; to emit flashes or coruscations of light; to flash.

When through the gloom the *glancing* lightnings fly. *Rome.*

2. To fly off in an oblique direction; to dart aside.

The damned arrow *glanced* aside. *Tennyson.*

3. To look with a sudden rapid cast of the eye; to snatch a momentary or hasty view.

Then sit again, and sigh and *glance*. *Suckling.*

4. To make an incidental or passing reflection or allusion; to censure by hints; often with *at*.

He had written verse, wherein he *glanced* at a certain reverend doctor, famous for his dulness. *Swift.*

5. To appear and disappear rapidly, like a gleam of light; to be visible for an instant.

And all along the forum and up the sacred seat,
His vulture eye pursued the trip of these small *glancing* feet. *Macaulay.*

Glance (glāns), *v.t.* To shoot or dart suddenly or obliquely; to cast for a moment; as, to *glance* the eye. 'Glancing an eye of pity on his losses.' *Shak.*

Glance-coal (glāns'kōl), *n.* [E. *glance*, from its shining lustre, and *coal*.] Anthracite (which see).

Glancingly (glāns'ing-lī), *adv.* In a glancing manner; by glancing; in an oblique manner; incidentally.

Sir Richard Hawkins hath done something in this kind, but brokenly and *glancingly*, intending chiefly a discourse on his own voyage. *Hakewill.*

Gland (glānd), *n.* [L. *glans*, *glāndis*, an acorn.] 1. In anat. a distinct soft body, formed by the convolution of a great number of vessels, either constituting a part of the lymphatic system, or destined to secrete

some fluid from the blood. Glands have been divided into *conglobate* and *conglomerate*, from their structure; but a more proper division is into *lymphatic* and *secretory*. The former are found in the course of the lymphatic vessels, and are conglobate. The latter are of various structure. They include the mucous follicles, the conglomerate glands properly so called, such as the parotid glands and the pancreas, the liver, kidneys, &c. The functional classification of these is into assimilating or absorbent glands, as those of the lymphatics and lacteals, and the secreting, as the pancreas, &c.; the liver combines both functions. The term has also been applied to other bodies of a similar appearance, neither lymphatic nor secretory, the ductless or vascular glands, such as the spleen, thymus, and thyroid glands, whose use is not certainly known, certain portions of the brain, as the pineal and pituitary glands, &c. See CONGLOBATE and CONGLOMERATE.—2. In bot. (a) a wartlike swelling found on the surface of plants, or at one end of their hairs. Glands are very various in form. Thus, there are *miliary glands*, which are small and superficial, appearing under the form of small round grains disposed in regular series, or scattered without order on all parts of the plant exposed to the air; *vesicular glands*, small reservoirs full of essential oil, and lodged in the herbaceous integument of vegetables, as in the leaves of the myrtle and orange; *globular glands*, which are of a spherical form, adhering to the epidermis only by a point; they are observed particularly in the Labiate; *utricular glands* or *ampullae*, which are filled with a colourless fluid, as in the ice-plant; *papillary glands*, something like the papillae of the tongue; they occur in many of the Labiate; *lenticular glands*, which are of a round depressed form, and appear peeping through the cuticle of the stem of the common willow and other similar plants. Some of these are borne upon stalks, others sessile, or attached to the plant without any appendage. Lenticular glands do not appear to have any function connected with secretion, but seem rather to be the rudiments of roots which never develop themselves. (b) A one-celled, compound inferior fruit, with a dry pericarp, as in the oak.—3. In mach. a contrivance, consisting of a cross-piece or clutch, for engaging or disengaging machinery moved by belts or bands.—4. *Insteam-engines*, the cover of a stuffing-box: called also a *Follower*.

Glandage (glānd'āj), *n.* A feeding upon acorns. *Craig; Worcester.*

Glander (glān'dēr) *v.t.* To affect with glanders.

Glandered (glān'dēr'd) *v. p. and a.* Affected with glanders.

Being drunk in plenty, it (tar water) hath recovered even a *glandered* horse that was thought incurable. *Berkeley.*

Glanders (glān'dēr'z), *n.* [From *gland*.] 1. In farriery, a very dangerous and highly contagious disease of the mucous membrane of the nostrils of horses, attended with an increased and vitiated secretion and discharge of mucus, and enlargement and induration of the glands of the lower jaw.—2. In med. a dangerous contagious disease in the human subject, accompanied by a pustular eruption, communicated by inoculation from glandered animals.

Glandiferous (glānd-if'ēr-us), *a.* [L. *glāndifer*—*glans*, *glāndis*, an acorn, and *fero*, to bear.] Bearing acorns or other nuts; producing nuts or mast; as, the beech and the oak are *glandiferous* trees.

Glandiform (glānd'ī-form), *a.* [L. *glans*, *glāndis*, an acorn, and *forma*, form.] In the shape of a gland or nut; resembling a gland.

Glandular (glānd'ū-lēr), *a.* Containing or supporting glands; consisting of glands; pertaining to glands.—*Glandular hairs*, in bot. hairs bearing glands on their tips, or fixed upon minute glands in the cuticle, as in the nettle.—*Glandular woody fibre*, in bot. a peculiar form of woody fibre found in the stems of resinous woods, especially the pine and fir tribe, consisting of a peculiar set of dots seen along the course of the tubes, and situated between them.

Glandularly (glānd'ū-lēr-lī), *adv.* In a glandular manner.

Glandulation (glānd'ū-lā'shon), *n.* In bot. the situation and structure of the secretory vessels in plants.

Glandulation respects the secretory vessels, which are either glandules, follicles, or utricles. *Lee.*

Glandule (glānd'ūl), *n.* [L. *glandula*, a little acorn.] A small gland or secreting vessel.

Glanduliferous (glānd'ū-lif'ēr-us), *a.* [L. *glandula*, a little acorn, and *fero*, to bear.] Bearing glandules.

Glandulose (glānd'ū-lōs), *a.* Same as *Glandulous*.

Glandulosity (glānd'ū-lōs'ī-tī), *n.* 1. The state or quality of being glandulous.—2. A collection of glands. [Rare.]

In the upper part of worms are found certain white and oval *glandulosity*. *Sir T. Brovne.*

Glandulous (glānd'ū-lūs), *a.* [L. *glandulosus*, from *glandula*, dim. of *glans*, *glāndis*, an acorn.] Containing glands; consisting of glands; pertaining to glands; resembling glands.

Glans (glānz), *n.* [L. See GLAND.] 1. In anat. the vascular body which forms the apex of the penis, and the extremity of the clitoris.—2. In bot. the acorn or mast of the oak, or a similar fruit.—3. In med. (a) a strumous swelling or enlargement of the thyroid gland; bronchocele. (b) A pessary; a suppository.

Glare (glār), *n.* [Allied to A. Sax. *glære*, amber, anything transparent; Dan. *glar*, Icel. *glar*, glass; L. G. *glaren*, to glow like burning coals; and probably to E. *glass*, *glance*, &c.] 1. A bright dazzling light; clear, brilliant lustre or splendour that dazzles the eyes; a confusing and bewildering light.

The frame of burnished steel that cast a *glare*. *Dryden.*
Maidens, like moths, are ever caught by *glare*.
And Mammon wins his way where scraps might
despair. *Byron.*

2. A fierce, piercing look.

About them round,
A lion now he stalks with fiery *glare*. *Milton.*

3. A viscous transparent substance. See GLAIR.

Glare (glār), *v.i. pret. & pp. glared*; *ppr. glaring*. 1. To shine with a clear, bright, dazzling light; as, *glaring* light.

The cavern *glared* with new admitted light. *Dryden.*

2. To look with fierce, piercing eyes.

They *glared* like angry lions. *Dryden.*

3. To shine with excessive lustre or brilliancy; to have a dazzling effect; to be excessively bright or brilliant; to be ostentatiously splendid; as, a *glaring* dress; *glaring* colours.

'Twas summer, and the sun had mounted high;
Southward the landscape indistinctly *glared*
Through a pale stream. *Wordsworth.*

She *glared* in balls, front boxes, and the ring. *Pope.*

Glare (glār), *v.t.* To shoot out or emit, as a dazzling light.

One spirit in them rul'd, and every eye
Glared lightning, and shot forth pernicious fire
Among the accurs'd. *Milton.*

Glareoline (glār'ō-lī'nē), *n. pl.* The pratineoles, a sub-family of birds of the order Grallae and family Charadriidae. See PRATINCOLE.

Glareous (glār'ō-s), *a.* In bot. growing in gravelly places.

Glareous (glār'ō-us), *a.* Same as *Glareous* (which see).

Glareness, **Glaringness** (glār'ī-nēs, glār'ing-nēs), *n.* The state or quality of having a glaring appearance; a dazzling lustre or brilliancy.

Glaring (glār'ing), *p. and a.* 1. Emitting a clear and brilliant light; shining with dazzling lustre.—2. Clear; notorious; open and bold; barefaced; as, a *glaring* crime.

Glaringly (glār'ing-lī), *adv.* Openly; clearly; notoriously.

I know not whether the brick-dust men in their martial liveries, and the tallow-chandlers in their clay-coloured frocks, are not too *glaringly* offensive for a royal eye to bear. *The Student.*

Glary (glār'ī), *a.* Of a brilliant dazzling lustre. 'Bright crystal glass is *glary*.' *Boyle.*

Glas (glas), *a.* A Celtic word, signifying a stream, occurring in several place-names; as, Douglas, Glas, Glasford, Strathglass.

Glass, *v.i.* To glaze. *Chaucer.*

Glass, *v.t.* To glaze. *Chaucer.*

Glasinge, *v. n.* Glass-work. *Chaucer.*

Glass (glas), *n.* [A. Sax. *glass*; L. G. D. G. Sw. and Icel. *glas*; Icel. also *glær*; O. G. Glas (glass or amber). Akin *glæsten*, *glance*, *glare*, &c.] 1. A hard, brittle, transparent artificial substance, formed by the fusion of silicious matter, such as powdered flint or fine sand, together with some alkali, alkaline earth, salt, or metallic oxide. The nature of the glass depends upon the quality and proportion of the ingredients of which

Fāte, fār, fat, fāli; mē, met, hēr; pine, pin; nōte, not, mōve; tūbe, tub, bll;

oil, pound; ū, Sc. abume; y, Sc. fey.

it is formed; and thus an infinite variety of different kinds of glass may be manufactured; but in commerce five kinds only are recognized, viz.:—(a) Bottle, or coarse green glass. (b) Broad, or coarse window glass. (c) Crown-glass, or the best window glass. (d) Plate-glass, or glass of pure soda. (e) Flint-glass, or glass of lead. The principal ingredients used for the production of each of these kinds of glass are silica, or flint, and an alkali. The differences in the various kinds result from the description of alkali employed, and from the addition of certain necessary materials, usually metallic oxides. The great utility of glass is well known. Its physical properties are of the highest importance. Although exceedingly brittle when cold, yet by the application of a high degree of heat it may be rendered so flexible and tenacious that it may with the utmost facility be moulded into any form. It is so ductile when heated that it may be spun into filaments of the greatest conceivable fineness, and these when cold are pliant and elastic in a high degree.—*Soluble glass*, a silicate of potash or soda in which the alkali predominates.—*Tempered or toughened glass*, glass hardened by being immersed in a hot bath of molten wax, resin, oil, or other liquid whose boiling-point is higher than that of water. M. de la Bastie, the discoverer of the process, has succeeded in tempering glass of a few millimetres in thickness to such a degree that it can be thrown to the ground without injury.—2. In chem. a substance or mixture, earthy, saline, or metallic, brought by fusion to the state of a hard, brittle, transparent mass, whose fracture is conchoidal.—3. Anything made of glass; especially, (a) a mirror; a looking-glass.

The glass of fashion and the mould of form. *Shak.*
(b) A glass vessel filled with running sand for measuring time; as, an hour-glass; hence, the time in which a glass is exhausted of its sand; specifically (*naut.*), the time in which a half-hour glass is emptied of its sand. 'Their glasses all were run.' *Chapman.*

She would not live
The running of one glass. *Shak.*

(c) A drinking vessel made of glass; hence, the quantity which such a vessel holds, and metaphorically strong drink; as, fond of his glass. 'Like a glass did break 't the rinsing.' *Shak.*

When a man thinks one glass more will not make him drunk, that one glass hath disabled him from well discerning his present condition. *Fer. Taylor.*

(d) An optical instrument composed partly of glass; a lens; a telescope; in the plural, spectacles. (e) An instrument for indicating atmospheric or other changes, in the composition of which glass is used; a barometer or thermometer.—*Glass of antimony*, a vitreous oxide of antimony mixed with sulphide.—*Glass of borax*, a vitreous transparent substance obtained by exposing to heat the crystals of borate of sodium.

Glass (glas), *a.* Made of glass; vitreous; as, a glass bottle.

Glass (glas), *v.t.* 1. To see as in a glass. Then take a shield I have of diamonds bright, And hold the same before the warrior's face, That he may glass therein his garments light. *Fairfax.*

2. To reflect. 'A clear lake glassing soft skies.' *Lord Lytton.*—3. To case in glass. *Shak.* [Rare.]—4. To cover with glass; to glaze. 'Glossed over by a vitrifying heat.' *Boyle.*—To glass one's self, to appear as in a mirror; to be reflected. 'When the Almighty's form glasses itself in tempests.' *Byron.*

Glass-blower (glas'blō-ēr), *n.* One whose business it is to blow and fashion glass.

Glass-blowing (glas'blō-ing), *n.* A mode of manufacturing glassware and window-glass by taking a mass of viscid glass from the melting-pot on the end of the blowing tube and then inflating the mass by blowing through the tube, repeatedly heating if necessary at the furnace, and subjecting it to various manipulations. Moulds are often used in the making of articles by blowing. The term glass-blowing also includes the production of toys and other articles under the blow-pipe.

Glass-case (glas'kās), *n.* A case or covering of glass, or largely consisting of glass.

Glasschord (glas'kord), *n.* The name given by Franklin to a musical instrument, with keys like a pianoforte, but with bars of glass instead of strings of wire, invented in Paris in 1785 by a German named Beyer.

Glass-coach (glas'kōch), *n.* A coach, superior to a hackney-coach, hired for the day, or any short period, as a private carriage; so called because originally only private carriages had glass windows.

Glass-crab (glas'krab), *n.* A popular name for what is now known to be one of the phases of development of the podophthal-matous crustaceans, but which was formerly regarded as belonging to a distinct family, Phyllosomata (which see). The name *glass-crab* is given on account of the transparency of the body.

Glass-cutter (glas'kut-ēr), *n.* One whose occupation it is to cut glass, or to grind it into various ornamental forms; that which cuts glass.

Glass-cutting (glas'kut-ing), *n.* The act or process of cutting, shaping, and modifying the surface of glass by applying the material to be cut, first to a cast-iron wheel supplied with sand and water, then to a stone wheel, and lastly to a wooden wheel for the polishing with pumice, rotten-stone, and putty powder.

Glassen (glas'en), *a.* Made of glass; glazed. [Rare.]

He that no more for age, cramps, palsies, can
Now use the bones, we see doth hire a man
To take the box up for him; and pursues
The dice with *glassen* eyes to the glad views
Of what he throws. *B. Jonson.*

Glass-eye (glas'ī), *n.* The common name in Jamaica for a species of thrush (*Turdus jamaicensis*), so called from the bluish white, pellucid, glass-like iris of the bird. A pulpy berry on which it feeds is called *glass-eye berry*.

Glass-faced (glas'fāst), *a.* Having a face of glass, or like a glass or mirror.—A *glass-faced flatterer*, one who gives back in his looks the looks of his patron. *Shak.*

Glassful (glas'fūl), *n.* As much as a glass holds.

Glassful (glas'fūl), *a.* Glassy; shining like glass. 'Minerva's glassful shield.' *Marston.*

Glass-furnace (glas'fēr-nās), *n.* A furnace in which the materials of glass are melted.

Glass-gall (glas'gāl), *n.* Sanddive (which see).

Glass-gazing (glas'gāz-ing), *a.* Addicted to viewing one's self in a glass or mirror; finical.

A whoreson, *glass-gazing*, super-serviceable, finical rogue. *Shak.*

Glass-grinder (glas'grind-ēr), *n.* One whose occupation is to grind and polish glass.

Glass-grinding (glas'grind-ing), *n.* Same as *Glass-cutting* (which see).

Glass-hive (glas'hiv), *n.* A bee-hive made of or covered with glass. *Dryden.*

Glasshouse (glas'hous), *n.* 1. A house where glass is made; a manufactory of glass.—2. A house built of glass, as a conservatory or greenhouse.

Glassily (glas'ī-lī), *adv.* So as to resemble glass.

Glassiness (glas'ī-nēs), *n.* The quality of being glassy or smooth; a vitreous appearance.

Glassite (glas'it), *n.* One of a religious sect founded in Scotland in the early part of the eighteenth century by John Glass, a minister of the Established Church of Tending, near Dumdee, who was deposed in 1728 for the opinions which he delivered in regard to ecclesiastical polity, resembling very nearly those of the Independents. The most distinguishing doctrine held by the Glassites is with respect to justifying faith, which is declared to be 'no more than a simple assent to the divine testimony passively received by the understanding.' In England and America, to which this sect spread itself, the adherents called themselves *Sandemanians*, after Robert Sandeman, a native of Perth, and son-in-law of Mr. Glass.

Glassman (glas'man), *n.* One who sells glass.

Glass-metal (glas'me-tal), *n.* Glass in fusion. *Bacon.*

Glass-mosaic (glas-mō-zā'ik), *n.* A modern Italian work in imitation of the antique, formed of small squares of coloured glass, frequently representing a painting so perfectly as to deceive the eye, used for brooches, lids of snuff-boxes, and the like.

Glass-mounter (glas'mount-ēr), *n.* One who embellishes glass articles with ornaments.

Glass-painter (glas'pānt-ēr), *n.* One who produces designs in colour on or in glass.

Glass-painting (glas'pānt-ing), *n.* The art or practice of producing designs in colour

on or in glass. In glass-painting (or glass-staining, as it is also called), two methods, or a combination of the two, are chiefly employed. The *enamel* method consists in painting on the glass in colours, which are then burned into it; the *mosaic* method consists in forming a design of separate pieces of stained or coloured glass, the colour being imparted to the glass in the making; the *mosaic-enamel* method, the most common, consists of a combination of these two.

Glass-paper (glas'pā-pēr), *n.* A polishing paper made by strewing finely-pounded glass on a sheet of paper or cloth, which has been besmeared with a coat of thin glue—much used for polishing metal and wood-work.

Glass-pot (glas'pōt), *n.* A vessel used for melting glass in manufactories.

Glass-shade (glas'shād), *n.* A cover or case of glass, as for flowers, gas-jets, &c.

Glass-snake (glas'snāk), *n.* The North American name for snakes of the genus *Ophirosaurus*, from their brittleness. See *OPHIOSAURUS*.

Glass-soap (glas'sōp), *n.* A name given by glass-blowers to the black oxide of manganese.

Glass-stainer (glas'stān-ēr), *n.* One who stains glass; a glass-painter.

Glass-staining (glas'stān-ing), *n.* The art or practice of staining glass; glass-painting (which see).

Glass-stopper (glas'stop-ēr), *n.* A stopple of glass for bottles.

Glass-tears (glas'tērz), *n. pl.* Same as *Rupert's Drops*.

Glassware (glas'wār), *n.* Articles or utensils made of glass.

Glasswork (glas'wērk), *n.* 1. Manufacture of or in glass.—2. The place or buildings where glass is made: in this sense often used in the plural.

Glass-worm (glas'wērm), *n.* A glow-worm.

Glasswort (glas'wērt), *n.* A name given to the plants of the genus *Salicornia*, a genus of succulent marine herbs with jointed stems, of the nat. order Chenopodiaceae. The various species of this genus, as well as of others belonging to the same order, grow abundantly on the coasts in the south of Europe and north of Africa, and yield by burning a vast quantity of ashes containing soda, formerly much employed in making both soap and glass; whence their English name *glasswort*. Two or three species are natives of Britain.

Glassy (glas'ī), *a.* 1. Made of glass; vitreous; as, a glassy substance.—2. Resembling glass in its properties, as in smoothness, brittleness, or transparency.

There is a willow grows aslant a brook,
That shows the hoar leaves in the glassy stream. *Shak.*

Death stood all fixed in his glassy eye;
His hands were withered and his veins were dry. *Byron.*

Glastonbury-thorn (glas'ton-bēr'thorn), *n.* A variety of hawthorn which puts forth leaves and flowers about Christmas-tide. This variety is said to have originated at Glastonbury Abbey, and the original thorn was believed to have been the staff with which Joseph of Arimathea aided his steps on his wandering from the Holy Land to Glastonbury, where he is said to have founded the celebrated abbey.

Glauberite (glā'bēr-it), *n.* [After *Glauber*. See *GLAUBER-SALT*.] A mineral of a grayish-white or yellowish colour, a compound of sulphate of soda and sulphate of lime, occurring in very flat oblique rhombic prisms. It is found chiefly in rock-salt.

Glauber-salt (glā'bēr-salt), *n.* [After *Glauber*, a German chemist, who died in 1668, by whom it was originally prepared.] Sulphate of soda, a well-known cathartic. It is a constituent of many mineral waters, and occurs in small quantity in the blood and other animal fluids. Combined with sulphate of lime it forms *glauberite*. It may be prepared by the direct action of sulphuric acid on carbonate of soda, and it is procured in large quantity as a residue in the process for forming hydrochloric acid and chlorine.

Glaucescence (glā-sēs-ens), *n.* The state of being glaucescent or of having somewhat a sea-green lustre. 'Destitute of glaucescence or bloom.' *Gardener's Assistant.*

Glaucous, **Glaucine** (glā-sēs-ent, glā'sin), *a.* [L. *glaucus*, Gr. *glaukos*, blue-gray or sea-green.] In bot. having a somewhat bluish-green or hoary appearance; having a slight sea-green lustre.

Glaucio (glā'siō), *a.* Of or pertaining to, or obtained from plants of the genus *Glaucium*; specifically, in *chem.* applied formerly to an acid obtained from *G. luteum*, now known to be *fumaric acid*.

Glaucium (glā'si-um), *n.* A genus of plants of the nat. order Papaveraceae, characterized by the long two-valved capsule and very short style; it is so named from the glaucous or sea-green hue of the stems and leaves. *G. luteum* (the yellow horned-puppy) is frequent on sandy sea-shores; it has large handsome yellow flowers, which are very fugacious. There are five or six known species, mostly natives of the Mediterranean region, though *G. luteum* occurs also in Eastern Asia. They abound in a copper-coloured acrid juice, said to be poisonous and to occasion madness.

Glaucolite (glā'kol-it), *n.* [*Gr. glaukos*, sea-green, and *lithos*, a stone.] In *mineral*, a greenish-blue variety of scapolite, composed chiefly of the silicates of alumina and lime.

Glaucoma (glā-kō'ma), *n.* [*Gr. glaukōmē*, opacity of the crystalline lens, from *glaukos*, light gray, blue-gray, sea-green.] In *med.* an almost incurable disease of the eye, being an opacity of the vitreous humour of the eye, characterized by a bluish-green tint seen from without. It somewhat resembles cataract, especially in the gradual obscuration of vision. Written also *Glaucosis*.

Glaucomatous (glā-kō'mat-us), *a.* Of or pertaining to, or having the nature of *glaucoma*.

It is no part of my secret meaning to set on the face of this cause any fairer *gloss* than the naked truth doth afford.

Gloss (glōs), *n.* [From L. *glossa*, an obsolete or foreign word that requires explanation (see extract below), Gr. *glossa*, the tongue, a language.] 1. Remark intended to illustrate some point of difficulty in an author, especially writing in a foreign tongue; interpretation; comment; explanation; an explanatory note on the margin or between the lines of a book.

All this without a *gloss* or comment,
He would unridle in a moment.

A *gloss*, *glossa*, properly meant a word from a foreign language, or an obsolete or poetical word, or whatever requires explanation. It was afterwards used for the interpretation itself. . . . In the 16th century it was extended from a single word to an entire expository sentence. The first *glosses* were interlinear; they were afterwards placed in the margin, and extended finally in some instances to a sort of running commentary on an entire book.

2. An interpretation artfully specious.

No written laws can be so plain, so pure,
But wit, and *gloss*, and malice may obscure.

Gloss (glōs), *v.t.* [The last two words have both had an influence on the meanings of this verb, and it is not easy to say what quota of meaning belongs to each.] 1. To give a superficial lustre to; to make smooth and shining; as, to *gloss* cloth by the calender; to *gloss* mahogany.

The same ill habits, the same follies too,
Gloss'd over only with a saintlike show.

2. To explain; to render clear and evident by comments; to illustrate.

In parchment then, large as his fields, he draws
Assurances, big as *gloss'd* civil laws.

3. To give a specious appearance to; to render specious and plausible; to palliate by specious representation.

You have the art to *gloss* the foulest cause.

Gloss (glōs), *v.i.* 1. To comment; to write or make explanatory remarks.

No man can *gloss* upon this text after that manner.

2. To make sly remarks or insinuations.

Her equals first observed her growing zeal,
And, laughing, *glossed* that Abra served so well.

[In this example the verb is really transitive, with a clause for its object.]

Gluttons in murder, wanton to destroy. *Granville.*

3. In zool. the *Gulo arcticus*, a carnivorous quadruped, about the size of a large badger, and intermediate between the bear family (Ursidae) and the weasels (Mustelidae), resembling the former family in general structure and the latter in dentition. It inhabits Northern Europe and America, and is known also by the name of *Wolverene* or *Wolverine*. The *glutton* is slow and deficient in agility, but persevering, cunning, fierce, and of great strength. It prefers putrid flesh, and has an extremely fetid odour. The fur is valuable, that from Siberia being preferred from its being of a glossy black. It receives its name from its voracity, which, however, has been greatly exaggerated.

Glutton† (glüt'n), *a.* Of or belonging to a glutton; gluttonous. 'Glutton souls.' *Dryden.*

A *glutton* monastery in former ages makes a hungry ministry in our days. *Fuller.*

Glutton† (glüt'n), *v.t.* To eat to excess; to gormandize; to indulge the appetite to excess.

Whereon in Egypt *glutting* they fed. *Drayton.*

Glutton† (glüt'n), *v.t.* To overfill, as with food; to glut.

Then after all your fooling, fat, and wine, *Glutton'd* at last, return, at home to pine. *Loveless.*

Gluttonish (glüt'n-ish), *a.* Gluttonous. *Sir P. Sidney.* [Rare.]

Gluttonize (glüt'n-iz), *v.t.* To eat to excess; to eat voraciously; to indulge the appetite to excess; to be luxurious. *Hallynell.* [Rare.]

Gluttonous (glüt'n-us), *a.* 1. Given to excessive eating; indulging the appetite for food to excess; insatiable. 'This *gluttonous* age.' *Raleigh.*

When they would smile and fawn upon his debts, And take down th' interest in their *glut'nous* maws. *Shak.*

2. Characterized by or consisting in excessive eating.

Well observe The rule of not too much, by temperance taught In what thou eat'st and drink'st, seeking from thence Due nourishment, not *gluttonous* delight. *Milton.*

Gluttonously (glüt'n-us-li), *adv.* In a gluttonous manner; with the voracity of a glutton; with excessive eating.

Gluttony (glüt'n-i), *n.* The act or practice of a glutton; excess in eating, or eating and drinking; extravagant indulgence of the appetite for food; voracity; luxury of the table.

Gluttony, a vice in a great fortune, a curse in a small. *Holyday.*

Their sumptuous *gluttonies* and gorgeous feasts. *Milton.*

Gluy (glü'y), *a.* Same as *Gluey*.

Glyceria (gli-së'ri-a), *n.* [*Gr. glykeros*, *glykys*, sweet.] A genus of grasses, chiefly distinguished from Poa by having the flowers in more linear subcylindrical spikelets. There are about forty species, two or three of which are found in Britain, as *G. aquatica*, which is one of the most beautiful as well as one of the largest of our grasses, and is eaten by cattle; and *G. fluitans*, the seeds of which are collected and used as an article of food under the name of *mannacroup*, furnishing a light nutritious aliment for invalids.

Glyceride (gli-së'rid), *n.* In chem. a compound ether of the triatomic alcohol glycerine. Some of the glycerides exist ready formed, as natural fats, in the bodies of plants and animals, and many more may be produced artificially by the action of acid upon glycerine.

Glycerine, **Glycerin** (gli-së'rin), *n.* [From *Gr. glykeros*, sweet.] ($C_3H_5O_3$) A transparent colourless liquid with a sweet taste, obtained from natural fats by saponification with alkalis or by the action of superheated steam.

Glycerizine (gli-së'ri-zin), *n.* Same as *Glycerizin*.

Glycerule (gli-së'röl), *n.* (C_3H_5) The hypothetical triatomic radical of glycerine and the glycerides.

Glyceryl (gli-së'ril), *n.* (C_3H_5) The radicle of glycerine.

Glyccoll, **Glyccocine** (gli'ko-kol, gli'ko-sin), *n.* [*Gr. glykys*, sweet, and *kolla*, glue.] Another name for gelatine sugar. See **GELATINE**.

Glycogen (gli'ko-jen), *n.* [*Gr. glykys*, sweet, and *gennao*, to produce.] In organic chem. and physiol. a proximate non-nitrogenous principle occurring in the epithelial cells of the liver, where it exists as an amorphous matter. In properties it seems to be intermediate between starch and dextrine, and is a respiratory or heat-forming food. In

Fäte, fär, fat, fall; më, met, hér; pine, pin; nôte, not, möve; tübe, tub, byll;

oil, pound; ü, Sc. abume; ý, Sc. fey.

contact with saliva, pancreatic juice, diastase, or with the blood or parenchyma of the liver, it is converted into glucose.

Glycogenic (gli-ko-jen'ik), *a.* Of or pertaining to glycogen; as, the *glycogenic* functions of the liver.

Glycol (gli'kol), *n.* [Compounded of the first syllable of glycerine and the last of alcohol.] ($C_2H_4O_2$) The type of a class of artificial compounds intermediate in their properties and chemical relations between alcohol and glycerine, or the bodies of which these are the types. Otherwise expressed, glycol is a diatomic acid, alcohol being a monatomic and glycerine a triatomic. It is liquid, inodorous, of a sweetish taste, and insoluble in water and alcohol.

Glyconian, Glyconic (gli-ko-ni'an, gli-ko-n'ik), *a.* [L.L. *glyconius*, *glyconicus*, from Gr. *glykônaios*, from its inventor *Glykôn*.] A term applied to a kind of verse in Greek and Latin poetry, consisting of three feet—a spondee, a choriamb, and a pyrrhic.

Glycyrrhiza (gli-si-r'iza), *n.* [Gr. *glykys*, sweet, and *rhiza*, root.] A genus of leguminous plants, consisting of perennial herbaceous plants with pinnate leaves, and small white, yellow, or blue flowers in axillary spikes or racemes. *G. glabra* is the plant from which liquorice is derived; it is found over a large extent of the warmer regions of Europe, extending into Central Asia, and is cultivated in this country at Mitcham in Surrey and in Yorkshire. Liquorice root is chiefly imported from Germany, Russia, and Spain; stick liquorice, the black inspissated extract of the roots, comes chiefly from Calabria.

Glycyrrhizin (gli-si-r'izin), *n.* ($C_{42}H_{64}O_{16}$) A peculiar saccharine matter obtained from the root of *Glycyrrhiza glabra*.

Glyn, Glynn (glin), *n.* The Celtic form of *Glen*, and a pretty common element in place-names; as, *Glyn, Glyn-corrwg, Glyn-taf*, in Wales; *Glynn* in Antrim, Ireland. Written also *Glin, Glinne, Ghlinne*.

Did shut them (the Irish) up within those narrow corners and *glinnes* under the mountainous fote, in which they lurked. *Spenser*.

Eoghain a *Ghlíne* (Even of the Glen) sits and wonders in sad silence. *Glasgow Herald*.

Glyph (glif), *n.* [Gr. *glyphô*, from *glyphô*, to carve.] In *sculp.* and *arch.* a channel or cavity, usually vertical, intended as an ornament.

Glyphæa (gli-fé'a), *n.* [Gr. *glyphê*, sculpture.] The name given to a genus of small fossil crustaceans, somewhat resembling lobsters, from the sculptured ornamentation of their carapaces. They occur in the oolite.

Glyphic (gli'fik), *n.* A picture or figure by which a word is implied; a hieroglyphic.

Glyphic (gli'fik), *a.* Of or pertaining to a glyph or glyphs; pertaining to carving or sculpture.

Glyphideæ (gli-f'idē-ē), *n. pl.* [Gr. *glyphis*, *glyphidos*, the notch of an arrow which fits into the string.] A family of gymnocarpous lichens, containing one British genus, *Chiodecton*.

Glyphograph (gli'fo-graf), *v.t.* [Gr. *glyphê*, an engraving, and *graphô*, to describe.] To form plates by the process of glyptography.

Glyptograph (gli'fo-graf), *n.* A plate formed by glyptography, or an impression taken from the plate.

Glyptographer (gli'fo-gra-fēr), *n.* One versed in, or one who practises glyptography.

Glyptographic (gli'fo-graf'ik), *a.* Of or pertaining to glyptography.

Glyptography (gli'fo-gra-fi), *n.* An electrotype process usually conducted as follows: a metal plate is covered with an etching-ground, and a design etched on the plate in the usual manner; the ground is then thickened by having several coats of ink, or a kind of varnish applied to it, and when the hollows are deep enough the plate is placed in connection with a voltaic battery, and copper deposited in the usual way, the result being a plate with the drawing in relief, from which an impression may be obtained after the manner of ordinary letterpress.

Glyptic (gli'fik), *a.* [Gr. *glyphô*, to engrave.] Pertaining to carving, sculpture, or the art of engraving on precious stones.

Glyptics (gli'fiks), *n.* The art of carving or engraving on precious stones.

Glyptocrinus (gli'fo-kri-nus), *n.* [Gr. *glyptos*, sculptured, and *krinos*, a lily.] A genus of fossil encrinurids, so called from their highly ornamented basal plates. They belong to the lower Silurian.

Glyptodipterine (gli'fo-dip'tér-in), *n.* A member of the family Glyptodipterini (which see).

Glyptodipterini (gli'fo-dip'tér-i'ni), *n. pl.* [Gr. *glyptos*, sculptured, and *dípteros*, having two wings—*di*, dis, two, and *pteron*, a wing.] A family of ganoid fossil fishes occurring in the Devonian series of rocks, characterized by two dorsal fins placed very far back, and two ventrals having a similar position. Of the species having rhomboidal scales the genus *Glyptolemus* may be regarded as the type, and *Holoptychius* of those with cycloid scales.

Glyptodon (gli'fo-ton), *n.* [Gr. *glyptos*, engraved, and *odous*, tooth—so named from its fluted teeth.] A gigantic fossil edentate animal, closely allied to the armadillos, found in the upper tertiary strata of South America. It is of the size of an ox, and

Glyptodon (*Glyptodon clavipes*).

covered with a coat of mail formed of polygonal osseous plates united by sutures.

Glyptograph (gli'fo-graf), *n.* [Gr. *glyptos*, engraved, and *graphô*, to describe.] An engraving on a gem or precious stone.

Glyptographer (gli'fo-gra-fēr), *n.* An engraver on precious stones.

Glyptographic (gli'fo-graf'ik), *a.* Of or pertaining to glyptography; describing the methods of engraving on precious stones.

A particularly valuable part of this introduction is the *glyptographic* lithology. *British Critic*.

Glyptography (gli'fo-gra-fi), *n.* 1. The art or process of engraving on precious stones.

2. A description of the art of engraving on precious stones.

Glyptolemus (gli'fo-lé-mus), *n.* [Gr. *glyptos*, sculptured, and *leinos*, the throat.] A genus of fossil ganoid fishes of the Devonian series, characterized by an elongated body, depressed head, two dorsal and two ventral fins placed very far back, and by a tail divided into two equal lobes by the prolonged conical termination of the body. It is the type of the rhomboidal-scaled section of the Glyptodipterini.

Glyptotheca (gli'fo-thé'ka), *n.* [Gr. *glyptos*, engraved, and *thêkê*, a repository.] A building or room for the preservation of works of sculpture.

Glyptothek (gli'fo-thek), *n.* Same as *Glyptotheca*.

Glyster (gli'stér), *n.* Same as *Clyster*.

Gmelina (me-li'na), *n.* [Named after *Gmelin*, a distinguished naturalist of Tübingen.] An Asiatic genus of plants, belonging to the nat. order Verbenaceæ. All the species form shrubs or trees, of which the latter are valued for their timber.

Gmelinite (me'lin-it), *n.* Hydrolite or ledereite, a mineral of a white passing into a flesh-red colour. It occurs in secondary flat six-sided prisms, terminated at both extremities by truncated six-sided prisms. It is a hydrated silicate of alumina, lime, and soda.

Gnapalium (na-fa'lli-um), *n.* [L.; Gr. *gnaphalon*, soft down—in allusion to the soft downy or woolly covering of the leaves.] A very extensive genus of beautiful and curious plants, met with in every quarter of the globe, belonging to the nat. order Compositæ. Nine or ten species are found in Britain, and are known by the popular names of cudweed and everlasting.

Gnar, Gnarr (när), *n.* [See the verb GNARR.] A knot; specifically, a hard knot on a tree; hence, a tough, thickset cross-grained person.

He was short shouldered, brode,
A thikke *gnarre*. *Chaucer*.

Gnarl (när), *n.* A protuberance on the outside of a tree; a knot; a snag. 'Gnarls without and knots within.' *Lauder*.

Gnarled (närld), *a.* 1. Knotty; full of knots; marked with protuberances. 'The gnarled oak.' *Shak.*—2. Cross-grained; perverse.

Gnarly (närli), *a.* Having knots; knotty.

Till, by degrees, the tough and *gnarly* trunk
Be riv'd in sunder. *Old play (1602)*.

Gnarr, Gnarl (när, näl), *v.t.* [O.E. *gnerr*,

A. Sax. *gnýrran*, to gnash; found in similar forms in the other Teut. languages; E. *gnarr*, a knot in a tree, is probably the same word, a growling and murmuring disposition suggesting knottiness or crossness of grain.] To growl; to murmur; to snarl.

And wolves are *gnarr*ing which shall gnaw thee first.
Shak.

A thousand wants
Gnarr at the heels of men. *Tennyson*.

Gnarre, *n.* See GNAR.

Gnash (nash), *v.t.* [O.E. *gnaste*, *gnayste*, D. *knarsen*, G. *knirschen*, Dan. *knaske*, Sw. *knästra*, *gnissla*, to gnash.] To strike together (the teeth), as in anger or pain.

All thine enemies have opened their mouth against thee; they hiss and *gnash* the teeth. *Lam. ii. 16*.

Gnash (nash), *v.i.* To grind the teeth; to strike or dash the teeth together, as in rage, pain, despair, and the like.

He shall *gnash* with his teeth and melt away.
Ps. cxlii. 10.

There they him laid,
Gnashing for anguish, and despite, and shame.
Milton.

Gnashingly (nash'ing-li), *adv.* In a gnashing manner; with gnashing.

Gnat (nat), *n.* [A. Sax. *gnat*; L.G. *gnid*, a small kind of gnat; perhaps akin to G. *gnatze*, the itch.] A name applied to several insects of the genus *Culex*. The proboscis or sting of the female is a tube containing four spiculae of exquisite fineness, dentated or edged; these are the modified mandibles and maxillæ. The males are destitute of stings, and are further distinguished by their plume-like antennæ. The most troublesome of this genus is the mosquito. 'Strain at a *gnat*' (Mat. xxiii. 24), to be scrupulous about small matters. In this phrase the *at* is a typographical blunder of the first edition of our common version of the Bible for *out*. It is an allusion to the custom of the Jews, Greeks, and Romans of passing their wines (which in the southern countries might easily receive gnats) through a strainer. This was a matter of religion with the Jews, who considered the insect unclean.

Gnat-flower (nat'flou-ēr), *n.* Same as *Bee-flower*.

Gnathitis (gna-thi-tis), *n.* [Gr. *gnathos*, a jaw, and *-itis*, term. denoting inflammation.] In *pathol.* inflammation of the jaw or cheek.

Gnathodon (nath'o-don), *n.* [Gr. *gnathos*, jaw-bone, and *odous*, a tooth.] 1. A genus of molluscs, of which there is one well-known species, *G. cuneatus*, from New Orleans. The hinge has in one valve a cardinal tooth and two lateral ones, the anterior of which is shaped like a jaw-bone. 2. A genus of birds (the tooth-billed pigeons), allied to the pigeons, found in the South Sea Islands. It is also called *Didunculus*, from being in some particulars a miniature resemblance of the dodo.

Gnathonic, † **Gnathonical** (nath-on'ik, nath-on'ik-al), *a.* [L. *gnatho*, Gr. *gnathôn*, a fat cheek, a greedy fellow, hence used by Terence as the name of a parasite, from Gr. *gnathos*, the jaw.] Flattering; deceitful. 'To attend others bathing or anointing . . . is servile and *gnathonical*.' *Transl. of Plutarch*.

Gnathonically (nath-on'ik-al-li), *adv.* In a gnathonic manner; servilely; parasitically.

Gnathopodite (nath-o-pô-dit), *n. pl.* [Gr. *gnathos*, a jaw, a mouth, and *podos*, *podos*, a foot.] In *zool.* one of those limbs which, in crustaceans, have been modified into accessory organs of mastication.

If the Trilobites have true walking legs instead of mouth-feet (*gnathopodites*) only, they would be more closely related to the Isopoda. *Nature*.

Gnathostoma (nath-os'to-ma), *n.* [Gr. *gnathos*, a jaw, and *stoma*, a mouth.] A genus of nematoid entozoa, first discovered by Owen in the stomach of the tiger. The body is round, elastic, and attenuated at both extremities, and the largest is about 1 inch in length. The genus is also known as *Cheiracanthus*.

Gnathling (nat'ling), *n.* A little gnat.

But if some man more hardy than the rest,
Shall dare attack these *gnathlings* in their nest,
At once they rise with impotence of rage. *Churchill*.

Gnat-snapper (nat'snap-ēr), *n.* A bird that catches gnats for food.

Gnat-strainer (nat'strän-ēr), *n.* One who attaches too much importance to little things; in allusion to Mat. xxiii. 24.

Gnat-worm (nat'werm), *n.* A small water insect produced by a gnat, and which after

its several changes is transformed into a gnat; the larva of a gnat.

Gnaw (nā), v. t. [A. Sax. *gnagan*, D. *knagen*, *knawen*, G. *gnagen*, Dan. *gnave*, *nage*, Icel. and Sw. *gnaga*, *naga*, to gnaw.] 1. To bite off by little and little; to bite or scrape off with the foreteeth; to wear away by biting; to nibble at; as, rats *gnaw* a board or plank; a worm *gnaws* the wood of a tree or the plank of a ship.

His bones clean picked; his very bones they *gnaw*.
Dryden.

2. To bite in agony or rage.

They *gnawed* their tongues for pain. Rev. xvi. 9.
At this he turned all red and paced his hall,
Now *gnawed* his under, now his upper lip.
Mackie.

3. To eat into or wear away by, or as by, continued biting; to consume; to waste; to fret; to corrode.

O'er the wild waste the stupid ostrich strays,
Whose fierce digestion *gnaws* the tempered steel.
Mackie.

Gnaw (nā), v. i. 1. To use the teeth in biting; to bite with repeated effort, as in eating or removing with the teeth something hard, unyielding, or unmanageable.

Growing like a dog . . . when he fears
To lose his bone, and lays his foot upon it
Gnawing and growing. *Tennyson*.

2. To be affected with continuous, severe pain, as if being corroded; as, my tooth *gnaws*.

Gnawer (nā'ēr), n. 1. One who or that which gnaws or corrodes.—2. In zool. a rodent.

Gneiss (nis), n. [G. *gneiss*, *gneisz*.] In mineral, a species of rock, composed of quartz, felspar, and mica, arranged in layers. The layers, whether straight or curved, are frequently thick, but often vary considerably in the same specimen. It passes on one side into granite, from which it differs in its slaty structure, and on the other into mica slate. It is rich in metallic ores, but contains no fossil remains. Porphyritic gneiss presents large distinct crystals of felspar which traverse several of the foliated layers. Gneiss often contains hornblende in place of mica, and receives the name of syenitic gneiss. The only difference between this rock and granite consists in the foliation of gneiss, the materials of granite being crystallized promiscuously, those of gneiss being segregated in layers.

Gneissic (nis'tik), a. Same as *Gneissose*.

Gneissoid (nis'oid), a. [*Gneiss*, and Gr. *eidos*, resemblance.] Resembling gneiss, a term applied to rocks when their chemical ingredients are segregated more distinctly than in the ordinary schists, yet do not show the well-marked layers of gneiss; or when the crystalline character is more pronounced than in gneiss, the layers not yet being so entirely obliterated as in granite.

Gneissose (nis'os), a. Having the qualities of, resembling, or exhibiting the texture or structure of gneiss.

Gnetaceæ (ne-tā'sē-ē), n. pl. [See below.] A nat. order of gymnosogenous plants, popularly called joint-firs, and consisting of small trees or shrubs, with flowers arranged in catkins or heads. The seeds of some of them are eaten. There are two genera, *Ephedra* and *Gnetum*.

Gnetum (nē'tum), n. [From *gnemon*, its name in the Isle of Ternate.] A genus of East Indian plants, the joint-firs, nat. order Gnetaceæ. The seeds of *G. gnemon* are roasted and eaten.

Gnide, v. t. [A. Sax. *gnidan*, to rub, to break in pieces; Dan. *gnide*, Sw. *gnida*, to rub.] To break in pieces; to comminute; to rub; to burish.

There mayst thou see . . . *gniding* of sheldes.
Chaucer.

Gnoff, n. [Probably akin to *gnaw*.] A miser.

The catiff *gnoff* said to his crue,
My money is many, my incomes but few. *Chaucer*.

Gnome (nōm), n. [Fr., supposed to be from Gr. *gnōmōn* one that knows, a guardian, from root *gnō* (seen in E. *know*), to know.] 1. An imaginary being, supposed by the Cabalists to inhabit the inner parts of the earth, and to be the guardian of mines, quarries, &c.

Pope has made admirable use in this fine poem (*Rape of the Lock*) of the fabled race of *gnomes*.
Warburton.

2. A dwarf; a goblin; a person of small stature or misshapen features, or of strange appearance.

Gnome (nōm or nō'mē), n. [Gr. *gnōmē*, a maxim, from *gnōmāi*, to know.] A brief reflection or maxim; a saw; an aphorism.

Gnome (is) a saying pertaining to the manners and common practices of men, which dechreth, by an apte brevity, what in this our life ought to be done or not done.
Peacham.

Gnomic, **Gnomical** (nōm'ik, nōm'ik-al), a. [Gr. *gnōmikos*. See last art.] Sententious; containing or dealing in maxims; didactic; applied especially to a particular class of poetry written by Theognis and others among the ancient Greeks, and to the writers.

Gnomic, **Gnomical** (nōm'ik, nōm'ik-al), a. Catachrestic for *Gnomonical*. See *GNOMONIC*. 'An ordinary *gnomical* dial.' Bacon.

Gnomimetric (nō'mi-o-met'rik-al), a. [Gr. *gnōmōn*, an index, and *metrōs*, to measure.] A term applied to a telescope and microscope, instruments for measuring the angles of crystals by reflection, and for ascertaining the inclination of strata, and the apparent magnitude of angles when the eye is not placed at the vertex.

Gnomologic, **Gnomological** (nō-mo-loj'ik, nō-mo-loj'ik-al), a. Of or pertaining to gnomology.

Gnomology (nō-mo-loj-i), n. [Gr. *gnōmē*, a maxim or sentence, and *logos*, discourse.] A collection of or treatise on maxims, grave sentences, or reflections; the knowledge of or literature regarding such. [Rare.]

Which art of powerful reclaiming wisest men have also taught in their ethical precepts and *gnomologies*.
Milton.

Gnomon (nō'mon), n. [Gr. *gnōmōn*, an index, from the root *gnō*, to know.] 1. In dialling, the style or pin, which by its shadow shows the hour of the day. Sometimes poetically used for a pendulum.

And, outward from its depth, the self-moved sword
Swings slow its awful *gnomon* of red fire
From side to side. *E. B. Browning*.

2. In astron. a style erected perpendicularly to the horizon, in order to find the altitudes, declinations, &c., of the sun and stars. The *gnomon* is usually a pillar or column or pyramid erected upon level ground or a pavement. It was much used by the ancient astronomers, and *gnomons* of great height, with meridian lines attached to them, are still common in France and Italy.—3. The index of the hour-circle of a globe.—4. In geom. the two complements of a parallelogram, together with either of the parallelograms about the diameter. Thus in the parallelogram ABCD, the two complements, AE and EC, together with the parallelogram EG, are called the *gnomon* AGF or CEH.

Gnomonic, **Gnomonical** (nō-mōn'ik, nō-mōn'ik-al), a. 1. Pertaining to the art of dialling.—2. In bot. bent at right angles.—*Gnomonic projection*, a projection of the surface of the sphere, in which the point of sight is taken at the centre of the sphere, and the principal plane is tangent to the surface of the sphere.

Gnomonically (nō-mōn'ik-al-ly), adv. In a *gnomonical* manner; according to the principles of the *gnomonic* projection.

Gnomonics (nō-mōn'iks), n. The art or science of dialling, or of constructing dials to show the hour of the day by the shadow of a *gnomon*.

Gnomonist (nō'mon-ist), n. One versed in *gnomonics*.

Gnomonology (nō-mon-o-loj-i), n. A treatise on dialling.

Gnoo (nō), n. Same as *Gnu*.

Gnostic (nos'tik), n. [L. *gnosticus*, Gr. *gnōstikos*, from root *gnō*, E. *know*.] One of a sect of philosophers that arose in the first ages of Christianity, who pretended they were the only men who had a true knowledge of the Christian religion. They formed for themselves a fantastical system of theology crudely combined from Greek and oriental philosophy, to which they accommodated their interpretations of Scripture. They held that all natures, intelligible, intellectual, and material, are derived by successive emanations from the infinite fountain of Deity. These emanations they called *eons*.

Gnostic (nos'tik), a. Pertaining to the *Gnostics* or their doctrines.

Gnosticism (nos'ti-sim), n. The doctrines, principles, or system of philosophy taught by the *Gnostics*.

Gnowe, pret. of *gnaw*. *Gnawed*.

His children wended that it for hunger was
That he his arms *gnowe*. *Chaucer*.

Gnu (nū), n. [Hottentot *gnu* or *nju*.] A genus of ruminant quadrupeds (*Catoble-*

pas), inhabiting the plains and wilds of South Africa, generally ranked by naturalists among the antelopes, but by some placed

Gnu (*Catoblepas gnu*).

among the ox family. The form of the best known species, *C. gnu*, partakes of that of the antelope, ox, and horse. Both sexes have horns, and long hair surrounds the face and muzzle. They are said to be fierce when attacked, but when taken young have been found to be capable of domestication.

Go (gō), v. i. pret. *went*; pp. *gone*; ppp. *going*. [*Went*, though used as the pret., is really the past tense of *wend*, A. Sax. *wendan*, to turn, to go. In A. Sax. the verb appears in two forms, a contracted *gān*, and a lengthened and nasalized form, *gangan*, O. and Prov. E. and Sc. *gang*, to go. The former corresponds with Dan. *gaae*, D. *gaan*, G. *gehen*, the latter with Goth. *gagan* (that is *gangan*), Icel. *ganga*, O. H. G. *gangan*. The past of *gān* was *ode*, *edon*, in later times *yode*, *yede*, from a root *g*, to go, seen also in L. *eo*, Gr. *emi*, to go.] 1. To move; to pass; to proceed; to be in motion from any cause or in any manner, as by the action of the limbs, by a conveyance, or as a machine: used sometimes literally and sometimes figuratively. 'The mourners *go* about the streets.' Eccl. xii. 5.

Clocks will *go* as they are set; but man,
Irregular man's never constant, never certain.

2. To walk; to move on the feet or step by step; also, to walk step by step, or leisurely, as distinguished from running or hastening; as, the child begins to *go* alone at a year old.

You know that love

Will creep in service where it cannot go. *Shak.*

Thou must run to him; for thou hast staid so long
that *going* will scarce serve the turn. *Shak.*

3. To depart; to move from a place: opposed to *come*; as, the mail *goes* and comes every day.

I will let you *go* that ye may sacrifice. Ex. viii. 8.

4. To be passed on from one to another; to have currency or use; to pass; to circulate; also, to be reckoned; to be esteemed.

And so the jest *goes* round. *Dryden*.

The money . . . should *go* according to its true value.

And the man *went* among men for an old man in the days of Saul. 1 Sam. xvii. 12.

5. To proceed or happen in a given manner; to fare; to be carried on; to have course; to come to an issue or result; to succeed; to turn out.

How *goes* the night, boy? *Shak.*

I think, as the world *goes*, he was a good sort of man enough.

Whether the cause *goes* for me or against me, you must pay me the reward. *Watts*.

They belong to that division of the pharynx formed into cells partly cartilaginous and fitted with covers, by means of which a portion of water can be retained for the purpose of moistening the mouth. All the fishes which have this peculiar form of the mouth are able to live some time without water. The gobies are generally of a medium or small size, and distinguished by their ventral or thoracic fins being either united in their whole length or at their bases. The lump-fish (*Cyclopterus*), remora, and the comephorus of Baikal Sea belong to this family. Written also *Gobiidae*, *Gobiidæ*, &c.

Gobius, **Gobio** (gō'bi-us, gō'bi-ō), *n.* [L.] The goby, a genus of fishes belonging to the section Malacopterygii Abdominales and family Cyprinidæ. It includes the gudgeons. *G. fluviatilis* is the common gudgeon. See *Gobioidæ*.

out a bottom, in which children learn to walk without danger of falling.

He (Plato) seems to have thought that the use of letters had operated on the human mind as the use of the *go-cart* in learning to walk. *Macaulay.*

God (god), *n.* [This word occurs throughout the Teutonic languages in forms varying but little from each other. The root meaning of the word is unknown, and though the temptation is strong to connect it with *good*, yet when we follow both words through the Teutonic languages we find that they must be looked upon as radically distinct. The state of the case is well put by Max Müller in the following extract:—'There is perhaps no etymology so generally acquiesced in as that which derives *God* from *good*. In Danish *god* is *god*, but the identity of sound between the English *God* and the Danish *god* is merely accidental; the two words are distinct and are kept distinct in every dialect of the Teutonic family. As in English we have *God* and *good*, we have in A. Sax. *God* and *gōd*; in Gothic *Guth* and *gōd*; in Old High German *Gott* and *gūt*; in German *Gott* and *gut*; in Danish *Gud* and *god*; in Dutch *God* and *goed*. Though it is impossible to give a satisfactory etymology of either *God* or *good*, it is clear that two words which thus run parallel in all these

dialects without ever meeting cannot be traced back to one central point. *God* was most likely an old heathen name of the Deity, and for such a name the supposed etymological meaning of *god* would be far too modern, too abstract, too Christian. In *God*, we find *god* applied to heathen deities (neuter and almost always plural), and afterwards changed to *God*, to signify *God*, while *god* (with long *o*) means *god*. The word seems to have been originally neuter among all the Teutonic peoples, and to have become masculine only after their conversion.] 1. A being conceived of as possessing divine power, and therefore to be propitiated by sacrifice, worship, and the like; a divinity; a deity.

This man is now become a *god*. *Shak.*

2. The Supreme Being; Jehovah; the eternal and infinite Spirit, the Creator, and the Sovereign of the universe.

God is a spirit; and they that worship him must worship him in spirit and in truth. *John iv. 24.*

3. A prince; a ruler; a magistrate or judge; an angel. [Rare.]

Thou shalt not revile the *gods*, nor curse the ruler of thy people. *Ex. xxii. 27.*

4. Any person or thing exalted too much in estimation, or deified and honoured as the chief god.

Whose *god* is their belly. *Phil. iii. 19.*

5. *pl.* The audience in the upper gallery of a theatre; so called from their elevated position. [Slang.]—6. *pl.* Among printers, the quadrats used in throwing for copy on the imposing stone, in the same way as dice are thrown, the highest number of nicks turned up indicating the winner: so called because they decide like gods the fate of the men.

God† (god), v.t. To deify.

This last old man
Lov'd me above the measure of a father;
Nay, *god*ded me, indeed. *Shak.*

Godbert† (god'hért), n. A hauberk.

Gold (gōld), *n.* [A. Sax. and G. *gold*; D. *goud*, Sc. *goud*, Sw. *guld*, Icel. *gull*, Goth. *gulth*. From root of yellow.] 1. A precious metal of a bright yellow colour, and the most ductile and malleable of all the metals. *Sym. Au. At. wt. 196.* It is one of the heaviest of the metals, and not being liable to be injured by exposure to the air, it is well fitted to be used as coin. Its ductility and malleability are very remarkable. It may be beaten into leaves so exceedingly thin that 1 grain in weight will cover 50 square inches, such leaves having the thickness only of $\frac{1}{1000000}$ part of an inch. It may also be melted and remelted with scarcely any diminution of its quantity. It is soluble in nitro-muriatic acid or *aqua regia*, and in a solution of chlorine. Its specific gravity is 19.3, or it is about nineteen times heavier than water. The fineness of gold is estimated by carats. (See CARAT.) Jeweller's gold is usually a mixture of gold and copper in the proportions of three-fourths of pure gold with one-fourth of copper. Gold is seldom used for any purpose in a state of perfect purity on account of its softness, but is combined with some other metal to render it harder. It is often found native in solid masses, as in Hungary and Peru, though generally in combination with silver, copper or iron. Gold is found plentifully in the western part of the United States, Australia, South Africa, and New Zealand. It generally occurs in metamorphic rocks in connection with quartz; but the most productive diggings are in the gravels derived from the waste of auriferous rocks.—*Graphic gold*, an ore of tellurium, consisting of tellurium, gold, and silver, found in Transylvania. Called also *Graphic Ore*.—2. Money; riches; wealth.

Come in, tailor; here you may roast your *goose*. *Shak.*

4. A game of chance formerly common in England. It was played on a card divided into small compartments numbered from 1 to 62, arranged in a spiral figure around a central open space, on which, at the beginning of the game, the stakes were laid, and during the game any forfeits paid. It was played by two or more persons with two dice, and the numbers that turned up to each designated the number of the compartment on which he might place his mark or counter. It was called the *game of goose*, because at every fourth and fifth compartment in succession a goose was depicted on the card, and, if the throw of the dice carried the counter of the player on a goose, he might move forward double the actual number thrown.

The twelve good rules, the royal game of *goose*. *Goldsmith*.

— To *cook one's goose*, to do for one; to finish a person.

Goose (gös), *v. t.* To hiss out; to condemn by hissing. [Slang.]

Gordiacea (gor-di-ā'se-ā), *n. pl.* [From *Gordius*, a king of Phrygia. See GORDIAN.] The hair-worms, an order of annuloid animals with a body so long and thin as to resemble horse-hair. In their early stages they inhabit the bodies of several insects, which they leave when developed. They have a mouth and alimentary canal, but no anus. In dry weather they become quite brittle, but retain vitality, and a shower of rain restores them to activity.

Gordian (gor-di-an), *a.* Pertaining to *Gordius*, king of Phrygia, or to a knot tied by him, and which could not be untied; hence, complicated; intricate. — *Gordian knot*, a knot tied by Gordius, in the cord which bound the pole of his chariot to the yoke, and which was so very intricate that there was no finding where it began or ended. An oracle declared that he who should untie this knot would be master of Asia. Alexander, fearing that his inability to untie it might prove an ill augury, cut it asunder with his sword. Hence the term *Gordian knot* is applied to any inextricable difficulty; and to cut the *Gordian knot* is to remove a difficulty by bold or unusual measures.

Turn him to any cause of policy,
The Gordian knot of it he will unloose
Familiar as his garter.

Gordius (gor-di-us), *n.* Hair-worms; hair-eels, a genus of very simple thread-like annuloids found in stagnant and slow-running waters, at one time believed to have originated from horse-hairs which had fallen into the water. The name is in allusion to the complex knots into which they twist their bodies. See GORDIACEA.

sleeping-place like a hammock, connecting the branches of the sheltered and thickly-leaved part of a tree by means of the long, tough, slender stems of parasitic plants, and lining it with the broad dried fronds of palms or with long grass. This hammock-like abode is constructed at different heights from 10 to 40 feet from the ground, but there is never more than one such nest in a tree. The gorilla has thirteen ribs, and in the proportion of its molar teeth to the incisors and in the form of its pelvis it approaches closely the human form. The Phœnician navigator Hanno found the name in use in the fifth century B.C. in W. Africa.

Goth (goth), *n.* [L. *Gothi*, *Goths*; *Goth*, *Guthi*, *Gutha*.] 1. One of an ancient Teutonic race of people, first heard of as inhabiting the shores of the Baltic. Many great hordes of them migrating southwards in the second century dispossessed the Romans of Dacia, and occupied the coast of the Black Sea from the Don to the Danube. There they divided into two sections, Visigoths (Western Goths) to the west of the Dniester, and Ostrogoths (Eastern Goths) to the east, and under these names overran and took an important part in subverting the Roman Empire. The Messogoths, a section of the Visigoths, settled in Russia and applied themselves to agriculture; and a portion of the Scriptures in their language is the earliest specimen of the Teutonic or Gothic tribe of tongues. — 2. One rude or uncivilized; a barbarian; a rude ignorant person; one defective in taste.

Look upon these writers as *Goths* in poetry. *Addison*.

Gothamist (go'tham-ist), *n.* A person deficient in wisdom, so called from *Gotham*, in Nottinghamshire, noted for some pleasant blunders. Warton, speaking of 'the idle pranks of the men of Gotham,' says 'that such pranks bore a reference to some customary law-tenures belonging to that place or its neighbourhood, now grown obsolete, and that Blount might have enriched his book of ancient tenures with these ludicrous stories.'

Gothamite (go'tham-it), *n.* 1. A Gothamist (which see). — 2. A man of Gotham; a Gothamist: a term sportively applied to the inhabitants of New York.

Gothic (goth'ik), *a.* 1. Pertaining to the Goths; as, *Gothic* customs; *Gothic* barbarity. — 2. A term applied to the various styles of pointed architecture prevalent in Western Europe from the middle of the twelfth century to the revival of classic architecture in the sixteenth. The term was originally applied scornfully by the Renaissance architects to every species of art which existed from the decline of the classic styles till their revival, but so far from being now used in a depreciatory sense, it is regarded as characterizing one of the noblest and completest styles of architecture ever invented. The chief characteristics of Gothic architecture are:—

The predominance of the pointed arch and the subsergency and subordination of all the other parts to this chief feature; the tendency through the whole composition to the predominance and prolongation of vertical lines; the absence of the column and entablature of classic architecture, of square edges and rectangular surfaces, and the substitution of clustered shafts, contrasted surfaces, and members multiplied in rich variety. The Gothic architecture of Britain has been divided into four principal epochs—the Early English, or general style of the thirteenth century; the Decorated, or style of the fourteenth century; the Perpendicular, practised during the fifteenth and early part of the sixteenth century (Flamboyant being the contemporary style in France); and the Tudor, or general style of the sixteenth century. See the separate terms and the illustrations under them.

I believe then, that the characteristic or moral elements of *Gothic* are the following, placed in the order of their importance:—(1) Savageness; (2) Changefulness; (3) Naturalism; (4) Grotesqueness; (5) Rigidity; (6) Reluctance. And I repeat that the withdrawal of any one, or any two, will not at once destroy the *Gothic* character of a building, but the removal of a majority of them will. *Ruskin*.

3. Rude; barbarous.

When do you dine, Emilia? At the old *Gothic* hour of four o'clock, I suppose. *Emilia Wyndham*.

Gout (gout), *n.* [Fr. *goutte*, *L. gutta*, a drop, from the old medical theory that diseases were due to the deposition of drops of morbid humour on the part—hence also *gutta serena*.] 1. A constitutional disorder or disease giving rise to paroxysms of acute pain with a specific form of inflammation, often favoured by original or hereditary constitution, appearing after puberty chiefly in the male sex, and returning after intervals. It is very often preceded by, or alternates with, disorder of the digestive or other internal organs, and is generally characterized by affection of the first joint of the great toe, by nocturnal exacerbations and morning remissions, and by vascular plethora, various joints, organs, or parts, becoming affected after repeated attacks without passing into suppuration. It may be acquired or hereditary. In the former case, it rarely appears before the age of thirty-five; in the latter, it is frequently observed earlier. Indolence, inactivity, and too free use of tartareous wines, fermented liquors, and very high-seasoned, fat, and nourishing food, are the principal causes which give rise to this disease. Gout is also called, according to the part it may affect, *Podagra* (in the feet), *Gonagra* (in the knees), *Chiragra* (in the hands), &c. It may be acute or chronic, and may give rise to concretions, which are chiefly composed of urate of soda. 2. A drop; a clot or coagulation.

Governante (gu'vörn-ant), *n.* [Fr. *gouvernante*, from *gouverner*. See GOVERN.] A lady who has the care and management of children; a governess.

I saw Envy there drest up in a widow's veil,
And the very picture of the *governante* of one of our noblemen's houses. *Sir R. L'Estrange.*

Governess (gu'vörn-es), *n.* 1. A female invested with authority to control and direct; a tutress; an instructress; a lady who has the care of instructing and directing children: generally applied to a lady who teaches children in their homes. Hence—
2. Anything regarded as feminine that governs, instructs, or tutors. 'Great affliction, that severe *governess* of the life of man.' *Dr. H. More.* 'The moon, the *governess* of floods.' *Shak.*

Governing (gu'vörn-ing), *p. and a.* Holding the superiority; prevalent; directing; controlling; as, a *governing* wind; a *governing* party in a state; a *governing* motive.

Government (gu'vörn-ment), *n.* 1. Direction; regulation; guidance; as, these precepts will serve for the *government* of our conduct.—
2. Control; restraint; as, men are apt to neglect the *government* of their temper and passions.—
3. The exercise of authority; direction and restraint exercised over the actions of men in communities, societies, or states; the administration of public affairs, according to established constitution, laws, and usages, or by arbitrary edicts; as, Prussia rose to importance under the *government* of Frederick II.

Let family *government* be like that of our heavenly Father—mild, gentle, and affectionate. *Kellock.*

As eloquence exists before syntax, and song before prosody, so *government* may exist in a high degree of excellence long before the limits of legislative, executive, and judicial power have been traced with precision. *Macaulay.*

4. The system of polity in a state; the aggregate of fundamental rules and principles by which a nation or state is governed; the mode or system according to which the sovereign powers of a nation, the legislative, executive, and judicial powers, are vested and exercised; as, a monarchical *government* or a republican *government*. The British *government* is of the kind known as a constitutional monarchy. The legislative power is placed in the sovereign, the lords spiritual and temporal, and the representatives of the people in the House of Commons. The executive power is vested in the sovereign, who is assisted in the discharge of it by his or her ministers and delegates. See ARISTOCRACY, DEMOCRACY, DESPOTISM, MONARCHY, OLIGARCHY, REPUBLIC.

For forms of *government* let fools contest;
Whate'er is best administered is best. *Pope.*

5. An empire, kingdom, or other state; a body politic governed by one authority; a province or division of territory ruled by a governor.—6. The right of governing or administering the laws. 'I here resign my

government to thee.' *Shak.*—7. The persons or council who administer the laws of a kingdom or state; the administration; executive power.—8. Manageableness; compliance; obsequiousness.—9. Regularity of behaviour; self-restraint; self-government.

Yet oftentimes it doth present harsh rage,
Defect of manners, want of *government*,
Pride, haughtiness, opinion, and disdain. *Shak.*

10. Management of the limbs or body.

Thy eyes' windows fall,
Like death, when he shuts up the day of life;
Each part depriv'd of supple *government*,
Shall stiff and stark, and cold appear, like death. *Shak.*

11. In *gram.* the influence of a word in regard to construction, as when established usage requires that one word should cause another to be in a particular case or mode. **Governmental** (gu'vörn-ment'al), *a.* Pertaining to government; made by government.

Lord Palmerston has issued the following circular to members of the House of Commons understood to be favourable to the *governmental* policy. *Times newspaper.*

Governor (gu'vörn-ér), *n.* He who or that which governs, rules, or directs; as, (a) one invested with supreme authority, especially with supreme authority to administer or enforce the laws; the supreme executive magistrate of a state, community, corporation, or post; a chief ruler; as, the *governor* of a colony; in America, each state has its *governor*; the *governors* of the Bank of England; the *governors* of Heriot's Hospital. (b) A tutor; one who has the care of a young man; one who instructs a pupil and forms his manners.

The great work of a *governor* is to fashion the carriage and form the mind. *Locke.*

(c) A father; a master or superior; an employer; an elderly person. [Slang.] (d) One who steers a ship; a pilot. *Jam. iii. 4.* (e) A contrivance in mills and machinery for maintaining a uniform velocity with a varying resistance. A common form of the steam-engine *governor* is shown in the annexed figure. It represents a spindle kept in motion by the engine. A and B are two centrifugal balls, C and D the rods which suspend the balls. These rods cross one another and pass through the spindle at C, where the whole are connected by a round pin put through the spindle and the rods which serves as the point of suspension for the centrifugal balls or revolving pendulums. A piece of brass M is made to slide up and down upon the upper part of the spindle, and to this piece

Governor of a Steam-engine.

the end of the lever N O, whose fulcrum is at P, is attached. This piece of brass is also connected with the ball rods by two short pieces and joints D E, F G. When the engine goes too fast, the balls fly farther asunder and depress the end N of the lever, which partly shuts a throttle-valve connected with the end O, and thus diminishes the quantity of steam admitted into the cylinder; and on the other hand, when the engine goes too slow, the balls fall down towards the spindle and elevate the end N of the lever, which partly opens the throttle-valve and increases the quantity of steam admitted into the cylinder. By this ingenious contrivance, therefore, the quantity of steam admitted to the cylinder is exactly proportioned to the resistance of the engine, and the velocity kept constantly the same. A similar contrivance is employed in mills to equalize the motion of the machinery. When any part of the machinery is suddenly stopped, or suddenly set agoing, and the moving power

remains the same, an alteration in the velocity of the mill will take place, and it will move faster or slower. The governor is used to remedy this. (f) See GAS-GOVERNOR.

Governor-general (gu'vèrn-er-jen' (ér-ál), *n.* A governor who has under him subordinate or deputy governors; a viceroy; as, the Governor-general of India.

Governorship (gu'vèrn-ér-ship), *n.* The office of a governor.

Graff (graf), *n.* [See GRAVE.] 1. A ditch or moat.—2. A grave. 'E'en as he is, could in his *graft*.' Burns. [Scotch.]
Graft (graf), *n.* A graft (which see).

I took his brush and blotted out the bird,
 And made a gardener putting in a *graft*.
 Tennyson.

Graft (graf), *v.t.* To graft.

And they also, if they abide not still in unbelief, shall be *grafted* in; for God is able to *graft* them in again. Rom. xi. 23.

Graftage (graf'āj), *n.* The scarp of a ditch or moat. 'To keep in repair the long line of boundary fence, to clean the *graftages*, clear out the moat-like ditches.' Mary R. Mitford.

Grafter (graf'ēr), *n.* In *law*, a notary or scrivener; a greffier.

Graffiti (grā-fē'tō), *n. pl.* [Pl. of It. *grafito*, a scribbling, from *graffiare*, to scribble.] A class of ancient delineations or inscriptions found on the walls of Pompeii, the Catacombs, and other Roman ruins, and consisting of rude scribbles or figures on the plaster of the walls, on pillars, door-posts, &c.: *graphites*. See GRAPHITE.

Graft (graf), *n.* [Fr. *greffe*, a slip or shoot of a tree for grafting, from O.Fr. *greffe*, a pointed instrument; L. *graphium*, a style for writing on waxen tablets, from Gr. *graphein*, to write, from the shape of the slips. From the same root comes A. Sax. *grafian*, to cut, to dig, and O.G. and Goth. *graban*. According to the etymology *graft* is the proper spelling of the word, but the spelling *graft* has almost entirely superseded it.] A small shoot or scion of a tree, inserted in another tree as the stock which is to support and nourish it. These unite and become one tree, but the graft determines the kind of fruit.

Graft (graf), *v.t.* [From the noun *graft*, above.] 1. To insert, as a scion or shoot, or a small cutting, into another tree; to propagate by insertion or inoculation; to fix a graft or grafts upon. 'Grafted to your relish.' Shak.

With his pruning-hook disjoin
 Unbearing branches from their head,
 And *graft* more happy in their stead. Dryden.

2. To insert in a body to which what is inserted did not originally belong; to incorporate after the manner of a scion or shoot on a stem; to join one thing to another so as to receive support.

This resolution against any peace with Spain is a new incident *grafted* upon the original quarrel. Swift.

—To *graft* a rope (*navit.*), to unlaid the two ends of a rope, placing the strands one within the other, as for splicing and stopping them at the joining.

Graft (graf), *v.t.* To insert scions from one tree, or kind of tree, into another.

Grafter (graf'ēr), *n.* One who grafts or inserts scions on foreign stocks; one who propagates trees or shrubs by grafting.

Grafting (graf'ing), *n.* The act of inserting a shoot or scion, taken from one tree, into the stem or some other part of another, in

cutting the ends of the scion and stock completely across in an oblique direction, in such a way that the sections are of the same shape, then laying the oblique surfaces together so that the one exactly fits the other, and securing them by tying or otherwise. In *cleft-grafting*, the stock is cleft down, and the graft, cut in the shape of a wedge at its lower end, is inserted into the cleft; while, in *saddle-grafting*, the end of the stock is cut into the form of a wedge, and the base of the scion, slit up or cleft for the purpose, is affixed. *Crown-grafting* or *round-grafting* is performed by cutting the lower end of the scion in a sloping direction, while the head of the stock is cut over horizontally and a slit is made through the inner bark. A piece of wood, bone, ivory, or other such substance, resembling the thinned end of the scion, is inserted in the top of the slit between the alburnum and inner bark and pushed down in order to raise the bark, so that the thin end of the scion may be introduced without being bruised. The edges of the bark on each side are then brought close to the scion, and the whole is bound with matting and clayed.

Grail (gräl), *n.* Same as *Gradual*, 2.

Grail, **Graile**† (gräl), *n.* [Fr. *grêle*, hail.] Small particles; gravel.

And lying down upon the sandy *grail*
 Drunk of the stream as clear as christall glas. Spenser.

Grail, **Graal** (gräl), *n.* [O.Fr. *grail*, *grail*, *grasail*, Fr. *grasail*, *grasail*, a bowl or dish of some kind; L.L. *gradalis*, *gradale*, &c. Origin doubtful; perhaps as Diez suggests L. and Gr. *crater*, a cup.] The legendary holy vessel, supposed to have been of emerald, from which our Saviour ate the paschal lamb at the last supper, or, according to other legends, from which he dispensed the wine, and said to have been brought to England by Joseph of Arimathea, who had caught the last drops of Christ's blood in it as he was taken from the cross. Other accounts affirm it to have been brought by angels from heaven, and entrusted to a body of knights, who guarded it on the top of a lofty mountain. When approached by any one not perfectly pure it vanished from sight. The *grail* having been lost, became the great object of research or quest to knights-errant of all nations, none being qualified to discover it but a knight perfectly chaste in thought and act, and the stories and poems of Arthur and the Knights of the Round Table are founded on this legend of the quest of the holy chalice. Written also *Grayle*.

Hither came Joseph of Arimathey,
 Who brought with him the holy *grail* they say,
 And preach'd the truth, but since it greatly did decay. Spenser.

A light was in the crannies, and I heard,
 'Glory and joy and honour to our Lord,
 And to the Holy Vessel of the *Grail*.' Tennyson.

Grain (grän), *n.* [O.E. *grain*, *greyn*, *grein*, from Fr. *grain*; L. *granum*, a grain, seed, kernel. The word is from the same root as E. *corn* (which see).] 1. A single seed or hard seed of a plant, particularly of those kinds of plants whose seeds are used for food of man or beast. This is usually inclosed in a proper shell or covered with a husk, and contains the embryo of a new plant. 2. Used collectively, without a definitive, for corn in general, or the fruits of certain plants, as wheat, rye, barley, oats, &c., which constitute the chief food of man and beast, as also for the plants themselves. 'Champing golden *grain* the horses stood.' Tennyson.—3. Any small hard particle, as of sand, sugar, salt, &c.—4. Hence, a minute particle: frequently used partitionately for the most minute portion of anything; as, he has not a *grain* of wit; had he but a *grain* of common sense. 'A *grain*, a dust; a gnat.' Shak. 'Neglect not to make use of any *grain* of grace.' Hammond.—5. A small weight, or the smallest weight ordinarily used, being the twentieth part of the scruple in apothecaries' weight, and the twenty-fourth part a pennyweight troy.—6. One of the constituent particles of a body, as of a stone, a metal, and the like; hence, the body or substance of a thing regarded with respect to the size, form, or direction of the constituent particles: the form of the surface of a body with respect to smoothness or roughness; state of the grit of any body regarded as composed of particles; as, marble, sandstone, sugar of a fine *grain*.

The tooth of a sea-horse contains a curdled *grain*.
 Sir T. Browne.

7. The veins or fibres of wood or other fibrous substance, especially with regard to their arrangement or direction; hence, the body or substance of wood as modified by the fibres; as, wood of a cross *grain*; to plane wood against the *grain*. 'Hard box, and linden of a softer *grain*.' Dryden.

Knots by the confluence of meeting sap
 Infect the sound pine, and divert the *grain*. Shak.
 —Against the *grain*, against the fibres of wood; hence, against the natural temper; unwillingly; unpleasantly; reluctantly.

Quoth Hudibras, 'It is in vain,
 I see, to argue *gainst* the *grain*.' Hudibras.

8. An essential element in anything, as heart or temper in man. 'Brothers eluded together but not united in *grain*.' Hayward.

9. A term formerly applied from their round seed-like form to one or more insects of the genus *Coccus* (*C. polonicus*, *C. ilicis*), which yield a scarlet dye, now largely superseded by cochineal (the product of the *C. cacti*), which also was sometimes called *grain*; a red kermes; hence, a red-coloured dye; a red colour of any kind pervading a texture: sometimes used by the poets as equivalent to Tyrian purple. 'Grain of Sarra (= Tyre). Milton. 'All in a robe of darkest *grain*.' Milton. 'Graine that you dye scarlet withall.' Habington.

This is that Indian cochennille so famous, and where-
 with they die in *grain*. Purcell.

Doing as the dyers do, who, having first dipped their silks in colours of less value, then give them the last tincture of crimson in *grain*. Coleridge.

From the excellence and permanence of the dye obtained from these insects *grain* came to be applied to any fast colour, so that we find the phrase in *grain* coming to mean in any permanent colour; in any colour or dye so intimately associated with the texture as to be irremovable; while to *dye in grain*, which originally meant to dye with *grain* or kermes, now means to dye in the fibre or raw material, as wool or silk before it is manufactured.

Ant. What complexion is she of?

Drom. Swart like my shoe.

Ant. That's a fault that water will mend.
Drom. No, sir; 'tis in *grain*; Noah's flood could not do it. Shak.

Graminaceous (grā-min'ā-shē-us), *a.* Belonging to the Graminaceæ or grasses; gramineous.

Gramineæ (grā-min'ē-ē), *n. pl.* [L. *gramineus*, of or pertaining to grass, from *gramen*, *graminis*, grass.] A very important group of Glumaceæ (which see) widely distributed throughout the globe, and comprising about 250 genera and 4500 species. Their nutritious herbage and farinaceous seed render them of incalculable importance, while the stems and leaves are useful for various textile and other purposes. The flowers are mostly bisexual, the perianth being in the majority composed of two very minute scales; the stamens are usually three, with versatile anthers; the ovary is one-celled, with one or two hairy or feathery stigmas. The fruit is terete or grooved on one side; the embryo is on one side of the base of the albumen. The stems are for the most part hollow and terete, the sheathing bases of the leaves being split to the base. The Gramineæ are generally herbaceous, the bamboos forming a marked exception to this rule. The various cereals and the sugarcane are members of this family.

Grane (grán), *n.* A groan. [Scotch.]

They've nae sair wark to craze their banes,
An' ill auld age wi' grips and *granes*. *Burns*.

Grange (grán'), *n.* [Fr. *grange*, a barn; L. *granea*, *granica*, a barn, from L. *granum*, grain.] 1.† *Lit.* a granary.

The loose unlettered hands:
When for their teeming flocks, and *granges* full,
In wanton dance they praise the bounteous Pan. *Milton*.

2. The farming establishment and granary attached to a religious house, where, in addition to their own crops, the grain paid as rent and tithes was stored. The name was also given to the farm buildings and granary of a feudal lord, the residence of his chief bailiff.

A *grange*, in its original signification, meant a farmhouse of a monastery, from which it was always at some little distance. One of the monks was usually appointed to inspect the accounts of the farm. He was called the prior of the *grange*. *Malone*.

3. A farm, with the dwelling-house, stables, byres, barns, &c.; particularly, a house or farm at a distance from other houses or villages; the dwelling of a yeoman or gentleman-farmer.

Shepherds at the *grange*,
Where the Babe was born,
Sang, with many a change,
Christmas carols until morn. *Longfellow*.

At the moated *grange* resides this dejected Mariana. *Shak*.

A *grange* implies some one particular house immediately inferior in rank to a hall, situated at a small distance from the town or village from which it takes its name; as Hornby *Grange*, Blackwell *Grange*, and is in the neighbourhood simply called the *Grange*. *Ritson*.

4. A combination, society, or lodge of farmers for the purpose of promoting the interests of agriculture, more especially for abolishing the restraints and burdens imposed on it by the commercial classes, the railroad and canal companies, &c., and for doing away with the middlemen or agents

intervening between the producer and the consumer. Granges originated in the great agricultural region on the Mississippi, and still prevail most generally there, but they are extending to all the states, especially to those largely depending on agriculture. [United States.]

Granger (gran'j-er), *n.* 1. † A farm steward or bailiff. —2. A member of a farmers' grange for the advancement of the interests of agriculture, as distinguished from the commercial and manufacturing interests. [United States.]

Graniferous (gran-if-er-us), *a.* [L. *granum*, grain, seed, and *fero*, to bear.] Bearing grain, or seeds like grain; as, *graniferous* pods.

Graniform (gran-i-form), *n.* In bot. formed like grains of corn.

Granilite (gran-i-lit), *n.* [L. *granum*, a grain, and Gr. *lithos*, a stone.] Indeterminate granite; granite that contains more than three constituent parts.

Granilla (gran-i-la), *n.* [Sp., dim. of *grano*, L. *granum*, grain, seed.] The dust or small grains of the cochineal insect.

Granite (gran'it), *n.* [Fr. *granit*; It. *granito*, grained, from L. *granum*, a grain.] In geol. and mineral. an unstratified rock, composed generally of quartz, felspar, and mica, united in a confused crystallization, that is, without regular arrangement of the crystals. The grains vary in size from that of a pin's head to a mass of 2 or 3 feet, but they seldom exceed the size of a large gaming die. When they are of this size, or larger, the granite is said to be 'coarse-grained.' Some varieties of granite are evidently of igneous origin, but there is reason to believe that many granites are rocks originally stratified, but subsequently so highly metamorphosed as to have become crystalline throughout, and lost all trace of stratification and lamination. Granite is one of the most abundant rocks seen at or near the surface of the earth, and was formerly considered as the foundation rock of the globe, or that upon which all sedimentary rocks repose; but it is now known to belong to various ages from the Laurentian to the tertiary, the Alps of Europe containing granite of the latter age. In alpine situations it presents the appearance of having broken through the more superficial strata; the beds of other rocks in the vicinity rising towards it at increasing angles of elevation as they approach it. It forms some of the most lofty of the mountain chains of the eastern continent, and the central parts of the principal mountain ranges of Scandinavia, the Alps, the Pyrenees, and the Carpathian Mountains are of this rock. No organic fossil remains have ever been found in granite, although it is sometimes found overlying strata containing such remains. Granite supplies the most durable materials for building, as many of the ancient Egyptian monuments testify. It varies much in hardness as well as in colour, in accordance with the nature and proportion of its constituent parts, so that there is much room for care and taste in its selection. Granite in which felspar predominates is not well adapted for buildings, as it cracks and crumbles down in a few years. The Aberdeen bluish gray granite is celebrated for its great durability, and also for its beauty. The Fetherhead red granite, the hue of which is due to its felspar being the flesh-coloured potash variety called orthoclase, is highly esteemed for polished work, as columns, pillars, graveyard monuments, &c. Granite in which mica is replaced by hornblende is called *syenite*; when both mica and hornblende are present it is called *syenitic granite*; when tale supplants mica it is called *protogine*; a mixture of quartz and hypersthene, with scattered flakes of mica, is called *hypersthene granite*; and the name of *graphic granite*, or *pegmatite*, is given to a variety composed of felspar and quartz, with a little white mica, so arranged as to produce an irregular laminar structure. When a section of this latter mineral is made at right angles to the alternations of the constituent materials, broken lines resembling Hebrew characters present themselves; hence the name.

Granitel, **Granitelle** (gran'i-tel), *n.* [Dim.

of *granite*.] A binary granitic compound containing two constituent parts, as quartz and felspar, or quartz and short hornblende. Italian workmen give this name to a variety of gray granite consisting of small grains.

Granitic, **Granitical** (gran-it'ik, gran-it'ik-al), *a.* 1. Of or pertaining to granite; like granite; having the nature of granite; as, *granitic texture*. —2. Consisting of granite; as, *granitic mountains*. —**Granitic aggregate**, in mineral. a granular compound of two or more simple minerals, in which only one of the essential ingredients of granite is present, as quartz and hornblende, felspar and short, &c.

Granitification (gran-it'i-fi-kā'shon), *n.* The act of forming into granite, or state or process of being formed into granite.

Granitiform (gran-it'i-form), *a.* Having the form of granite; resembling granite in structure or shape.

Granitify (gran-it'i-fi), *v.t.* [E. *granite*, and L. *facio*, to make.] To form into granite.

Granite, **Granitine** (gran'it-in), *n.* A granitic aggregate of three species of minerals, some of which differ from the species which compose granite, as quartz, felspar, and jade or short.

Granitoid (gran-it-oid), *a.* [E. *granite*, and Gr. *oides*, resembling.] Resembling granite; specifically, in mineral. having each of the materials separately crystallized and distinct, as in granite, syenite, &c.

Granivorous (gran-i-vō-rus), *a.* [L. *granum*, grain, and *vor*, to eat.] Eating grain; feeding or subsisting on seeds; as, *granivorous* birds.

Grannam (gran'nam), *n.* A grandmother; a grandam. [Colloq.]

The magic-mill that grinds the *grannams* young. *Crabbe*.

Granny (gran'ni), *n.* A grandmother. [Scottish.]

Grano (grā'nō), *n.* pl. **Grani** (grā'nē). A money of account in Malta, equal to about 1 d. sterling.

Grant (grant), *v.t.* (Probably two words are here mixed up under one form—one from L. *gratus*, pleasant, L.L. *gratus*, *gratum*, consent, satisfaction, which last, by insertion of *n*, became *gratum*, *facere gratum* and *facere gratum* being equivalent to *gratificare*. In old charters we find such phrases as 'Ad grantum et voluntatem Archiepiscopi Remensis,' 'Faciemus vobis *gratum nostrum*,' in both which cases *gratum* means satisfaction. Parallel with this we have the O.Fr. *eranter*, *eranter*, Norm. *granter*, to promise, to agree, and as double *a* in O.Fr. is an almost certain sign of the loss of *d*, such a form as *eranter*, *eranter*, almost certainly points to a L.L. *credentare*, to make to believe or trust, from L. *credere*, pp. *credero*, to believe, to trust.) 1. To transfer the title or possession of for a good or valuable consideration; to convey by deed or writing; to give or make over; as, the legislature have *granted* all the new land.

Grant me the place of this threshing-floor. 1 Chr. xxi. 22.

2. To bestow or confer, with or without compensation, particularly in answer to prayer or request.

Thou hast *granted* me life and favour. Job x. 12.
Unblemish'd let me live, or die unknown;
O *grant* an honest fame, or *grant* me none. *Pope*.

3. To admit as true what is not proved; to allow; to yield; to concede; as, we take that for *granted* which is supposed to be true.

Grant that the Fates have firm'd, by their decree. *Dryden*.

I *grant* in her some sense of shame. *Tennyson*.

—*Give, Confer, Grant*. See under GIVE.

Grant (grant), *v.i.* To consent; to give permission, countenance, or consent.

The soldiers would have toss'd me on their pikes
Before I would have *granted* to that act. *Shak.*

Grant (grant), *n.* 1. The act of granting; a bestowing or conferring. —2. The thing granted or bestowed; a gift; a boon; the thing conveyed by deed or patent. —3. In law, a conveyance in writing of such things as cannot pass or be transferred by word only, as land, rents, reversions, tithes, &c.

A *grant* is an executed contract. *Z. Swift*.

4. That which is granted or conceded; concession; admission of something as true.

This *grant* destroys all you have urg'd before. *Dryden*.

SYN. Present, gift, boon, allowance, stipend.

Grantable (grant'a-bl), *a.* That may be granted or conveyed.

I will inquire, therefore, in what cases dispensations are *grantable*, and by whom. *Shierlock*.

Grantee (grant-ē), *n.* In law, the person to whom a grant or conveyance is made.

Granter (grant'er), *n.* He who grants.

Grantor (grant'or), *n.* In law, the person who makes a grant or conveyance: the correlative of *grantee*.

Granula (gran'ū-la), *n. pl.* [Dim. of L. *granum*, a grain.] In bot. a little grain; applied to the large spore contained in the centre of many algae, as *Gloionema*.

Granular, **Granulary** (gran'ū-la-ri), *a.* [From L. *granum*, grain.] Consisting of or resembling granules or grains; as, a *granular substance*; a stone of *granular appearance*. —**Granular limestone**, a limestone having a crystalline granular character. It occurs in irregular masses, and is almost exclusively found in primary rocks. It furnishes varieties of statuary marble.

Granularity (gran'ū-lér-ī), *adv.* In a granular form.

Granulate (gran'ū-lāt), *v.t.* pret. & pp. *granulated*; ppr. *granulating*. [Fr. *granuler*, from L. *granum*, a grain.] 1. To form into grains or small masses; as, to *granulate* powder or sugar. —2. To raise in granules or small asperities; to make rough on the surface.

I have observed in many birds the gullet, before its entrance into the gizzard, to be much dilated, and thick-set, or as it were *granulated* with a multitude of glandules. *Ray*.

Granulate (gran'ū-lāt), *v.i.* To collect or be formed into grains; to become granular; as, cane-juice *granulates* into sugar; melted metals *granulate* when poured into water.

Granulate, **Granulated** (gran'ū-lāt, gran'ū-lāt-ed), *p.* and *a.* 1. Consisting of grains; resembling grains, as shagreen. —2. Having numerous small elevations; specifically, in bot. applied to roots which are divided into little knobs or knots, as in *Saxifraga granulata*. —**Granulated glass**, a kind of roughened glass used in stained windows.

Granulation (gran'ū-lā'shon), *n.* 1. The act of forming into grains; state or process of being formed into grains; as, the *granulation* of powder and sugar. See extract.

Granulation is the process by which metals are raised to minute grains. It is effected by pouring them, in a melted state, through an iron cullender pierced with small holes into a body of water, or directly upon a bundle of twigs immersed in water. In this way copper is granulated into bean-shot, and silver alloys are granulated preparatory to refining. *Ure*.

2. In surg. (a) a process by which little grain-like fleshy bodies form on the surfaces of ulcers and suppurating wounds, and serve both for filling up the cavities and bringing nearer together and uniting their sides. (b) The fleshy grains themselves.

Granule (gran'ūl), *n.* [Fr., as if from a L. form *granulum*, dim. of *granum*, a grain.]

A little grain; a small particle; as, in bot. (a) a small grain, many of which are contained in each grain of pollen, constituting the fovilla. (b) A spore found in some algae, and in all cryptogamic plants.

(c) A small wart-like appendage on the calyx of certain species of *Rumex*, and on the roots of certain plants, as *Saxifraga granulata*. —**Granule cells**, minute cells found in animal solids and liquids containing globules of fat.

Granuliferous (gran-ūl-if-er-us), *a.* [E. *granule*, and L. *fero*, to bear.] Bearing grains; full of grains.

Granuliform (gran-ūl-i-form), *a.* [E. *granule*, and L. *forma*, shape.] In mineral. having an irregular granular structure.

Granulite (gran'ūl-ī), *n.* [E. *granule*, and Gr. *lithos*, a stone.] A fine-grained granitic rock consisting of granular felspar (orthoclase) and a little quartz. It is often imperfectly schistose, and sometimes contains garnets. Called also *Eurite*, *Leptynite*, and *Retroslite* or *Felsite*.

Granulolous (gran-ūl-us), *a.* Full of grains; abounding with granular substances.

Grape (grāp), *n.* [Fr. *grappe*, a bunch of fruit or flowers; It. *grappa*, the stalk of fruit, the part by which it is held; *grappare*, to seize, *grappolo*, a cluster of grapes; from the German; comp. O.G. *krappe*, a hook; D. *krappe*, a cluster. See GRAB.] 1. Properly, a cluster of the fruit of the vine, but commonly a single berry of the vine; the fruit from which wine is made by expression and fermentation. —2. The cascabel or knob at the butt of a cannon. —3. *pl.* In *farriery*, a mangy tumour on the legs of a

Graphically, **Graphically** (graf'ik-li, graf'ik-al), *adv.* In a graphic manner.

Graphicalness, **Graphicalness** (graf'ik-nes, graf'ik-al-nes), *n.* The condition or quality of being graphic.

Graphidei, **Graphideæ** (graf'id-ē-i, graf'id-ē-ē), *n. pl.* [Genus *Graphis*, Gr. *graphō*, to write, *eidos*, resemblance.] A nat. order of lichens, remarkable for the resemblance which the fructification (apothecia or shields) bears to the forms of certain oriental alphabets, whence the scientific name, and popular name of *scripture-worts*. Some species are found only as parasites on the bark of particular species of Cinchona.

Graphis (graf'is), *n.* A genus of lichens. The species are found chiefly on the bark of trees. See GRAPHIDEI.

Graphite (graf'it), *n.* [Gr. *graphō*, to write.] 1. One of the forms under which carbon occurs in nature, also known under the names of *Plumbago*, *Black-lead*, and *Wad*. It occurs not unfrequently as a mineral production, and is found in great purity at Borrowdale in Cumberland. Graphite may be heated to any extent in close vessels without change; it is exceedingly unchangeable in the air; it has an iron-gray colour, metallic lustre, and granular texture, and is soft and unctuous to the touch. It is used chiefly in the manufacture of pencils, crucibles, and portable furnaces, in burnishing iron to protect it from rust, and for counteracting friction between the rubbing surfaces of wood or metal in machinery.—2. In *archæol.* rudely

scratched or engraved representation of a figure or a rude inscription on a wall, pillar, and the like; a *graphito*. See GRAFFITI.

The next in the catacombs under the farm of Tor Marancia near Rome was a *graphito*, one of those rude scratchings which, though made by idle or mischievous hands, prompted by the spirit which has moved the 'cockneys' of all ages to disgrace walls by recording their names or fancies upon them, nevertheless often contain most valuable information. This *graphito* was found on the *intonaco* (plaster) of the apse. It represented in rude outline the profile of a bishop seated, evidently preaching from the episcopal chair, with a halo of background showing the side of the choir, with the pulpit or ambo for the epistle. It was clearly a reminiscence of an event which had occurred within the basilica. Here, again, conjecture could only offer an explanation; but what event could the representation of a pontiff preaching in a basilica within the catacomb be believed to be that of Domitilla suggest other than the sainted Gregory delivering that homily he is recorded to have preached to the people in the cemetery where the saints Nereus and Achilleus were buried, and which tradition has connected with the church dedicated to them within the walls! *Shakspeare Wood.*

Graphitoid, **Graphitoidal** (graf'it-oid, graf'it-oid'al), *a.* [From *graphite*, and Gr. *eidos*, resemblance.] Resembling graphite or plumbago.

Grapholite (graf'ol-it), *n.* [Gr. *graphō*, to write, and *lithos*, a stone.] A species of slate suitable for writing on.

Graphometer (graf'om-et-ēr), *n.* [Gr. *graphō*, to describe, and *metron*, measure.] A mathematical instrument, called also a *Semicycle*, for measuring angles in surveying.

Graphometrical (graf'ō-met'rik-al), *a.* Pertaining to or ascertained by a graphometer.

Phototype (graf'ō-tip), *n.* [Gr. *graphō*, to write, and *typos*, an impression.] A process for obtaining blocks for surface-printing. Drawings are made on blocks of chalk with a siliceous ink; when dried, the soft parts are brushed away, and the drawing remains in relief; stereotypes are then taken from the block. In a later form of the process the chalk block is superseded by a zinc plate covered with finely-powdered French chalk, brought to a hard and firm texture by enormous pressure.

Grapnel, *n.* A grapnel. *Chaucer.*

Grapnel (graf'nel), *n.* [O. Fr. *grappil*, Fr. *grappin*, from root of *grapple*. See GRAB.]

1. A small anchor fitted with four or five flukes or claws, used to hold boats or small vessels.

Grapnel.

2. A grappling-iron, used to seize and hold one ship to another in engagements preparatory to boarding.

Grapple (grāp'l), *v.t.* pret. & pp. *grappled*; ppr. *grappling*. [A freq. of *grab* (which see).] To seize; to lay fast hold on, either with the hands or with hooks; as, a man *grapples* his antagonist, or a ship *grapples* another ship.

Grapplement (grāp'l-ment), *n.* A grappling; close fight or embrace.

Him backward overthrew, and down him stay'd
With their rude hands and grisly *grapplement*. *Spenser.*

Grapple-plant (grāp'l-plant), *n.* The Cape name of the *Harpagophytum procumbens*, a South African procumbent plant of the nat. order Pedaliaceæ. The seed has many hooked thorns, and clings to the mouth of any ox which has come on it while grazing, the pain being so exquisite that the animal roars through agony and a sense of helplessness.

Grappling (grāp'l-ing), *n.* 1. The act of laying fast hold on.—2. That by which anything is seized and held; a grapnel.

Grappling-iron (grāp'l-ing-i-ern), *n.* An instrument consisting of four or more iron claws for grappling and holding fast.

Grapsidæ (graps'id-ē), *n. pl.* [Genus *Grapsus*, from Gr. *grapsos*, a crab, and *eidos*, resemblance.] A family of decapod brachyurous crustaceans belonging to the family Catantopidae, placed by Milne-Edwards between the Gonopliacinae and the family of the Oxytomes. The shell is nearly square, the legs flat, the eyes placed upon short footstalks at the anterior angles of the shell, and the antennæ covered by the front of the latter. They are chiefly inhabitants of the seas of the East and West Indies.

Grapsus (graps'us), *n.* A genus of decapod crustaceans of the tribe Grapsidae, allied to the crabs. See GRAPSIDÆ.

Graptolite (grāp'tol-it), *n.* [Gr. *graptos*, written, inscribed, and *lithos*, stone.] One of a genus (Graptolithus) and sub-family

Block of Stone containing Graptolites.

(Graptolitidæ) of fossil hydrozoa, agreeing with the living sertularians in having a horny polypary, and in having the separate zooids protected by little horny cups, all springing from a common flesh or conosome, but differing in that they were not fixed to any solid object, but were permanently free. Graptolites usually present themselves as silvery impressions on hard black shales of the Silurian system, presenting the appearance of fossil pens, &c.; whence the name.

Graptolithus (grāp'tol'i-thus), *n.* The generic name of the graptolites. See GRAPTOLITE.

Graptolitic (grāp-to-lit'ik), *a.* Of or belonging to graptolites; produced by graptolites; containing graptolites; as, *graptolitic* markings; *graptolitic* slate.

Graptolite (grāp-to-lit-dē), *n. pl.* Graptolites, an extinct sub-family of the hydrozoa, found fossil in Silurian slate. See GRAPTOLITE.

Graptopora (grāp-to-pō-ra), *n.* [Gr. *graptos*, written, from *graphō*, to write, and *poros*, tail-stone.] A rare form of extinct coryophytes, supposed to unite the genera *Fenestella* and *Graptolithus*. It occurs in the lower Silurian rocks, and appears in leaf-like bundles of the lines radiating from numerous central pores.

Grapy (grāp'i), *a.* Composed of or resembling grapes. 'The *grapy* clusters.' *Addison.*

Grasp (grasp), *v.t.* [Comp. G. *grapsen*, to snatch, from O. G. *grappen*, *graben*, from root of *grab* (which see); It. *graspere*, to grasp, is probably from the German.] 1. To seize and hold by clasping or embracing with the fingers or arms.

Long arms stretch'd as to *grasp* a flyer. *Tennyson.*

2. To catch; to seize; to lay hold of; to take possession of; as, kings often *grasp* more than they can hold.—3. To seize by the intellect; to become thoroughly acquainted or conversant with; to comprehend.

To know the truth of things, to have cognizance of that which is real, we must penetrate beneath the surface, eliminate the accidental and irrelevant, and *grasp* the principle or essence which underlies and interprets appearances. *Dr. Caird.*

Grasp (grasp), *v.i.* 1. To catch or seize; to gripe.—2. To struggle; to strive.

His hands abroad display'd, as one that *grasps*
And tugg'd for life. *Shak.*

3. To seize with eager greed; to seize avariciously.

3. An instrument used for turning iron after it has been roughed out by the heel-tool.

Grave-robbor (gräv'rob-ēr), *n.* One who robs a grave; one who takes a dead body out of a grave; a resurrectionist.

Gravery (gräv'ē-ri), *n.* The process of engraving or carving; engraving; engraving.

Neither shall you hear of any piece either of picture or *gravery* and enshining, that came out of a *gravel* hand. *Dezob.*

Graves (grävz), *n. pl.* [L.G. *green*.] The dregs at the bottom of the pot in melting tallow. See GRAVES.

Gravestone (gräv'stōn), *n.* A stone laid over a grave, or erected near it, as a monument to preserve the memory of the dead.

Graveyard (gräv'yārd), *n.* A yard or inclosure for the interment of the dead.

Gravie (gräv'ik), *n.* Pertaining to or causing gravitation; as, *gravie* forces; *gravie* attraction. *Goodrich*. [Rare.]

Gravid (gräv'id), *a.* [L. *gravidus*, from *gravis*, heavy.] Being with child; pregnant. *Sir T. Herbert*.

Gravitate (gräv'id-āt), *v.t.* [L. *gravido*, *gravitatum*, to load, to impregnate, from *gravidus*, pregnant.] To cause to become full or gravid.

Her womb is said to bear him (blessed is the womb that bare thee), to have been *gravitated*, or great with child. *Barrow*.

Gravitation, Gravidity (grä-vit-ä'shon, grä-vit-ä'ti), *n.* The act of gravitating or making pregnant, or state of being gravitated or made pregnant; pregnancy; impregnation.

The signs of *gravidity* and obstructions are hard to be distinguished in the beginning. *Arbutus*.

Gravigrada (grä-vi-grä'da), *n. pl.* [L. *gravis*, heavy, and *gradus*, a step.] A family of huge fossil animals allied to the sloths of the present day, but of the bulk of a rhinoceros or hippopotamus, differing from the sloths in that their feet, instead of being suitable for climbing, were adapted for

digging. They appear to have obtained their food by excavating around the roots of trees and overturning their trunks.

Gravigrade (grä-vi-gräd), *n.* Properly, a member of the fossil family *Gravigrada* (which see). The term has been extended, however, by Blainville to the mammals characterized by a slow, heavy pace, as the elephant, hippopotamus, &c.

Gravimeter (grä-vim'et-ēr), *n.* [L. *gravis*, heavy, and Gr. *metron*, a measure.] An instrument for determining the specific gravities of bodies, whether liquid or solid. See HYDROMETER.

Gravimetric (grä-vi-met'rik), *a.* [L. *gravis*, heavy, and Gr. *metron*, a measure.] Of or pertaining to measurement by weight; specifically, in chem. applied to a method of analysis of compound bodies performed by decomposing them and finding the weight of their elements.

Graving (gräv'ing), *n.* 1. The act of cutting figures in hard substances; act of engraving. 2. That which is graved or carved; carved work; an engraving. 2 Chr. ii. 14.—3. Impression, as upon the mind or heart. 'Former *gravings* . . . upon their souls.' *Eikon Basilike*.

Graving-dock (gräv'ing-dok), *n.* A dock in which ships are graved; a dry dock into which ships are taken to have their bottoms examined, cleaned, and the like. See DOCK.

Graving-piece (gräv'ing-pēs), *n.* In ship-building, a small piece of wood put in to supply the defects of a plank.

Gravita (grä-vē-tä), [It.] In music, a term indicating that a piece is to be performed in slow, marked, and solemn time, and with an earnest, dignified expression.

Gravitate (grä-vi-tät), *v.t. pret. & pp. gravitated; ppr. gravitating.* [Fr. *graviter*, from L. *gravis*, from *gravis*, heavy.] To be affected by gravitation; to exert a force or pressure upon, or tend to move under the influence of gravitation.

Gravitation (grä-vi-tä'shon), *n.* The act of gravitating or tending to a centre of attraction; the force by which bodies are pressed or drawn, or by which they tend toward the centre of the earth or other centre, or the effect of that force. The attraction of gravitation exists between bodies in the mass, and acts at sensible distances. It is thus distinguished from chemical and cohesive attractions, which unite the particles of bodies together, and act at insensible distances, or distances too small to be measured.—*Terrestrial gravitation*, gravitation which respects the earth, or by which bodies descend or tend towards the centre of the earth. All bodies, when unsupported, fall by gravitation towards the earth in straight lines tending to its centre.—*General or universal gravitation*, gravitation by which all the planets tend towards one another, and by which all the bodies and particles of matter in the universe tend towards one another. The theory of universal gravitation was established by Sir Isaac Newton, who laid down the law that every particle of matter within the universe attracts every other particle with a force proportional directly to the product of the numbers representing their mass, and inversely to the square of the distance separating one from the other.

Gravitative (grä-vi-tät-iv), *a.* Causing to gravitate or tend to a centre. *Coleridge*.

Gravity (grä-vi-ti), *n.* [Fr. *gravité*; L. *gravis*, from *gravis*, heavy. See GRAVE, *a.*] 1. The state of being grave or weighty; heaviness; as, the *gravity* of lead.—2. Solemnity of deportment or character; solemnity of demeanour; seriousness. 'Great Cato there, for *gravity* renowned.' *Shak.*—3. Relative importance, significance, dignity, and the like; weight; enormity. 'According to the *gravity* of the fact.' *Hooker*.

They derive an importance from . . . the *gravity* of the place where they were uttered. *Burke*.

4. The tendency of a mass of matter toward a centre of attraction, especially toward the centre of the earth; centripetal force; terrestrial gravitation.—5. In music, lowness or depth of tone or note.—*Centre of gravity*. See CENTRE.—*Absolute gravity*, that by which a body descends freely and perpendicularly in a vacuum or non-resisting medium.—*Relative gravity*, that by which a body descends when the absolute gravity is constantly counteracted by a uniform but inferior force, such as in the descent of bodies down inclined planes, or in resisting mediums, as air and water.—*Specific gravity*, the weight belonging to an equal bulk of

every different substance; the relative gravity or weight of any body or substance considered with regard to the weight of an equal bulk of some other body which is assumed as a standard of comparison. The standard for the specific gravities of solids and liquids is pure distilled water at the temperature of 62° Fahr., which is reckoned unity, and by comparing the weights of equal bulks of other bodies with this standard we obtain their specific gravities. Thus, if we take equal bulks of water, silver, and platinum, and weigh them, the silver will be found to be 10.5 times and the platinum 21.4 times heavier than the water; and reckoning the specific gravity of water unity, the specific gravity of silver is said to be 10.5 and that of platinum 21.4. The practical rule is, weigh the body in air, then in pure distilled water, and the weight in air divided by the loss of weight in water will give the specific gravity of the body. One substance is said to have a greater specific gravity than another when a given bulk of the former weighs more than the same bulk of the latter. In designating the specific gravities of gases the standard or unity is atmospheric air.—*Line of direction of gravity*, the straight line which passes through the centre of gravity of a body in a direction towards the centre of the earth; the line which the centre of gravity describes when the body is allowed to fall freely.

Gray (grä'vi), *n.* [From *graves*, *graves*, L.G. *green*, G. *grabe*, the dregs of melted tallow.] The fat and other liquid matter that drips from flesh in cooking made into a dressing for the meat when served up.

Gray, Grey (grä), *a.* [A. Sax. *grey*, D. *grauw*, Icel. *grár*, Dan. *graa*, G. *grau*, gray. Probably connected with G. *greis*, an old man.] 1. Of the colour of hair whitened by age; hoary; hence, white with a mixture of black, as the colour of ashes.

These *gray* and *dun* colours may be also produced by mixing whites and blacks. *Newton*.

2. Having gray hairs; gray-headed.

'A year hence.' 'We shall both be *gray*.' *Tennyson*.

3. Old; mature; as, *gray* experience.

Gray, Grey (grä), *n.* 1. A gray colour; a dull or neutral tint.

The walls bear the dim, soft browns and greys of age. *Quida*.

2. An animal of a gray colour, as a horse, a badger, and a kind of salmon (*Salmo erax*).

Gray-beard, Grey-beard (grä'bērd), *n.* 1. A man with a gray beard; an old man. 'Love, which *gray-beards* call divine.' *Shak.*—2. A name given to stoneware drinking-jugs brought into use in the early part of the sixteenth century, which had a bearded face (resembling that of Cardinal Bellarmine, in ridicule of whom for his opposing the reformed religion these jugs were designed) in relief on the front part of the neck. The word is still in use in Scotland and north of England to designate a large earthen jar or bottle for holding spirituous liquor.

Gray-beard, Grey-beard (grä'bērd), *a.* Having a gray beard.

Hold off, unhand me, *gray-beard* loon. *Coleridge*.

Gray-bird (grä'bērd), *n.* A species of thrush.

Gray-falcon (grä'fä-ken), *n.* The peregrine falcon.

Grayfly (grä'fli), *n.* The trumpet-fly.

Grayhound (grä'hound), *n.* Greyhound (which see).

Grayish (grä'ish), *a.* Somewhat gray; gray in a moderate degree.

Gray-lag (grä'lag), *n. or a.* [Lag is probably the A. Sax. *lagu*, Icel. *lög*, lake, water, or as Yarell conjectures *lā*, *lago*, the domesticated goose being perhaps brought originally from Italy.] A popular name for the *Anser ferus*, the common wild goose or fen-goose of Europe, and the supposed original of the domestic goose.

Grayle, † (gräl), *n.* [Fr. *grêle*.] Gravel. *Spenser*.

Grayle (gräl), *n.* Same as *Gradual*, 2.

Grayling (grä'ling), *n.* *Thymallus vul-*

Grayling (*Thymallus vulgaris*).

garis, a voracious fish of the family Salmonidae, called also *Umber*, about 16 or 18 inches

in length, of a more elegant figure than the trout; the back and sides are of a silvery gray colour. It is found in clear rapid streams in the north of Europe, and is excellent food.

Grayly, Greyly (grā'li), *adv.* In a gray colour or colour; with a gray tinge.

It may be the most important thing about a pollard willow that it comes *grayly* against a cloud, or *grayly* out of a pool. *Ruskin.*

Gray-malkin (grā'mā-kīn), *n.* (See GRIMAL-KIN.) A gray cat. *Shak.*

Gray-mare, Grey-mare (grā'mār), *n.* A cant term for a wife; as in the saying, 'The *gray-mare* is the better horse,' which means that 'the wife rules the husband;' hence, a wife who rules her husband; a domineering wife.

Ah! Glorvina, what a *gray-mare* you might have become had you chosen Mr. B. for your consort! *Thackeray.*

Gray-mill, Gray-millet (grā'mil, grā'mil-ēb), *n.* A plant, *Lithospermum officinale*. See GROMWELL.

Grayness, Greyness (grā'nes), *n.* The state or quality of being gray.

Gray-owl (grā'oul), *n.* The tawny-owl (*Strix stridula*), a common British species inhabiting thick woods or strong plantations of evergreens, and feeding indiscriminately on leversets, young rabbits, moles, rats, mice, birds, frogs, and insects.

Gray-pease (grā'pēz), *n. pl.* Common pease in a dried state.

Graystone (grā'stōn), *n.* In *geol.* a grayish or greenish, compact, volcanic rock, composed of felspar and augite, or hornblende, and allied to basalt.

Graywacke, Grauwacke (grā-wa'ke, grō-wa'ke), *n.* [*G. grauwacke*—*grau*, gray, and *wacke*, a German mining term for a kind of rock.] Metamorphic sandstone in which grains or fragments of various minerals, as quartz and felspar, or of rocks, as slate and siliceous clay rocks, are embedded in an indurated matrix, which may be siliceous or argillaceous. The colours are gray, red, blue, or some shade of these. The term, as used by the earlier writers, included all the conglomerates, sandstones, and shales of the older formations, when these had been subjected to considerable change. At first it was nearly synonymous with Silurian strata, these in this country, and especially in Scotland, yielding the only genuine graywacke.

Gray-weather (grā-wēth-ēr), *n.* In *geol.* a large boulder of siliceous sandstone. Of this kind are the stones forming the circle of Stonehenge, which are derived either from the Woolwich and Reading beds or from the Bagshot sands.

Graze (grāz), *v. t. pret. & pp. grazed*; *ppr. grazing*. [Perhaps a form of *grate*, to rub; *G. kraizen*, O.H.G. *chrazōn*, or the root meaning may be to skim along the grass: see *GRAZE*, to pasture.] To rub or touch lightly in passing; to brush lightly the surface of in passing; as, the bullet *grazed* the wall or the earth.

Whose solid virtue
The shot of accident, nor dart of chance,
Could neither graze nor pierce. *Shak.*

Graze (grāz), *v. t.* To pass so as to touch or rub lightly; to pass with a touch or rub, such as to ruffle the skin.

The shot . . .
Pierced Talgol's gaberdine, and *grazing*
Upon his shoulder, in the passing,
Lodg'd in Magnano's brass habergeon,
Who straight 'A surgeon' cried, 'A surgeon!' *Hudibras.*

Graze (grāz), *v. t. pret. & pp. grazed*; *ppr. grazing*. [*A. Sax. grāsian*, from *græs*, grass; comp. *D. grāzen*, to graze, and *gras*, grass, *G. grāsen* and *gras*.] 1. To feed or supply with growing grass; to furnish pasture for; as, the farmer *grazes* large herds of cattle.

He hath a house and a barn in repair, and a field or two to *graze* his cows, with a garden and orchard. *Swift.*

2. To feed on; to eat from the ground, as growing herbage.

The lambs with wolves shall *graze* the verdant mead. *Pope.*

3. To tend while grazing, as cattle.

Jacob *graz'd* his uncle Laban's sheep. *Shak.*

Graze (grāz), *v. t.* 1. To eat grass; to feed on growing herbage; as, cattle *graze* on the meadows.—2. To supply grass.

Then the ground continueth the wet, whereby it will never *graze* to deprive that year. *Bacon.*

3. To move on devouring, as spreading fire.

As every state lay next to the other that was oppressed, so the fire perpetually *grazed*. *Bacon.*

[In the last sense *graze* may be connected

with *L. grassor*, to go about, to go about with hostile intentions, to attack.]

Graze (grāz), *n.* The act of grazing or rubbing slightly; a slight rub or scratch; a light touch.

Paul had been touched—a mere *graze*—skin deep. *Lever.*

Graze (grāz), *n.* The act of grazing or feeding on grass.

Then he devoted himself to unharnessing Dobbin, and turning him out for a *graze* on the common. *Hughes.*

Grazer (grāz'ēr), *n.* One that grazes or feeds on growing herbage.

Grazier (grā'zhēr), *n.* One who grazes or pastures cattle and rears them for the market; a farmer who raises and deals in cattle.

Grazierly (grā'zhēr-lī), *a.* Relating to or like a grazer. *Heber.* [Rare.]

Grazing (grā'zing), *n.* 1. The act of feeding on grass.—2. A pasture.

Grazing-ground (grā'zing-ground), *n.* Ground for cattle to graze on.

Grazioso (grā-tai-ō'sō), [*It.*] In music, an instruction to the performer that the music to which this word is affixed is to be executed elegantly and gracefully.

Gre, t *n.* [*Fr. grā*, from *L. gratum*, that which is pleasant, *gratus*, pleasant.] Pleasure; satisfaction.

Gre, t *n.* A step; a degree; superiority.

Chaucer. See GRE.

Grease (grēs), *n.* [*Fr. graisse*; *It. grasso*, from *L. crassus*, fat, gross. *Akin* to Gael. *creis*, fat.] 1. Animal fat in a soft state; oily or unctuous matter of any kind, as tallow, lard; but particularly the fatty matter of land animals, as distinguished from the oily matter of marine animals.—2. In *farriery*, a swelling and inflammation in a horse's legs attended with the secretion of oily matter and cracks in the skin.

Grease (grēz or grēs), *v. t. pret. & pp. greased*; *ppr. greasing*. 1. To smear, anoint, or daub with grease or fat.—2. To bribe; to corrupt with presents.

Envy not the store
Of the *greas'd* advocate that grinds the poor. *Dryden.*

3. In *farriery*, to affect with the disease called grease.

Grease-box (grēs'boks), *n.* The receptacle over the axle of a locomotive or railway carriage for holding grease; the portable box in which grease is carried to replenish the axle.

Grease-cock (grēs'kok), *n.* In *steam-engines*, a short pipe, with two stop-cocks, fixed in the cylinder-cover, for the purpose of introducing melted grease into the cylinder to lubricate the piston, without allowing the steam to escape.

Greaser (grēs'ēr), *n.* 1. One who or that which greases, as the person who looks after supplying the wheels of locomotives, carriages, and waggons with grease.—2. A name of contempt given by the people of the United States to a Mexican creole.

The Americans call the Mexicans *greasers*, which is scarcely a complimentary sobriquet; although the term 'greaser' camp' as applied to a Mexican encampment is truthfully suggestive of filth and squalor. *Murray.*

Greasily (grēs'li), *adv.* In a greasy manner; as, (a) with grease or an appearance of it. (b) Grossly; indelicately.

You talk *greasily*, your lips grow foul. *Shak.*

Greasiness (grēs'lī-nes), *n.* The quality or state of being greasy; oiliness; unctuousness; grossness.

Greasy (grēs'ī), *a.* 1. Composed of or characterized by grease; oily; fat; unctuous; as, greasy food.—2. Smeared or defiled with grease. 'Mechanic slaves with *greasy* aprons.' *Shak.*—3. Like grease or oil; smooth; seemingly unctuous to the touch; as, a fossil that has a *greasy* feel.—4. Fat of body; bulky. [Rare.]

Let's consult together against the *greasy* knight (Falstaff). *Shak.*

5. Gross; indelicate; indecent.

Chaste cells, when *greasy* Aretine,
For his rank fido, is surnamed divine. *Marston.*

6. In *farriery*, affected with the disease called grease; as, the legs of the horse are *greasy*.

Great (grāt), *a.* [*A. Sax. grēat*; comp. *L. G. and D. groot*, *Fris. grat*, *O.G. grōz*, *G. gross*, *great*. Pott is of opinion that it is of the same origin as *L. grandis*.] The most general meanings of this word are large or considerable in extent, number, or degree; hence, distinguished from other things of the same kind by possessing in a large or

unusual degree the characteristic quality or attribute of the class, or any quality or attribute regarded as characteristic for the time being; hence, remarkable, uncommon, notable. The principal usages may be given as follows.—1. Large in bulk, surface, or linear dimensions; of wide extent; big; grand; immense; enormous; expanded; as, a *great* body; a *great* house; a *great* farm; a *great* lake; a *great* length; a *great* distance. 2. Large in number; numerous; as, a *great* many; a *great* multitude; a *great* army.—3. Large, extensive, or unusual in degree; as, *great* fear; *great* love; *great* strength; *great* wealth; *great* power; *great* influence; *great* folly.—4. Long continued; of long duration; as, a *great* while; a *great* interval of time. 5. Important; weighty; involving important interests; as, a *great* argument; a *great* truth; a *great* event; a thing of no *great* consequence.—6. Chief; principal; as, the *great* seal of England.—7. Holding an eminent or prominent position in respect of mental endowments or acquirements, virtue or vice, rank, office, power, or the like; eminent; distinguished; celebrated; notorious; as, the *great* Creator; a *great* genius; a *great* hero; a *great* philosopher or botanist; a *great* scholar; Peter the *Great*.

No ceremony that to *great* ones 'longs,
Not the king's crown, nor the deputed sword . . .
Become them with one-half so good a grace
As mercy does. *Shak.*

Thou slave, thou wretch, thou coward;
Thou little valiant, *great* in villany. *Shak.*

8. Of elevated sentiments; generous; noble; as, he has a *great* soul.—9. On an extensive scale; sumptuous; magnificent; as, a *great* feast or entertainment.—10. Wonderful; sublime; as, a *great* conception or idea.

Great are thy works, Jehovah, infinite
Thy power! *Milton.*

11. Expressive of haughtiness or pride; proud; as, he was not disheartened by *great* looks.—12. Pregnant; teeming; filled; as, *great* with young.

His eyes sometimes even *great* with tears. *Sidney.*

13. Hard; difficult.

It is no *great* matter to live lovingly with good-natured and meek persons. *Fer. Taylor.*

14. Denoting a degree of consanguinity, in the ascending or descending line; as, *great* grandfather, the father of a grandfather; *great great* grandfather, the father of a *great* grandfather, and so on indefinitely; and *great* grandson, *great great* grandson, &c.—*Great circle.* See under CIRCLE.—*Great gun.* See under GUN.—*Great organ*, a part of an organ, the largest and most powerful, played by a keyboard of its own, and forming in many respects an instrument by itself.—*The great, pl.* the powerful, the rich, the distinguished persons of rank and position.

Great (grāt), *n.* 1. The whole; the gross; the lump or mass; as, a carpenter contracts to build a ship by the *great*.

Gentlemen, I am sure you have heard of a ridiculous ass, that many years since sold lies by the *great*. *Nash.*

2. *pl.* The *great-go* at a university.

Lucy told the old ladies a good deal about herself and her father, and the old days in which Lawrence Desmond had read for 'greats' at Henley. *Miss Bradton.*

Great (grāt), *a.* [*A. Sax. grith*, peace.] Familiar as one on good terms; reconciled; friendly; intimate. [Old English and Scotch.]

Those that would not censure, or speak ill of a man immediately, will talk more boldly of those that are *great* with them. *Bacon.*

Great-bellied (grāt'bel-lid), *a.* Having a great belly; with child; pregnant. *Shak.*

Great-born (grāt'born), *a.* Nobly descended. *Dryden.*

Greatcoat (grāt'kōt), *n.* An over-coat; a topcoat.

Greaten (grāt'n), *v. t.* To make great; to enlarge; to magnify.

I called the artist but a *greatened* man. *E. B. Browning.*

Greaten (grāt'n), *v. i.* To become large; to increase; to dilate.

Being committed against an infinite majesty, it (sin) *greatens*, and rises to the height of an infinite demerit. *South.*

Great-go (grāt'gō), *n.* The examination for degrees at some universities. See under GO.

Great-hearted (grāt'hārt-ed), *a.* High-spirited; undefeated.

Greatly (grāt'hī), *adv.* 1. In a great manner or degree; much.

I will *greatly* multiply thy sorrow. *Gen. iii. 16.*

2. Nobly; illustriously.

By a high fate, thou *greatly* didst expire. *Dryden.*

3. Magnanimously; generously; bravely.

Where are these bold intrepid sons of war,
That greatly turn their backs upon the foe,
And to their general send a brave defiance?

Great-mercy (grat'mer-si), *n.* [Fr. *grand-merci*.] Great favour. *Spenser.*

Greatness (grat'nes), *n.* The state or quality of being great; as, (a) largeness of bulk, dimensions, number, or quantity; as, the greatness of a mountain, of an edifice, of a multitude, or of a sum of money. With reference to solid bodies, however, we more generally use *bulk*, *size*, *extent*, or *magnitude*, than *greatness*; as, the bulk or size of the body; the extent of the ocean; the magnitude of the sun or of the earth. (b) Large amount; high degree; extent; as, the greatness of a reward; the greatness of virtue or vice. (c) High rank or place; elevation; dignity; distinction; eminence; power; command.

Farewell, a long farewell to all my greatness. *Shak.*

(d) Swelling pride; affected state.

It is not of pride or greatness that he cometh not aboard your ships. *Bacon.*

(e) Magnanimity; elevation of sentiment; nobleness; as, greatness of mind.

Virtue is the only solid basis of greatness. *Rambler.*

(f) Strength or extent of intellectual faculties; as, the greatness of genius. (g) Force; intensity; as, the greatness of sound, of passion, heat, &c.

Greave (grév), *n.* A steward; a peace-officer; a reeve; a grievé. [Old English and Scotch.]

Greave (grév), *n.* Same as *Grove*. *Fairfax.*

Greave (grév), *n.* Same as *Grove*. *Spenser.*

Greave (grév), *v.t.* *Naut.* to clean, as a ship's bottom, by burning; to grave.

Greave (grév), *n.* [Fr. *grève*, armour for the leg; Pg. *greba*, probably from Ar. *djavrab*, Egypt. *gavrab*, a covering for the legs.] Armour, made of bronze, brass, or other metal, and lined with some soft substance, worn on the front of the lower part of the leg, across the back of which it was buckled. All his greaves and cuisses dash'd with drops of onset. *Tennyson.*

Greaves (grév), *n. pl.* [L. *green*, greaves; G. *griebe*, dregs of melted tallow. Comp. *gravy*.] The insoluble parts of tallow gathered from the melting-pots, and made up into cakes for dog's meat. In Scotland such cakes are called *cracklings*.

Grebe (gréb), *n.* [Fr. *grebe*; G. Swiss, *grebe*, perhaps from Arner. *krib*, W. *erib*, a comb, a crest, because one variety (*Podiceps cristatus*), known as the great crested grebe, has a comb or crest.] The common name of the birds of the genus *Podiceps*, family *Colymbidae*, characterized by a straight conical bill, no tail, tarsus short, toes flattened, separate, but broadly fringed at their edges by a firm membrane, and legs set so far back that on land the grebe assumes the upright position of the penguin. The geographical distribution of the genus is very wide, these birds haunting seas as well as ponds and rivers. They are excellent swimmers and divers; the little grebe or dabchick is well known for its quickly-repeated plungings. They feed on small fishes, frogs, crustaceans, and insects, and

Schvauian or Horned Grebe (*Podiceps cornutus*).

their nests, formed of a large quantity of grass, &c., are generally placed among reeds and sedges, and rise and fall with the water. Five species are British, the great crested grebe (*P. cristatus*), the little grebe or dabchick (*P. minor*), the Slavonian or horned grebe (*P. cornutus*), the red-necked (*P. rubricollis*), and the eared (*P. auritus*). The three last are winter visitors, but the two first remain with us all the year. The great grebe is about 21 to 22 inches long, and has been called satin grebe from its beautiful silvery breast-plumage, much esteemed as material for ladies' mufts;

the little grebe is about 9 inches long, and is by far the most common. The motions of the grebes on land are singularly ungainly; they walk with difficulty, and sometimes shuffle on their bellies like seals.

Greece (grés), *n.* In her, same as *Greece*. **Grecian** (gré'shan), *a.* Pertaining to Greece; Greek.—*Grecian architecture*, the architecture which flourished in Greece from about 500 years before the Christian era, or perhaps a little earlier, until the Roman conquest. It had its origin in the wooden hut formed of posts set in the earth, and covered with transverse poles and rafters. Its beginnings were very simple, being little more than imitations in stone of the original posts and beams. By degrees these were modified and decorated so as to give rise to the distinc-

Temple of Jupiter at Olympia—Doric order.

tion of what are called the orders of architecture, which comprehend the Doric, Ionic, and Corinthian, to which may perhaps be added the Caryatic order. Of these the Doric is the most distinctive, and may be regarded as the national style. The architecture of the Greeks is known to us only through the remains of their sacred edifices and monuments, and we have no means of ascertaining in what manner it was applied to their houses. Simple and grand in their general composition, perfect in proportion, enriched yet not encumbered with ornament of consummate beauty, these remains cannot be surpassed in harmony of proportion and beauty of detail. The arch in any form seems never to have been used.—*Grecian fire*, same as *Greek fire*. See under *GREEK*, *a.*

Grecian (gré'shan), *n.* 1. A native of Greece. 2. One who adopted the language and manners of the Grecians. Acts vi. 1.—3. One versed in or studying the Greek language.

Grecism (gré'sizm), *n.* An idiom of the Greek language.

Milton has infused a great many latinisms, as well as *grecisms* and hebraisms, into his poem. *Addison.*

Grecize (gré'siz), *v.t.* pret. & pp. *grecized*; ppp. *grecizing*. 1. To render Grecian.—2. To translate into Greek.

Grecize, Grecianize (gré'siz, gré'shan-iz), *v.t.* To speak the Greek language.

Grecque (grék), *n.* [Fr. *fret-work*.] An apparatus introduced into coffee-pots for holding the coffee grounds. The bottom is perforated with minute holes, and the hot water is poured through it, carrying with it the aroma of the coffee without the grounds. Grenadier of 1745, blowing his fuse to light grenade.

of long service and acknowledged bravery were selected for this duty, so that they soon formed a kind of élite. They were the foremost in assaults. At first there were only a few grenadiers in each regiment, but companies of grenadiers were formed in France in 1670, and in England a few years later. When hand grenades went out of general use, the name was still retained for the company, the members of which were of great height and were distinguished by a particular dress, as for instance the high bear-skin cap. In the British and French armies the grenadier company was the first of each battalion. Now the companies of a battalion or regiment are equalized in size and other matters, and the title in the British army remains only to the regiment of grenadier guards. — 2. Sax. *hwelf*, whelp.] The name of a distinguished princely family in Italy, originally German, and re-transported into Germany in the eleventh century, still, however, retaining large possessions in Italy. Welf, son of Isenbrand, Count of Altorf, one of the vassals of Charlemagne, is said to have been the first to bear the name. It still continues in the two branches of the House of Brunswick—the ducal and the royal, to which latter the reigning family of Britain belongs. After the battle of Weinsberg, fought in 1140 against the Waiblingens (Ghibellines), where the name of the head of the house was given as a rallying cry or watchword to his followers, the term became gradually extended to all the members of that faction in Italy which aimed at national independence and supported the pope, while that of Ghibelline was given to the supporters of the emperors in their endeavour to subjugate Italy to Germany. The contest lasted for nearly 300 years, desolating both countries. Latterly the term was applied to a supporter of democratic principles, and that of Ghibelline to an upholder of aristocracy. The terms fell into disuse towards the end of the fifteenth century. See *GHIBELLINE*.

Guidance (gí'd'ans), *n.* [See **GUIDE**.] The act of guiding; direction; government; a leading.

His studies were without *guidance* and without plan. *Macaulay.*

Guide (gíd), *v.t.* pret. & pp. *guided*; ppr. *guiding*. [*Fr. guider*; *It. guidare*; *Sp. guiar*—of Teutonic origin, and akin to *G. weisen*, to show, to direct, to lead, and probably to *Goth. vilan*, to watch over, *A. Sax. witan*, to observe, to know. For change of *w* into *g* see **GUIDE**.] 1. To lead or direct in a way; to conduct in a course or path; as, to *guide* an enemy or a traveller who is not acquainted with the road or course.

I wish you'd *guide* me to your sovereign's court. *Shak.*

2. To direct; to regulate.

He will *guide* his affairs with discretion. *Ps. cxli. 5.*

3. To influence in conduct or actions; to give direction to.

When nothing but the interest of this world *guides* men, they many times conclude that the slightest wrongs are not to be put up. *Kettelwell.*

4. To instruct and direct; as, let parents *guide* their children to virtue, dignity, and happiness.—5. To attend to; to look after; to superintend.

I will that the younger women marry, bear children, and *guide* the house. *1 Tim. v. 14.*

6. To treat; to use; as, the laddie was ill *guided*. [*Scotch*.]—*Guide*, *Direct*, *Sway*. *Guide* implies that the person guiding either accompanies or precedes us; while *direct* merely infers that he gives instructions, which may be done from a distance. *Direct* thus implies that we must reflect and to some extent exercise our own judgment; *guide*, that we trustingly follow where we are led. *Sway* is used of some influence (generally bad) which turns us aside from what otherwise would have been the course followed, and in this sense is nearly equal to *bias*. We are *guided* or *directed* by our principles or reason, and *swayed* by our passions or feelings.

Guide (gíd), *n.* [*Fr. guide*, *It. guida*, *Sp. guía*. See the verb.] 1. A person who leads or directs another in his way or course; a conductor; as, the army followed the *guide*. 2. One who or that which directs another in his conduct or course of life; a director; a regulator.

He will be our *guide*, even to death. *Ps. xlviii. 14.*
We have sure experience for our *guide*. *Dryden.*
They were dangerous *guides*, the feelings. *Tewisson.*

3. A guide-book (which see).—4. In *technology*, applied to various contrivances intended to direct or keep to a fixed course or motion. See **GUIDE-BAR**, **GUIDE-RAIL**, &c.

Guide-bar, **Guide-block** (gíd'bär, gíd'blok), *n.* One of two pieces of metal with parallel sides fitted on the ends of the crosshead of a steam-engine, on which it slides and by which it is kept parallel to the cylinder. They are a substitute for the parallel motion. Called also *Slide-rod* and *Slide*.

Guide-book (gíd'buk), *n.* A book for directing travellers and tourists as to the best routes, &c., and giving them information about the places they visit.

Guideless (gíd'les), *a.* Destitute of a guide; wanting a director. *Dryden.*

Guide-post (gíd'pöst), *n.* A post at the forks of a road for directing travellers the way; a finger-post. *Burke.*

Guider (gí'd'ér), *n.* A guide; a director.

Guide-rail (gíd'räl), *n.* In *rail*, an additional rail placed midway between the two ordinary rails of the track, and employed in connection with devices on the engine or carriages to keep a train from leaving the track in curves, crossings, or steep gradients.

Guideress, *t. n.* A female guide or leader. *Chaucer.*

Guide-screw (gíd'skrö), *n.* In *mach.* a screw for directing or regulating certain movements.

Guide-tube (gíd'tüb), *n.* In *mach.* any contrivance by which a boring-bit or drill is guided, but which consists commonly of a fixed tube to prevent swerving.

Guildry (gí'd'rí), *n.* In Scotland, a guild; the members of a guild.

Guile (gil), *n.* [Romance form of Teut. *wile* (which see); *O. Fr. guile*, *guile*. For change of Teut. *w* into *romance g* see **GUIDE**.] Craft; cunning; artifice; duplicity; deceit.

Behold an Israelite indeed, in whom is no *guile*. *In. i. 47.*
O, that deceit should stain each gentle slave's,
And with a virtuous vizard hide foul *guile*. *Shak.*

We may, with more successful hope, resolve
To wage by force or *guile* eternal war. *Milton.*

Guile† (gil), *v.t.* 1. To disguise craftily.

Is it repentance,

Or only a fair shew to *guile* his mischiefs? *Beau. & Fl.*

2. To deceive; to delude. *Spenser.*

Guiled† (gil'ed), *a.* Deceiving; treacherous.

This ornament is but the *guiled* shore
To a most dangerous sea. *Shak.*

Guileful (gil'ful), *a.* Full of guile; intended to deceive; cunning; crafty; artful; wily; deceitful; insidious; treacherous.

Without expense at all,

By *guileful* fair words peace may be obtain'd. *Shak.*

Guilefully (gil'ful-lí), *adv.* In a guileful manner; treacherously; deceitfully. 'The tempter *guilefully* replied.' *Milton.*

profit to the adventurous inhabitants. The common guillemot (*U. troile*) is about 18 inches in length, and lays only one egg, of large size, which is esteemed a delicacy. It is for the eggs and the young birds the fowlers descend the rocks. If the egg is removed another is laid. The guillemot flies and runs tolerably well, and is said to convey its young to the water on its back. The black guillemot (*U. grylle*) is about 14 inches long, and lays three eggs, often on the bare rock. It is not so common as the former. Other species are enumerated among British birds, but are rare.

Guillevat (gil'lé-vat), *n.* [*From Fr. guiller*, to ferment, *Armor. goell*, ferment, and *E. vat*.] A vat for fermenting liquors.

Guilloche (gil'lósh'), *n.* [*Fr.*, said to be after a workman named *Guilloche*, the inventor.] In *arch.* an ornament in the form of two or more bands or strings twisting over each

other so as to repeat the same figure in a continued series by the spiral returning of the hands. The term is also applied, but improperly, to a fret.

Guillotine (gil-lo-tén'), *n.* 1. An engine for beheading persons at one stroke—an invention of the middle ages—adopted with improvements by the National Assembly of France during the first revolution on the proposal of a Dr. *Guillotin*, after whom it is named. In this apparatus decapitation is effected by means of a steel blade loaded with a mass of lead, and sliding between two upright posts, grooved on their inner sides, the person's neck being confined in a circular opening between two planks, the upper one of which also slides up or down.

Guillotine as used in Paris.

The condemned is strapped to a board, which in the cut is shown resting horizontally on the table in front of the upright posts, but which is easily drawn forward and set upright when necessary, and again

canted over upon the table and rapidly moved up so as to place the neck of the condemned within the semicircle of the lower plank, the other being raised for the purpose. On the right of the table is a large basket or trough of wicker-work for the reception of the body. Under the place where the head rests is an oblong trough for its reception. The knife is fixed to the cap or lintel on the top of the posts by a claw in the form of an 8, the lower part of which opens as the upper part closes. This claw is acted upon by a lever to which a cord is attached. When the head of the condemned is in position the cord is pulled, and by the action of the lever the knife is set at liberty, descending by the grooves in the upright posts and falling upon the neck of the condemned just behind the planks which keep the head in position. The scaffold, which is surrounded by an open railing, is raised 6 or 7 feet from the ground.—2. A machine which cuts by a knife descending between grooved posts, much used for cutting paper, straw, &c. Called also *Guillotine-cutter*.

Guillotine (gil-lo-tén'), *v. t. pret.* & *pp.* *guillotined*; *ppr.* *guillotining*. To behead by the guillotine.

Guills (gilz), *n.* [Comp. A. Sax. *geolo*, yellow.] A plant, the corn-marigold.

Guilt (gil't), *n.* [A. Sax. *gyllt*, a crime, from *gyldan*, to pay, to requite; Icel. *gjald*, payment, retribution, *gjaltu*, to pay, to yield; E. *yield* (which see).] 1. Criminality; that state of a moral agent which results from his wilful or intentional commission of a crime or offence, knowing it to be a crime or violation of law. Guilt implies both criminality and liability to punishment. Guilt may proceed either from a positive act or breach of law, or from voluntary neglect of known duty.—2. Criminality in a political or civil view; exposure to forfeiture or other penalty.

A ship incurs *guilt* by the violation of a blockade.

Kent.

3.† A crime; offence.

Close pent up *guilts*
Rive your concurring continents, and ask
These dreadful summoners grace.

Shak.

Guiltlike (gil'ti-lik), *a.* Guilty.

Guiltily (gil'ti-li), *adv.* In a guilty manner.

His looks frightened the ambassador, who after looking *guiltily* for a little time at the grief-stricken man hurried away without a further word.

Thackeray.

Guiltiness (gil'ti-nes), *n.* The state of being guilty; wickedness; criminality; guilt.

He thought his flight rather to proceed of a fearful *guiltiness* than of a humble faithfulness.

Sir P. Sidney.

Guiltless (gil'ti-les), *a.* 1. Free from guilt, crime, or offence; innocent.

The Lord will not hold him *guiltless* that taketh his name in vain.

Ex. xx. 7.

2. Without experience; ignorant. 'Heifers *guiltless* of the yoke.'

Pope.

Such gardening tools, as art yet rude,
Guiltless of fire, had formed.

Milton.

Guiltlessly (gil'ti-les-li), *adv.* In a guiltless manner.

Guiltlessness (gil'ti-les-nes), *n.* State or quality of being guiltless. *Sir P. Sidney.*

Guilt-sick (gil'ti-sik), *a.* Made sick by or in consequence of guilt. 'A *guilt-sick* conscience.

Beau. & Fl.

Guilty (gil'ti), *a.* [A. Sax. *gyllig*. See **GUILT**.]

1. Having incurred guilt; having committed a crime or offence, or having violated a law by an overt act or by neglect, and by that act or neglect being liable to punishment; not innocent; criminal; morally delinquent; with of before the crime. 'The guilty kindred of the queen.' *Shak.*

Nor he, nor you, were *guilty* of the strife.

Dryden.

2. Pertaining to guilt; indicating or expressing guilt; as, a *guilty* flush instantly rose to his face.—3.† Conscious; cognizant; with of.

I'll give out . . . and swear it too, if thou'lt ha' me; and that I know the time and place where he stole it, though my soul be *guilty* of no such thing.

B. Jonson.

4.† Liable; owing; condemned to payment; with of.

They answered and said, He is *guilty* of death.

Mat. xxvi. 66.

Gods of the liquid realms on which I row,
If, given by you, the laurel bind my brow,
Assist to make me *guilty* of my vow.

Dryden.

Guimbard (jim'bärd), *n.* [Fr. *guimbarde*.] The Jew's-harp. [Rare.]

Guinea (gî-nê), *n.* [Because first coined of gold brought from *Guinea*, in Africa.] 1. A gold coin of Great Britain of the value of

21 shillings sterling; since the issue of sovereigns in 1817 no longer coined.

The *guinea*, so called from the *Guinea* gold out of which it was first struck, was proclaimed in 1663, and to go for twenty shillings; but it never went for less than twenty-one shillings.

Pinkerton.

2. A sum of money of the same amount; as, he has sold his picture for 1000 *guineas*.

Guinea-corn (gî-nê-korn), *n.* A plant, *Sorghum vulgare*. See **SORGHUM**.

Guinea-dropper (gî-nê-drop-ër), *n.* One who cheats by dropping counterfeit *guineas*.

Who now the *guinea-dropper's* bait regards,
Trick'd by the sharper's dice or juggler's cards.

Gay.

Guinea-fowl (gî-nê-foul), *n.* The *Numida meleagris*, a fowl of the rasorial order, family Phasianidae, closely allied to the peacocks and pheasants, a native of Africa, and common in *Guinea*, whence the name.

Guinea-fowl (*Numida meleagris*).

It is larger than the common domestic fowl, and has a short strong bill with a wattle hanging down at each side, the head naked and surmounted by a crest. Its colour is a dark gray, beautifully variegated with small white spots. The *guinea-fowl* was well known to the Romans, and has long been common in our own poultry-yards, of which it is rather a quarrelsome member. Both flesh and eggs are esteemed as food.

Guinea-grains (gî-nê-gränz), *n. pl.* Grains of paradise.

Guinea-grass (gî-nê-gras), *n.* A species of grass (*Panicum junetorum* or *P. maximum*) cultivated in the West Indies and Southern States of America, and used as fodder for horses. It is a native of West Africa, and of the same genus with millet.

Guinea-hen (gî-nê-hen), *n.* 1. A *guinea-fowl* (which see).—2. A courtesan. [Old slang.]

Ere I would drown myself for the love of a *guinea-hen* I would change my humanity with a baboon.

Shak.

Guinea-peach (gî-nê-pêch), *n.* A West African tropical plant (*Sarcocaulis excentricus*), having pink flowers and an edible fruit of the size of a peach. See **SARCOCAULIS**.

Guinea-pepper (gî-nê-pep-për), *n.* *Capsicum annuum*, a South American and Indian plant, which is frequently cultivated and preserved under the name of *Guinea-pepper*, and was introduced to England before 1543. In many parts of the south of Europe its fruit is eaten green by the peasants, and is preferred by them to onions or garlic. The name is also given to the seeds or dried fruit of several widely different plants, but agreeing in their peppery character and being natives of West Africa, as to the capsules or dried fruit of *Capsicum frutescens*, sold by druggists under the name of *guinea-pepper*, to the seeds of *Habzelia cethiopica*, and sometimes to grains of paradise. See **CAVEYNE PEPPER**.

Guinea-pig (gî-nê-pig), *n.* A rodent mam-

Guinea-pig (*Cavia cobaya*).

mal of the genus *Cavia* or *Cavy*, the *C. cobaya*, found in Brazil. It is about 7 inches in length, and of a white colour, variegated

with spots of orange and black. It is easily tamed, and is often kept in this and other countries as a domestic pet. The name *guinea-pig* is a sad misnomer, as the animal has nothing to do with *Guinea*, and of course is not related to the pig. *Guinea* may be by corruption for *Guiana*, and *pig* may have been suggested by the absence of a tail. See **CAVIA**.

Guinea-plum (gî-nê-plum), *n.* A West African tree (*Parinarium excelsum*), attaining the height of 60 feet, with long leaves and large terminal bunches of flowers, succeeded by a fruit about the size of an Imperatrice plum. This fruit is covered with a rough skin; the edible matter is a dry, farinaceous substance surrounding a large stone.

Guinea-worm (gî-nê-wërm), *n.* A species of worm, *Farilaria medinensis*, which is very common in hot countries, and often insinuates itself under the human skin, causing intense pain. When it shows itself externally it is extracted very slowly for fear of breaking it.

Guinlad (gwin'yad), *n.* Same as *Gwyniad*.

Gulpure (gë-pür), *n.* [Fr.] 1. An imitation of antique lace, very durable, equally beautiful, and less expensive.—2. A kind of gimp.

Guisard (giz'ard), *n.* A guiser. [Scotch.]

Guise (giz), *n.* [Fr. *guise*, the Romance equivalent of E. *wise*, mode, fashion, O.H.G. *wisu*, G. *weise*; in A. Sax. used only as a term in the formula, *as in rithetis*, righteous. Comp. *guard*, *ward*; *guile*, *wise*; *guarantee*, *warranty*; Fr. *guerre*, E. *war*; Fr. *Guillaume* (*Guilelmus*), Teut. *Wilhelm*. In each case the Teutonic form is the older, the *u* being changed into *gu* in passing into the Romance tongues, from the difficulty the Romance speaking people have in pronouncing it.] 1. External appearance; dress; garb; as, he appeared in the *guise* of a shepherd. 'Some, who under the *guise* of religion, sacrificed so many thousands.' *Swift*.

That love which is without dissimulation wears not the *guise* of modern liberality.

J. M. Mason.

2. Manner; mien; cast or behaviour.

Lo you, here she comes! This is her very *guise*; and, upon my life, fast asleep. Observe her; stand close.

Shak.

By their *guise*
Just men they seem.

Milton.

3. Custom; mode; practice; manner. 'To shame the *guise* of the world.'

Shak.

The swain replied, It never was our *guise* To slight the poor, or aught humane despise.

Pope.

Guise (giz), *v. t. and i.* To dress as a *guisard*; to assume or act the part of a *guisard*.

Then like a *guised* band, that for a while Has mimick'd forth a sad and gloomy tale.

Baillie.

Guiser (giz'ër), *n.* [From *guise*, the meaning being one who assumes a *guise* or garb other than his own.] A masker; a mummer; one who volunteers vocal music for money about the time of Christmas and the New-year.

Guitar (gi-tär'), *n.* [Fr. *guitare*, It. *chitarra*, L. *cithara*, Gr. *kithara*.] A musical stringed instrument, somewhat resembling the lute, much esteemed in Spain and Italy. It has six strings, which are played upon by twirling with the fingers of the right hand, while the notes are stopped by the fingers of the left hand upon the finger-board, which has frets across it. The three highest

strings of the guitar are generally of gut, and the three lowest of silk spun over with silvered wire.

Guit-guit (gwit/gwit), *n.* [From the sound of its voice.] The name given to a sub-family of passerine birds found in Australia and South America. See **CAREBINE**.

Guisard (giz'ard), *n.* A guiser or masker. [Scotch.]

Gula (gü'la), *n.* [L. *gula*, the throat.] In arch. same as *Gola* (which see).

Gular (gü'lär), *a.* [From L. *gula*, the throat or gullet.] Pertaining to the gullet.

Gulaund (gū'land), *n.* [Icel. *gulund*—*gul*, yellow, and *und*, a duck.] An aquatic fowl of a size between a duck and a goose, the breast and belly white, the head mallard green. It inhabits Iceland.

Gulch (gulch), *n.* [Allied to Sw. *gölka*, to gulch; D. *gölzig*, greedy.] 1. A swallowing or devouring.—2. A glutton.

You muddy gulch, dar'st look me in the face,
While mine eyes sparkle with revengeful fire!

Ant. Brewer.

3. A deep, abrupt ravine caused by the action of water; a gully. [United States.]

Gulch (gulch), *v.t.* To swallow greedily.

Gule (gul), *v.t.* In *her*. To give the colour of gules to. *Heywood.*

Gules (gūlz), *n.* [French *gules*, from Per. *gul*, a rose.] In heraldry, the term employed to indicate red. It is represented in an engraved escutcheon by vertical lines.

Gules.

Gulf (gulph), *n.* [Fr. *golfe*, It. *golfo*, Mod. Gr. *kōlphos*, Gr. *kōlyon*, gulf.]

1. A large indentation on the coast-line of a country or region and the sea embraced in it; a tract of water extending from the ocean or a sea into the land; a bay; a bight; as, the Gulf of Mexico; the Gulf of Venice.

2. An abyss; a chasm; a deep place in the earth; as, the Gulf of Avernus.

A gulf profound as that Serbionian bog,
Betwixt Domitian and Mount Casius old,
Where armies whole have sunk. *Milton.*

3. A whirlpool; an absorbing eddy. *Shak.*

4. That which gulfs or swallows; the gullet.

Scale of dragon, tooth of wolf,
Witches' mummy, maw and gulf
Of the ravin'd salt-sea shark. *Shak.*

5. Anything insatiable.

A gulf of sin swallowing gold. *Tennyson.*

6. A wide interval, as in station, education, and the like; as, the gulf that separates the higher and lower classes.—7. In Cambridge University, the place at the bottom of the list of passes, where the names of those who have barely escaped being plucked in examination are written. Their names are separated from those of the students who have passed creditably by a line.

The ranks of our curatehood are supplied by youths, whom at the very best merciful examiners have raised from the very gates of 'pluck' to the comparative paradise of the 'gulf.' *Sat. Rev.*

8. In *mining*, a large deposit of ore in a lode.

Gulf (gulph), *v.t.* 1. To swallow; to overwhelm, as by swallowing; to engulf. [Rare.]

If with thee the roaring waves
Should gulf him fathom-deep in brine. *Tennyson.*

2. In the University of Cambridge, to place in the gulf, or among those students who have barely escaped being plucked in their final examination.

Gulf-stream (gulf'strēm), *n.* A stream or current of warm water, which flows from the Gulf of Mexico through the channel between Cuba and America, past the Bermudas, touching the tail of the great bank of Newfoundland, and thence sweeps onwards towards Europe, part going north, and part returning southward to the tropics.

Gulf-weed (gulf'wēd), *n.* A genus of sea-weeds (*Sargassum*), of the sub-order Fucales, of which two species, *S. vulgare* and *S. bacciferum*, are found abundantly in the Atlantic Ocean as well as in the Pacific and the Indian Ocean.

They are tropical plants. In the Atlantic they chiefly occupy a more or less interrupted space between the 20th and 30th parallels of north latitude, called the Sargasso Sea, and are also plentiful in the Gulf-stream, whence the name. The *S. bacciferum* has grapelike air-vessels by which it is buoyed. The plants get detached from rocky shores, and after floating about for a time sink.

Gulph (gulph), *a.* Full of gulfs or whirlpools.

To pass the gulph purple sea that did no sea-rites know. *Chapman.*

Gul-gul (gul'gul), *n.* [Native name.] A sort of chunam or cement made of pounded sea-shells mixed with oil, which hardens like a

Gulf-weed (*Sargassum bacciferum*).

stone, and is put over a ship's bottom in India, so that worms cannot penetrate even when the copper is off.

Gulielma (gū'li-el-ma), *n.* [After Queen Caroline Wilhelmine, wife of Maximilian I. of Bavaria.] A genus of South American palms, of which *G. speciosa* or peach-palm is cultivated on the banks of the Amazon and Rio Negro, supplying the natives with food and other necessities. It grows to the height of 60 or 80 feet.

Gulist (gū'list), *n.* [L. *gulo*.] A glutton.

Gull (gul), *n.* [Old and Prov. E. *gull*, a young unledged bird of any kind; a nestling; comp. 'As that ungentele gull, the cuckoo's bird.' *Shak.*, 1 Hen. IV. v. 1. From Icel. *gul*, A. Sax. *geolo*, yellow, from the yellow colour of the beak. Comp. Fr. *bejavine*, yellow-beak, novice.] 1. A young unledged bird. *Shak.*—2. One easily cheated; a simpleton. 'A gull is he which seems, and is not wise.' *Sir J. Davies.*—3. A cheating or cheat; trick; fraud.

I should think this a gull, but that the white-bearded fellow speaks it. *Shak.*

Gull (gul), *v.t.* To deceive; to cheat; to mislead by deception; to trick; to defraud.

The vulgar, gull'd into rebellion, armed. *Dryden.*

Gull (gul), *n.* [From the Celtic. W. *guyllan*, Armor. *guelan*, Corn. *gullian*.] A natorial bird of the genus *Larus*, family Laridae, and order Longipennes of Cuvier. The gulls are web-footed and long-winged. They are exceedingly numerous, much on the wing, and particularly noisy. They are found on the shores of all latitudes, and are distinguished from other sea-fowls by their straight bill bending downwards towards the point, by their light body, supported by large wings, by slender legs, webbed feet, and a small hind toe. There are various species, as the common gull or sea-new (*L. canis*), 18 inches long; the black-headed gull (*L. ridibundus*),

Lesser Black-backed Gull (*Larus fuscus*).

also one of the most common in Britain, 16 inches long; the herring gull (*L. argentatus*), still larger; the kittiwake (*L. tridactylus*), smaller than any of the above, with no hind toe, whose eggs, with those of the gullenot, are the great object of cliff-fowling; the little gull (*L. minutus*); the wagel or great black-backed gull (*L. marinus*), 30 inches long; the lesser black-backed gull (*L. fuscus*); the ivory gull (*L. eburneus*); the burgomaster (*L. glaucus*), about the same size and not improbably identical with the preceding; and some others.

Gullage (gū'āj), *n.* Act of being gulled.

Had you no quirk
To avoid gullage, sir, by such a creature?

B. Jonson.

Gullicatcher (gul'kach-ēr), *n.* A cheat; a man who cheats or entraps silly people.

Guller (gul'ēr), *n.* One who gulls; a cheat; an impostor.

Gullery (gul'ē-ri), *n.* Cheating or cheat; fraud.

What more gulleries yet? they have cosed me of my daughters, I hope they will cheat me of my wife too. *Marmion.*

Gullet (gul'let), *n.* [Fr. *goulet*, neck of a bottle, *goulotte*, water-channel, from L. *gula*, the throat.] 1. The passage in the neck of an animal by which food and liquor are taken into the stomach; the esophagus. 2. Anything resembling the food-passage, either in shape or functions; as, (a) a channel for water.

A deep, impassable gullet of water, without bridge, ford, or ferry. *Fulter.*

(b) A preparatory cut or channel in excavations of sufficient width to admit of the earth waggons traversing it. (c) A peculiar concave cut in the teeth of some saw-blades.

(d) A gore in a shirt.

Gulley (gul'li), *n.* Same as Gully.

Gullibility (gul-i-bil'i-ti), *n.* The state or quality of being gullible; unsuspecting credulity. *Burke.* [Colloq.]

Gullible (gul'i-bl), *a.* Easily gulled or cheated.

Gullish (gul'ish), *a.* Foolish; stupid.

They have most part some gullish humour or other, by which they are led. *Burton.*

Gullishness (gul'ish-ness), *n.* The state or quality of being gullish; foolishness; stupidity.

Gully (gul'li), *n.* [Fr. *goulet*. See GULLET.] 1. A channel or hollow worn in the earth by a current of water; a ravine; a ditch; a gutter.—2. An iron tram-plate or rail.

Gully (gul'li), *v.t.* To wear into a gully or channel.

Gully (gul'li), *v.i.* To run with noise.

Gully (gul'li), *n.* A large knife; a warlike weapon. [Scotch.]

Gully-gut (gul'li-gut), *n.* A glutton. *Chapman.*

Gullyhole (gul'li-hōl), *n.* The opening through which gutters and drains empty themselves into the subterranean sewer.

Gulo (gū'lo), *n.* [L. a gormandizer, from *gula*, the throat.] The generic name under which the glutton or vorlverine and the grison, with other carnivorous congeners, have been arranged. See GLUTTON.

Gulosity (gū'los-i-ti), *n.* [L. *gulosus*, from *gula*, the gullet.] Greediness; voracity; excessive appetite for food. [Rare.]

They are very temperate, seldom offending in ebriety, nor erring in gulosity, or superfluity of meats. *Sir T. Browne.*

Gulp (gulp), *v.t.* (Perhaps imitative of the sound made in swallowing, or a form of *gulf*, to swallow up. Comp. D. *golpen*, to swallow greedily; Dan. *gulpe*, to disgorge; to gulp up.) To swallow eagerly or in large draughts.

He loses the fish, gulps it down, and so soon as ever the morsel was gone wipes his mouth. *Sir R. L. Estrange.*

—To *gulp up*, to throw up from the throat or stomach; to disgorge.

Gulp (gulp), *n.* 1. The act of taking a large swallow; a swallow, or as much as is swallowed at once.

This unsettled my poor girl, who was about to swallow her whole glass of wine and water at a gulp. *Hook.*

2. A disgorging.

Gulph (gulph), *n.* An obsolete spelling of *Gulf*.

Gulravage (gul-rā'vāj), *n.* [Scotch.] Same as *Gilravage*.

Guly (gū'li), *a.* Of or pertaining to gules. *Milton.*

Gum (gūm), *n.* [A. Sax. *gōma*, Icel. *gōmr*, G. *gum*, palate, gum.] The cellular and elastic fleshy substance which covers the alveolar portions of the upper and lower jaw, and envelops the neck of the teeth.

Gum (gūm), *n.* [A. Sax. *goma*, Fr. *gomme*, from L. *gummi*, Gr. *kommi*, gum.] 1. A juice which exudes from trees either spontaneously or after incisions are made, and thickens on the surface, or is obtained from their seeds or roots. Gum is more or less soluble in water, but is insoluble in alcohol, ether, and oils. There are six varieties of gum, namely, gum-arabic, gum-senegal, gum of the cherry and other stone-fruit trees, gum-tragacanth, gum of Bassora, and the gum of seeds and roots. All these gums, except the last, flow spontaneously from the branches and trunks of their trees, and sometimes from the fruits, in the form of a mucilage, which dries and hardens in the air; the gum of seeds and roots, however, requires to be extracted by boiling water. It differs from the gums proper in not being soluble in water, merely swelling up when boiled with it. A number of very different substances are confounded in commerce under the name of gum; thus, gum-elemi and gum-copal, which are true resins; gum-ammoniacum, which is a gum-resin; and gum-elastic (caoutchouc), which differs from both, are all called gums. For constituents see ARABIN, BASSORINE, CERASIN.—2. Gummy (which see).

Gum (gūm), *v.t.* pret. & pp. *gummed*; ppr. *gumming*. To smear with gum; to unite or stiffen by gum or a gum-like substance.

Gum (gūm), *v.t.* To exude or form gum. See GUMMING.

Gum-animal (gum'an-i-mal), *n.* The *Galago senegalensis*, a quadrumanous animal of Western Africa, is so called from feeding much on gum. It is about the size of a rat, and a favourite article of food in Senegal.

Gum-arabic (gum-ā-rā-bik), *n.* See ARABIN.

Gum-arabic (gum-ā-rā-bik), *n.* The juice of various species of trees of the genus *Acacia*, hardened in the air. It is collected chiefly

in the north-east of Africa, occurring in small round or spheroidal tears. It is sometimes employed as a demulcent, but more

Gum-arabic Plant (*Acacia Seyal*).

generally as a mere adhesive. Among the species yielding it are *A. Vereh*, *A. Seyal*, *A. stenocarpa*, *A. arabica*, and *A. horrida*. See ACACIA.

Gumbo, Gombo (gum'bō, gum'bō), *n.* [United States.] 1. The name given in the Southern States to *Ochra* or *Okra*, the pod of *Hibiscus esculentus*.—2. A soup in which this fruit enters largely as an ingredient; also, a dish made of young capsules of ochra, with salt and pepper, stewed and served with melted butter.

Gum-boil (gum'bōil), *n.* A boil or small abscess on the gum.

Gum-cistus (gum-sis'tus), *n.* A plant, *Cistus ladaniferus*, largely cultivated in Portugal. It has lance-shaped, entire, three-nerved leaves, and large white flowers. A gum having a pleasant balsamic odour is obtained by boiling the summits of the branches in water.

Gum-dragon (gum'dra-gon), *n.* Same as *Gum-tragacanth*.

Gum-elastic (gum-el'as-tik), *n.* Caoutchouc; india-rubber. See CAOUTCHOUC.

Gum-elemi (gum-el'ē-mi), See ELEM.

Gum-juniper (gum-jū'nī-pēr), *n.* The resin of *Callitris quadrivalvis*, a coniferous tree found in Barbary. The resin is used in varnish-making; when powdered it forms pounce, used for preparing paper and parchment for writing on.

Gumlac (gum'lak), *n.* Same as *Lac* (which see).

Gumma (gum'a), *n.* [See GUM.] In *med.* a kind of soft tumour, so called from the resemblance of its contents to gum.

Gummiferous (gum-i-fēr-us), *a.* [*L. gummi*, gum, and *fero*, to produce.] Producing gum.

Gumminess (gum'i-ness), *n.* 1. The state or quality of being gummy; viscosness.—2. Accumulation of gum.

The tendons are involved with a great gumminess and collection of matter. *Wiseman.*

Gumming (gum'ing), *n.* A formidable disease in trees bearing stone fruit, as cherries, plums, apricots, peaches, and almonds, arising from external injury, from exposure to unusual degrees of heat or cold, or from sudden alteration of temperature or constitutional weakness, characterized by a morbid exudation of gum, and terminating generally in the destruction of the tree.

Gummosity (gum-os'i-ti), *n.* Gumminess; the nature of gum; a viscous or adhesive quality. [Rare.]

Gummons (gum'us), *a.* Of the nature or quality of gum; viscous; adhesive.

Gummy (gum'i), *a.* 1. Consisting of gum; of the nature of gum; viscous; adhesive. 'A gummy juice.' *Sir W. Raleigh*.—2. Impregnated with gum; giving out gum; covered with gum or viscous matter. 'The gummy bark.' *Dryden*. 'Gummy eyes.' *Dryden*. 3. Having an accumulation of gum, or matter resembling gum; stuffy; puffy. [Slang.]

A little gummy in the leg, I suppose. *Colman the younger.*

Gump (gump), *n.* [Comp. Dan. and Sw. *gump*, Icel. *gumpr*, the rump, the buttocks.] A foolish person; a dolt. [Vulgar.]

Gumption (gum'shun), *n.* [For *gumptionish*, a being *gumptionish*, prov. *goam*, Icel. *guma*, A. Sax. *guman*, to observe.] 1. Understanding; capacity; shrewdness. [Colloq.]

One does not have *gumption* till one has been properly cheated. *Lord Lytton.*

2. In *painting*, a name applied to a nostrum much in request by painters in search of the supposed lost medium of the old masters, and to which they ascribe their unapproachable excellence; the art of preparing colours.

Gum-rash (gum'rash), *n.* A mild species of papular eruption to which many children are subject soon after birth; red gum.

Gum-resin (gum-re'zin), *n.* [See RESIN.] A mixed juice of plants, consisting of resin and various other substances, which have been taken for a gummy substance. The gum-resins do not flow naturally from plants, but are mostly extracted by incision, in the form of white, yellow, or red emulsive fluids, which dry and consolidate. The most important species are olibanum, galbanum, scammony, gamboge, euphorbium, asafetida, aloes, myrrh, and ammoniac.

Gum-sandarach (gum-san'da-rak), *n.* See SANDARACH.

Gum-senegal (gum-sen'ē-gal), *n.* A kind of gum-arabic, brought from the country of the river Senegal in Africa, yielded by *Acacia Vereh*.

Gum-stick (gum'stik), *n.* A small piece of some hard substance, as of ivory or coral, given to children to put into the mouth for the purpose of relieving the pains of teething.

Gum-tragacanth (gum-tra'ga-kanth), *n.* A gum yielded by several eastern species of *Astragalus*, of the sub-genus *Tragacantha*.

Gum-tree (gum'tre), *n.* The name given to various species of the genus *Eucalyptus* (which see); also in the United States to the black gum (*Nyssa multiflora*), one of the largest trees of the Southern States. Its small blue fruit is the favourite food of the opossum.

Gum-water (gum'wā-tēr), *n.* A distillation from gum.

Gum-wood (gum'wud), *n.* A name given to the wood of some species of *Eucalyptus* (which see).

Gun (gun), *n.* [*O. E. gonne, gone, gunne, &c.* Etymology doubtful. A common and not improbable derivation is from *L. L. mangona, mangonus*, *O. F. mangonne*, a machine for throwing stones in sieges, a mangonel; some suggest that it is from *W. gun*, a bowl.] A name applied to every species of firearm for throwing projectiles by the explosion of gunpowder or other explosive, consisting of a tube or barrel closed at one end, in which the projectile is placed, with an explosive charge behind, which is fired through a small hole or vent, as cannons, mortars, and other heavy pieces of ordnance, together with the fowling-piece, rifle, and pocket-pistol. In strict military language, however, the word is applied only to pieces of heavy ordnance.—*Guns of position*, heavy field-pieces which are not designed to execute quick movements.

The infantry have not a leg left, the cavalry can barely keep their horses off their knees, and the horse-guns are reduced to the state of *guns of position*. *W. H. Russell.*

—*Great gun*, (*a*) a cannon. (*b*) A person distinguished in any department, as in oratory, preaching, &c. (*c*) *pl. Naut.* a tempest.

Look at that cloud, no bigger than one's hand, to the southward. I tell you that, before we are two hours older, there will be a hurricane, and it will blow *great guns*. *Sala.*

Gun (gun), *v. i.* To shoot with a gun; to practise shooting the smaller kinds of game.

Guna (gu'na), *n.* [*Skr.*, quality.] A term used chiefly in Sanskrit grammar, and applied to the changing of *i* and *ī* to *e*, *u* and *ū* to *o*, *ri* and *ṛi* to *ar*, by compounding them with a prefixed *ā* (that is, *ā+i=ē*, and so on). The term is also sometimes used in regard to similar changes in other languages.

Gunarchy (gūn'ar-ki), *n.* Same as *Gynarchy*.

Gunate (gu'nāt), *v. t.* In *philol.* to subject to the change known as *guna* (which see).

Gunation (gu-nā'shon), *n.* [See GUNA.] In *philol.* the act of gunating or state of being gunated; the process, in the development of language, by which *ai*, *ae*, *ē*, &c., are produced by prefixing *ā* to *i* or *ī*, or *au*, *ō* by prefixing *ā* to *u* or *ū*, or similar vowel changes take place; thus, Gr. root *ei*, stem *et*, verb *eimi*; Gr. root *phug*, stem *phoug*, verb *phlegui*; Goth. root *bug*, stem *baug*; Goth. root *vit*, stem *vait*.

Gun-barrel (gun'ba-rel), *n.* The barrel or tube of a gun.—*Gun-barrel drain*, a cylindrical drain of small diameter.

Gun-boat (gun'bōt), *n.* A boat or small vessel fitted to carry one or more guns of

heavy calibre, and from its light draught capable of running close inshore or up rivers.

Gun-carriage (gun'ka-rij), *n.* The carriage or structure on which a gun is mounted or moved, and on which it is fired. In the case of a field or siege piece it unites, for travelling, with a forepart, fixed on a pair of wheels, termed a *limber*, to which the horses are attached, so as to form a single four-wheeled carriage. In action it is unlimbered, and then rests on its wheels, and on a strong support termed the *trail*.—The *protected barbette gun-carriage*, called also the *Moncrieff gun-carriage* (after its inventor Major Moncrieff), is designed to store up the force of recoil on firing, and of applying it to the work of raising the gun to fire over a high parapet. When fired the gun descends under cover by its own recoil, assuming at the same time the loading position, in which it is retained by a toothed wheel and ratchet. When re-loaded, by releasing the ratchet, it is brought by a counterweight, which the force of the recoil has elevated, back to its original position. The carriage moves laterally on a circular rail-laid on the platform, and can easily be turned in any direction. The same inventor has also designed a hydropneumatic carriage, in which the force is stored up in the form of air, which is highly compressed in a strong iron cylinder.

Gun-cotton (gun'kot-tū), *n.* A highly explosive substance produced by soaking cotton or any vegetable fibre in nitric and sulphuric acids, and then leaving it to dry. It has about four times the explosive force of gunpowder, and is occasionally used as a substitute for it. Gun-cotton explodes without smoke, and does not foul the piece, but when confined in the bore of a rifle it occasionally bursts the barrel. By dissolving it in a mixture of rectified ether and alcohol, collodion is obtained. See COLLODION.

Gunda (gun'da), *n.* The sum of four cowry shells, used by the poorer natives of India as a medium of currency in smaller or fractional payments and purchases. *Sinmonds.*

Gun-deck (gun'dek), See DECK.

Gundelet (gun'dē-let), *n.* A gondola. *Marston.*

Gun-fire (gun'fir), *n.* *Milit.* the hour at which the morning or evening gun is fired.

Gun-flint (gun'flint), *n.* A piece of shaped flint, fixed in the lock of a musket or pistol before the introduction of percussion caps to fire the charge.

Gunge, Gunj (gunj), *n.* In Bengal, a public granary or store; a mart.

Gunjah (gun'jā), *n.* See GANJAH.

Gun-lock (gun'lok), *n.* The lock of a gun.

Gun-metal (gun'met-i), *n.* An alloy, generally of nine parts of copper and one part of tin, used for the manufacture of cannon, &c. Other metals, as zinc or iron, have sometimes been added or substituted for the tin.

Gunnage (gun'āj), *n.* The number of guns in a ship-of-war. [Rare.]

Gunnel (gun'el), See GUNWALE.

Gunner (gun'ēr), *n.* One skilled in the use of guns; one who works a gun, either on land or sea; a cannonier; also, a warrant-officer in the navy appointed to take charge of all the ordnance, ordnance-stores, and ammunition on board ship, and to superintend the practice of gunnery.

Gunnery (gun'ēr-i), *n.* A science which has for its object to ascertain the effects produced by firing a projectile from a piece of ordnance under every variety of circumstances, and thus to determine the right form of gun and projectile, the best proportion of charge, the elevation to be given to the piece, and the quality and disposition of material best adapted to resist the action of projectiles at various ranges.

Gunnery, Gunny (gun'ēr, gun'nī), *n.* [Bengalee *guni*.] A strong coarse sackcloth manufactured in Bengal, for making into bags, sacks, and packing generally. The material is made from jute, the fibre of *Cochlorus capsularis*, and sunn, the fibre of *Crotalaria juncea*.

Gunning (gun'ing), *n.* The act of hunting or shooting game with a gun.

In the earlier times, the art of *gunning* was but little practised. *Gladsmith.*

Gumocracy (gūn-ok'ra-si), *n.* Same as *Gynocracy*.

Gun-port (gun'pōrt), *n.* A hole in a ship for a cannon. See PORT.

Gunpowder (gun'pōu-dēr), *n.* An explosive

mixture of saltpetre, sulphur, and charcoal, reduced to a fine powder, then granulated and dried, largely employed in the discharge, for war or sport, of projectiles from guns as well as in blasting. The proportion of the ingredients in the composition of gunpowder is different in different countries. That made for the English government contains about 75 parts of saltpetre, 10 of sulphur, and 15 of charcoal.—*Gunpowder tea*, a fine species of green tea, being a carefully picked hyson, the leaves of which are rolled and rounded, so as to have a granular appearance.

Gun-reach (gun'réch), *n.* Gunshot; the distance a gun will carry. *Sidney Smith.*

Gun-room (gun'róm), *n.* *Naut.* an apartment on the after-end of the lower gun-deck, occupied by the gunner, or by the lieutenants as a mess-room.

Gunshot (gun'shot), *n.* The reach or range of a gun; the distance to which shot can be thrown so as to be effective; *milik*, the length of the point-blank range of a cannon-shot.

Luxembourg retired to a spot which was out of gunshot, and summoned a few of his chief officers to a consultation. *Macaulay.*

Gunshot (gun'shot), *a.* Made by the shot of a gun, as, a gunshot wound.

Gunsmith (gun'smith), *n.* A maker of small arms; one whose occupation is to make or repair small firearms.

Gunsmithery (gun'smith-é-ri), *n.* The business of a gunsmith; the art of making small firearms.

Gunster (gun'stér), *n.* One who uses a gun; a gunner. [Rare.]

Gunstick (gun'stik), *n.* A rammer or ram-rod; a stick or rod to ram down the charge of a musket, &c.

Gunstock (gun'stok), *n.* The stock or wood in which the barrel of a gun is fixed.

Gunstone (gun'stón), *n.* A stone used for the shot of cannon. [Before the invention of iron balls, stones were used for shot.]

That I could shoot mine eyes at him like gunstones. *D. Foulson.*

Gun-tackle (gun'tak-l), *n.* The blocks and pulleys affixed to the sides of a gun-carriage

Ship-gun with Gun-tackle.

and the side of a ship by means of which a gun is run up to or drawn back from the port-hole.

Gunter's Chain (gun'térz chän), [After Edmund Gunter, the inventor.] The chain in common use for measuring land, having a length of 66 feet, or 22 yards, or 4 poles of 5½ yards each; and it is divided into 100 links of 7.32 inches each. 100,000 square links make 1 acre.

Gunter's Line (gun'térz lín), (a) A logarithmic line on Gunter's scale, used for performing the multiplication and division of numbers mechanically by the dividers; called also *Line of Lines* and *Line of Numbers*. (b) A sliding scale corresponding to logarithms for performing these operations by inspection without dividers; called also *Gunter's Sliding-rule*.

Gunter's Quadrant (gun'térz kwod-rant), A quadrant made of wood, brass, or other substance, being a kind of stereographic projection on the plane of the equator, the eye being supposed in one of the poles. It is used to find the hour of the day, the sun's azimuth, &c., as also to take the altitude of an object in degrees.

Gunter's Scale (gun'térz skál), A large plain scale having various lines upon it, both natural and logarithmic, of great use in solving mechanically by means of a slider problems in navigation and surveying. It is usually 2 feet long, and about 1½ inch broad.

Gun-wadding (gun'wad-ing), *n.* Circular pieces of card-board, cloth, felt, &c., used to keep down the charge in a gun.

Gunwale, **Gunnel** (gun'wál, gun'nel), *n.* [Gun, and wale, an edge, a plank, the upper

edge of a ship's side, next the bulwarks;—because the upper guns are pointed from it.] *Naut.* the upper edge of a ship's side; the uppermost wale of a ship, or that piece of timber which reaches on either side from the quarter-deck to the fore-castle, being the uppermost bend which finishes the upper works of the hull. The gunwale of a boat is a piece of timber going round the upper sheer strake as a binder for its top-work.

Gurge (gérj), *n.* [L. *gurgies*, a whirlpool.] A whirlpool. [Rare.]

Marching from Eden he shall find
The plain, wherein a black bituminous gurge
Bolls up from under ground. *Milton.*

Gurget (gérj), *v.t.* To swallow.

Gurgeons, **Gurgions** (gérj'uz), *n. pl.* [See GURGEOUS.] The coarser part of meal separated from the bran.

Gurgle (gér'gl), *v.i.* pret. & pp. *gurgled*; ppr. *gurgling*. [Probably imitative. Comp. G. *gurgeln*, It. *gorgogliare*, to gurgle. See GARGLE.] To run or flow in a broken, irregular, noisy current, as water from a bottle, or a small stream on a stony bottom; to flow with a purling sound.

Pure gurgling fills the lonely desert trace. *Yong.*

Gurgle (gér'gl), *n.* A gush or flow of liquid; the sound made by a liquid flowing from the narrow mouth of a vessel, or generally through any narrow opening; the sound made when air is forced through a liquid.

Flow, flow, then crystal rill,
With tinkling gurgles fill
The mazes of the grove. *Thompson.*

Gurgle (gér'gl), *n.* A very porous earthen vessel for cooling water by evaporation.

Gurgoyle (gér'gól), *n.* In arch. same as *Gurgoyle* (which see).

Gurholite (gér'hof-it), *n.* A sub-variety of magnesian carbonate of lime or dolomite, found near Gurhol, in Lower Austria. It is snow-white, and has a dull, slightly conchoidal or even fracture.

Gurjun (gér'jun), *n.* [Native name.] A thin balsam or oil, derived from trees of the genus *Dipterocarpus* in Burmah and the Eastern Archipelago, used as a substitute for linseed-oil in the coarser kinds of paints for house and ship painting, and also medicinally. It assists to preserve wood from the attacks of white ants.

Gurkin (gér'kin), *n.* Same as *Gherkin*.

Gurny (gér'mi), *n.* In mining, a level; a working.

Gurnard, **Gurnet** (gér'nárd, gér'net), *n.* [O. Fr. *grougnart*, probably from *grouper*, to grunt or grumble, from the sound these fishes make when taken from the water; comp. Fr. *grondin*, another name of the gurnard, from *gronder*, to grunt; also N. *knor-jak*, Dan. *knorre*, to growl.] The popular name of the species of fishes of the genus *Trigla*, family Sclerogenidae. The head is angular and wholly covered with bony plates, and there are seven rays in the membranes of the gills. The body is elongated, nearly round and tapering; there are two dorsal fins; the pectoral fins are large; the teeth are small and numerous. The gray gurnard is the *Trigla gurnardus*, common on the British coast; the red gurnard is the *T. cuculus*, also common on our coasts; the

Gray Gurnard (*Trigla gurnardus*).

flying gurnard is the *T. volitans*, which inhabits the Mediterranean, Atlantic, and Indian seas.

Gurrah (gúr'ra), *n.* [Hind. *gorhá*.] A kind of plain, coarse India muslin.

Gurry (gúr'i), *n.* An alvine evacuation.

Gurry (gúr'i), *n.* The Indian name for a small native fort.

Gurt (gért), *n.* In mining, a gutter; a channel for water.

Gurtst (gérts), *n. pl.* Groats. *Holland.*

Guse (gús), *n.* A goose. [Scotch.]

Gush (gush), *v.t.* [Ice. *gíða*, to gush, to be poured out, *gusa*, a gush, and to gush, a Scandinavian word, allied to A. Sax. *geotan*, Goth. *giutan*, G. *giessen*, to pour.] 1. To issue with violence and rapidity, as a fluid; to rush forth as a fluid from confinement;

to flow suddenly or copiously; as, blood gushes from a vein in venesection.

Behold he smote the rock, that the waters gushed out. *Ps. lxxviii. 20.*

A sea of blood gushed from the gaping wound. *Spenser.*

2. To act with a sudden and rapid impulse; to be extravagantly and effusively sentimental.

Gush (gush), *v.t.* To emit suddenly, copiously, or with violence.

The gaping wound gushed out a crimson flood. *Dryden.*

Gush (gush), *n.* 1. A sudden and violent issue of a fluid from an enclosed place; an emission of liquor in a large quantity and with force; outpouring of, or as of, a liquid; the fluid thus emitted.

The gush of springs
And fall of lofty fountains. *Byron.*

2. An effusive display of sentiment.

Gusher (gush'ér), *n.* One who or that which gushes; a person who is demonstratively affectionate or sentimental.

Gushing (gush'ing), *ppr.* Rushing forth with violence, as a fluid; flowing copiously; as, gushing waters.—2. Emitting copiously; as, gushing eyes.—3. Weakly and unreservedly demonstrative in matters of affection; exuberantly and demonstratively affectionate; extravagantly sentimental; applied to persons (generally females) or things; as, a gushing girl; a gushing letter.

To add to the atmosphere of danger which surrounded this gushing young person, she is placed at the outset of the story in an odd not to say false position. She is a wife in nothing but name. *Saturday Rev.*

Gushingly (gush'ing-li), *adv.* 1. In a gushing manner.

Rivers, which flow gushingly,
With many windings through the vale. *Byron.*

2. With great display of sentiment or affection.

Gusing-iron (gús'in-yrn), *n.* A laundress's smoothing-iron. [Scotch.]

Gusset (gus'set), *n.* [Fr. *gousset*, a fob, a bracket, a gusset, from *gousse*, a cod, husk, or shell.] 1. A small piece of cloth inserted in a garment for the purpose of strengthening or enlarging some part; hence, anything resembling such a piece of cloth in shape or function; as, (a) a small piece of chain-mail, afterwards of plate, placed at the juncture of the armour beneath the arms as a protection when the necessity for free motion would otherwise leave it uncovered. (b) A kind of bracket or angular piece of iron fastened in the angles of a structure to give strength or stiffness. (c) An angular piece of iron inserted in a boiler, tank, &c., where it changes from a cylindrical to a square form, &c., as in the junction of the barrel and fire-box of a locomotive.—2. In her. an abatement or mark of disgrace somewhat resembling a gusset, and formed by a line drawn from the dexter or sinister chief point one-third across the shield and then descending perpendicularly to the base. It may be on either the dexter or sinister side of the shield. When on the former, it is an abatement for adultery; when on the latter, for drunkenness. Sometimes erroneously called *Gore*.

Gust (gust), *n.* [L. *gustus*, taste; *gusto*, to taste.] 1. The sense or pleasure of tasting; gratification of the appetite; relish; gusto.

They fondly thinking to allay
Their appetite with *gust*, instead of fruit
Chew'd bitter ashes. *Milton.*

2. Gratification of any kind, especially that which is highly relished; pleasure; enjoyment.

Destroy all creatures for thy sport or *gust*. *Pope.*

3. Turn of fancy; intellectual taste.

A choice of it may be made according to the *gust* and manner of the ancients. *Dryden.*

Gust (gust), *v.t.* To taste; to have a relish for.

The palate of this age *gusts* nothing high. *Sir R. L'estrang.*

Gust (gust), *n.* [Ice. *gustr*, a blast of wind, *gusta*, to blow in gusts; may be allied to E. *gush* or *ghost*, Sc. *goustie*, gusty, haggard, ghostlike.] 1. A sudden squall; a violent blast of wind; a sudden rushing or driving of the wind, of short duration.

One warm *gust*, full-fed with perfume. *Tennyson.*

2. A sudden violent burst of passion.

Pardon a weak distemper'd soul that swells
With sudden *gusts*. *Addison.*

Gustable (gust'a-bl), *a.* [From *gust*, to taste.] 1. That may be tasted; tastable.

This position informs us of a vulgar error, terming the gall bitter, whereas there is nothing *gustable* sweeter.

2. Pleasant to the taste; having a pleasant relish. [Rare.]

A *gustable* thing, seen or smelt, excites the appetite and affects the glands and parts of the mouth.

Gustard (gust'erd), *n.* A local name of the great bustard.

Gustation (gust-ā'shon), *n.* [L. *gustatio*.] The act of tasting. [Rare.]

Gutta (gut'ta), *n. pl.* **Guttæ** (gut'tē). [L.] A drop; specifically, in *arch.* one of a series of pendent ornaments, generally in the form of the frustum of a cone, but sometimes cylindrical, attached to the under side of the capitals and under the triglyphs of the Doric order. It is not clear what their origin may have been.

Guttæ.

whether they represent drops of water or icicles, or the heads of nails or wooden pins.

Gutta Percha (gut'ta per'cha), *n.* [Malay *gutta*, gum, and *percha*, the tree from which it is obtained.] A substance resembling caoutchouc in many of its properties, but stronger, more soluble, and less elastic. It is obtained in the state of a milky-looking juice, which hardens on being exposed to the air, and is the sap of a large tree of the genus *Isandra*, the *I. Gutta* of Hooker, nat. order Sapotaceæ. The tree abounds in the Malayan Peninsula and in some of the islands of the Eastern Archipelago.

Gutta percha comes to us in two forms; the one is in thin films or scraps, something similar to clippings of white leather; the other is in rolls formed by rolling the thin layers together in a soft state. When pure the slips are transparent and somewhat elastic, verging in colour from a whitish yellow to a pink. Below the temperature of 50° *gutta percha* is as hard as

Gutta-percha Plant (*Isandra Gutta*).

wood, excessively tough, and only flexible in the form of thin slips. By an increase of heat it becomes more flexible, until at a temperature considerably below the boiling-point of water it becomes as soft as bees'-wax. It is now easily cut and divided by a knife, and may be moulded into all varieties of forms with the greatest ease, or it may be cut and milled again so perfectly as scarcely to exhibit even the appearance of a joint, and possessing all the strength of an undivided mass. Whatever be the shape into which it is formed in the soft state it will retain precisely the same form as it cools, hardening again to its previous state of rigidity, and the process of softening and hardening may be repeated any number of times without injury to the material. *Gutta percha* is, in a great measure, devoid of elasticity, in which respect it offers a striking contrast to caoutchouc; but it possesses an astonishing degree of tenacity, and offers great resistance to an extending force. When once drawn out, however, it remains, without contracting, in the same position. It is soluble with difficulty in ether and other caoutchouc solvents, but very readily in oil of turpentine and naphtha. *Gutta percha* has been applied to a variety of purposes—as a substitute for leather; as an insulating coating for the copper wires of submarine telegraph cables; as an ingredient in mastics and cements; for the manufacture of flexible hose, tubes, bottles, soles of shoes, &c. It is also used by surgeons for splints, for covering moist applications to retard evaporations, and other purposes.

Gutta-serena (gut'ta-sēr-ē'nā), *n.* An old medical name for *Amacrosis* (which see).

Guttate (gut'tā), *a.* [L. *gutta*, a drop.] In bot. spotted, as if discoloured by drops.

Gymnotidae (jim-nō'tī-dē), *n. pl.* A family of apodal fresh-water fishes, of which the *Gymnotus* is the type. The *Gymnotidae* are mostly South American. See GYMNOTUS.

Gymnotus (jim'nō'tus), *n.* [Gr. *gymnos*, naked, and *notos*, the back.] A genus of fishes of the section Apodes, or those which have no dorsal fin. The only known species is the *Gymnotus electricus*, or electric eel,

Electric Eel (*Gymnotus electricus*).

so named from the resemblance which it bears to an eel, and the singular power with which it is furnished with giving electric shocks. It is about 5 or 6 feet in length, the head is rather broad and depressed, the muzzle obtuse, and the pectoral fins small and rounded. The Linnean genus *Gymnotus*, which included other species, has been erected into the family *Gymnotidae*.

One fearful shock, fearful but momentary, like that from the electric blow of the *Gymnotus*. *De Quincy.*

Gymnura (jim-nū'ra), *n.* [Gr. *gymnos*, naked, and *oura*, a tail.] A small quadruped found in Sumatra, having a spiny covering like that of a hedgehog.

Gymp (jimp), *n.* Same as *Gimp*.

Gyn (gīn), *v.t.* To begin.

Soon as thou *gynst* to sette thy notes in frame. *Spenser.*

Gyn (jīm), *n.* In *artillery*, a kind of hoisting tackle or windlass for mounting and dismounting ordnance from their carriages, &c. See GYN.

Gynæceum, **Gyneceum** (jin-ē'sē-um), *n.* [Gr. *gynaikion*, from *gynē*, *gynaikos*, a woman.] 1. Among the ancients, the females' apartment or division of a house of consideration, which was usually the remotest part of a building, lying beyond an interior court.—2. A sort of manufactory in ancient Rome for making clothes and furniture for the emperor's family, the managers of which were females.—3. In *bot.* the pistil taken in a collective sense, precisely as the stamens form the androecium, the petals the corolla, and the sepals the calyx.

Gynæcian (jin-ē'shi-an), *a.* [Gr. *gynaikios*, feminine, from *gynē*, a woman.] Relating to women.

Gynæcium (jin-ē'si-um), *n.* Same as *Gynæceum*.

Gynæcocracy, **Gynecocracy** (jin-ē-kok'ra-sī), *n.* [Gr. *gynē*, *gynaikos*, a woman, and *kratos*, power.] Government by a woman; female power or rule.

Gynæcology, **Gynecology** (jin-ē-kol'o-jī), *n.* [Gr. *gynē*, *gynaikos*, a woman, and *logos*, discourse.] In *med.* the doctrine of the nature and diseases of women.

Gynæcomasty (jī'nē-ko-mas'tī), *n.* [Gr. *gynē*, *gynaikos*, a woman, and *mastos*, a breast.] In *physiol.* the condition of a man having breasts as large as those of a woman, and functionally active.

Gynæocracy, **Gyneocracy** (jin-ē-ok'ra-sī), *n.* A badly-formed word, of the same origin and meaning the same thing as *Gynæcocracy*.

Gynander (jin-an'dér), *n.* A plant belonging to the class *Gynandria*.

Gynandria (jin-an'dri-a), *n.* [Gr. *gynē*, a woman, a female, and *aner*, *andros*, a man, a male.] The name given to one of the classes in the artificial system of Linnæus, the character of which is to have the stu-

mens and pistil consolidated into a single body. The principal part of the class con-

Gynandria.

Portion of flower of *Orchis maculata*, magnified. *a*, Broad face of the stigma. *b*, Anther fixed on the stigma, showing the masses of pollen in their cells. These masses spring from glands inclosed in the pouch at the base. *c*, Abortive stamens. *d*, Lip. *e*, Petals. *f*, Sepals.

sists of orchidaceous plants, forming in it the order Monandria.

Gynandrian, Gynandrous (jin-an'dri-an, jin-an'drus), *a.* Of or pertaining to the class Gynandria.

Gynarchy (jin'ar-ki), *n.* [Gr. *gynē*, woman, and *archē*, rule.] Government by a female or females.

I have always some hopes of change under a gynarchy. *Chesterfield.*

Gyneceum (jin-ē'sē-nūm), *n.* See GYNÆCEUM.

Gypogerranidæ (jip'ō-jēr-an'ī-dē), *n. pl.* [Typical genus *Gypogerranus*, and Gr. *eidos*, resemblance.] A family of vultures, including a single genus, of which only one spe-

cies, the secretary-falcon or vulture of South Africa, is known. The most characteristic feature of this bird is the extraordinary length of its tarsi. It preys on serpents and other reptiles. See SECRETARY-BIRD.

Gypogerranus (jip-ō-jēr-a-nus), *n.* [Gr. *gyps*, a vulture, and *gerranus*, a crane.] A genus of birds of the family Gypogerranidæ, of which only one species, the *G. repentinus* (secretary-bird), or secretary-bird, is known. See SECRETARY-BIRD.

Gypse (jips), *n.* Same as *Gypsina*.

Gypseous (jip'sē-us), *a.* [See GYPSUM.] Of the nature of gypsum; partaking of the qualities of gypsum; resembling gypsum.

Gypsey (jip'si), *n.* Same as *Gypsey* (which see).

Gypsiferous (jip-sif'ēr-us), *a.* [Gypsum (which see), and *L. fero*, to bear.] Producing gypsum.

Gypsine (jip'sin), *a.* Same as *Gypseous*.

Gypography (jip-sōg'ra-fi), *n.* [Gypsum (which see), and Gr. *graphie*, writing, from *graphō*, to write.] The art of engraving on gypsum.

Gypsologist (jip-sōl'ō-jist), *n.* [G. *gypsos*, and Gr. *logos*, a discourse.] One who has an extensive knowledge of the gypsums, as with their language, history, manners, and customs.

Gypsology (jip-sōl'ō-ji), *n.* That branch of knowledge which treats of the gypsums or that which pertains to them, as their language, history, manners, and customs.

Gypsoplast (jip-sō-plast'), *n.* [Gypsum (which see), and Gr. *plassō*, to mould.] A cast taken in plaster of Paris or white lime.

Gypsum (jip'sum), *n.* [L. *gypsum*; Gr. *gypsos*, chalk.] A mineral which is found in a compact and crystallized state, as alabaster and selenite, or in the form of a soft chalky stone which in a very moderate heat gives out its water of crystallization, and becomes a very fine white powder, extensively used under the name of plaster of Paris. (See PLASTER.) This last is the most common, and is found in great masses near Paris, where it forms the hill of Montmartre, near Aix in Provence, and near Burgos in Spain. It is found in smaller portions in various parts of Europe. Gypsum occurs abundantly in the more recent sedimentary formations, and is even now forming, either as a deposit from water holding it in solution, or from the decomposition of iron pyrites when the sulphuric acid combines with lime, or from the action of sulphurous vapours in volcanic regions on calcareous rocks. The most interesting gypsums, in a general point of view, are the tertiary, or those of the plains or hills of comparatively modern formation. They are characterized by the presence of fossil bones of extinct animals, and a large proportion of carbonate of lime, which gives them the title of liasstone gypsums. Such are the gypsums of the environs of Paris.

When gypsum occurs without water it is called *anhydrite*, but in its most ordinary state it is combined with water; of this latter there are six sub-species: sparry gypsum or selenite, the foliated granular, the compact, the fibrous, the scaly foliated, the earthy. The plaster stone of the Paris basin, ground and mixed with water, is used as a mortar in building; when mixed with glue instead of water the material is known as stucco. Gypsum, pulverized by grinding or burning, has been used with good effect as a manure, especially as a top-dressing for meadows.

Gypsy (jip'si), *n.* [Corruption of O.E. *Gyptian*, itself a contraction of *Egyptian*, from the belief that the race are descendants of the ancient people of Egypt. Called in Fr. *Bohémiens*; G. *Zigeuner*; D. *Heidenen* (heathens); Dan. and Sw. *Tatars*; It. *Zingari*; Sp. *Gitanos*, *Zincali*; Turk. *Tchinghianes*; Per. *Sisech*; Hind. *Karachee*, and in their own tongue *Rom* (lit. man).] 1. One of a peculiar vagabond race found in every country of Europe, as well as in parts of Asia, Africa, and America, acting as nomadic tinkers, workers in horn, horse and ass dealers, basket-makers, fortune-tellers, &c., and distinguishable from the peoples among whom they rove by their bodily appearance and by their language. Their skin is of a tawny colour; eyes large, black, and brilliant; hair long, coal-black, and often ringleted; mouth well shaped; teeth of dazzling whiteness; and their frame light, but lithe and agile. Their language, which they call *Romany chit* or *chib* or *Romanes*, is a Hindu dialect closely allied to Sanskrit, but much corrupted by admixture with the tongues

of the peoples among whom they have sojourned. Thus, in the vocabulary of the Anglo-Scottish gypsies there are Greek, Slavonic, Rumanian, Magyar, German, and French ingredients, evidencing that they had sojourned in the countries where these languages are spoken. Etymologists generally concur in regarding the gypsies as descendants of some obscure Indian tribe. — 2. A reproachful name for a person of a dark complexion.

Lament, to his lady, was but a kitchen-wench; Didst thou a lady; Cleopatra a *gypsy*; Helen and Hero, maidens and harlots. *Shaks.*

3. A cunning or crafty person, or one of bad character, of either sex; a cheat; especially, a name of slight reproach to a young woman; sometimes implying artifice or emulating.

The *gypsy* knows her power and flies. *Prior.*

Gypsy-wort (jip'si-wört), *n.* A common name of the plants of the genus *Lycopus*, nat. order Labiate. One species, common gypsy-wort or water-horehound (*L. europæus*), is found in Britain in ditches and on river banks. It yields a black dye said to be used by the gypsies to render their skin darker, hence the name.

Gyracanthus (ji-ra-kan'thus), *n.* [Gr. *gyros*, a circle or spire, and *akanthos* for *abanth*, a spine.] A genus of fossil acanthopterygious fishes, belonging to extinct shark-like fishes, found in the carboniferous and Permian formations, often from 10 to 18 inches long; so named from the sculptured ridges with which they are ornamented, which run spirally from the base upwards.

Gyral (jir'al), *a.* [See GYRE.] Whirling; moving in a circular form.

Gyrate (jir'at), *a.* Turning round a central point; whirling; wheeling. [Poetical.]

Gyrate (jir'at), *v. t.* [L. *gyro*, *gyration*, to turn round in a circle, from *gyros*, a circle. See GYRE.] To turn round; to revolve round a central point, as a tornado; to move spirally.

Waters of vexation filled her eyes, and they had the effect of making the famous Mr. Stedie appear to leap and gyrate, as if he were possessed by several devils. *Dickens.*

Gyrate (jir'at), *a.* Winding or going round, as in a circle. In bot. a term applied to the manner in which the fronds of ferns are rolled up.

Gyration (jir-ā'shon), *n.* [L. *L. gyration*, *gyrationis*, from L. *gyro*, *gyration*. See GYRATE, GYRE.] A turning or whirling round; a circular motion.

The stately and voluminous gyration of an ascending balloon. *De Quincey.*

— *Centre of gyration*, a point in a revolving body, into which, if all its matter could be collected, it would continue to revolve with the same energy as when its parts were in their original places.

Gyratory (jir-ā-tō-ri), *a.* Moving in a circle or spirally.

Gyre (jir), *n.* [L. *gyrus*, Gr. *gyros*, a ring, circle.] A circular motion, or a circle described by a moving body; a turn.

Graduating up in a spiral line Of still expanding and ascending gyres. *E. B. Brewster.*

Gyre† (jir), *v. t.* and *i.* To turn round; to revolve.

He (the devil) puts out both the eyes of our apprehension and judgement, that he may gyre us about in the mill of unprofitable wickedness. *Rp. Hall.*

Gyre-carline (gir'kar-lin), *n.* [Icel. *gyfir*, an ogress, a witch, and Sc. *carline*, Icel. *karlma*, a woman; a hag; a witch. (Scotch.)] **Gyreful†** (gir'ful), *a.* Abounding in gyres or spiral turns. *Drant.*

Gyrencephala (ji-ren-sē'f-a-lā), *n. pl.* [Gr. *gyros*, a circle or spire, and *enkephalos*, the brain.] One of the four sub-classes into which Owen has divided the mammalia, based on the structure of the brain. This

sub-class is characterized by having the hemispheres of the cerebrum covering the greater part of the cerebellum and the olfactory lobes. A corpus callosum is present, and the surface of the cerebral hemispheres is thrown into numerous convolutions. To the Gyrencephala belong the Quadrumana, Carnivora, Artiodactyla, Perissodactyla, Proboscidea, Toxodontia, Sirenia, and Cetacea.

Gyrencephalate (ji-ren-sef'a-lāt), *a.* Of or belonging to the division Gyrencephala.

Gyrfalcon (ji-r'fa-kun), *n.* [O. Fr. *gerfaut*, Fr. *gierfaut*, It. *girofalco*, *gerfalco*, L. *L. gyrfalco*, from *gyrus*, a circle, so called from its flight.] A species of falcon, the *Falco gyrfalco*, one of the boldest and most beautiful of the tribe. Three closely allied species were formerly confounded under this term, but have now been satisfactorily distinguished. The gyrfalcon proper (*F. gyrfalco*) is a native of Norway and Sweden; the other two species are the Iceland falcon (*F. Islandus*) and the Greenland falcon (*F. groenlandicus* or *candicans*). Their haunts and habits are very similar. See **FALCON**.

Gyrinidae (ji-r'ni-dē), *n. pl.* [From the Linnean genus *Gyrinus*, from *gyrus*, a circle, from their swimming in circles.] A family of coleopterous insects belonging to the section Pentamera, and sub-section Hydradeptera or water-beetles. This family corresponds with the Gyrinus of Linn. It includes the whirling-beetles (which see).

Gyrocarpus (ji-rō-kārp'us), *n.* [Gr. *gyros*, round, and *karpos*, fruit.] A genus of apetalous exogens, nat. order Illiciaceae, consisting of trees having polygamous flowers; natives of the East Indies and tropical America. The fruit is nut-like, two-winged at the apex, from two of the lobes of the calyx enlarging while the others fall off. The wood of one Asiatic species is employed for making catamarans for the Madras coast.

Gyrodus (ji'rō-dus), *n.* [Gr. *gyros*, round, and *odon*, a tooth.] A thick-toothed fossil fish found in the oolite of Durrheim in Baden, as also in the chalk; so named from its circular grinding teeth, arranged in rows on the bones of the roof, floor, and sides of

the mouth, by which it was enabled to crush crustaceans and fishes.

Gyrogonite (ji-rōg'on-it), *n.* [Gr. *gyros*, round, and *gonos*, seed.] A petrified spiral seed-vessel of plants of the genus *Chara*, found in fresh-water deposits, and formerly supposed to have been a shell.

Gyroidal (ji-rō'id'al), *a.* [Gr. *gyros*, a circle, and *oides*, resemblance.] Spiral in arrangement or action; as, (a) in *crystal*, having certain planes arranged spirally, so that they incline all to the right or all to the left of a vertical line; (b) in *optics*, turning the plane of polarization circularly or spirally to the right or left.

Gyrolepis (ji-rō'l'ē-pis), *n.* [Gr. *gyros*, a circle, and *lepis*, a scale.] A genus of fossil gamoid fishes, found in the new red sandstone and the bone beds of the lias formation.

Gyroma (ji-rō'ma), *n.* [Gr. *gyros*, to round, to bend, from *gyros*, round.] 1. A turning round.—2. In *bot.* the shield of lichens.

Two stern-faced men set out from Lynn, Through the cold and heavy mist; And Eugene Aram walked between, With *gyves* upon his wrist. Hood.

Gyve (jiv), *v.t.* pret. & pp. *gyved*; ppr. *gyving*. To fetter; to shackle; to chain.

Those yron fetters wherewith he was *gyv'd*, The badges of reproch, he threw away. Spenser.

H.

H, the eighth letter of the English alphabet, often called the *aspirate*, as being a mere aspiration or breathing, though not the only aspirated letter in English. The sound that distinctively belongs to it is that which it has at the beginning of a syllable either before a vowel, as in *hard*, *heavy*, or after (in spelling, but really before) *wh*, as in *where*, *when* (= *hence*, *hwen*). Classing it by this sound it may be regarded (though authorities are not quite agreed upon the subject) as a continuous sord consonant, being produced very far back in the throat by an unchecked emission of breath, accompanied with a very slight approximation of the root of the tongue to the back of the vocal chords. It is more closely allied to *k* (including the hard sound of *c*), *g*, and *ng* (in *sing*) than to any of the other consonants. To represent the sound just described, however, is only a comparatively small part of the duty it has to perform; it is also very commonly joined to other consonants to represent sounds for which there are no special letters in the alphabet, as in the digraphs *ch*, *sh*, *th* (*child*, *ship*, *thin*, *this*), or in other consonantal combinations of various origins and values, as in the words *enough* (*gh*=*f*), *plough* (*gh* silent), *philosophy* (*ph*=*f*), *rhetoric* (*h* silent), &c. *th* and *ph* are found only in words borrowed or derived from the Greek and Latin. *Ch* is also common in words taken from the Greek, but in this case it generally has the *k* sound, as in *chemistry*, *chyle*, *toponachy*, &c. This letter, along with most of the others in the Anglo-Saxon alphabet, was borrowed from the Latin alphabet, into which it passed from the Greek. In the Greek alphabet it latterly was used to represent *ē* (long), but originally and at the time when borrowed by the Latins it represented the rough breathing or aspirate. In Anglo-Saxon it appears

generally to have been more strongly guttural than in most Latin words, often corresponding to the rough guttural *ch* in German *nach*. In many words formerly spelled with this guttural *h* alone, we now find the *h* strengthened by the addition of a *g* before it, though the combination is now often silent altogether, as in *night* (A. Sax. *niht*), *thought* (A. Sax. *thoht*), &c. (See *G*.) In Old English such words were often written with a character distinct from *g* or *h*, and when this was dropped both these letters seem to have been considered necessary to give the proper guttural sound. In some words coming to us from the French it is silent when initial, as in *hour*, *honour*, *honest*. In A. Sax. *h* frequently occurs at the beginning of a syllable before *l*, *n*, and *r*, positions from which it has since fallen out. Comp. *hlaf*, *loaf*; *hlūd*, *loud*; *hræfen*, *raven*; *hring*, *ring*; *hrōf*, *roof*; *hnecca*, *neck*, &c. According to Grimm's law, when the same roots or words occur in English and Latin or Greek (with which Sanskrit generally agrees), *h* in English represents *k* in the latter languages; thus, *E. heart*=*L. cor*, *cordis*, Gr. *kardia*; *E. horn*=*L. cornu*; *E. head* (O.E. *heafod*)=*L. caput*, Gr. *kephālē*; *E. hound*=*L. canis*, Gr. *kyōn* (dog); *E. hemp*=*Gr. kannabis*, &c.—In music, *H* is the German equivalent for *B* natural, *B* being with them our *B* flat.—As a numeral in Latin, *H* denotes 200, and with a dash over it *H* 200,000.—As an abbreviation in Latin, *H* stands for *homo*, *heres*, *hora*, &c.—In English, *H.M.S.* stand for his (her) majesty's ship or service. *H.R.H.* for his (her) royal highness. *H.P.* for half-pay.

Hail (hăl), *n.* [A. Sax. *hagel*, *hayol*, *hagil*; comp. G. D. Dan. and Sw. *hagel*, Icel. *hagl*, hail. Perhaps from a verb *hag*, to hack or cut, hail being regarded as pieces cut small. For a similar softening or disappearance of *g*, comp. *fall*, *nail*, *fair*, *vay*, &c.] The small masses of ice or frozen vapour falling from the clouds in showers or storms. These masses consist of little spherules united, but not all of the same consistence, some being as hard and solid as perfect ice, others soft, like frozen snow. Hailstones assume various figures; some are round, others angular, others pyramidal, others

flat, and sometimes they are stelled with six radii, like crystals of snow. Hail occurs chiefly in spring and summer, and is always accompanied with electrical phenomena, and not infrequently with thunder. It usually precedes storms of rain, sometimes accompanies them, but never, or very rarely, follows them, especially if the rain is of any duration. The time of its continuance is always very short, generally only a few minutes. The usual size of hail-

stones is about $\frac{1}{4}$ inch in diameter, but they are frequently of much larger dimensions, sometimes even 3 and 4 inches in diameter. Hailstorms are very destructive to crops, particularly in hot climates. The phenomena attending the formation and fall of hail are not well understood; the dry state in which they fall shows that they have been exposed to cold below 0° C. This cold is probably due to the meeting of currents of unequal temperature and electric tension. In temperate regions the storms usually come with the prevalent winds of the district. Probably when hailstones are formed they are carried along through the atmosphere by currents of wind in a direction very oblique to the horizon, by which means they may be kept suspended a sufficient length of time to acquire the dimensions they possess by coagulating the particles of humid vapour with which they successively come in contact. Hail-rods, upon the same principle as lightning-rods, have been erected in Germany and Switzerland with the view of subtracting the superabundant electricity from the clouds and preventing the formation of hail; but they have not been attended with the success which was expected.

Hail (hăl), *v. t.* To pour down hail.

My people shall dwell in a peaceable habitation when it shall *hail*, coming down on the forest. Isa. xxxii. 19.

Hail (hăl), *v. t.* To pour down as hail.

Halmaille (hal'ma-li), *n.* A Ceylonee tree of the genus *Berrya* (*B. amomilla*) and nat. order *Tiliaceae*, closely allied to the linden or lime tree of Europe, and highly esteemed for house and boat building, and for many other purposes.

Halmaturus (hal'ma-tŭrus), *n.* [Gr. *halmata*, *halmatos*, a spring, a leap, a bound, and *oura*, a tail.] A genus of marsupials belonging to the kangaroo family. These animals are natives of Australia, are shy, and very fleet, and are only distinguished from the true kangaroo (*Macropus*) by having the muzzle naked. The male of *H. Parryi* measures 5 feet from the nose to the tip of the tail. *H. ualabatus* is the wallabee of Australia.

Halmote, **Hallimote** (hal'möt, hal'i-möt), *n.* [A. Sax. *hallo-gemot*, a meeting of the hall.] The old name for a court, which is now called a *Court-baron*.

Halo (hä'lō), *n.* [L. *halos*, genit. and acc. *halo*, a halo, from Gr. *halos*, a circular threshing-floor, and hence the disk of the sun, a halo.] 1. A luminous ring or circle, either white or coloured, appearing round the sun or moon. Sometimes one only appears, and sometimes several concentric circles appear at the same time; when the circles are of small diameter they are usually called *coronæ*. Halos are at times accompanied with other phenomena, such as *parhelia*, or mock-suns; *paraselenæ*, or mock-moons, and variously arranged white bands, crosses, or arcs. All these appearances are believed to be the result of certain modifications which light undergoes by reflection, refraction, dispersion, diffraction, and interference when it falls upon the crystals of ice, the rain-drops, or the minute particles that constitute fog and clouds.—2. Applied to any circle of light, as to the 'glories' surrounding the heads of saints.—3. A coloured circle round the nipple; an areola.—4. *Fig.* an ideal glory investing an object, due to the object being viewed through the medium of feeling or sentiment.

A halo of romance surrounded America in these days. It was the India of the reigns of the first Georges.

Scotsman newspaper.

Halo (hä'lō), *v. t.* To form itself into halo.

His gray hairs

Curled life-like to the fire

That *haloed* round his brow.

Southey.

Halterman† (halt-ér-man), *n.* A hangman.

It is an ill wind that blows no man to good, for *haltermen* and *baller-mans* were not better set a-work this many a day. *Bundle of New Wit*, 1636.

Haltersack† (halt-ér-sak), *n.* A term of reproach equivalent to *hang-dog*.

If he were my son, I would hang him up by the heels, and flea him, and salt him, whoreson *halter-sack*! *Barne*, 8c. 74.

Haltica (halt-i-ka), *n.* [Gr. *haltikos*, good at leaping, from *haltomai*, to leap.] A genus of coleopterous insects of the family Chrysomelina, popularly known as flea-beetles. The turnip-flea (*H. nemorum*), whose larvae are sometimes so destructive to the turnip crops, furnishes an example. They have thickened femora to their hind legs, and jump, hence their scientific and popular names.

Halticidae (halt-i-ti-ä), *n. pl.* [See HALTICA.] The flea-beetles, a family of coleopterous insects, now usually included under the Chrysomelidae, destructive to cruciferous plants, and of which the genus *Haltica* is the type. See HALTICA.

Hamadryad (ham-a-dri-ät), *n. pl.* **Hamadryads**, **Hamadryades** (ham-a-dri-äd-iz, ham-a-dri-äd-iz), [*Gr. hamadryas*, from *hama*, together, and *drys*, a tree, a nymph whose life was bound up with that of some tree.] 1. In *Greek* and *Roman antiqu.* a wood-nymph, feigned to live and die with the tree to which she was attached.

The common opinion concerning the nymphs, whom the ancients called *hamadryads*, is ascribed to the honour of trees than anything yet mentioned. It was thought that the fate of these nymphs had so near a dependence on some trees, more especially oaks, that they lived and died together. *Spectator*.

2. A dog-faced ape or baboon (*Cynocephalus hamadryas*), with long mane and whiskers—a native of Abyssinia.

Hamal (häm'al), *n.* A porter in Constantinople. The hamals carry immense weights between them, suspended on poles supported on their shoulders.

Hammer-beam (ham'mēr-bēm), *n.* A short beam attached to the foot of a principal

way across the apartments. The hammer-beam is generally supported by a rib rising up from a corbel below; and in its turn forms the support of another rib, constituting with that springing from the opposite hammer-beam an arch. Although occupying the place of a tie in the roofing, it does not act as a tie; it is essentially a lever, as will be obvious on an examination of the figure, which is a representation of the roof of Westminster Hall. Here the inner end of the hammer-beam A receives the weight of the upper portion of the roof, which is balanced by the pressure of the principal at its outer end.

Hammer-cloth (ham'mēr-kloth), *n.* The cloth which covers the driver's seat in some kinds of carriages: so called perhaps from the old practice of carrying a hammer, nails, &c., in a little pocket hid by this cloth, or rather, as Skeat explains it, from D. *hemel* and E. *cloth*, *hemel* meaning the top or cover of a coach, also heaven (=G. *himmel*).

The long-tailed duck (*H. glacialis*) inhabits the northern and arctic seas during summer, being frequent in Orkney and Shetland, but it is rare in South Britain. It flies swiftly and is an expert diver, and its down is said to rival that of the eider.

Hare-lip (här'lip), *n.* A fissure or vertical division of one or both lips, sometimes extending also to the palate. Children are frequently born with this kind of malformation, particularly of the upper lip. The cleft is occasionally double, there being a little lobe or portion of the lip situated between the two fissures. Every species of the deformity has the same appellation of hare-lip, in consequence of the imagined resemblance which the part has to the upper lip of a hare. The cure of hare-lip is performed by cutting off quite smoothly the opposite edges of the fissure, and then bringing them together and maintaining them in accurate apposition till they have firmly united.

This is the foul fiend Filibertigibbet. He begins at curfew, and walks till the first cock. He squints the eye and makes the hare-lip. *Shak.*

It has alternate leaves, so extended at the base that the stalks seem to grow through the leaves, whence the plant is also called *Thorow-wax* and *Thorow-leaf*. The flowers are small and of a greenish-yellow colour. The term hare's-ear is also assigned to *Erysimum austriacum* and *E. orientale*.

Hare's-foot (här'füt), *n.* A name applied to *Ochroma Lagopus*, a plant belonging to the nat. order Sterculiaceae. It is a Central American tree, growing to the height of 40 feet, and its spongy wood is so light that rafts formed from it are unsinkable. It has its name from its fruit, which is about 1 foot long, and when ripe splits open by five slits, from which the silk-cotton of the seeds spreads over the whole surface, giving it the appearance of a hare's foot. The cotton is used for stuffing cushions and pillows.—The hare's-foot tree is *Trifolium arvense*.

Hare's-foot Fern (här'füt fern), *n.* *Davallia canariensis*, a fern having a creeping stem or rhizome covered with brown chaff, and supposed to resemble the foot of a hare. See DAVALLIA.

Harmonic, Harmonical (harm'mō-n'ik, harm'mō-n'ik-al), *a.* 1. Relating to harmony or music.

After every three whole notes, nature requireth, for all harmonical use, one half note to be interposed. *Bacon.*

2. Concordant; musical; consonant; as, harmonic sounds.

Harmonic twang of leather, horn and brass. *Pope.*
3. In music, an epithet applied to the accessory sounds which accompany the predominant and apparently simple tone of any string, pipe, or other sonorous body.—4. In math. having relations or properties bearing some resemblance to those of musical consonances: said of numbers, terms of certain ratios, proportions, and the like.—*Harmonic curve*, an ideal curve into which a musical chord is supposed to be infected when put into such a motion as to excite sound.—*Harmonic interval*, in music, the distance between two chords or between two consonant notes.—*Harmonical mean*, in arith. and alg. a term used to express certain relations of numbers and quantities. An harmonical mean between two quantities, as *a* and *b*, is double a fourth proportional to the sum of the quantities, and the quantities themselves. Thus *a + b*:

$a :: b : \frac{ab}{a+b}$, which is the fourth proportional, and $\frac{2ab}{a+b}$ is the harmonical mean.—

Harmonical proportion, in arith. and alg. The relation between four quantities when the first is to the fourth as the difference between the first and second is to the difference between the third and fourth, or when *a : d :: a - b : c - d*. In like manner three quantities are said to be in harmonical proportion when the first is to the third as the difference between the first and second to the difference between the second and third.—*Harmonical series*, a series of many numbers in continued harmonical proportion.

—*Harmonic triad*, in music, the chord of a note, consisting of its third and perfect fifth, or in other words, the common chord.

Harmonic (harm'mō-n'ik), *n.* In music, (a) a note produced by a number of vibrations which is a multiple of the number producing some other; a secondary and less distinct tone which accompanies any principal and apparently simple tone, as the octave, the twelfth, the fifteenth, and the seventeenth. (b) An artificial tone produced.

Harmonica (harm'mō-n'ik-a), *n.* 1. A collection of musical glass gullets, resembling finger-glasses, which were put into a revolving

motion on their centres while the rim was touched by the finger. This instrument was invented by a German and improved by Dr. Franklin.—2. A musical instrument consisting of a small box, in which are ranged horizontally a number of oblong plates of glass, sometimes of metal, of unequal

Harmonica.

equal length, which are struck with a small flexible hammer, the handle of which is made of whalebone, and the striking part of cork covered with taffeta. The length of the plates determines the pitch of the notes, the high notes being produced by the short plates, and the low by the long. 3. Same as *Harmonicon*, 2.

Harmonically (harm'mō-n'ik-al-lī), *adv.* In a harmonical manner; musically; harmoniously; suitably.

Harmonichord (harm'mō-n'ik-kord), *n.* An instrument played like a pianoforte, but sounding like a violin. The tone is produced by the pressure of the keys, which sets a revolving cylinder of wood, covered with leather and charged with rosin, in action over the strings.

Harmonicon (harm'mō-n'ik-on), *n.* 1. A powerful musical instrument consisting of a large barrel organ, containing, in addition to the common pipes, others to imitate the different wind-instruments and an apparatus to produce the effects of drums, triangles, cymbals, &c., the combination being intended to resemble the effect of a military band.—2. A musical instrument only used as a toy, consisting of free reeds inclosed in a box in such a way that inspiration produces one set of sounds, respiration another.—3. Same as *Harmonica*, 2.—*Chemical harmonicon*, a contrivance consisting of a tube of glass, or of any other material, in which a small flame of hydrogen gas is made to burn, in consequence of which the column of air contained in the tube gives forth musical sounds.

Harmonics (harm'mō-n'iks), *n.* The doctrine or science of musical sounds.

Harmonious (harm'mō-n'ius), *a.* Exhibiting or characterized by harmony; as, (a) adapted to each other; having the parts proportioned to each other; symmetrical.

God hath made the intellectual world harmonious and beautiful without us. *Locke.*

Thoughts, that voluntary move Harmonious numbers. *Milton.*

(c) Agreeing in action or feeling; living in peace and friendship; as, an harmonious family or society.

Harmoniously (harm'mō-n'ius-lī), *adv.* In a harmonious manner.

Distances, motions, and quantities of matter harmoniously adjusted in this great variety of our system. *Bentley.*

Harmoniousness (harm'mō-n'ius-nes), *n.* The quality or condition of being harmonious.

Harmoniophon (harm'mō-n'io-fōn), *n.* [Gr. *harmonia*, a close fitting together, harmony, and *phōnē*, sound.] A musical wind-instrument consisting of a series of free reeds inserted in a tube like a clarinet. It is played upon by means of keys arranged like those of a pianoforte, that is, those producing the normal scale are in one row, and those producing the chromatic tones in another.

Harmonist (harm'mō-n'ist), *n.* 1. One who harmonizes; specifically, (a) in music, one skilled in the principles of harmony; a writer of harmony; a musical composer.

A musician may be a very skillful harmonist and yet be deficient in the talents of melody, air, and expression. *A. Smith.*

(b) One who shows the agreement or harmony between corresponding passages of different authors, as of the four evangelists.

He endeavoured to show how, among the fathers, Augustine and Hierom are flatly against the harmonists. *R. Nelson.*

2. One of a certain sect of Protestants from Württemberg, who settled in America in 1803. Their first American settlement was

at New Harmony, Indiana, whence they removed to Pittsburgh, Pennsylvania, in 1822. They hold their property in common, and consider marriage a civil contract.

Harmonite (harm'mō-n'it), *n.* Same as *Harmonist*, 2.

Harmonium (harm'mō-n'ium), *n.* A musical instrument resembling a small organ, and much used as a substitute for it. It is played on by a clavier or key-board similar to that of an organ or pianoforte, and the sounds are produced by reeds, not unlike the reed-pipes of an organ, but left free at one end—hence called *free reeds*—caused to vibrate by wind from a bellows worked by the feet. It has different stops or registers. This instrument is best adapted for the performance of grave or sacred music.

Harmoniumist (harm'mō-n'ium-ist), *n.* A player of the harmonium.

Harmonization (harm'mō-n'iz-ā'shon), *n.* The act of harmonizing or state of being harmonized.

Harmonize (harm'mō-n'iz), *v. i.* pret. & pp. *harmonized*; ppr. *harmonizing*. 1. In music, to form a concord; to agree in sounds or musical effect; as, the tones harmonize.—2. To be in peace and friendship, as individuals or families.—3. To agree in action, adaptation, or effect; to agree in sense or purpose; as, the arguments harmonize; the facts stated by different witnesses harmonize.

Harmonize (harm'mō-n'iz), *v. t.* 1. To adjust in fit proportions; to cause to agree; to show the harmony or agreement of; to reconcile the contradictions between.—2. To make musical; to combine according to the laws of counterpoint; to set accompanying parts to, as an air or melody. 'The Lutheran chorals harmonized by Bach.' *Dwight.*

Harmonizer (harm'mō-n'iz-er), *n.* One who harmonizes; a harmonist. 'Commentators and harmonizers.' *Cleaver.*

Harmonizing (harm'mō-n'iz-ing), *a.* Being in accordance; bringing to an agreement.

Harmonometer (harm'mō-n'om'et-er), *n.* [Harmony (which see), and Gr. *metron*, measure.] An instrument or monochord for measuring the harmonic relations of sounds. It often consists of a single string stretched over movable bridges.

Harmony (harm'mō-ni), *n.* [L. and Gr. *harmonia*, from Gr. *harmos*, a suiting or fitting together, from *arō*, to fit, to adapt.] 1. The just adaptation of parts to each other, in any system or combination of things, or in things intended to form a connected whole; as, the harmony of the universe.

Equality and correspondence are the causes of harmony. *Bacon.*

Heaven's harmony is universal law. *Couper.*

2. In music, (a) just proportion of sound; consonance; musical concord; the accordance of two or more sounds, or that union of different sounds which pleases the ear; or a succession of such sounds called chords.

Ten thousand harps that tune. *Milton.*

Angelic harmonies.

(b) The science which treats of such sounds.

3. Concord or agreement in facts, views, sentiments, manners, interests, and the like; good correspondence; peace and friendship; as, good citizens live in harmony.

Harmony to behold in wedded pair, More grateful than harmonious sounds to the ear. *Milton.*

4. In anat. an immovable articulation, in which the depressions and eminences presented by the bony surface are but slightly marked, as in the union of the superior maxillary bones with each other.—5. A literary work which brings together parallel passages of historians respecting the same events, and shows their agreement or consistency; said especially respecting the gospels.—*Natural harmony*, in music, consists of the harmonic triad or common chord.—*Artificial harmony* is a mixture of concords and discords.—*Figured harmony* is when one or more of the parts move during the continuance of a chord, through certain notes which do not form any of the constituent parts of that chord.—*Perfect harmony* implies the use of untempered concords only.—*Tempered harmony* is when the notes are varied by temperament. See TEMPERAMENT.—*Close harmony* is when the sounds composing each chord are placed so near to each other that no sound belonging to the chord could again be interposed between any of those already present.—*Spread harmony* is when the sounds of a chord are placed at such a wide distance from each other that some of them might be again

Harmonic Triad.

interposed between the sounds already present. — *Harmony* or *music of the spheres*, the music imperceptible to human ears, produced by the movements of the heavenly bodies, according to the belief or hypothesis of Pythagoras and his school. Pythagoras supposed these motions to conform to certain fixed laws which could be expressed in numbers, corresponding to the numbers which give the harmony of sounds. It is to this hypothesis that Shakspeare refers in the following passage:—

Look how the floor of heaven
Is thick laid with patines of bright gold;
There's not the smallest orb which thou beholdest
But in his motion like an angel sings:
Still quivering to the young-eyed cherubim:
Such harmony is in immortal souls;
But whilst this muddy vesture of decay
Doth grossly close it in, we cannot hear it.

— *Pre-established harmony*, an hypothesis adopted by Leibnitz, to explain the correspondence which exists between the course of our sensations and the series of changes actually going on in the universe.

Harmost (här'most), *n.* [Gr. *harmostis*, from *harmos*, to regulate.] In Greek antiquity, a governor sent by the Lacedaemonians, after the Peloponnesian war, into a subject or conquered town, partly to keep it in subjection, and partly to abolish the democratic form of government, and establish in its stead one similar to their own.

Harmotome (här'mô-tôm), *n.* [Gr. *harmos*, a joint, and *temnô*, to cut.] See CROSS-STONE.

Harn (här'n), *n.* [For *hardin*, *hardyn*, from *harnis*, the refuse of flax.] A very coarse kind of linen. [Scotch.]

Her cutty sark o' Paisley harn,
That while a lassie she had worn. Burns.

Harn (här'n), *a.* Made of harn; hence, coarse. [Scotch.]

Harnes, *n.* Harness; armour; furniture. *Chaucer.*

Harnese, *n.* *or i.* To dress.

Harness (här'nes), *n.* [W. *harnais*, *harnais*, harness, from *harn*, iron. Fr. *harnais*, G. *harnisch*, are probably borrowed from the English.] 1. The whole accoutrements or equipments of a knight or horseman; originally perhaps defensive armour, but used also for the furniture of a military man, defensive or offensive, as a casque, cuirass, helmet, girdle, sword, buckler, &c.

I can remember that I buckled his harness when he went into Blackheath field. *Latimer.*

2. The gear or tackle by which a horse or other animal is yoked to and made to draw or work a vehicle or anything else, as a waggon, coach, gig, chaise, plough, harrow, mill, log of wood, &c.; the working gear of a horse or other animal: sometimes applied to gear by which men drag heavy weights. 3. The apparatus in a loom by which the sets of warp threads are shifted alternately to form the shed. It consists of the heddles and their means of support and motion. Called also *Mounting*.

Harness (här'nes), *v.t.* 1. To dress in armour; to equip with armour for war, as a horseman. 'Harness'd in rugged steel.' *Romeo*. 2. To equip or furnish for defence.

They saw the camp of the heathen, that it was strong, and well harness'd, and compass'd round about with horsemen. *Macc. iv. 7.*

3. To put harness on, as a horse. 'Harness the horses.' *Jer. xli. 4.*

Harness-cask (här'nes-kask), *n.* See HARNESS-TUB.

Harness-currer (här'nes-ku-ri-er), *n.* A dresser of leather for harness or saddlery purposes.

Harnesser (här'nes-er), *n.* One who harnesses.

Harness-plater (här'nes-plät-er), *n.* A workman who electroplates the metal work for harness.

Harness-tub (här'nes-tub), *n.* *Naut.* a cask of a peculiar form fastened on the deck of a vessel to receive the salted provisions for daily consumption. Called also *Harness-cask*.

Harness-weaver (här'nes-wäv-er), *n.* A weaver employed in the manufacture of the more complicated patterns of shawls, &c. [Scotch.]

Harns (här'nz), *n. pl.* [A. Sax. *hærnes*, D. *hiërne*, Icel. *hærni*, G. *ge-hirn*, brains.] Brains. [Scotch.]

Harōja (här-ō'ja), *n.* Same as *Halluf*.

Harow! (här'ō), *exclam.* [O. Fr. *harō*.] A form of exclamation anciently used in Normandy to call for help or to raise the hue-and-cry.

Harp (härp), *n.* [A. Sax. *hearpe*, Icel. *harpa*, O. H. G. *harfa*, G. *harfe*, late L. *harpa*, which is probably the Latin form of Gr. *harpē*, a sickle, from its shape. The name may be originally Teutonic, however, and the L. L. *harpa* merely a Latinized form of it.] 1. A stringed musical instrument of great antiquity, found among the Assyrians, Egyptians, Hebrews, Greeks, Irish, Welsh, and other nations. It is found in great variety of form and construction, some of its varieties being shown in the accompanying figures. All these, it will be seen, except the Anglo-

Ancient Harps.

1, 2, Egyptian. 3, Assyrian. 4, Persian. 5, Anglo-Saxon.

Saxon, differ from the modern harp in wanting the front pillar. There are no representations of the Hebrew harp of undoubted accuracy. The modern harp is nearly triangular in form, and the strings are stretched from the upper part to one of the sides. It stands erect and is played with both hands, the strings being struck or pulled by both fingers and thumb. Before its improvement by Erard, the harp was tuned in the principal key, and modulations effected by pressure of the thumb, or by turning the tuning-pins of the strings which it was desired to alter. Erard first added seven pedals to the instrument, which were moved by the foot of the performer, and afterwards constructed a double-action harp with seven pedals. The harp thus constructed contains forty-three strings tuned according to the diatonic scale, every eighth string being a replicate in another octave of the one counted from. By means of the pedals each string can be sharpened twice, each time a semitone, so that the instrument is capable of rendering the full chromatic scale, and of modulating into all the keys of the tonal system. Its range is six octaves, being from double E below the bass to E in altissimo.—2. A constellation, otherwise called *Lyra* or *the Lyre*.—3. Formerly, an Irish coin bearing the emblem of a harp, of the value of a halfpenny.—4. In Scotland, a grain-sieve for removing weed-seeds from grain; also, an oblong implement, consisting of a frame filled up with parallel wires resembling the strings of a harp, for separating the finer from the coarser parts of sand; a screen.

Harp (härp), *v.t.* 1. To play on the harp. I heard the voice of harpers, *harping* with their harps. *Rev. xiv. 2.*

2. To dwell on a subject tiresomely and vexatiously, in speaking or writing; to speak or write repeatedly with slight variations: usually with *on* or *upon*. He seems Proud and disdainful, *harping* on what I am . . . Not what he knew I was. *Shak.*

—To *harp on one string*, to dwell too exclusively upon one subject, so as to weary or annoy the hearers. You *harp* a little too much upon one string. *Collier.*

Harp (härp), *v.t.* 1. To give forth, as a harp

gives forth sound; to give expression to or utter.

Thou'st *harp'd* my fear aright. *Shak.*

2. In Scotland, to sift or separate by means of a harp; as, to *harp* grain; to *harp* sand.

Harpa (här'pa), *n.* [L. *harpa*, a harp.] A genus of gasteropodous molluscs of the whelk family (Buccinidae), distinguished by the beauty of their shells. They are commonly called *Harp-shells*, because their curved outlines have some resemblance to the shape of a harp, and their deep longitudinal ridges represent the strings.

Harpactidæ (här-pak'ti-dē), *n. pl.* [Gr. *harpax*, rapacious, from *harpazō*, to seize, and *eidos*, resemblance.] A family of entomotracheous crustaceans of the order Copepoda, having the eyes so closely set together as to appear only one.

Harpagon (här'pa-gon), *n.* [Gr. *harpagē*, from *harpazō*, to seize.] A grappling-iron.

Harpagophytum (här-pa-gō'fi-tum), *n.* [L. *harpago*, a hook; Gr. *harpagē*, a seizure, from *harpazō*, to seize; and Gr. *phyton*, a plant.] A genus of plants, nat. order Pedaliaceæ, including the grapple-plant of South Africa, *H. procumbens*. Another species, *H. leptocarpum*, much resembling the grapple-plant in distinctive characteristics, is a native of Madagascar.

Harpalidæ (här-pal'i-dē), *n. pl.* [Gr. *harpalos*, greedy, and *eidos*, resemblance.] An extensive family of coleopterous insects, of the section Geodephaga, by some regarded as a sub-family of the Carabidæ. The Harpalidæ are divided into three principal sections, characterized by modifications of the anterior tarsi of the male: (a) *Harpaline*, having the four anterior tarsi of the males dilated; (b) *Feronine*, having the two anterior tarsi dilated, and the joints heart-shaped; (c) *Pattellimane*, having the two anterior tarsi of the males dilated, the joints being square or rounded. They are usually found under stones.

Harpax (här'paks), *n.* [Gr. *harpax*, rapacious.] A genus of fossil shells of the group Ostreacea, oblong and somewhat triangular in shape, the hinge being formed by two projecting teeth. It is now included in the genus *Plicatula*.

Harper (härp'ér), *n.* 1. A player on the harp.—2. An Irish brass coin of the reign of Queen Elizabeth, of the size of a shilling and the value of a penny: so called from bearing the figure of a harp. 'The harper that was gathered amongst us to pay the piper.' *E. Janson.*

Harping (härp'ing), *a.* Pertaining to the harp; as, *harping* symphonies. *Milton.*

Harping-iron (härp'ing-í-ern), *n.* A harpoon (which see).

The boat which on the first assault did go,
Struck with a *harping-iron* the younger foe. *Waller.*

Harpings, **Harpins** (härp'ingz, härp'inz), *n. pl.* *Naut.* the foreparts of the masts, which encompass the bow of the ship, and terminate in the stem. Their use is to strengthen the ship in the place where she sustains the greatest shock in plunging into the sea.

Harpist (härp'ist), *n.* A player on the harp; a harper.

Harpoon (här-pōn'), *n.* [Fr. *harpon*, a harpoon, from *harper*, to gripe, to clutch, probably from *harpe*, a harp, and also a claw, a hook or angle-iron (see *HARP*); the D. *harpoen*, G. *harpune*, have the same origin.] A spear or javelin used to strike and kill whales and large fish. It consists of a long

a, Hand-harpoon. b, c, Gun-harpoons.

shank, with a broad flat triangular head, sharpened at both edges for penetrating the whale with facility. It may be thrown by the hand or fired from a gun. See HARPOON-GUN.

Harpoon (här-pōn'), *v.t.* To strike, catch, or kill with a harpoon.

The beluga is usually caught in nets, but is sometimes *harpooned*. *Pennant.*

Harpooneer (här-pön-ēr'), *n.* A harpooner. [Rare.]

Harpooner (här-pön-ēr'), *n.* One who uses a harpoon; the man in a whale-boat who throws the harpoon.

Harpoon-gun (här-pön-gun'), *n.* A gun for firing a harpoon, employed in the whale-fishery. Its barrel is about 2 feet long and 3 inches exterior diameter, and rests on a swivel. The harpoon to be discharged from

Harpoon-gun.

it has the end of its shank fitting the bore of the gun, and is so contrived that while a part of its shank passes into the gun-barrel, the cord attached to it remains outside, and slides up to the end on being fired.

Harpour, *n.* A harper. *Chaucer.*
Harpess (här-pēs'), *n.* A female player on the harp. *Sir W. Scott.*

Harp-seal (här-pēs'), *n.* The Greenland seal (*Phoca groenlandica*), so called from the large, black, crescent-shaped mark on each side of the back. See SEAL.

Harp-shell (här-pē-shēl'), *n.* See HARPA.

Harpichord (härp-si-kord'), *n.* The old name for the spinet and the harpsichord.

Harpsichord (härp-si-kord'), *n.* [Older forms, *arpsichord*, *harpschord*, *harpschorda*, O.Fr. *harpechord*, It. *arpicordo*—*harp* and *chord*; it does not appear how the *s* got inserted.] A stringed musical instrument with a key-board for the fingers, in shape something like the horizontal grand pianoforte. The strings or wires were set in vibration by a quill plectrum. This instrument was difficult to keep in tune, and the quills needed constant renewal. It was superseded by the pianoforte about the middle of the eighteenth century.

Harpisciol, **Harpsecol** (härp-si-kol'), *n.* A harpsichord.

Harpster (härp-sēr'), *n.* A female performer on the harp. [Rare.]

Harpy (här-pi'), *n.* [Fr. *harpie*; L. *harpyia*; Gr. *harpia*, from the root of *harpazō*, to seize or claw.] 1. In *class. antiq.* a fabulous winged monster, ravenous and filthy, having the face of a woman and the body of a bird, with its feet and fingers armed with sharp claws, and the face pale with hunger.

Harpy, from an antique gem.

The harpies were three in number, Aello, Ocypete, and Celeno. In *her.* the harpy is represented as a vulture with the head and breast of a woman. —2. The harpy-eagle (which see). —3. A name given to the *Circus aeruginosus*, or marsh-harrier, a British species of hawk, allied to the buzzards. See HARRIER. —4. Any rapacious or ravenous animal; an extortioner; a plunderer.

I will . . . do you any embassy . . . rather than hold three words conference with this *harpy*. *Shak.*

Harpy-eagle (här-pi-ē-gl'), *n.* The *Harpyia destructor* of Linn., the *Thrasaetus harpyia* of modern zoologists, a rapacious bird of Mexico and South America, celebrated for the enormous development of its legs and beak, and for the strength and power it evinces in mastering its prey.

Harquebuse, **Harquebuss** (härkwē-bus'), See ARQUEBUSE.

Harquebussier (härkwē-bus-ēr'), See ARQUEBUSTIER.

Harr (här'), *n.* [See HAAR.] A storm proceeding from the sea; a tempest; an eagle.

Harrage (här-rāj'), *v.t.* To harass; to plunder from.

This of Lincoln, *harraged* out before, should now lie fallow. *Fidler.*

Harrateen (har-ra-tēn'), *n.* A kind of stuff or cloth. *Shenstone.*

Harrico (här-ri-kō'), *n.* The same as *Harricot*.

Harridan (här-di-dan'), *n.* [Fr. *haridelle*, Prov. Fr. *hardèle*, *härin*, a worn-out horse, a jade.] A hag; an odious old woman; a vixenish woman; a trollop.

Harrier (här-ri-ēr'), *n.* [From *hara*.] A small kind of dog of the hound species employed in hunting the hare. There are particular breeds of the harrier, as the large slow-hunting harrier and the little fox-beagle, and a cross-breed between these. In all the scent is extremely keen, which enables them to follow all the doblings of the hare.

Harrier (här-ri-ēr'), *n.* [From *harry*, to pillage, because it pillages the poultry-yards.] A hawk of the genus *Circus*, allied to the buzzards. The harriers are more bold and active than the buzzards. They strike their prey upon the ground and generally fly very low. There are several species, as the marsh-harrier, the hen-harrier, and ash-coloured harrier. These are all found in Great Britain. The marsh-harrier (*C. aeruginosus*), also called the moor-buzzard, harpy, and duck-hawk, is from 21 inches to 23 inches long. The head of the male is yellowish white. The hen-harrier (*C. cyaneus*) is 18 inches to 20 inches long; the adult male is of an almost uniform gray, the female brown. The female is called the *ringtail*, from the rust-coloured ring formed by the tips of the tail-feathers. The hen-harrier is very destructive to poultry-yards, whence the name. The male is sometimes known as the blue hawk.

Harri-karri, **Harri-kiri** (här-ri-ka-ri, här-ri-ki-ri'), *n.* The Chinese term for the mode of suicide incumbent on Japanese military and civil officials, when ordered by government to perform it as a punishment for any offence. It is effected by inflicting two gashes on the belly in the form of a cross. Called frequently by English writers *Happy Despatch*. Written also *Harri-kiru*.

Harrington (här-ring-ton'), *n.* A farthing; so named because Lord Harrington obtained from James I. a patent for making brass farthings.

Harringtonite (här-ring-ton-it'), *n.* Same as *Natrolite* (which see).

Harrot (här-rot'), *n.* A corruption of *Herald*.
The first red herring that was broiled in Adam and Eve's kitchen do I fetch my pedigree from, by the *harrot's* book. *B. Jonson.*

Harrow (här-ō'), *n.* [A. Sax. *hearge*, a harrow; same word as Dan. *harve*, Sw. *harf*, a harrow; perhaps akin to D. *harik*, G. *harke*, a rake.] An agricultural implement, usually formed of pieces of timber or metal crossing each other, and set with iron teeth, called tines.

Harrow.

It is drawn over ploughed land to level it and break the clods, and to cover seed when sown. An implement, called a *chain harrow*, consisting of a congeries of iron rings, is used for covering grass seeds, and especially for separating weeds from the earth or clods in which they are enveloped.

Harrow (här-ō'), *v.t.* 1. To draw a harrow over, for the purpose of breaking clods and levelling the surface, or for covering seed sown; to break or tear with a harrow; as, to *harrow* land or ground. —2. To tear; to lacerate; to torment; to harass.

I could a tale unfold, whose lightest word Would *harrow* up thy soul. *Shak.*

Harrow (här-ō'), *v.t.* [See HARRY.] To pillage; to strip; to lay waste by violence.

Meaning thereby to *harrow* his people, did accumulate them the rather. *Bacon.*

Harrow (här-ō'), *exclam.* See HAROW.
Harrower (här-ō-ēr'), *n.* One who harrows.
Harrower (här-ō-ēr'), *n.* A species of hawk; a harrier (which see).

Harrowingly (här-ō-ing-li'), *adv.* In a harrowing manner; exterminatingly.

Harry (här'), *v.t.* pret. & pp. *harried*; ppr. *harrying*. [A. Sax. *heryian*, *herian*, to plun-

der, to afflict, from *here*, an army, an expedition; comp. Icel. *herja*, to lay waste, to oppress; Dan. *harye*, *harye*, G. *verheeren*, to ravage. With this word the A. Sax. *heryian*, to vex, afflict, seems to have been early confounded. See HARROW.] 1. To strip; to pillage; to plunder; to rob; as, to *harry* a bird's nest.

And still, from time to time the heathen host Swarmed overseas and *harried* what was left. *Tennyson.*

2. To harass; to agitate; to tease; to harrow.

I repent me much *Shak.*

That I so *harried* him.

Harry (här'), *v.t.* To make harassing incursions.

What made your rogueries *Harrying* for victuals here? *Beau. & Fl.*

Harry Soph (här-ri-sof'), *n.* [Gr. *erisophos*, very learned.] In the University of Cambridge, a title given to those students who, having attained sufficient standing to take the degree of B.A., declare themselves candidates for a degree in law or physic.

Harsh (härsh'), *a.* [A Scandinavian word: O.E. and Sc. *harsk*, harsh, rough, sharp, acid; Dan. and O.Sw. *harsk*, rancid; G. *harsch*, harsh, rough; root doubtful.] 1. Rough; rugged; grating; especially, (a) to the touch; as, *harsh* cloth: opposed to smooth. '*Harsh* sand.' *Boyle.* (b) To the taste; as, *harsh* fruit. (c) To the ear; discordant; jarring; as, *harsh* notes; a *harsh* voice. —2. Austere; crabbed; morose; peevish; as, civilization softens the *harsh* temper or nature of man.

He was a wise man and an eloquent; but in his nature *harsh* and haughty. *Bacon.*

3. Rough; rude; abusive; rigorous; severe; as, a *harsh* reflection.

Bear patiently the *harsh* words of thy enemies. *Jer. Taylor.*

Harshly (härsh-li'), *adv.* In a harsh manner; roughly; austere; crabbedly; rudely; unpleasantly.

It would sound *harshly* in her ears. *Shak.*

Harshness (härsh-nes'), *n.* The quality or condition of being harsh.

'Tis not enough no *harshness* give offence, The sound must seem an echo to the sense. *Pope.*

—*Acerimony, Asperity, Harshness, Fortness.* See ACERIMONY.

Harslet (häs-let'), *n.* Same as *Haslet*.

Hart (här't'), *n.* [A. Sax. *heort*, *hiorot*; comp. L.G. and D. *hart*, Dan. *hört*, Sw. *hört*, Icel. *hjórt*, G. *hirsch*, stag; lit. horned animal; allied to Gr. *keras*, L. *cornu*, a horn. See HORN.] A stag or male deer when he has passed his fifth year, and the sur-roval or crown antler is formed. See ANTLE. — *Hart of ten*, a hart with ten tines or branches on his horns.

A great large deer is—
What head?—Forked, a *hart of ten*. *B. Jonson.*

Hartail (här-tail'), *n.* The East Indian name of orpiment.

Hartbeest, **Hartebeest** (här't-bēst, här'te-bäst'), *n.* [Dutch.] The name given by the Dutch colonists to the kaama, a South African antelope. See KAAMA.

Hart-berry, **Hart-crop** (här't-be-ri, här't-krop'), *n.* Eilberry (which see).

Harten (här't-n'), *v.t.* To hearten; to encourage. *Spenser.*

Hartin (här't-in'), *n.* (C₁₀H₁₇O.) A fossil resin resembling hartite; massive, but crystallizing from rock-oil in needles belonging to the trimetric system. It is found in the lignite of Oberhart, Austria.

Hartite (här't-it'), *n.* (C₁₀H₁₇) A fossil resin resembling hartin, and found like it in the lignite of Oberhart, Austria.

Hartroyal (här't-roi-al'), *n.* A plant, a species of poplain.

Hart's-clover, **Hart's-trefoil** (här't's-klo-der, här't's-tré-foil'), *n.* A plant, the common yellow mellilot (*Mellilotus officinalis*). See MELLILOT.

Hartshorn (här'tshorn'), *n.* The antler of the hart or stag (*Cervus elaphus*). The constituent elements of deciduous horns differ materially from those of persistent horns, as of the ox, and are identical, or nearly so, with those of bone. These horns were formerly much used as a source of ammonia, and the products of their distillation much used in medicine under the name of the *volatile salt of hartshorn*, *spirit of hartshorn*, but these have now been superseded by simpler preparations of ammonia and carbonate of ammonia. See AMMONIA. — *Jelly of hartshorn*, a nutritive jelly, formerly obtained from the shavings of the horns of harts, now procured by planing down the

bones of calves. — *Hartshorn plantain*, *Plantago coronopus*. See BUCKS-HORN.

Hart's-tongue (harts'tung), *n.* The popular name of a genus of ferns, the *Scolopendrium*, nat. order Polypodiaceae. One species (*S. vulgare*) is found in Britain. The name Hart's-tongue is also given to another fern — *Polypodium phyllitis*.

Hart's-trefoil. See HART'S-CLOVER.

Hartwort (harts'wört), *n.* Torfilyum, a genus of plants, nat. order Umbelliferae, having pinnatisect leaves and compound umbels of white flowers, chiefly natives of the Mediterranean region. One species, *T. maximum*, an annual, has been found growing in waste ground about London and Oxford.

Harum-scarum (här'um-skä'rum), *a.* [Perhaps from *hare*, to fright, and *scare*.] Hare-brained; unsettled; giddy; rash.

Harum-scarum (här'um-skä'rum), *n.* A giddy, hare-brained, or rash person.

Haruspice. See ARUSPICER.

Haruspicy (ha-rus'pis-i). See ARUSPICY.

Harvest (här'vest), *n.* [A. Sax. *harfest*, *harfest*, *harfest*; comp. O. Fris. *harvest*, G. *herbst*, D. *herbst*, autumn, harvest; probably cognate with G. *karpos*, fruit, L. *carpo*, to pluck. Wedgwood, following Ihre, thinks the truer form is seen in Icel. *haust*, Sw. and Dan. *höst*, harvest, autumn, D. *oogst*, harvest, from L. *augustus*, the month of August, *Armor. oost*, harvest, being of the same origin.] 1. The season of gathering a crop of any kind; the time of reaping and gathering corn and other grain. — 2. That which is reaped and gathered in; the ripe corn or grain collected and secured in barns or stacks.

To glean the broken ears after the man
That the main harvest reaps. *Shak.*

3. The product of any labour; gain; result; consequence.

Let us the harvest of our labour eat. *Dryden*.
What is that to him that reaps not harvest of his
youthful joys? *Tennyson*.

Harvest (här'vest), *v.t.* To reap or gather, as corn and other fruits, for the use of man and beast.

Harvest-bug (här'vest-bug), *n.* A species of tick (*Lepus autumnalis*) which infests the skin in the autumn.

Harvester (här'vest-er), *n.* One who or that which harvests; specifically, an American machine for cutting grain, grass, or other crop; a mower; a reaper.

Harvest-feast (här'vest-fest), *n.* The feast made at the ingathering of the harvest.

Harvest-field (här'vest-feld), *n.* A field from which a harvest is gathered.

Harvest-fly (här'vest-flī), *n.* A name applied in America to several large hemipterous insects of the Cicada group, popularly called locusts in the United States.

Harvest-goose (här'vest-gös), *n.* A stubble-goose (which see).

Harvest-home (här'vest-höm), *n.* 1. The time of getting home the harvest; the bringing home of the harvest; hence, any opportunity for making gain.

And his chin, new reaped,

Sax. between vowels); comp. Dan. *have*, Icel. *hafa*, Goth. *haben*, G. *haben*, to have. Cog. L. *capio*, to take. L. *habeo*, to have, probably belongs to a different root. *Heave* may be allied.] 1. To possess; to hold in possession or power; as, I *have* money, land, books, clothes.—2. To possess, as something that is connected with or regularly attached to one.

Have ye another brother? Gen. xliii. 7.

Sheep that *have* not a shepherd. 1 Ki. xxii. 17.

3. To accept; to take as husband or wife; as, will you *have* this apple?

Break thy mind to me in broken English: wilt thou *have* me? Shak.

4. To hold; to regard; as, to *have* in honour, that is, to hold in honour, to honour; to *have* in derision or contempt, to hold in derision or contempt, to deride, to despise. 'Of them shall I be *had* in honour.' 2 Sam. vi. 22.—5. To maintain; to hold in opinion.

Sometimes they will *have* them to be the natural heat; sometimes they will *have* them to be the qualities of the tangible parts. Bacon.

Haustement, from MS. in Royal Library, Paris.

6. To be urged by necessity or obligation; to be under necessity, or impelled by duty; as, I *have* to visit twenty patients every day; the nation *has* to pay the interest of an immense debt.

7. To seize and hold; to catch; as, the hound *has* him.—8. To contain; as, the work *has* many beauties and many faults.—9. To procure or make to be; to effect; to cause; to require; to determine.

Every day after his meal, he *has* proclamation made that all the kings of the earth are now at liberty to dine. Brougham.

10. To cause to go or be removed; to cause to be brought; to take.

And Amnon said, *Have* all men out from me. 2 Sam. xiii. 9.

That done, go and cart it, and *have* it away. Thackeray.

11. To gain; to procure; to receive; to obtain; to purchase; as, I *had* this cloth very cheap; he *has* high wages for his services.—12. To bring forth, to produce, as a child.

By the first (wife) *had* he Suano. R. Browne.

Both blue eyes more bright than clear, Each about to *have* a tear. Coleridge.

13. To perceive, know, or find something happen: in this sense followed by an infinitive, usually without the *to*; as, 'I must not *have* you question me.' Shak. 'I hate to *have* thee climb that wall by night.' Longfellow. 'We often *had* the traveller or stranger visit us to taste our gooseberry wine.' Goldsmith; but sometimes the infinitive has the *to*; as, 'Do but speak what thou'lt *have* me to do.' Marlowe.—14. To experience in any way, as to enjoy, to participate in, to feel; as, to *have* a cigar; to *have* a rest; to *have* a discussion, debate, encounter; to *have* a reluctance to do anything; seldom found in this sense in the passive voice, though this use sometimes occurs; as, a debate *was had* on the appropriation of hospitals.—15. To understand; to know; to be expert in; to have learned; to have become acquainted with.

He *hath* neither Latin, French, nor Italian. Shak.

You *have* me, *have* you not? Shak.

Where *have* you this? (that is, Where have you learned this?) Shak.

I *had* as good, it would be as well for me; I *had* better, it would be better for me; I *had* best, it would be best for me; I *had* as lief or lieve, I would as willingly; I *had* rather, I should prefer.

Then you *had* as good make a point of first giving away yourself. Goldsmith.

You *had* better leave your folly. Marlowe.

I *had* as lief be none as one. Shak.

I *had* much rather be myself the slave,

And wear the bonds, than fasten them on him, Cooper.

The great antiquity of this construction in English forbids the supposition that the *had* in such phrases is a corruption of *would*, as has been suggested. *Have after!* pursue! let us pursue!

Let's follow; 'tis not fit thus to obey him.—*Have after!* Shak.

—*Have at!* go at! assail! encounter! as, *have at him!*—*Have with!* come on! agree!

—*To have a care*, to take care; to be on guard, or to guard.—*To have a person out*, to meet him in a duel.

Our mother can't marry a man with whom one or both of us has been out on the field, and who has wounded us or killed us, or whom we have wounded or killed. We must *have* him out, Harry. Thackeray.

—*To have it out of a person*, to punish him; to retaliate on him; to take him to task.—*Have* is used as an auxiliary verb to form certain compound tenses, as the perfect and pluperfect of both transitive and intransitive verbs, the past participle of which completes the tense either alone or with some other auxiliary. In such cases the word *have* no doubt originally had its proper meaning as a transitive verb, and was so used at first only with other transitive verbs, as denoting the possession of the object in the state indicated by the past participle of the latter verb; thus I *have* received a letter, means literally I possess a letter received. The construction was afterwards extended to cases in which the possessor of the object and the performer of

the action are not necessarily the same, as in *I have written a letter*, and to intransitive verbs. In the same way the Latin *habere*, to have, has come to be used as an auxiliary or merely a formative element in the conjugation of the verb in the Romance languages.

Haveless (hav'les), *a.* Having little or nothing. 'Though a man be haveless.' *Gower.*

Havelock (hav'lok), *n.* [After General Havelock, distinguished in the Indian Mutiny of 1857.] *Milit.* A light kind of covering for the head and neck, composed of white cloth, used by soldiers and others as a protection against sun-strokes.

D. *haght*, G. *habicht*, Icel. *hawk*, Dan. *høg*, a hawk.] A name frequently applied to almost all the members of the family Falconidae, but also restricted to designate a section of that family, characterized by having a crooked beak, furnished with a cere at the base, a cloven tongue, the head thick set with feathers, and wings which reach no farther along the tail than two-thirds of its length. Most of these birds are rapacious, feeding on birds or other small animals, as the goshawk and the sparrow-hawk (which see). The species of hawks are numerous, and are arranged under different genera. They are distributed over the world. Hawks were formerly trained for sport or catching small birds. They were reckoned among the ignoble birds of prey.

Hawk (hāk), *v.t.* 1. To catch or attempt to catch birds or small quadrupeds by means of hawks or falcons trained for the purpose, and let loose on the prey; to practise falconry. 'He that *hawks* at larks and sparrows.' *Locke*.—2. To fly in the manner of the hawk; to soar.

Head (hed), *n.* [A. Sax. *heaf*, *heafod*, Dan. *hoved*, G. *haupt*, O.H.G. *houbit*, Goth. *hauþith*, head. Cog. L. *caput*, Gr. *kephalē*, head. For change of *c*, Gr. *k*, into Teut. *h*, see H.]

1. The name applied generally to the anterior part or extremity of animals. The development of the head is due to the principle termed *cephalisation* (which see) by Professor Dana, i.e. a tendency towards specialization and concentration of nerve-centres and sense-organs. The head bears the mouth, brain, and sense-organs. In invertebrates the jaws are never true parts of the head, but may be modified limbs or hard parts developed in the lining membrane of the mouth. The head of vertebrates is divisible into a *facial* and *cranial* part, the latter containing the brain. In invertebrates (e.g. insects, lobsters, &c.) the head consists of a varying number of segments resembling those of the body in essential nature, but having their appendages peculiarly modified for mastication and prehension.—2. As the seat of the brain and mental faculties it is used for understanding; will or resolution; inclination; thoughts; mind; as, a good *head*; a strong *head*; and also in the phrases, of *his own head*; *on* or *upon their own head*.

The bordering wars in this kingdom were made altogether by volunteers *upon their own head*, without any pay or commission from the state. *Sir J. Davies*.

3. A person; an individual; a unit; as, the tax was raised by a certain rate per *head*: used only in sing.

Thirty thousand *head* of swine. Addison.

4. A chief; a principal person; a leader; a commander; one who has the first rank or place, and to whom others are subordinate; as, the *head* of an army; the *head* of a sect or party. Eph. v. 23.—5. What gives a striking appearance to the head, as the hair, a head-dress, antlers of a deer, &c.; as, a beautiful *head* of hair; 'a buck of the first *head*' (that is of the fifth year). *Shak.* 'A laced *head*.' Swift.—6. Part of a thing regarded as in some degree resembling in position or otherwise the human head, (a) the top, especially when larger than the rest of the thing; as, the *head* of a spear; the *head* of a cabbage; the *head* of a nail; the *head* of a mast. (b) The main point or part; that which is most had regard to.

True, I have married her: The very *head* and front of my offending Hath this extent, no more. *Shak.*

(c) The forepart; as, the *head* of a ship, which includes the bows on both sides; also, the ornamental figure or image erected on or before the stem of a ship. (d) The upper part, as of a bed or bedstead, of a street, &c. (e) In bot. the top of corn or other plant; the part on which the seed grows. See CAPITULUM. (f) That which rises on the top; as, the froth or head on a pot of beer or other effervescing liquor. (g) The matured part of an ulcer or boil; hence, to come to a *head*, to suppurate. (h) The principal source of a stream; as, the *head* of the Nile. (i) The part most remote from the mouth or opening into the sea; as, the *head* of a bay, gulf, or creek. (j) A headland; promontory.—7. Altitude of water in ponds or reservoirs, as applicable to the driving of mill-wheels.

A mill driven by a fall of water, whose virtual *head* is ten feet. *Caird's Mechanics* Dict.

8. The foremost place; the place of honour or of command; as, the lord-mayor sat at the *head* of the table.

An army with the Duke of Marlborough at the *head* of them. Addison.

9. Crisis; height; influence; force; strength; pitch; as, the sedition got to such a *head* as not to be easily quelled.

The indisposition . . . is grown to such a *head*. Addison.

10. Topic of discourse; chief point or subject; a summary; as, the *heads* of a discourse or treatise.

Aids were properly speaking confined to the *heads* of marrying the lord's daughter, making his son a knight and redeeming his own person from captivity. *Brougham*.

11. A bundle of flax measuring probably 2 feet in length and weighing a few pounds. In the north of Europe 18 head of hemp or flax weigh about 1 cwt.—12. Armed force. I, Left primitive carotid artery. K, Left subclavian artery. L, Left coronary artery. Fig. 2, Section, right side. C, D, E, F, G as in fig. 1. a, Cavity of right auricle. b, Inferior vena cavi. c, Coronary valve. d, Entrance of the auriculo-ventricular opening. e, Valve of the pulmonary artery. f, Fossa ovalis.

propelling agent of the blood in the animal body, situated in the thorax of vertebrate animals. From this organ the primary arteries arise, and in it the main veins terminate. By its alternate dilatation and contraction the circulation is carried on, the blood being received from the veins, and returned through the arteries. In man, quadrupeds, and birds the heart consists of four chambers; reptiles and amphibians have a three-chambered heart, whilst fishes have two chambers only. The heart of an insect or a spider is a long tube divided into compartments; that of molluscs is two or three chambered.—2. Regarded as the seat of the mental faculties or capacities, or some one or other or combination of them, it stands for (a) the mind, the soul, the consciousness; the thinking faculty; as, there are many devices in a man's *heart*; the *heart* of kings is unsearchable; David had it in his *heart* to build a house of rest for the ark. 'My *heart* misgives me.' *Shak.* 'Ask your *heart* what it doth know.' *Shak.*

'What his heart thinks his tongue speaks.' *Shak.*

Michal saw King David leaping and dancing before the Lord, and she despised him in her heart. 2 Sam. vi. 16.

(b) The seat of the affections and passions, either singly or combined, as of love, joy, grief, enmity, courage, pleasure, &c., especially of the more admirable feelings or emotions; as a good, tender, loving, bad, or selfish heart: hence, sometimes used of the moral side of our nature in contradistinction to the intellectual; as, he was all head and no heart; sometimes confined to courage; spirit; as, to take heart; to give heart; to recover heart.

The king's heart was toward Absalom. 2 Sam. xiv. 1. Kind hearts are more than coronets. And simple faith than Norman blood. *Tennyson.* Being so clouded with his grief and love, Small Heart was his after the holy quest. *Tennyson.*

(c) The seat of the will or inclination; hence, disposition of mind; mental tendency.

He had a heart to do well. *Sir P. Sidney.*

The heart of the sons of men is fully set in them to do evil. *Eccles. viii. 11.*

(d) Conscience, or sense of good or ill; the seat of moral life and character.

Every man's heart and conscience doth in good or evil, even secretly committed, and known to none but itself, either like or disallow itself. *Hooker.*

The evidence might be accumulated a thousand-fold, from the works of Veronese, and of every succeeding painter—that the fifteenth century had taken away the religious heart of Venice. *Ruskin.*

3. The inner part of anything; the part nearest the middle or centre; as, the heart of a country, kingdom, or empire; the heart of a town; the heart of a tree. Hence—4. The chief part; the vital or most essential part; the vigorous or efficacious part; the core; the very essence or essential part.

Barley, being steeped in water, will sprout half an inch, and much more, until the heart be out. *Bacon.*

Wordsworth goes to the very heart of things, and not to their outside, to the soul of man, and not his body. *Lord Coleridge.*

And then show you the heart of my message. *Shak.*

5. An appellation of kindness or of encouragement.

Cheerly, my hearts. *Shak.*

6. Strength; power of producing; vigour; fertility; as, keep the land in heart.

Heat (hêt), *n.* [*A. Sax. hæta, hæte, from hât, hot.* Comp. *D. and L.G. hitte, Icel. hiti, Dan. hede, O.H.G. hitza, G. hitze, heat; Goth. heito, fever.* The root is probably seen also in *G. het, dry, heater, clear, bright; Skr. chitra, bright, glancing; Gr. kaiti, to burn.*] 1. An affection of matter believed to consist in a certain motion or vibration of the ultimate molecules of which bodies are composed: it is a condition or exhibition of energy, of which motion, light, gravity, electricity, &c., are other exhibitions under different conditions. Heat is latent when present in matter but not perceptible. It is sensible when it is evolved and perceptible. It is the cause of fluidity and evaporation. It expands all bodies, but the expansions are different in different substances. In general solids expand least by heat; liquids expand more and more rapidly, and air and gases expand most and most rapidly of all. Heat is always manifested through matter, and although unequally diffused among bodies it is always tending to an equilibrium. It may be communicated to surrounding bodies either by contact or conduction or by radiation, the ether being the medium of communication. Its influence at different distances from the place or point whence it emanates is inversely as the squares of those distances. The chief sources of heat are the following—viz. the sun's rays, combustion, percussion, friction, pressure, the mixture of different substances, electricity, and magnetism.—*Specific heat*, a term applied to the quantity of heat required to raise equal weights of different substances through equal intervals of temperature.—*Animal heat*, a certain amount of heat or temperature possessed by animals, which is necessary for the performance of vital action. See **under ANIMAL**, *a.*—2. The sensation produced on the sentient organs of animals by heat when present in excess, or when above that which is normal to the human body; the bodily feeling when one is exposed to fire, the sun's rays, &c.; the reverse of cold. When we touch or approach a hot body the heat passes from that body to our organs of feeling, and gives the sensation of heat. On the contrary, when we touch a cold body the heat passes from the hand to that body, and causes a sensation of cold.—3. High temperature, as distinguished from low; a concentration of heat; the greatest accumulation of heat, or the time of such accumulation; as, the heat of the tropics; the heat of the body in fever; the heat of the day.—4. The state of being once heated or hot; exposure to heat; as, give the iron another heat.—5. A violent action uninterrupted; a single effort, as in a race.

Many pauses are required for refreshment between the heats. *Dryden.*
As for 'Manfred,' the two first acts are the best; the third so so; but I was blown with the first and second heats. *Byron.*
6. Indication of high temperature, as the condition or colour of the body or part of the body; redness; high colour; flush.

It has raised animosities in their hearts, and heats Addison.

7. Utmost ardour or violence; rage; vehemence; as, the heat of battle; the heat of party.—8. Agitation of mind; inflammation or excitement; exasperation; as, the heat of passion. 'The heat and hurry of his rage.' *South.*—9. Animation in thought or discourse; fervency. 'With all the strength and heat of eloquence.' *Addison.*—10. Fermentation.

Heat (hêt), *v.t.* [*A. Sax. hætan, to make hot.* See the noun.] 1. To make hot; to communicate heat to, that is, to impart a greater rapidity to the ultimate molecules of; to cause to grow warm; as, to heat an oven or a furnace; to heat iron.—2. To make feverish; to excite; as, to heat the blood.

Thou art going to Lord Timon's feast?
Ay, to see meat fill knives and wine heat fools. *Shak.*

3. To warm with passion or desire; to rouse into action; to animate.

A noble emulation heats your breast. *Dryden.*

4. To run a heat over, as in a race.

You may ride us
With one soft kiss a thousand furlongs, ere
With spur we heat an acre. *Shak.*

Heat (hêt), *v.i.* 1. To grow warm or hot by the communication of heat, as by fire or friction; as, the iron or the water heats slowly.—2. To grow warm or hot by fermentation or the development of heat by chemical action; as, green hay heats in a mow, and green corn in a bin.

Heat (hêt or het), old pret. and pp. of *heat*, formerly used by good authorities, but now only a provincialism. 'The iron . . . heat red hot.' *Shak.*

Nebuchadnezzar . . . commanded that they should heat the furnace seven times more than it was wont to be heat. *Dan. iii. 19, ed. 1611.*

Heat-engine (hêt'en-jin), *n.* A machine in which heat is transformed into mechanical force. The name of heat-engine or thermodynamic engine is given to all machines which yield work in virtue of heat which is supplied to them.

Heater (hêt'ër), *n.* One who or that which heats; specifically, (a) a mass of iron, which is heated and put into a box-iron to heat it and keep it hot, for ironing or smoothing clothes. (b) A vessel attached to a steam-engine for the application of the waste steam to the heating of water.

Heath (hêth'fûl), *a.* Full of warmth.

Heath (hêth), *n.* [*A. Sax. hæth, L.G. D. Fris. and G. heide, the plant, and also a moor or heath; Goth. haithô, a field; Icel. heithi, heath, a waste, a fell.*] 1. A name common to all the plants of the nat. order Ericaceae, but more specifically confined to the members of the genera *Erica* and *Calluna*. (See **ERICA**, **CALLUNA**.) They inhabit the northern parts of Europe and a few of the loftiest hills in the south, but their chief habitat is the southern promontory of Africa, where thousands of acres are covered with heaths in incredible numbers, and with hundreds of different species. In Great Britain heath or heather covers large tracts of waste lands, and is used to thatch houses, to make brooms, and even beds in the Highlands of Scotland. Sheep, goats, and cattle feed upon it, and bees extract finely flavoured honey from the flowers. The young shoots and flowers are said to have been anciently employed in this country for the manufacture of beer. Three species of heaths are common in Britain, two of which belong to the genus *Erica*—*E. cinerea*, or fine-leaved heath, and *E. Tetralix*, or cross-leaved heath—the third being the only known species of the genus *Calluna*—*C. vulgaris*, common heath or ling, or common Scotch heather. This last is the most common heath in Europe.—2. A place overgrown with heath; a desert and desolate tract of land. 'The heaths of Staffordshire.' *Temple.*

Their stately growth, though bare,
Stands on the blasted heath. *Milton.*

3. A place overgrown with shrubs of any kind.

Some woods of oranges, and heaths of rosemary,
Will smell a great way into the sea. *Bacon.*

Heath-bell, Heather-bell (hêth'bel, hêth'ër-bel), *n.* The flower of *Erica Tetralix*. Sometimes applied to the flower of *Erica cinerea* also.

'Tis sweet beneath the heather-bell,
To live in autumn brown. *Leyden.*

Heath-berry (hêth'be-ri), *n.* The crowberry (which see).

Heath-clad (hêth'klad), *a.* Clothed or crowned with heath.

Heath-cock (hēth'kok), *n.* The *Tetrao tetrix*, otherwise called *Black-cock*, *Black-grouse*, and *Black-game*.

Heathen (hē'then), *n.* [A. Sax. *hæthen*; comp. Goth. *hæthino*, G. *heide*, a heathen. Although so closely resembling Gr. *ethnea*, contr. *ethnē*, Gentiles, the word is probably not derived from this source, but from A. Sax. *hæth*, Goth. *hæthi*, the fields or open country, hence it is exactly equivalent to the L. *paganus*, originally a countryman. See **HEATH.**] 1. One who worships idols or does not acknowledge the true God; a pagan; an idolater. In *Script.* the word seems to comprehend all nations except the Jews or Israelites, as they were all strangers to the true religion, and all addicted to idolatry. The word may now be applied perhaps to all except Christians, Jews, and Mohammedans. *The heathen*, without the plural termination, is used collectively for Gentiles or heathen nations.

Ask of me, and I will give thee the *heathen* for thine inheritance. Ps. li. 9.

2. A rude, illiterate, barbarous, or irreligious person.

The two known species—*H. salicifolia*, called by the Mexicans *hanchinol* (which see), and *H. grandiflora*—are smooth, erect, bushy shrubs, the former common to Texas, Mexico, and S. America, the latter confined to S. America. Now placed in genus *Nesaea*.

Heinous (hā'nus), *a.* [Fr. *haineux*, from *haine*, malice, hate, from *hair*, O. Fr. *hadir*, to hate, from Teut. verb=*E.* to hate.] Hatelul; odious; hence, great; enormous; aggravated; as, a *heinous* sin or crime.

How *heinous* had the fact been, how deserving

Of blame. *Milton*.

SYN. Enormous, excessive, aggravated, great, monstrous, flagrant, flagitious, atrocious.

Heinously (hā'nus-li), *adv.* In a hateful manner; hatefully; abominably; enormously.

Heinousness (hā'nus-nes), *n.* The condition or quality of being heinous; odiousness; enormity; as, the *heinousness* of theft or robbery or of any crime.

Heir (är), *n.* [O. Fr. *heir*, L. *heres*, an heir.] 1. One who succeeds or is to succeed another in the possession of lands, tenements, and hereditaments by descent; one on whom the law casts an estate of inheritance by the death of the ancestor or former possessor; one in whom the title to an estate of inheritance is vested by the operation of law on the death of a former owner; an inheritor.

Lo, one born in my house is my *heir*. Gen. xv. 3.

What lady is that same?

The *heir* of Alençon, Rosaline her name. *Shak.*

2. One who inherits or takes anything from an ancestor; one who receives any endowment from an ancestor; as, the son is often *heir* to the disease or to the miseries of the father. '*Heir* to an honourable name.' *Macaulay*.—3. That which is procreated or begotten; a child.

If the first *heir* of my invention prove deformed I shall be sorry it had so noble a godfather. *Shak.*

—*Heir apparent*, one whose right of inheritance is indefeasible, provided he outlives his ancestor, at whose death he is *heir at law*.—*Heir presumptive*, one who, if the ancestor should die immediately, would be *heir*, but whose right of inheritance may be defeated by any contingency, as by the birth of a nearer relative.—*Heir at law*, or *heir general*, one who by the common law succeeds to the lands and tenements of his father or ancestor at his death.—*Heir special*, one who succeeds in the order pointed out by some instrument which determines such special course of descent.—*Heir by custom*, one whose right as *heir* is determined by certain customary modes of descent which are attached to the land.

Heir (är), *v.t.* To inherit; to succeed to.

One only daughter *heired* the royal state. *Dryden*.

Heir-apparency (är-ap-pären-si), *n.* The state of being *heir apparent*.

Heirdom (är'dum), *n.* The state of an heir; succession by inheritance.

Heiress (är'es), *n.* A female heir.

Heirless (är'les), *a.* Destitute of an heir.

Heirloom (är'loom), *n.* [Fr. *heir* and *loom* (A. Sax. *lōma*), which originally (as still occasionally in Scotland) meant a tool, implement, or article. See LOOM.] A personal chattel that by special custom descends to an heir with the inheritance, being such a thing as cannot be separated from the estate

without injury to it, as jewels of the crown, charters, deeds, and the like; any piece of personal property which has belonged to a family for a long time.

Heirship (är'ship), *n.* The state, character, or privileges of an heir; right of inheriting.—*Heirship movables*, in *Scots law*, the best of certain kinds of movables which the heir is entitled to take, besides the heritable estate: a distinction abolished in 1808.

Heise, *v.t.* and *n.* See HEEZE.

Heise (hē'zi), *n.* [Dim. of *heise*.] A lift. [Scotch.]

Heisugge, *† n.* The hedge-sparrow. *Chaucer*.

He-jalap (hē'ja-lap), *n.* A kind of jalap, produced by *Ipomoea orizabensis*.

Hejira (hej'i-ra), *n.* Same as *Hegira*.

Helamys (he'la-mis), *n.* [Gr. *helios*, a fawn, and *mys*, a rat.] The jumping-hare or jumping-rat, a genus of rodent animals allied to the jerboas. The head is large, the tail long, and the fore-legs very short in comparison with the hinder. One species is known, a native of the Cape of Good Hope (*H. elamys* or *Pedetes capensis* or *cappi*). It somewhat resembles a hare in colour, is as large as a rabbit, and, like it, inhabits deep burrows. It can jump 20 or 30 feet at a bound.

Helarctos (he-lärk'tos), *n.* [Gr. *helios*, the sun, and *arktos*, a bear.] A sub-genus of the genus *Ursus*, comprising bears found in India and the eastern islands. The Tibetan sun-bear (*H. thibetanus*) is a black species with a white patch on the breast. The Malayan sun-bear (*H. malayanus*), also black with a white mark on the breast, has a yellow patch on the muzzle, which is broader and shorter than in the foregoing. It is called also *Bruang* (which see). The Bornean sun-bear (*H. Boryspilus*) is black, with an orange-coloured patch on the breast. All the sun-bears are slenderly made, and their fur is not so heavy and thick as that of other bears.

Helbeh (hel'ba), *n.* The seed of a plant of the genus *Trigonella*, with somewhat bitter taste, whose flour, mixed with dourah or dhurra, is used as food by the labourers of Egypt.

Helcology (hel-kol'o-jī), *n.* [Gr. *helkos*, an ulcer, and *logos*, discourse.] The doctrine of, or a treatise upon ulcers.

Helcoplasty (hel'ko-plas-tī), *n.* [Gr. *helkos*, an ulcer, and *plastos*, to form.] In *surg.* an operation which consists in grafting on an ulcer a piece of skin from the opposite limb, or from the limb of another person, when the destruction of skin is too great to permit the healing process.

Held (held), *pret. & pp. of hold*.

Helet (hēl), *v.t.* [A Sax. *helan*, to conceal. Cog. L. *celo*, to conceal. Comp. *hell*.] To hide; to cover; to roof.

Hele, *† v.t.* To heal; to help. *Chaucer*.

Helet (hēl), *n.* Health.

Heleles, *† a.* Remediless. *Chaucer*.

Helena (hel'e-na), *n.* A meteoric appearance about the masts of ships. See CASTOR and POLLUX.

Helenin, **Helenine** (hel'e-nin), *n.* (C₂₁H₂₅O₃). A substance derived from *Indula Helenum*, or elecampane, by acting on the fresh root with hot alcohol, or by distilling it with water. It crystallizes in white prisms, and resembles the stearoptenes in being volatile.

Heliac, **Heliacal** (hē'li-ak, hē-li'ak-al), *a.* [L. *heliacus*, from Gr. *hēlios*, the sun. Akin L. *sol*, and W. *haul*, sun.] In *astron.* emerging from the light of the sun or passing into it; rising or setting at the same time, or nearly the same time, as the sun. The heliacal rising of a star is when, after being in conjunction with the sun and invisible, it emerges from the light so as to be visible in the morning before sunrise. On the contrary, the heliacal setting of a star is when the sun approaches so near as to render it invisible by its superior splendour.

Helicallally (hē-li'ak-al-li), *adv.* In a heliacal manner.

Hellanthemum (hē-li-an-thēm-um), *n.* [Gr. *hēlios*, the sun, and *anthemon*, a flower.] A very numerous genus of herbaceous undershrubs and shrubby or creeping plants, chiefly European, nat. order Cistaceae; the rock-rose genus. They are cultivated as ornamental plants. Six species are found in Britain.

Hellanthoidea (hē'li-an-thoid'a), *n. pl.* [Gr. *hēlios*, the sun, *anthos*, a flower, and *eidos*, resemblance.] An order of actiniform polypes, of the division Anthozoa, of which the Actinise or sea-anemones may be taken as the type: often called *sunflowers*.

Helianthus (hē-li-an'thus), *n.* [Gr. *hēlios*, the sun, and *anthos*, a flower.] A genus of Composite containing about fifty species, chiefly North American annual or perennial herbs, with rough leaves and large yellow flowers, of which the common sunflower (*H. annuus*) and the *H. tuberosus* (the Jerusalem artichoke) are examples. See SUNFLOWER.

Helical (hel'ik-al), *a.* Of or pertaining to a helix; having a spiral form; spiral.

Helically (hel'ik-al-li), *adv.* In a helical manner; spirally.

Helicidae (he-lis'i-dē), *n. pl.* [See HELIX.] The general name by which the land shell-snails are distinguished. See HELIX.

Heliciform (he-lis'i-form), *a.* [L. *helix*, *helix*, Gr. *helix*, a convolution, and *forma*, form.] Having the form of a helix; helical.

Helicina (hel-i-sin'a), *n.* [See HELIX.] A genus of gastropod mollusca, snail-like in form, but having a horny operculum. They are found in America and the West Indies.

Helicine (hel'i-sin), *a.* Relating to or resembling a tendril.

Helicite (hel'i-stē), *n.* [See HELIX.] Fossil remains of the helix, a shell.

Helicogyrate (hel'i-ko-jī'rāt), *a.* [Gr. *helix*, *helix*, convoluted, and *gyros*, a circle.] In bot. applied to a plant, or part of a plant, having a ring carried obliquely round it, as in the spore-cases of Trichomanes.

Helicoid, **Helicoidal** (hel'i-koid, hel-i-koid'al), *a.* [Gr. *helix*, anything spiral, and *eidōs*, form.] Spirally curved like the spire of a univalve shell; spiral.—*Helicoid parabola*, in math. the curve which arises from the supposition that the axis of the common parabola is bent round into the periphery of a circle, and is a line then passing through the extremities of the ordinates, which now converge toward the centre of the said circle.

Helicoid (hel'i-koid), *n.* [See the adjective.] In geom. a warped surface which may be generated by a straight line moving in such a manner that every point of it shall have a uniform motion in the direction of a fixed straight line, and at the same time a uniform angular motion about it.

Helicometry (hel-i-kom'ē-tri), *n.* [Gr. *helix*, *helix*, anything spiral, and *metron*, measure.] The art of measuring or drawing spiral lines on a plane.

Helicon (hel'i-kon), *n.* A mountain in Boeotia, in Greece, from which flowed two fountains sacred to the Muses, Aganippe and Hippocrene. The Greeks supposed it to be the residence of Apollo and the Muses.

From *Helicon's* harmonious springs
A thousand rills their mazy progress take. *Gray*.

Heliconia (hel-i-kō'ni-a), *n.* A genus of butterflies, the type of the family Heliconidae (which see).

Heliconian (hel-i-kō'ni-an), *a.* Pertaining to Helicon.

Heliconidae, **Heliconiidae** (hel-i-kon'i-dē, hel'i-kon'i-dē), *n. pl.* A family of butterflies, in which the club at the end of the antennae is very small, the central cell of the hind wings is closed, and the legs are very slender. They all inhabit hot countries, and in the typical genus *Heliconia* the wings are nearly transparent.

Helicteres (hel-ik'tēr-ēz), *n.* [Gr. *heliktēr*, anything twisted, from *helix*, a spiral.] A genus of plants, nat. order Sterculiaceae, containing about thirty species of chiefly American trees or shrubs, with entire or serrate leaves, and small axillary flowers which are succeeded by the curious spirally-twisted carpels.

Helictis (he-lik'tis), *n.* A genus of carnivorous quadrupeds, allied to the skunks, of which there are at least two species, one (*H. moschata*) found in China, where it was discovered by Mr. Reeves, the other (*H. orientalis*) in Nepal, whence it was sent by Mr. Hodgson. *Maudslayi*.

Heling (hē'ling), *n.* [From O.E. *hela*, L. *celo*, to conceal. See HELL.] That which covers; especially, the covering of the roof of a building. Written also *Hilking*.

Helio-centric, **Helio-centric** (hē'li-o-sen'trik, hē'li-o-sen'trik-al), *a.* [Fr. *héliocentrique*—Gr. *hēlios*, the sun, and *kentron*, centre.] In astron. relating to the sun as a centre; appearing as if seen from the sun's centre.

Copernicus had satisfied himself of the truth of the *Helio-centric* Theory, according to which the planets, and the earth as one of them, revolve round the sun as the centre of their motions. *Whevell*.

The *helio-centric* place of a planet is the

place of the ecliptic in which the planet would appear to a spectator at the centre of the sun. The *helio-centric* latitude of a planet is the inclination of a line drawn between the centre of the sun and the centre of a planet to the plane of the ecliptic. *Helio-centric* longitude of a planet, the angle at the sun's centre, formed by the projection of its radius vector on the ecliptic, and the line drawn from the sun's centre to the first point of Aries.

Heliochrome (hē'li-o-krōm), *n.* [Gr. *hēlios*, the sun, and *chrōma*, colour.] A coloured photograph.

Heliochromic (hē'li-o-krom'ik), *a.* In photog. pertaining to heliochrome.

Heliochromy (hē'li-o-kro-mi), *n.* In photog. the art of producing coloured photographs.

Heliograph (hē'li-o-graf), *n.* [Gr. *hēlios*, the sun, and *graphō*, to write.] In photog. (a) an instrument for taking photographs of the sun. (b) A picture taken by heliography; a photograph.

Heliographic, **Heliographical** (hē'li-o-graf'ik, hē'li-o-graf'ik-al), *a.* Of or pertaining to heliography.

Heliography (hē'li-o-gra-fi), *n.* [Gr. *hēlios*, the sun, and *graphō*, to write.] The process of taking pictures on any prepared material by means of the sun and the camera obscura; photography.

Heliolater (hē'li-o-lat-ēr), *n.* [Gr. *hēlios*, the sun, and *latreūō*, to worship.] A worshipper of the sun.

Heliolatry (hē'li-o-la-tri), *n.* [Gr. *hēlios*, the sun, and *latreia*, service, worship.] The worship of the sun.

Heliolite (hē'li-o-lit), *n.* [Gr. *hēlios*, the sun, and *lithos*, a stone.] A synonym of sunstone or aventurine feldspar, composed of oligoclase and albite, with included crystals of hematite or goethite.

Heliolites (hē'li-o-lit'ēz), *n.* [See above.] An extensive genus of corals, belonging to the family Miliporidae, so named from the radiating, sun-like appearance of the septa of their pores. They occur in the Silurian and Devonian systems.

Helioscope (hē'li-o-skōp), *n.* [Gr. *hēlios*, the sun, and *metrōō*, to measure.] An instrument for measuring with exactness the diameters of the sun, moon, and planets, or any small apparent distance between celestial objects.

Helionis (hē'li-o-rnis), *n.* [Gr. *hēlios*, the sun, and *ornis*, a bird.] A genus of birds. See FLY-ROOF.

Helioscope (hē'li-o-skōp), *n.* [Gr. *hēlios*, the sun, and *skōpōō*, to view.] A sort of telescope fitted for viewing the sun without pain or injury to the eyes, as when made with coloured glasses or glasses blackened with smoke, or with mirrors formed simply of surfaces of transparent glass, which reflect but a small portion of light.

Helioscopic (hē'li-o-skop'ik), *a.* Pertaining to a helioscope.

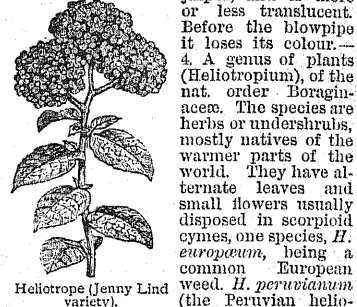

Heliosis (hē'li-ō-sis), *n.* [Gr., exposure to the sun, from *hēlios*, the sun.] In bot. a term applied to the spots produced upon leaves by the concentration of the rays of the sun through inequalities of the glass of conservatories, or through drops of water resting on them.

Heliospherical (hē'li-o-sfē'rik-al), *a.* [Gr. *hēlios*, the sun, and *E. spherical* (which see).] Round as the sun.

Helio-stat (hē'li-o-sat), *n.* [Gr. *hēlios*, the sun, and *statos*, fixed, from *histēmi*, to stand.] A name which is given to various contrivances for reflecting the sun's light either temporarily or continuously to an observer at a distance. The simplest helio-stat is a mirror hung up at a distant station so as to reflect a flash to the observer whose station may be many miles from it. This mirror is generally so adjusted that the flash occurs exactly at some prearranged hour, and by being in readiness the observer can get an observation with precision as regards time. Some helio-stats are visible for 80 miles. By being fitted with an adjustment of clock-work, the mirror can be made to revolve with the sun, and so to reflect a beam of sunlight steadily in one direction, being then called also *heliostope*. The helio-stat has been used for signalling in war.

Heliostope (hē'li-o-trop), *n.* [Gr. *hēlios*, the sun, and *tropōō*, to turn; *tropēō*, turning.] 1. In astron. an instrument or erection for showing at a place when the sun arrives at his farthest point north or south of the equator as seen at that place.—2. A helio-stat. See HELIOSTAT.—3. A mineral, a sub-species of

quartz, of a deep green colour, peculiarly pleasant to the eye. It is usually variegated with blood-red or yellowish dots of jasper, and is more or less translucent.

Heliotrope (Jenny Lind variety).

favourite garden plant on account of the fragrance of its flowers.

Heliotropææ (hē'li-o-trō'pē-ē), *n. pl.* A group or sub-order of Boraginaceæ, of which the genus *Heliotropium* is the type.

Heliotropic, **Heliotropical** (hē'li-o-trop'ik, hē'li-o-trop'ik-al), *a.* Of or pertaining to, or characterized by, heliotropism.

Heliotropism (hē'li-o-tro-pizm), *n.* [See HELIOTROPÆ.] Disposition or tendency to turn or incline toward the sun, especially the characteristic tendency of a plant to direct its growth toward the sun or toward light.

Heliotype (hē'li-o-tip), *n.* [Gr. *hēlios*, the sun, and *E. type*.] 1. A photographic process by which pictures can be printed in the same manner as lithographs, depending on the fact that a dried film of gelatine and bichromate of potash, when exposed to light, is afterwards insoluble in water, while the portion not so exposed swells when steeped. A mixture of gelatine, bichromate of potash, chrome alum, and water is poured on a plate of glass, where it shortly settles into a film. When dried the film contracts and separates from the glass. A picture is then printed on it from a negative, after which it is attached to a plate of zinc, and copies are taken from it by inking it with lithographic ink exactly as in the ordinary lithographic process. The films are technically called 'skins.' Sometimes a gutta-percha mould is prepared from the film, and copper deposited on it by the electrolytic process, the plate thus produced being printed from in the ordinary way.—2. A picture produced by this process.

Heliotypegraphy (hē'li-o-tip-og'ra-fi), *n.* [Gr. *hēlios*, the sun, *typos*, type, and *graphōō*, to write.] A photographic process by which the sun paints its own picture. The picture is first received on a glass plate rendered sensitive by collodion, whence it is transferred to a positive covered with a varnish of a complex chemical nature. Certain constituents of the varnish, which are more easily affected by the sun's actinic rays, are removed by chemical means, when the plate becomes a matrix or foundation, from which an electrolyte can be taken, available either for surface-printing or printing on the copperplate plan.

Helise, *n.* *Elysium*. *Chaucer*.

Hellspheric, **Hellspherical** (hel-i-sfē'rik, hel-i-sfē'rik-al), *a.* [*Helix* and *spheric*.] Spiral.—*Hellspherical line*, the rhumb line in navigation, so called because on the globe it winds round the pole spirally, coming nearer and nearer to it, but never terminating in it. It is also called a *Loxodromic Curve* or *Line*.

Helium (hē'li-um), *n.* [Gr. *hēlios*, the sun.] An elementary substance which spectrum analysis (in 1868) showed to exist in the sun's chromosphere, and which has latterly been found in some rare minerals; very light, only 2.13 times as heavy as hydrogen.

It seems to have been proved that at least some sensible part of the light of the corona is a terrestrial atmospheric halo or dispersive reflection of the light of the glowing hydrogen and *Helium* round the sun. *Sir W. Thomson*.

Frankland and Lockyer find the yellow prominences to give a very decided bright line not far from D, but hitherto not identified with any terrestrial flame. It seems to indicate a new substance, which they propose to call *helium*. *Nature*.

Helix (hē'liks), *n. pl. Helices* (hē'li-sēz), [Gr., a winding, a convolution; applied to a snail from its convolutions.] 1. A spiral line,

as of wire in a coil; a winding, or something that is spiral; a circumvolution; specifically, in *geom.* a non-plane curve whose tangents are all equally inclined to a fixed right line—such a curve as is described by every point of a screw that is turned round in a fixed nut. 2. In *arch.* a small volute or twist under the abacus of the Corinthian capital, of which in every perfect capital there are sixteen, two at each angle, and two meeting under

Helices.

the middle of each face of the abacus, branching out of the cauliculi or stalks, which rise from between the leaves.—3. In *anat.* the whole circuit or extent of the auricle or external border of the ear.—4. In *zool.* a genus of gasteropodous molluscs, the type of the family Helicidae, belonging to the order Pulmonata, and comprising the land shell-snails. The common garden snail (*H. hortensis*) and the edible snail of France (*H. pomatia*) are examples.

Hell (hel), *n.* [A. Sax. *hell*, *helle*, from *helan*, to cover, conceal, literally a concealed place or place of concealment, hence hell, the grave, a tomb; comp. *icel. hel*, the abode of the dead, death, and the goddess of death; D. *hel*, G. *hölle*, hell. Some consider that Hell (O. H. G. *Hella*) was originally the name of the goddess of death, and that the notion of locality afterwards attached itself to the word. See **HELE**.] 1. The place of the dead, or of souls after death; the lower regions or the grave; called in Hebrew *sheol*, and by the Greeks *hades*.—2. The place or state of punishment for the wicked after death. Mat. x. 28; Luke xii. 5.

Sin is *hell* begun, as religion is heaven anticipated. *F. Trollop.*

3. Wicked spirits; the infernal powers.

Much danger first, much toil did he sustain,
While Saul and *hell* crost his strong fate in vain. *Cowley.*

4. A place regarded as in some respects resembling hell; as, (a) in some games the place to which are carried those who are caught. (b) A place into which a tailor throws his shreds or a printer his broken type. (c) A dungeon or prison.

A hound that runs counter, and yet draws dry foot well.

One that before the judgment carries poor souls to hell. *Shak.*

(d) A gaming-house.

At midnight he had lost forty-eight thousand pounds. . . The atmosphere was hot, to be sure, but it well became such a *hell*. *Disraeli.*

Hell (hel), *v.* [A corruption of *helo* (which see).] To hide; to cover.

Else would the waters overflow the lands,
And fyre devour the ayre, and *hell* them quight. *Spenser.*

Helladotherium (hel'la-do-thē'ri-um), *n.* [Gr. *Hellas*, *Hellados*, Greece, and *thērion*, a wild beast.] A fossil genus of mammals, of which only one species is known, somewhat resembling the gaffe. It occurs in the pliocene of France and Greece.

Hellandic (hel-la-nod'ik), *n.* [Gr. *Hellandikos*, a chief judge at the Olympic games—*Hellen*, a Greek, and *dike*, right, judgment.] In *Greek antiqu.* a judge of the games, exercises, or combats, who decided to which of the candidates the prizes belonged.

Hell-bender (hel'bend-ēr), *n.* A name given to the large North American salamander. See **MENOPOME**.

Hell-black (hel'blak), *a.* Black or dark as hell. *Milton.*

Hell-born (hel'born), *a.* Born of or in hell. **Hell-brewed** (hel'brōd), *a.* Prepared in hell. 'Thy *hell-brewed* opiate.' *Milton.*

Hell-broth (hel'broth), *n.* A composition for infernal purposes.

Hell-cat (hel'kat), *n.* A witch; a hag.

Hell-doomed (hel'dōmd), *a.* Doomed or consigned to hell.

Hellebore (hel'le-bōr), *n.* 1. A name applied to the species of two very different genera of plants—*Helleborus* and *Veratrum* (both of which see).—2. The powdered root of white hellebore (*Veratrum album*), used to

destroy lice, and by gardeners for killing caterpillars.

Helleborine (hel'le-bōr-in), *n.* 1. A name commonly applied to plants of the genus *Epipactis*, nat. order Orchidaceae. There are but few species, perennials with creeping rhizomes, fibrous roots, leafy stems, and loose racemes of dull-coloured flowers. They are natives of the northern hemisphere, three or four species being found in Britain.—2. A resin obtained from the root of black hellebore (*Helleborus niger*).

Helleborise (hel'le-bōr-iz), *v. t.* [Gr. *helleborizō*, to treat with hellebore.] To dose with hellebore with the view of bringing one to his senses; to treat for madness by hellebore.

I am represented, as dogmatical in the assertion, as original in the opinion, as singular in the paradox, nay, as one who would be *helleborised* as a madman for harbouring the absurdity. *Sir W. Hamilton.*

Helleborism (hel'le-bōr-izm), *n.* A medicinal preparation of hellebore.

In vain should the physician attempt with all his medicines and *helleborisms*. *Ferrand (1630).*

Helleborus (hel-leb'ō-rus), *n.* [L. *helleborus*, Gr. *helleboros*, hellebore.] A genus of plants, nat. order Ranunculaceae, consisting of perennial low-growing plants with palmate or pedate leathery leaves, yellowish, greenish, or white flowers, having five conspicuous persistent sepals, eight to ten small tubular petals, and several many-seeded carpels. *H. orientalis* is the species which produced

Helleborus niger (Christmas-rose).

the black hellebore of the ancients. *H. niger* is the Christmas-rose common in gardens; it is a native of South and East Europe, and is the source of the black hellebore of modern pharmacopoeias. *H. viridis* and *H. foetidus* are herbaceous plants with green flowers, and grow in Britain; their leaves are emetic and purgative. The whole of these plants are accounted purgative, and in large doses act as a narcotic acid poison; but they are now mostly laid aside.

Hellenes (hel-jēn-ēs), *n. pl.* [Gr.] The inhabitants of Greece; the Greeks.

Hellenian, **Hellenic** (hel-jēn-i-an, hel-len-ik), *a.* [Gr. *hellenikos*, *hellenios*, from *Hellenes*, the Greeks.] Pertaining to the Hellenes or inhabitants of Greece; Greek; Grecian.

Hellenism (hel-len-izm), *n.* [Gr. *hellenismos*, from *Hellen*, a Greek.] A phrase in the idiom, genius, or construction of the Greek language.

Hellenist (hel-len-ist), *n.* [Gr. *hellenistes*, from *Hellen*, a Greek.] 1. One who affiliates with Greeks or who adopts their language, manners, and customs; especially, a Jew who used the Greek language in the early ages of Christianity.—2. One skilled in the Greek language. 'The critical *Hellenist*.' *Dalgarno.*

Hellenistic, **Hellenistical** (hel-len-ist'ik, hel-len-ist'ik-al), *a.* Pertaining to the Hellenists.—**Hellenistic language**, the Greek spoken or used by the Jews who lived in Egypt and other countries where the Greek language prevailed.

Hellenistically (hel-len-ist'ik-al-ly), *adv.* According to the Hellenistic dialect.

Hellenization (hel-len-iz-ā'shon), *n.* Act of using the Greek language.

Hellenize (hel-len-iz), *v. i.* To use the Greek language.

Hellespont (hel'es-pont), *n.* [Gr. *Helles-pontos*, lit. sea of Helle (daughter of Athamas), who was drowned in it—*Helle*, *Hellas*, and *pontos*, sea.] A narrow strait between Europe and Asia, now called the *Dardanelles*;

elles; a part of the passage between the Euxine and the Egean Sea.

Hellespontine (hel'es-pont'in), *a.* Pertaining to the Hellespont.

Hell-fire (hel'fir), *n.* The fire of hell; the torments of hell.

Hell-gate (hel'gāt), *n.* The portal or entrance into hell. 'Fast by *hell-gate*.' *Milton.*

Hell-hag (hel'hag), *n.* A hag of hell; a malicious, mischievous old woman.

Hell-hated (hel'hāt-ed), *a.* Abhorred as hell. *Shak.*

Hell-haunted (hel'hant-ed), *a.* Haunted by the devil or evil spirits. 'This *hell-haunted* grove.' *Dryden.*

Hellhood (hel'hūd), *n.* The state or condition of hell. *Beau. & Fl.*

Hell-hound (hel'hound), *n.* A dog of hell; an agent of hell; a miscreant.

Helmet (helm'et), *n.* [Dim. from A. Sax. *helm*, what covers, a helmet, from *helan*, to cover; D. and G. *helm*, Goth. *hilm*, *icel. hjálmr*. See also **HELL**.] 1. A defensive covering for the head; especially, a piece of armour composed of metal, leather, &c., for the protection of the head. The earlier Greek and Roman helmets did not protect the face. During the middle ages helmets were made of steel, frequently inlaid with gold, and provided with bars

and flaps to cover the face in battle and to allow of being opened at other times. The full-barred helmet entirely covered the head, face, and neck, having in front perforations for the admission of air, and slits

through which the wearer might see the objects around him. The open helmet covered only the head, ears, and neck, leaving the face unguarded. Some open helmets had a bar or bars from the forehead to the chin, to guard against the transverse cut of a broadsword. The modern military helmets afford no protection for the face. Firemen wear a heavy head-piece of leather and brass, or other materials, to protect them as far as possible from falling ruins at conflagrations. Helmets of white felt, with folds of linen wrapped round them, are worn in India and other hot climates as a protection against the sun. The name helmet is also given to a kind of hat worn by policemen. — 2. In *her.* the part of a coat of arms that bears the crest. Of the helmets borne over coat-armour, the form and position of which show the quality or dignity of the bearer, only four are used by English heralds—viz.

Hemastatics (hē-mā-stat'iks), *n.* The doctrine of the motion of the blood in living bodies.

Hematein, **Hemateine** (hē-mā-tē'in), *n.* (Probably C₁₆H₁₂O₆.) A dark-red colouring matter obtained by acting on hematoxylin by ammonia. With excess of ammonia it forms a splendid purple matter.

Hematemesis (hē-mā-ten'ē-sis), *n.* Same as *Haematemesis*.

Hematherm (hē-mā-thēr'm), *n.* [Gr. *haima*, blood, and *thermos*, hot.] A name given by some zoologists to a warm-blooded animal.

Hematin, **Hemafine** (hē'mā-tin), *n.* [Gr. *haima*, *haimatos*, blood.] 1. The red colouring matter of the blood occurring in solution in the interior of the blood corpuscles or cells. Watts gives the formula C₂₂H₂₂FeN₆O₆ as probable. It is the only structure of the body, except hair, which contains iron. Hematin can be obtained by submitting the comminuted clod of ox blood, freed as much as possible from serum, to pressure, and agitating the expressed liquid by small portions with a saturated solution of oxalic acid, with addition of alcohol and a large quantity of ether. The solution, left to stand for some weeks over chloride of calcium, deposits the hematin in small black nodules made up of cubes. It may be

obtained in various other ways.—2. The name sometimes given to hematoxylin. See **HEMATOXYLIN**.

Hematite (hē'mā-tīt), *n.* [Gr. *haimatitēs*, from *haima*, blood.] A name applied to two ores of iron, red hematite and brown hematite. They are both of a fibrous structure, and the fibres, though sometimes nearly parallel, usually diverge or even radiate from a centre. They rarely occur amorphous, but almost always in concretions, uniform, globular, botryoidal, stalactitic, &c. The red hematite (called sometimes *bloodstone*) is a variety of the red oxide; its streak and powder are always nearly blood-red. It is one of the most important iron-ores. The brown hematite is a variety of the brown oxide or hydrate; its streak and powder are always of a brownish yellow.

Hematic (hē'mā-tif'ik), *a.* Pertaining to hematite or resembling it.

Hematocle (hē'mā-to-sel), *n.* [Gr. *haima*, *haimatos*, blood, and *klē*, a tumour.] A tumour filled with blood; a swelling of the scrotum or spermatic cord containing blood.

Hematology (hē'mā-to-lō-jī), *n.* [Gr. *haima*, *haimatos*, blood, and *logos*, a discourse.] The doctrine of the blood.

Hematosin, **Hematosine** (hē'mā-tō'sin), *n.* [Gr. *haima*, *haimatos*, blood.] The red colouring matter of the blood. See **HEMATIN**.

Hematosin (hē'mā-tō'sis), *n.* Same as *Hematosin*.

Hematoxylin, **Hematoxyline** (hē'mā-tōks'i-lin), *n.* [Gr. *haima*, *haimatos*, blood, and *xylin*, wood.] (C₁₆H₁₄O₆.) The colouring principle of logwood (*Haematoxylon campechianum*), of a red colour and bitterish taste. It crystallizes in small crystalline laminae of a reddish-white colour. Their taste is bitter, acid, and slightly astringent. This colouring matter is a constituent part of all the colours prepared with logwood, and the changes which it undergoes by the action of acids and alkalis render it useful as a reagent to detect their presence.

Hematoxylon (hē'mā-tōks'i-lon). See **HEMATOXYLIN**.

Hematuria (hē'mā-tū'ri-a), *n.* Same as *Haematuria*.

Hemelytron (hem-el'i-tron), *n. pl. Hemelytra (hem-el'i-tra).*

A wing-cover of a tetrapterous insect when it is coriaceous at the base and membranous at the extremity, as in the order Hemiptera. In the fig. *a* shows the coriaceous or leathery portion, and *b c* the membranous or transparent portions.

Hemelytron.

Hemeralopia (hē'mē-ra-lō'pi-a), *n.* [Gr. *hēmera*, the day, *alao*, blind, and *ops*, the eye.] A defect in the sight in consequence of which a person can see only by artificial light; day blindness. It is also used, however, for exactly the opposite defect of vision. See **NYCTALOPIA**.

Hemerobaptist (hē'mē-ro-bap'tist), *n.* [Gr. *hēmera*, day, and *baptis*, to wash.] One of a sect among the Jews who bathed every day.

Hemerobian (hē'mē-rō'bi-an), *n.* A neuropterous insect of the family Hemerobiidae.

Hemerobidae (hē'mē-rō'bi-i-dē), *n. pl.* [Typical genus *Hemerobius*—Gr. *hēmera*, a day, *bios*, life, and Gr. *eidos*, resemblance.] Lacewing flies, a family of neuropterous insects, remarkable for the exceeding brilliancy of the eyes in most of the species, and for the delicate structure and varied colours of their long reticulated wings. The larvae prey upon plant-lice.

Hemerobius (hē'mē-rō'bi-us), *n.* [See **HEMEROBIDÆ**.] A genus of neuropterous insects, the type of the family Hemerobiidae. The eggs are placed in a long thread-like pedicel.

Hemerocallidæ (hē'mē-ro-kal'li-dē), *n. pl.* [See **HEMEROCALLIS**.] A section of the nat. order Liliaceae, comprising many showy plants bearing red, white, blue, or yellow umbellate or racemose flowers. It includes the New Zealand flax (*Phormium tenax*), and *Sesuviera cylindrica*, which yields fibres for cordage.

Hemerocallis (hē'mē-rō-kal'lis), *n.* [Gr. *hēmera*, the day, and *kallistos*, most beautiful.] A genus of Liliaceae, natives of temperate Asia and Eastern Europe, two species of which (*H. flava* and *H. fulva*) are grown in gardens for the beauty of their flowers, under the name of day-lily. They have long radical leaves, and a branched few-

flowered scape, with large handsome blossoms, the segments of which are united into a tube.

Hemi- (he'mi). [Gr. *hēmi*, abbrev. from *hēmiōs*, neut. of *hēmiōs*, half.] A prefix signifying half, used in many compound words derived from the Greek; equivalent to L. *semi*, Fr. *semi*.

Hemianatropal, Hemianatropous (he'-mi-an-at'rop-al, he'-mi-an-at'rop-us), *a.* [Prefix *hemi*, and *anatropal* (which see).] In *bot.* half-anatropal: applied to ovules.

Hemicarp (he'mi-kä'rp), *n.* [Prefix *hemi*, and Gr. *karpōs*, fruit.] In *bot.* one of the halves of a fruit which spontaneously divides into two.

Hemicrania, Hemicrany (he-mi-kra'-ni-a, he'-mi-kra'-ni), *n.* [Prefix *hemi*, and Gr. *kranion*, the skull.] A pain that affects only one side of the head.

Hemicranic (he-mi-kran-'ik), *a.* Relating to hemicrania.

Hemicycle (he'mi-si-kl), *n.* [Gr. *hēmiçyklos*, —*hēmi*, half, and *kyklos*, a circle.] 1. A half circle; more generally called a *Semicircle*. 2. A semicircular arena; a semicircular room or division of a room.

The collections will be displayed in the *hemicycle* of the central pavilion of the palace of the Trocadero.

Hemidactyl (he-mi-dak'til), *a.* In *zool.* having an oval disk at the base of the toes, as in some saurian reptiles.

Hemidactylus (he-mi-dak'til-us), *n.* [Prefix *hemi*, and Gr. *dactylos*, a finger or toe.] A genus of lizards belonging to the gecko family or flat-toed lizards, which have an oval disk at the base of the toes.

Hemidesmus (he-mi-des'mus), *n.* [Prefix *hemi*, and Gr. *desmos*, a band—alluding to the filaments.] A genus of twining plants, nat. order Asclepiadaceae, having opposite leaves, and cymes of small greenish flowers. *H. indicus* yields the Indian sarsaparilla, a reputed alterative, diuretic, and tonic, which is rarely employed in England.

Hemidiapente (he-mi-dia-pen'te), *n.* [Prefix *hemi*, and Gr. *diapente*, a fifth in music.] In *music*, an imperfect fifth.

Hemiditones (he-mi-di-tōn), *n.* [Prefix *hemi*, and Gr. *ditonos*, of two tones—*di*, for *dis*, twice, double, and *tonos*, a tone.] In *Græc. music*, the lesser or minor third.

Hemidystrophia (he-mi-dis'trōf-i-a), *n.* [Prefix *hemi*, Gr. *dys*, ill, and *trophē*, from *trophō*, to nourish.] In *bot.* a term employed to design the partial nourishment of trees, owing to the unequal distribution of their roots, from these being prevented spreading in some directions, or other causes.

Hemigale (he-mig-a-lē), *n.* [Prefix *hemi*, and Gr. *gale*, weasel.] A Bornean animal of the civet family, distinguished by the row of broad dark stripes which cross its back. It is a sub-genus of *Paradoxurus*.

Hemigamous (he-mig-a-mus), *a.* [Prefix *hemi*, and Gr. *gamos*, marriage.] In *bot.* having one of the two florets in the same spikelet neuter, and the other unisexual, whether male or female: said of grasses.

Hemiglyph (he-mi-glif), *n.* [Prefix *hemi*, and Gr. *glyphē*, a carving.] In *arch.* the half channel at the edge of the triglyph tablet in the Doric entablature.

Hemihedral (he-mi-hē'dral), *a.* [Prefix *hemi*, and Gr. *hedra*, a face.] In *mineral.* a term applied to a crystal having only half the number of planes belonging to any particular modification which the law of symmetry requires, as when a cube has planes only on half of its eight solid angles, or one plane out of a pair on each of its edges; or as, in the case of a tetrahedron, which is hemihedral to an octahedron, it being contained under four of the planes of an octahedron.

Hemihedrally (he-mi-hē'dral-lī), *adv.* In a hemihedral manner.

Hemihedrism (he-mi-hē'drizm), *n.* In *crystal.* the property of crystallizing hemihedrally.

Hemihedron (he-mi-hē'dron), *n.* A solid hemihedrally divided; thus the tetrahedron is a hemihedron.

Hemimetabola (he-mi-me-tab'o-la), *n. pl.* [Prefix *hemi*, and Gr. *metabolē*, change.] The section of the class *Insecta* which undergo an incomplete metamorphosis. See *INSECT*.

Hemimetabolice (he-mi-me-ta-bol'ik), *a.* [See *HEMIMETABOLA*.] In *zool.* a term applied to those insects which undergo an incomplete metamorphosis, the larva differing from the perfect insect chiefly in the absence of wings and in size.

Hemimorphic (he-mi-mor'fik), *a.* [Prefix *hemi*, and Gr. *morphe*, form.] In *crystal.* a term applied to a crystal having the two ends modified with unlike planes.

Hemina (hē-mi'na), *n.* [L., from Gr. *hēmina*, from *hēmiōs*, half.] 1. An ancient Roman measure containing half a sextarius, and, according to Arbutnot, about $\frac{1}{2}$ pint English wine measure.—2. In *med.* a measure equal to about 10 fluid ounces.

Hemiopie (hē-mi-ōp), *n.* [Prefix *hemi*, and Gr. *ops*, *opos*, a voice.] An ancient musical wind-instrument consisting of a tube with three holes.

Hemiopia, Hemiopt (hē-mi-ō-pi-a, hē-mi-ōp'si), *n.* [Prefix *hemi*, and Gr. *opsis*, sight.] A defect of vision in which the patient sees only a part of the object he looks at, the middle of it, its circumference, or its upper or lower part, or more commonly one lateral half being completely obscured.

Hemiplegia, Hemipleg (he-mi-plē'ji-a, he'-mi-plē-ji), *n.* [Prefix *hemi*, and Gr. *plēgē*, a stroke, from *plēssō*, to strike.] A palsy that affects one half of the body; a paralytic affection on one side of the human frame.

Hemiplegic (he-mi-plē'jik), *a.* Relating to hemiplegia.

Hemiplexy (hē-mi-pleks-i), *n.* Same as *Hemiplegia*.

Hemipode (he-mi-pōd), *n.* A bird of the genus *Hemipodius*.

Hemipodius (he-mi-pō-di-us), *n.* [Prefix *hemi*, and Gr. *pous*, *podos*, a foot, from the hind-toe being absent.] A genus of rasorial birds allied to the quails. The species are found chiefly in Africa and Asia. The swift-flying hemipodius is the little quail of New South Wales.

Hemiprism (he-mi-prizm), *n.* [Prefix *hemi*, and *prism* (which see).] In *crystal.* a form in the monoclinic and triclinic systems of crystallization that comprises but one face of a prism and its opposite. *Dana*.

Hemiprismatic (he'mi-pris-mat'ik), *a.* [Prefix *hemi*, and *prismatic* (which see).] Half prismatic.

Hemipter, Hemipteran (he-mip'tēr, he-mip'tēr-an), *n.* An insect of the order Hemiptera.

Hemiptera (he-mip'tēr-a), *n. pl.* [Prefix *hemi*, and Gr. *pous*, a wing.] An order of four-winged insects, having a suctorial proboscis, the outer wings, or wing-covers, either entirely formed of a substance intermediate between the elytra of beetles and the ordinary membranous wings of most insects, or leathery at the base and transparent towards the tips (hemelytra). In one group (Aphides) all the wings when present are membranous. The true wings are straight and unplaited. Some feed on vegetable and some on animal juices. Those having the upper wings of a uniform substance throughout (whether leathery or transparent) have been constituted into a section, and by some naturalists into an order named Homoptera; those having them partly leathery and partly transparent constitute the section or order Heteroptera. The plant-lice, boat-fly, cochineal insect, locust, bug, lantern-fly, &c., belong to this order.

Hemipteral, Hemipterous (he-mip'tēr-al, he-mip'tēr-us), *a.* Belonging to the order Hemiptera; having the upper wings half crustaceous and half membranaceous.

Hemisphere (he-mi-sfēr), *n.* [Gr. *hēmi-sphairion*—*hēmi*, half, and *sphairion*, a globe.] 1. A half sphere; one half of a sphere or globe when divided by a plane passing, or regarded as passing, through its centre; half the terrestrial globe; half of the celestial globe, or half the surface of the heavens.—2. A map or projection of half the terrestrial or celestial sphere.—*Hemispheres of the brain*, the two parts which constitute the upper surface of the brain. See *BRAIN*.

Hemispheric, Hemispherical (he-mi-sfē-rik, he-mi-sfē-rik-al), *a.* Containing or pertaining to a hemisphere; as, a *hemispheric* figure or form; a *hemispherical* body. *Boyle*.

Hemispheroidal (he-mi-sfē-roid'al), *a.* Approaching to the figure of a hemisphere; having a figure resembling a hemisphere.

Hemispherule (he-mi-sfē'rūl), *n.* A half spherule.

Hemistich (he-mi-stik), *n.* [Gr. *hēmistichion*—*hēmi*, half, and *stichos*, a row, a line, a verse.] Half a poetic verse, or a verse not completed.

Hemistichal (he-mis'tik-al), *a.* Pertaining to or written in hemistichs; by, according to, or into hemistichs; as, an *hemistichal* division of a verse.

Hemitone (he-mi-tōn), *n.* [Prefix *hemi*, and Gr. *tonos*, a tone.] In *music*, same as *Semitone*, but seldom used.

Hemitrichous (he-mit'ri-kus), *a.* [Prefix *hemi*, and Gr. *trichos*, *trichos*, hair.] In *bot.* half covered with hairs.

Hemitropal, Hemitropous (he-mit'ro-pal, he-mit'ro-pus), *a.* [Prefix *hemi*, and Gr. *tropos*, a turn, from *trepō*, to turn.] 1. Turned half round; half-inverted.—2. In *bot.* applied to an ovule in which the axis of the nucleus is more curved than in an anatropal ovule.

Hemitrope (he-mi-trōp), *a.* [Prefix *hemi*, and Gr. *tropē*, a turning.] Half-turned; specifically, in *mineral.* applied to a crystal which has two similar parts or halves, one of which is turned half round upon the other.

Hemitrope (he-mi-trōp), *n.* [See *HEMITROPAL*.] 1. Anything hemitropal in structure. 2. In *crystal.* a twin-crystal.

Hemitropy (he-mit'ro-pi), *n.* In *crystal.* twin-composition in crystals.

Hemlock (hem'lok), *n.* [A. Sax. *hemleac*, *hymlic*—*hēm*, *hym*, of doubtful meaning, and *leac*, an herb. Comp. *garlic*, *charlock*, &c.] A poisonous plant, *Conium maculatum*, nat. order Umbelliferae, supposed to be identical with the *kōneion* (hemlock) of the Greeks. It is a tall, erect, branching biennial, with a smooth, shining, hollow stem, usually marked with purplish spots, elegant much-divided leaves, and white flowers in compound umbels of ten or more rays, surrounded by a general involucre of three to seven leaflets. It is found in Britain and throughout Europe and temperate Asia in waste places, banks, and under walls, and is said to be fatal to cows, but that horses, goats, and sheep may feed upon it without danger. The poison administered to Socrates is supposed to have been a decoction of it, though others are of opinion that

Hemlock (*Conium maculatum*).

the potion was obtained from water-hemlock (*Cicuta virosa*). Hemlock is a powerful sedative, and is used medicinally. The extract is considered the best preparation. It is often serviceable as a substitute for, or an accompaniment to opium. It has been found very useful in chronic rheumatism and in whooping-cough, in allaying the pain of irritable sores and cancerous ulcers. The virtues of hemlock reside in an alkaline principle termed *coni* or *conine*. See *CONIA*.—*Hemlock spruce*, an American fir (the *Abies canadensis*), so called from its branches resembling in tenacity and position the common hemlock.—*Water-hemlock*, *Cicuta virosa*.—*Hemlock water-dropwort*, *Eranthe crocata*.

Hemmel (hem'mel), *n.* [Comp. D. *hemel*, G. *himmel*, heaven, a canopy; formerly a covering.] A crowd or herd, as of cattle; a shed or hovel for cattle. [Local.]

Hemming, Himming (hem'ing, him'ing), *n.* A shoe or sandal made of raw hide.

Hemoptysis, Hemoptoe (hē-mop'ti-sis, hē-mop'tō-ē), *n.* Same as *Hæmoptysis* (which see).

Hemorrhage (hē-mor-āj), *n.* [Gr. *haimorrhagia*—*haima*, blood, and *rhēgnymi*, to break, to burst.] A discharge of blood from the blood-vessels.

Hemorrhagic (hē-mor-aj'ik), *a.* Pertaining to a flux of blood; consisting in hemorrhage.

Hemorrhagy† (hē-mor-aj-i), *n.* Hemorrhage. *Ray*.

Hemorrhoid† (hē-mor-oid), *n.* [See *HEMORRHOIDS*.] A venous worm or ser-

pent. 'The venomous worms called *hemorrhoids*.' *Holland.*

Hemorrhoidal (hē-mor-oid'al), *a.* Pertaining to the hemorrhoids; as, the *hemorrhoidal* vessels.

Hemorrhoids (hē-mor-oidz), *n. pl.* [Gr. *hai-morrhōis*, *hai-morrhōidos*, a gushing of blood—*haima*, blood, and *rhōos*, a flowing, from *rhēo*, to flow.] Painful tumours or tubercles, consisting of enlargements of the mucous membrane, formed in the rectum or around the anus, frequently accompanied by bleeding when at stool; piles; in *Scip.* emeralds. See **PILES**.

Hemp (hemp), *n.* [A. Sax. *henepe*, *hanep*, Comp. D. *hennep*, Dan. *hannp*, Icel. *hannp*, G. *hanf*, and the cog. words, Armor. *canab*, Ir. *cannaib*, *canab*, Lith. *kanape*, L. *cannabis*, Gr. *kannabis*, Per. *kani*, Skr. *cana*, hemp.] 1. A plant of the genus *Cannabis*, nat. order Cannabinaceæ. *C. sativa* being the only known species. It is an annual herbaceous plant, the fibre of which constitutes the hemp of commerce. It is a native of Western and Central Asia, but has been long naturalized in Brazil and tropical Africa, and is extensively cultivated in Italy and many other countries of Europe, particularly Russia and Poland. Its fibres are tough and strong, and peculiarly adapted for weaving into coarse fabrics such as sail-cloth, and twisting into ropes and cables. Immense quantities are imported into this country from Russia for the use of the navy. The Indian variety, often known as *Cannabis indica*, is the source of the narcotic drug *bhang* or *hashish*. (See **BHANG**.) The plants of the genus *Sansevieria* are known by the name of *booster-hemp* (which see).—2. The skin or rind of the plant prepared for spinning. 3. A cant term for a rope and for hanging.

Hemp (*Cannabis sativa*).

Hemp-agrimony (hemp-ag-ri-mun-ni), *n.* A plant, *Eupatorium cannabinum*. See **EUPATORIUM**.

Hempen (hemp'n), *a.* Made of hemp; as, a *hempen* cord.—*Hempen* collar, *hempen* caudle, the noose of the hangman's rope placed round the neck.

Ye shall have a *hempen* caudle then, and the help of a hatchet. *Shak.*

Hempie (hemp'i), *n.* One for whom the hemp grows; a rogue; commonly applied in a jocular way to a giddy young person of either sex. [Scotch.]

Hempie (hemp'i), *a.* Roguish; riotous; romping. [Scotch.]

I was a daff *hempie* lassie then, and little thought what was to come o't. *Sir W. Scott.*

Hemp-nettle (hemp'net-l), *n.* The English name for *Galeopsis* (which see).

Hemp-palm (hemp'palm), *n.* A Chinese and Japanese species of palm (*Chameroops excelsa*), of the fibres of whose leaves cordage is made, while hats and even cloaks are made from the leaves themselves.

Hemp-seed (hemp'sēd), *n.* The seed of hemp.

Hempy (hemp'i), *a.* Like hemp. 'A cotton, or hempy kind of moss.' *Howell.* [Rare.]

Hemself, **Hemselve**, **Hemselven**, *pron. pl.* Themselves. *Chaucer.*

Hemstitch (hem'stich), *n.* A peculiar kind of stitch made by drawing out a few parallel threads and fastening the cross threads in successive small clusers.

Hemstitch (hem'stich), *v. t.* To ornament by hemstitch.

Hemuse (hēmūz), *n.* The roe in its third year.

Hen (hen), *n.* [A. Sax. *hen*, *henne*, a word common to the Teutonic languages; comp. D. *hen*, Icel. *henna*, G. *henne*, *hen*—the feminines corresponding to A. Sax. and Goth. *hana*, D. *haan*, G. *hahn*, Icel. *hani*, a cock. The word for cock in these languages is generally regarded as signifying the crier, the singer, and connected with L. *cano*, to sing.] The female of any kind of bird; especially, the female of the domestic or barn-yard fowl. There are numerous varieties of the domestic hen, British and foreign, some valued for their laying qualities, some for their fattening, as the Dorking, game, Hamburg,

Spanish, Cochinchina, &c. It is often prefixed to the names of birds to express the female as *hen*-canary, *hen*-sparrow, &c.—*Hen-and-chickens*, a variety of the daisy, in which numerous smaller heads of flowers proceed from the leaves of the involucre, and surround the large central head.

Henbane (hen'bān), *n.* [*Hen* and *bane*.] A plant of the genus *Hyoscyamus*, nat. order

Henbane (*Hyoscyamus niger*).

Solanaceæ. The only British species is *H. niger*, a native of Europe and Northern Asia. It is a coarse erect biennial herb, found in waste ground and loose dry soil, having soft, clammy, hairy foliage of disagreeable odour, pale yellowish-brown flowers streaked with purple veins, and a five-toothed calyx. The expressed juice of the leaves and seeds is often used as a sedative, antispasmodic, and narcotic, having in many cases the great advantage over laudanum of not producing constipation. When taken in any considerable quantity it proves quickly fatal to man and most animals, and is particularly destructive to domestic fowls, hence the name. Swine are said to eat it with impunity. Called also *Stinking Nightshade*.

Henbit (hen'bit), *n.* A name applied to *Lamium amplexicaule*, an ugly weed.

Hen-blindness (hen'blind-nes), *n.* Nyctalopia or night-blindness.

Hen-buckie (hen'buk-i), *n.* A provincial Scotch name for the large whelks (*Buccinum undatum*), much used as a bait for fish.

Hen-cavey (hen'kāv-i), *n.* Hen-coop. [Scotch.]

Hence (hens), *adv.* [O.E. *hennes*, *hens*; A. Sax. *heonan*, *heona*, hence; Sc. *hine*, hence; G. *hin*; O.G. and Goth. *hina*, hence. *Hence* is composed of the pronominal element seen in *he*, *here*, &c., as stem and two suffixes—(a) *n*, originally perhaps the locative of the demonstrative stem, and (b) *ce*=*es*, the sign of the genitive. The form *hennes* (hence) was supplanting older *heonne* in the fourteenth century.] 1. From this place.

Arise, let us go *hence*. *Jn. xiv. 23.*

2. From this time; in the future; as, a week *hence*. 'A year *hence*.' *Locke*.—3. From this cause or reason, as a consequence, inference, or deduction from something just before stated.

Hence perhaps it is, that Solomon calls the fear of the Lord the beginning of wisdom. *Tillotson.*

4. From this source or original.

All other faces borrowed *hence* *Suckling*.
Their light and grace.

—*Hence* is often used elliptically by writers for to go hence; to depart hence; most commonly in commands or entreaties, when it is equal to away! begone!

Early to-morrow will we rise, and *hence*. *Shak.*
Hence with your little ones! *Shak.*

Hence (hens), *v. t.* To send away; to despatch. 'His dog he *henced*.' *Sir P. Sidney.*
